#90294u0121 10/21/1990 ~United Press International

OAKLAND, CA (OCT. 21) UPI - Any effective machine continues to thrive with replacement parts. With that in mind, the Cincinnati Reds showed Saturday night they are worthy successor to the Big Red Machine.

Outfielders Eric Davis and Billy Hatcher left Game 4 of the World Series with first-inning injuries, and the Reds did sputter a bit. But Jose Rijo kept Cincinnati close, and a two-run rally in the eighth produced a 2-1 victory that culminated an astonishing sweep of the Oakland Athletics.

''We've overcome obstacles all year,'' third baseman Chris Sabo said. ''We have no MVP or Cy Young. We're a team. Everyone's done their job. We've won without guys all year.''

Herm Winningham and Glenn Braggs, the replacements for the injured outfielders played vital roles in the eighth as the Reds won their first Series title since the days of the original Big Red Machine in 1976.

Barry Larkin opened with a single off starter Dave Stewart and Winningham, trying to sacrifice, beat out a bunt. Paul O'Neill also bunted and was safe when first-base umpire Randy Marsh ruled Stewart's throw had pulled Willie Randolph off the bag at first. Replays seemed to indicate otherwise.

Braggs then bounced into a force play at second as Larkin scored to tie it. Hal Morris, who grounded into an inning-ending double play in the sixth with the bases loaded, then lifted a sacrifice fly to send home Winningham with the go-ahead run.

Rijo, who pitched seven shutout innings to win Game 1, was masterful after allowing a double to Willie McGee and an RBI single to Carney Lansford in the first. Those were the only hits he would allow.

The Series Most Valuable Player did not permit a baserunner after Rickey Henderson walked with two out in the second. He retired the final 20 batters he faced.

''My slider was really working, and I kept throwing sliders until they proved to me they could hit it,'' said Rijo, who struck out nine. ''They couldn't.''

After Rijo fanned Dave Henderson to open the ninth, Randy Myers relieved and got pinch-hitter Jose Canseco - who was benched before the game in a lineup shakeup - on a slow roller to third.

Lansford then fouled out to first baseman Todd Benzinger for the final out, triggering a Cincinnati celebration.

Davis suffered bruised ribs and possible kidney damage when he landed on his right side diving for McGee's double. Hatcher, who went 9 for 12 in the Series also left with a severe bruise after being hit in the left hand with a Stewart pitch in the top of the inning.

Both players remained in the game briefly after being hurt, but soon were taken to Merritt Hospital for X-rays and evaluation.

Cincinnati Manager Lou Piniella said Davis would not have been able to play again in the Series. Hatcher's X-rays were negative, but it was uncertain if he would have been able to suit up again.

Asked what he thought after seeing his two outfielders go down, Piniella said: ''I thought I was going to activate myself before the game was over.''

Stewart allowed just seven hits but lost to Rijo for the second time in the Series.

The sweep established Oakland as one of history's great underachievers. Over the last three seasons, the A's have won a big- league best 306 games and three pennants, yet have only one Series title to show for it.

Oakland, which lost to the Dodgers in five games in 1988 and dominated San Francisco last year, is the first team to sweep the Series one year and get swept the next.

History will show the A's deserve straight F's for their performance against Cincinnati. They scored just eight runs, none after the fourth inning in any game, and were 3 for 27 with runners in scoring position. Their four straight losses matched their longest losing streak all year.

The Reds, who have won their last nine Series games beginning with Game 7 in 1975, had the bases loaded in the sixth with one out, but Stewart got Morris to bounce into a 4-6-3 double play.

In the seventh, Sabo led off with a double off the left-center field wall - the ball struck inches short of clearing the fence - for his third straight hit of the game and eighth in his last 10 at-bats.

Sabo moved to third on Benzinger's groundout, but Stewart was sturdy once more fanning Joe Oliver and getting Mariano Duncan on a fly to center.

Oakland took a 1-0 lead in the first. After Davis failed to hold on to McGee's one-out double, Harold Baines was walked intentionally and Lansford followed with his two-out RBI single up the middle.

La Russa shuffled his lineup before the game, replacing slumping starters Canseco and Terry Steinbach with right fielder McGee and catcher Jamie Quirk. In the end, it didn't help.

#90294u0156 10/21/1990 ~United Press International
(OCT. 21) UPI - President Bush says he'll start the new week Monday by vetoing major civil rights legislation... unless Congress accepts his revisions. Bush sent his own plan to Capitol Hill Saturday night, saying it fixes what he calls ''critical defects'' in the congressional bill that Bush says would lead to hiring quotas.

House Speaker Thomas Foley says he does NOT think a House deficit- reduction bill will survive negotiations on Capitol Hill ''intact.'' The Washington lawmaker says he believes the final bill will incorporate both the House and Senate versions. A stop-gap measure keeping the government funded expires Wednesday.

Canada is the latest nation to succumb to Iraqi pressure in Kuwait. The Canadian government pulled its diplomats out of occupied Kuwait Saturday, saying the embassy has run out of food. The U-S embassy is one of a handful of foreign compounds that remain open in Kuwait in defiance of Iraqi orders to close.

Doctors, nurses and paramedics were busy Saturday night at the Dallas Cotton Bowl. Officials say between 50 and 75 people were treated after collapsing from heat exhaustion while waiting for a concert by the rock group Z-Z Top. More than 70-thousand people waited as long as seven hours without water.

Officials in Sierra Leone are worried that a cholera outbreak might be imminent in the capital of Freetown... with Saturday's arrival of hundreds of refugees from strife-torn Liberia. Those fleeing Liberia's civil war said 25 people died during the long boat ride from Monrovia.

Firefighters from six communities were sent to the scene of a fire in Dover, New Hampshire... but rescuers were NOT able to save three children who died in the flames. Officials suspect a cigarette left in the first-floor kitchen started the blaze that also injured four adults and another child.

-30- 2009
#90294u0165 10/21/1990 ~United Press International
(OCT. 21) UPI - Canada became the latest nation to succumb to Iraqi pressure and pull its diplomats out of Kuwait, and a senior U.S. official warned that pro-Iraqi terrorists were planning attacks.

In another development, The Washington Post reported Sunday Iraqi military forces are beginning to learn how to operate sophisticated U.S. Hawk anti-aircraft missiles and radars that were captured in Kuwait.

The Post said the Iraqis had captured about 150 of the highly accurate missiles and that they could pose a substantial threat to U.S. and allied military aircraft.

A Bush administration official, speaking on the condition of anonymity, said highly disciplined terrorist teams have been brought to Baghdad and are preparing for action, possibly on Arab leaders friendly to the United States.

The senior official emphasized that President Bush and Secretary of State James Baker will hold Iraq responsible for any attack. In testimony last week on Capitol Hill, Baker said the use of military force by the United States against Iraq is likely if Americans are harmed or exposed to extreme danger.

Defense Secretary Dick Cheney said during a visit to France that he believed economic sanctions imposed by the United Nations following Iraq's Aug. 2 invasion of Kuwait were beginning to have an effect as evidenced by Iraqi President Saddam Hussein's decision Friday to ration gasoline.

''We also are hopeful that we will be able to achieve our objective peacefully '' he said in Paris.

Thousands of people marched through Paris Saturday to protest the prospect of war in the gulf in a rally sponsored by leftist parties.

Egypt's semi-official Middle East News Agency quoted Canadian External Affairs Minister Joe Clark as saying Canada would not officially close its embassy in Kuwait, but would withdraw all of its personnel.

The move Saturday leaves only a handful of foreign missions, including that of the United States, open in occupied Kuwait in defiance of Iraqi orders to relocate to Baghdad. Iraqi soldiers have surrounded the embassies and cut off their supplies of water and electricity.

Clark said the Canadian diplomats were leaving because they had run out of food.

MENA quoted informed sources Saturday as saying Kuwaiti resistance fighters freed 70 prisoners in Safwan on the Iraqi-Kuwaiti border during a fight last week.

The sources, who escaped to Amman, told the news agency that eight Kuwaiti fighters died in the clash and claimed 30 Iraqi soldiers were killed.

The Kuwaiti resistance has issued numerous reports about raids and attacks on Iraqi occupational forces that can not be confirmed, but they have sometimes backed their claims with photographs of smoldering Iraqi vehicles and dead soldiers.

The news agency said exiled Kuwaiti emir Sheikh Jaber al-Ahmed al- Sabah would travel to Paris to hold discussions with French President Francois Mitterrand, whose gulf peace proposal has been widely praised. The plan calls for an Iraqi withdrawal from Kuwait followed by free elections, which the ruling al-Sabah family has opposed.

Sources told the news agency Mitterrand would seek to assure al-Sabah that the plan did not call for his ouster from power.

One member of the family, poet Saad al-Sabah, told reporters in Cairo that Iraqi authorities had told some family members they would be richly rewarded if they remained in Kuwait and accepted the ouster of Sheikh Jaber.

Saad al-Sabah said the family members refused the offer.

Former British Conservative Prime Minister Edward Heath arrived in Baghdad Saturday on a self-styled mission to persuade Iraq to free elderly and sick British hostages.

Some British lawmakers have criticized Heath, saying Saddam will use him for propaganda purposes. Iraqi authorities were quoted by MENA as saying Heath was a guest of Iraq, and not the British Embassy in Baghdad.

Saddam is holding hundreds of Western men hostage at key military and economic sites as insurance the Western forces in the gulf will not attack. Western hostages from several countries have been released in recent days - including four Germans Saturday - as so-called gestures of good will.

Germany and Italy sent messages to their nationals in Iraq Saturday pledging they were doing what they could to win their release.

KUALA LUMPUR, Malaysia (OCT. 21) UPI - Prime Minister Mahathir Mohamad joined voters throughout Malaysia Sunday casting ballots in the country's eighth general election, with Mahathir battling an opposition alliance for political supremacy.

After 10 days of campaigning, the 65-year-old Mahathir seeking a third, five-year term said he is hopeful of retaining a two-thirds majority in Parliament despite the unexpected defection of the major Christian party from his camp.

''We have made the assessment,'' Mahathir said. ''God willing, it will happen.''

Polling was confined Saturday to the remote eastern states of Sabah and Sarawak and spread to the rest of the nation Sunday, where an electorate of 8 million withstood light rain and long lines to vote for candidates vying over 180 parliamentary seats and 351 seats in 11 state assemblies.

Election commission officials expected the first results to be available at 8:30 p.m. as a result of a new system enabling the votes to be counted faster than in the past.

Mahathir, challenged by opposition candidate Sudin Wahab for the Kubang Pasu parliamentary seat, was considered a certain victor based on the country's bouyant economic growth and relatively low inflation. With Malaysia regarded as the latest newly industrialized country in Asia, analysts expected a Mahathir victory.

But the defection last week of the Parti Bersatu Sabah (PBS) from Mahathir's National Front coalition government to the opposition Spirit of '46 left him nervous over the possibility of losing his two-thirds parliamentary majin.

''There will be no problem if we are returned with a big majority,'' Mahathir said. ''If we win with a majority of one or two seats, surely it will be difficult.''

Mahathir's United Malays National Organization (UMNO), the dominant party in the Moslem country, is fielding 86 out of the 412 parliamentary candidates. Of the six opposition parties which have formed a pact against Mahathir, the Spirit of '46 has 61 members contenting parliamentary races.

Fifty percent of the electorate are Malays, 33 percent Chinese, 10 percent Indian and the remainder consist of other ethnic groups.

In rural areas, makeshift voting booths were constructed in schools, community halls coconut processing centers and sheds while helicopters and more than 1,000 boats ferried farmers, livestock breeders, housewives, hunters and fishermen without any other transportation.

The major parties in urban areas had extra cars available to transport voters to polling centers.

It was the first time since Malaysia gained independence from Britain in 1957 that an alliance of opposition parties has been formed to challenge the National Front.

#90294u0241 10/21/1990 ~United Press International

BEIJING (OCT. 21) UPI - Aftershocks again rocked a remote area of western China Sunday, where at least one person died and large numbers of homes collapsed in a strong earthquake, officials and news reports said.

The quake measuring 6.2 on the Richter scale rumbled through the center of Gansu Province on Saturday afternoon, followed by a strong aftershock measuring 5.1 on the Richter and several moderate aftershocks.

The State Seismological Bureau in Beijing reported one person had been killed and at least two injured. But the toll was expected to rise as reports came in

from the hilly, sparsely populated region 75 miles north of the provincial capital, Lanzhou.

Officials said aftershocks continued, with a total of six measuring above a magnitude of 3 on the Richter scale recorded by Sunday morning in the worst affected area, a Tibetan ethnic region around the county towns of Tianzhu, Jingtai and Gulang.

The official Xinhua news agency reported 30 percent of the dwellings at the epicenter had collapsed.

#90294u0246 10/21/1990 ~United Press International

BEIRUT, Lebanon (OCT. 21) UPI - Gunmen Sunday burst into the residence of a staunch supporter of ousted Christian Gen. Michel Aoun and fatally shot him along with his wife and one of his two sons, officials said.

''Gunmen broke into the house of Dany Chamoun at 6:30 a.m. and shot him dead along with his wife and son,'' Marwan Hamadeh, a former Druze Moslem Minister, told United Press International.

Witnesses, who requested anonymity, said the unidentified gunmen opened fire on Chamoun after they knocked on the door of his fifth floor apartment as he appeared in his pajamas.

Chamoun, son of former Christian Maronite President Camille Chamoun, supported Aoun in a ''war of liberation'' against the Syrians last year and recent military campaign against the Christian Lebanese Forces militia of Samir Geagea.

Police said Chamoun, 54, his wife Ingrid, in her late 40s, and 6- year-old son Tarek were instantly killed. His second son Jerome, 7, was badly injured and transported to Sacre Coeur Hospital in east Beirut.

Lebanese troops loyal to Syrian-backed army commander Gen. Emile Lahoud cordoned off Dany's residence in the Syrian-policed Christian district of Baabda, east of Beirut, witnesses said.

The witnesses said the soldiers barred journalists from approaching the multi-storey building where Chamoun's family lived.

''I think this incident is designed to stir trouble and inter- communal discords,'' Hamadeh said in a telephone interview.

The killing came amid reports that Syrian forces had executed scores of Aoun's soldiers after the Christian strongman gave up last week.

The Frensh newspaper Le Monde in a report published Saturday said Syrian troops killed 14 civilians in the Christian village of Bsouss, 7 miles east of Beirut. The report could not be confirmed independently.

Aoun's two-year rebellion against the government of President Elias Hrawi ended last week when Syrian troops joined Lebanese forces to oust him from the presidential palace at Baabda.

Aoun has been holed up since then in the French embassy awaiting a decision on whether he will be allowed to leave the country.

Chamoun's father, who was president in 1958, called for U.S. military intervention that year during a conflict with the Moslem camp that was backed by the late Egyptian President Jamal Abdul Nasser.

#90294u0250 10/21/1990 ~United Press International

COLOMBO, Sri Lanka (OCT. 21) UPI - Security forces seized control of a separatist Tamil rebel stronghold in northern Sri Lanka following an eight-hour battle that left 20 guerrillas and three soldiers dead, a senior government official said Sunday.

The official said the encounter occurred Saturday on the northern Jaffna peninsula at the town of Mavaddipuram, which had been a base for the Liberation Tigers of Tamil Eelam in their war against the governemnt.

The Tigers used Mavaddipuram as a staging area for repeated attacks on the nearby Kankesanthurai military garrison, the official said.

The clash between security forces and Tiger rebels lasted for eight hours Saturday and 20 rebels died in the fighting, the official said.

''There was heavy enemy resistance,'' the official said. ''However, we were able to overcome it. Three soldiers were killed and 15 received minor injuries.''

Security forces also destroyed a fleet of rebel vehicles during the battle, the official said.

No further details were immediately available.

Security forces have been conducting operations to establish greater military influence in the peninsula, which is largely controlled by the Tigers.

Fighting between security forces and the Tamil Tigers erupted in mid- June after rebels staged four simultaneous attacks on military bases in eastern Sri Lanka.

Since then, more than 2,600 soldiers, rebels and civilians have been killed in the fighting.

Tiger rebels are fighting to establish an independent Tamil homeland in the northern and eastern provinces.

They believe that Sri Lanka's minority Tamils, who are mostly Hindu, need a separate nation because of years of alleged discrimination by the predominantly-Buddhist Sinhalese, who control the Colombo government.

Sri Lanka battled a number of Tamil militant groups from 1983 until 1987 when Colombo tried to end the violence by signing a peace accord with New Delhi.

Under the terms of the agreement, India sent thousands of peace- keeping troops to Sri Lanka to maintain law and order and to supervise the surrender of weapons by militant groups who agreed to lay down their arms in exchange for greater autonomy in Tamil areas.

Only the Tamil Tigers refused to participate in the process and the development led to war between the rebel group and the Indian army.

India failed to defeat the Tigers and earlier this year withdrew the last of its forces, leaving behind a fragile peace between the rebels and the Sri Lankan government.

Diplomatic observers said they believed the Tigers and the government would settle their differences without resorting to violence, but the peace was shattered in June when the rebels attacked the military camps.

#90294u0251 10/21/1990 ~United Press International

TOKYO (OCT. 21) UPI - A mental patient swinging a fruit knife assaulted and inflicted serious injuries to a former labor minister at a military base in western Japan Sunday, police said.

Hyosuke Niwa, 78, was attacked by a 47-year-old mental patient while attending a ceremony marking the founding of the Moriyama garrison base of the Ground Self-Defense Force in Nagoya, about 175 miles southwest of Tokyo, police said.

They said Niwa, a member of the ruling Liberal Democratic Party, was stabbed in the neck and taken to a nearby hospital. He was reported to be in a coma.

''The 47-year-old assailant was arrested on the spot and is under questioning '' said a spokesman for the Aichi Prefectural (state) Police Headquarters in Nagoya, about 175 miles southwest of Tokyo.

''He (Niwa) suffered two wounds about 3 inches deep in the back side of his neck and below the right jaw. He remains in a coma,'' said Sadahiro Yamamoto, head of the Aichi University hospital.

Yamamoto said Niwa's heart stopped beating temporarily after he was taken to the hospital, and emergency operation to rejoin a severed artery was performed.

The assailant, who police said has been hospitalized for a mental disease, was arrested on the spot and detained on charges of attempted murder, police said.

The attacker's name was withheld on grounds he is a mental patient.

Niwa, a native of Aichi Prefecture (state), is a close associate of Prime Minister Kaifu. Both Niwa and Kaifu belong to the same intra-party faction and are elected to the lower house of parliament from Aichi Prefecture.

Niwa was first elected in 1955 and has since been returned to the chamber 12 times. He served as labor minister under former Prime Minister Noboru Takeshita in 1988.

-30- 1947

#90294u0254 10/21/1990 ~United Press International

JERUSALEM (OCT. 21) UPI - A West Bank Arab armed with a bayonet stabbed to death three Israelis in a quiet Jewish neighborhood Sunday in the worst attack on Jews in Jerusalem since the start of the nearly 3-year-old Palestinian uprising, police said.

A suspect was in custody. Army Radio reported he was a religious Moslem intent on revenging the killings of at least 20 Arabs during riots on the Temple Mount nearly two weeks ago. The suspect, whose name was not made public, was employed as a construction worker in the Baka area, police said.

Authorities called for restraint and immediately reinforced patrols in Jerusalem to prevent revenge attacks on Arabs. Police arrested an Israeli carrying a Molotov cocktail and dispersed crowds of Jewish youths who gathered on a main road used by Palestinians from the occupied West Bank.

The attack occurred nearly two weeks after aat least 20 Arabs were killed by police during riots on the Temple Mount, fueling speculation that the stabbings were motivated by revenge.

Witnesses said the Arab suspect, a 19-year-old from Ubeidiya village, carried a bayonet from a Kalashnikov rifle and shouted ''God is great'' and ''Kill the Jews'' in Arabic as he pursued his victims in the affluent, middle-class Baka neighborhood.

The assailant first stabbed an 18-year-old female soldier as she returned from

a neighborhood grocery store at about 6:45 a.m. He then ran to an adjoining street where he stabbed the 13-year-old and killed a 43-year-old civilian man, Jerusalem Police Chief Aryeh Bibi told a news conference.

''At about 7 o'clock an Arab come in front of my house. He knifed a girl. He shouted 'God is great, God is great' and then ran away,'' David Ben Shimon, a Baka resident, told Army Radio.

A 28-year-old cadet from a police anti-terrorism unit who lived in the area heard the cries, ran after the suspect and first tried to talk with him.

''The officer shot in the air several times while the Arab ran toward him shouting 'God is great,''' Bibi said. The suspect was shot in both legs, but managed to stab the cadet and kill him.

Ben Shimon told the radio he and others overpowered and disarmed the Arab. Police arrived a short time later.

Crowds of Jews, chanting ''death to Arabs,'' quickly gathered in the area and tried to set ablaze the car of an Arab they believed was trying to run them down, Israel Radio reported. They poured gasoline on the car, but police stopped them from lighting it.

Police immediately escorted Arab workers out of the area to prevent revenge attacks on them.

Bibi told Army Radio police patrols had been increased to prevent a repetition of attacks by Israelis on Arabs that occurred after two Israeli youths were found murdered in August.

''I call upon all citizens to behave with restraint and to let the police do their job,'' he said.

Politicians across the political spectrum condemned the attack, with several right-wing parties calling for tougher measures against Palestinians. The Tzomet Party called on the security forces to stop using ''a velvet glove'' against Arabs.

''We have to shoot in order to kill,'' the right-wing party said in a statement.

The right-wing National Religious Party charged the killings were a challenge to the existence of Israel.

''The murders in Jerusalem teach us that the struggle is not about this or that territory, but about the sovereignty of Israel as the state of the Jews '' NRP said.

Amnon Rubenstein of the center-left Shinui Party called on Israeli and Palestinian leaders to condemn the killings and prevent the circle of bloodshed from continuing.

#90294u0258 10/21/1990 ~United Press International

TOKYO (OCT. 21) UPI - About 23,000 leftists and pacifists demonstrated peacefully outside the U.S. Forces Japan headquarters near Tokyo Sunday, protesting the government's plan to dispatch Japanese troops to assist U.S.-led multinational forces in the Middle East, organizers said.

''We must oppose this effort to send the Self-Defense Force overseas under the attractive name of peace,'' Takako Doi, chairwoman of Japan's major opposition Socialist Party, told the protesters.

She urged the participants to join forces to ''crush the law'' up for debate in the Diet, Japan's parliament.

The demonstrators joined hands to form a human chain enclosing the U.S. military headquarters in Fussa on the western outskirts of Tokyo.

Police said the demonstration was peaceful and there were no arrests.

The organizers said similar demonstrations were held in Tokyo and other parts of the nation.

The demonstration outside the U.S. facility was part of a nationwide program organizated by opposition political parties and pacifist groups to oppose the bill introduced by the government of Prime Minister Toshiki Kaifu.

''Bonds of trust with other nations cannot be forged if Japan simply stands idly,'' Kaifu told a parliamentary session. ''It is crucial that Japan be able to cooperate effectively ... in terms of personnel and material.''

Japan has pledged a total of $4 billion to assist U.S. peace-keeping efforts and help countries in the Middle East suffering from U.N. economic sanctions against Iraq.

In Tokyo, about 15,000 people attended a rally and adopted a resolution, denouncing Iraqi aggression and annexation of neighboring Kuwait, opposing the dispatch of Japanese troops overseas and calling for the abolition of the U.S.-Japan security treaty.

Kaifu's ruling Liberal Democratic Party holds a commanding majority in the powerful lower house of the Diet but opposition parties dominate the upper house.

The bill has to be cleared by both chambers for its enactment.

Recent newspaper polls showed that nearly half of the Japanese people are opposed to the government's bill.

#90294u0261 10/21/1990 ~United Press International

BANGKOK (OCT. 21) UPI - Khmer Rouge guerrillas derailed a train with mines and attacked passengers with shotguns, killing 50 people, official Phnom Penh radio reported.

The radio, in a broadcast Saturday night, said the attack and similar guerrilla actions around the country showed that the Khmer Rouge were only pretending to seek peace.

''On Oct. 17 a group of Polpotists (followers of Khmer Rouge leader Pol Pot) attacked a convoy of trains with land mines and shotguns in an area 15 kilometers (9 miles) east of Prey Nop district in Kompong Som, derailing the train and causing the death of 50 people,'' the radio said.

The attack occurred on the rail line between Kompong Som, the country's only deep water port, and Phnom Penh, about 100 miles south of the capital.

It was the second time that rail line - the main route for military and civilian supplies from the port - had been attacked in the past three months.

Resistance officers have said they are focusing on cutting off Soviet supplies of munitions to the Vietnamese-installed government and cutting transport routes to the outlying provinces.

''This is the cruel and barbarous nature of the gang stained with the people's blood, which has attempted to resolve the Cambodian problem via military means '' the radio said.

''This is also clear evidence that the traitorous Pol Pot gang has no goodwill to settle the Cambodian problem in the least,'' it said.

Both the resistance and the Phnom Penh government have said they accepted in principle the peace framework outlined by the United Nations but they have differed sharply over the details of implementing the peace plan.

The radio called on the United Nations and the five permanent members of the Security Council to take preventive measures against the Khmer Rouge, the most powerful of the three groups in the U.N.-recognized resistance coalition.

The Khmer Rouge government, blamed for the deaths of more than 1 million people during its 1975-1979 rule, was ousted by a Vietnamese invasion which

put the current government in power.

#90294u0264 10/21/1990 ~United Press International
(OCT. 21) UPI - Around the world, around the clock, the latest news from U-P-I...

Taxes remain the troublesome issue as negotiators try to hammer out a deficit-cutting agreement in Washington. Congressional leaders and White House officials are trying to blend elements of House and Senate versions before the government once again runs out of money. A stop-gap measure expires Wednesday.

Thousands of peace activists rallied in 19 cities around the nation Saturday. Protesters marched and chanted anti-war slogans in cities that included New York, San Francisco, Atlanta and Madison Wisconsin. Ron Kovic- the man who inspired the movie ''Born on the Fourth of July'' spoke in Los Angeles.

New York City detectives are looking into what are described as ''an awful lot of similarities'' between the death of a 10-year-old girl and three other people, two of them children. Jessica Guzman is the most recent child found dead in the Bronx in an area where two other children were also found slain.

Hollywood has lost one of its classic Western stars. Actor Joel McCrea died Saturday in Los Angeles of pulmonary complications at 84. McCrea did NOT just play a cowboy on the screen, it was also one of his favorite real life roles. McCrea was elected to the Cowboy Hall of Fame in Oklahoma City.

Police in Tokyo say a former labor minister is hospitalized in serious condition after an attacked by a mental patient swinging a fruit knife. Officials say the patient assaulted the former government official during a ceremony at a military base in Western Japan.

A newspaper poll says people in northern New Jersey are less inclined these days to cross the Hudson River for a visit to New York City. Nearly half the adults who answered the survey said they fear becoming a crime statistic. The respondents also citied New York traffic and high prices as reasons to stay home.

SAN FRANCISCO (OCT. 21) UPI - The Communist Party U.S.A., a Marxist stepchild whose parents moved without leaving a forwarding address, is becoming more like the dispossesed and homeless it claims to represent.

Increasingly alone as wayward uncles in Hungary, Romania, and finally Soviet Russia itself stray from the house of ideology built by Lenin and Marx, the

CPUSA finds itself struggling to identify goals for today's communist.

''We have grown. We're not a hidebound thing,'' spokesman Jim West said from CPUSA headquarters in New York City. ''We have evolved. We have matured. We believe in a democratic human socialism.''

But Richard Starr, editor of the Yearbook on International Communist Affairs, contended that the party is shrinking. U.S. communists are confused by the reform movement sweeping the Soviet Union toward a capitalist society. The overall collapse of communism in Eastern Europe and the recent bloody events in China and Romania leave them aghast.

''In the United States, it seems to me that what's going on is that they are shriveling, so to speak,'' said Starr, who edits the yearbook for the Hoover Institution, a Stanford University think-tank specializing in global politics.

The governmental collapses in Eastern Europe and the flagging economic outlook of communist Third World nations have some political experts singing the death song for the communist system of government.

But CPUSA members disagree.

''I think ... pronouncement of the death of communism is long before it's true '' said Kendra Alexander, chairperson of the Communist Party in northern California. ''My personal opinion is that this drama is far from over.''

''There's no question,'' Alexander adds, that events in Eastern Europe have had a ''tremendous imppcc yngwfxx. ynppfxx. ynxhfxx. ynpwfxx. m. to naa r abc-communists:1215ped sked 20-21

ALIQUIPPA, PA (OCT. 21) UPI - Five years ago, Wieland Mueller cried when he saw pictures his mother had recently taken of his boyhood home in Strehla-Elbe Germany.

''I cried because it's almost like I remember it,'' Mueller said, not having seen the home since the Russian army confiscated the mansion home in the 1940s when he was but 9 years old.

Mueller, 54, an engineer for National Cash Register in Hopewell Township, is hoping a program offered by a reunified Germany will somehow compensate him for his loss. He is asking for compensation under a program for former East Germans who lost real estate and ther personal property because of Nazi discrimination in 1933 and until the Communist takeover in 1949.

''It would be nice to be reimbursed,'' Mueller said recently, ''but I don't put too much hope in it.''

Mueller left West Germany in 1962 and hasn't been to Strehla-Elbe since 1947. His family lived in the mansion that had been handed down through the family of his mother.

But the family was forced to flee to Bavaria in May 1945 when the Russian army took over the home as its headquarters as it advanced into southern Germany. Mueller's father, the regional welfare secretary for the Nazi Party, was taken as a prisoner of war.

The family, minus the father, returned to Strehla-Elbe briefly in 1947 but soon went back to Bavaria, Mueller said.

''We were ostracized. My father was a high-ranking Nazi.''

Mueller eventually got a mechanic's apprenticeship with NCR in Augsburg at age 16, later earned an engineering degree and transferred to NCR's Dayton, Ohio, office in 1962.

Mueller says he is not planning his future around a windfall from his former homestead, which now is used as a kindergarten.

''If there is any claim, we will not displace anyone who is there now,'' he said. ''I thought until very recently (the home) was gone forever. It would be a bonus if we were reimbursed, an unexpected thing.''

#90294u0368 10/21/1990 ~United Press International

MIAMI (OCT. 21) UPI - Imprisoned Panamanian Gen. Manuel Noriega is awaiting trial in a three-room ''dictator's suite'' furnished with a color TV, an exercise bike, a private shower, an IBM computer and a paper shredder.

A Sunday report in The Miami Herald said Noriega's suite at the Metropolitan Correctional Center also has a telephone, an executive's desk, a conference table, six chairs and two safes with alarm systems.

In the evening, while the other 1,232 prisoners are locked in their cells, guards accompany Noriega on a stroll of the prison grounds, walking among the ficus trees on a lakeside pathway. Sometimes hecklers peek out and shout, ''Sissy.''

''Tennis at 11, tea at 3,'' Noriega joked one day to defense attorney Jon May.

Noriega, awaiting a 1991 trial on cocaine charges, leads a comfortable but isolated life in the suburban prison 24 miles southwest of Miami, his lawyers said.

''The general doesn't complain about anything,'' said May.

Noriega, Inmate No. 41586, has a cell-bedroom, a conference room and an office. Defense attroney Richard Sharpstein, who represents a co- defendant, dubbed it the ''Dictator's Suite.''

Frank Rubino, another of Noriega's attorneys, said the office equipment is used by the lawyers to help prepare Noriega's defense.

''He's entitled to it because of his confinement. The general couldn't come to

my office,'' Rubino said.

But Noriega can't open the safes, which contain secret documents, because he doesn't have the combination, Rubino said.

Noriega is allowed to roam freely around the cell, but he is monitored by a closed-circuit camera and his phone calls are also monitored.

He has a window, but no view. The government erected a brick wall 3 inches in front of his window for security.

The United States government will not discuss the price tag for the deposed dictator's security. Nor will government officials discuss the price for his English-lesson tapes, his underwear, or his freeze-dried coffee, all of which the government supplies. Noriega buys his own Oreo cookies at the commissary, for $2.20 a package, the newspaper said.

U.S. District Judge William Hoeveler has declared Noriega a prisoner of war. As such, Army Col. James Burger, a lawyer from the Judge Advocate General's office in Washington, visited Noriega and gave him an ID card and a copy of the Geneva Convention in Spanish.

Noriega told the colonel he had no real complaints about his prison treatment, except that his family cannot visit him.

His POW status entitles him to a monthly salary of 75 Swiss francs, or $59, paid by the U.S. government.

Noriega passes his time shooting basketball with jailers, watching his favorite soap opera on TV and responding to letters.

His correspondents have included eighth-grade pen pals at Suzanne Middle School in Walnut, Calif., the Syracuse Republican Club, and convicted Medellin Cartel kingpin Carlos Ledher Rivas, who is imprisoned in Marion, Ill.

Noriega also spends time reading newspapers, history books and the Bible in Spanish.

''The public's idea of a prison comes from Jimmy Cagney movies - tin cups clanging against bars, mean officers and lousy food,'' said Warden Stephen F. Pontesso. ''It's not that way at all.''

#90294u0382 10/21/1990 ~United Press International

BERLIN (OCT. 21) UPI - A senior conservative deputy Sunday called for an investigation of the leader of the renamed Communist Party of former East Germany in connection with a $65 million payment to Moscow.

When police searched the Berlin offices of the Party of Democratic Socialism, the new name of the Communist Party, they found two documents showing that the party had recently transferred $65 million to Moscow academies for the training of functionaries.

The money was allegedly transferred to pay for fees of East German students taking classes at the Moscow ''University for the Friendship of People.''

In an interview with the daily Bild Zeitung to be published Monday, parliamentary Deputy Eduard Lintner, a leading conservative in Chancellor Helmut Kohl's Christian Democratic Union, called for an investigation of PDS leader Gregor Gysi in connection with the money transfer.

''It is intolerable that Gregor Gysi plays the clean intellectual while obscure figures in his party are responsible for questionable illegal money transfers,'' Lintner said.

PDS officials said the money had been paid to clear old debts of the formerly Stalinist party and denied that the money had been transferred through ''devious channels.''

The Friday raid on the PDS headquarters, conducted by 150 police in bullet-proof vests without a search warrant, drew sharp criticism from the PDS and other political parties.

''The search was absolutely illegal,'' said Gysi, who claimed his parliamentary immunity and that of deputy and former East German Prime Minister Hans Modrow had been violated when police searched their offices.

Gysi and Modrow are among 24 PDS deputies in the German Parliament.

But Berlin's Interior Minister Erich Paetzold said the search was warranted and that Gysi and Modrow's immunity had not been violated because police did not search their offices although they had entered them.

#90294u0404 10/21/1990 ~United Press International

ISLAMABAD, Pakistan (OCT. 21) UPI - Washington's decision to suspend aid to Islamabad has awakened nationalistic passions in Pakistan that opponents of Benazir Bhutto are directing against the ousted prime minister prior to Wednesday's elections.

The Islamic Democratic Alliance, a disparate coalition of anti-Bhutto parties, has accused Bhutto and leaders of her Pakistan People's Party of pandering to the United States while in office and of lobbying Washington to suspend aid to put pressure on the caretaker government.

Analysts and diplomats say the IDA strategy appears to be working and may have reduced some of the strong support the PPP has built up since Bhutto's ouster by President Ghulam Ishaq Khan.

''The sudden emergence of the U.S. link and Benazir's alleged role appears to have struck a chord,'' said a Western diplomat. ''Nationalism is something that people respond to.''

Most predictions say the PPP will emerge as the single largest party from Wednesday's elections but without an overall majority, and that the IDA will be able to cobble together a coalition government with the help of minor parties and independents.

''It will be much more difficult for the PPP to put together a coalition,'' said the diplomat. ''There is a feeling that the military will keep a PPP plurality in the National Assembly from taking power this time.''

However, most commentators say an IDA coalition government, founded largely on opposition to Bhutto, may not survive long and that the country could again be voting within a year.

Ishaq Khan sacked Bhutto's 20-month-old administration on Aug. 6, accusing it of corruption and nepotism and of failing to maintain law and order, and dissolved the National Assembly. He appointed opposition leader Ghulam Mustafa Jatoi as interim prime minister until elections he set for Oct. 24.

Many believe the president's actions were inspired by the military, which has run Pakistan for more than half of its 43-year history and which had been in conflict with Bhutto's democratic government.

The president also set up Special Disqualification Courts to try Bhutto and members of her administration on corruption charges in what observers believe was a bid to bar her from the elections.

But analysts say the attempts to malign Bhutto and keep her from returning to power have instead evoked a wave of sympathy for the 37- year-old daughter of hanged prime minister Zulfikar Ali Bhutto.

Bhutto has drawn large and emotional crowds at rallies across the country in an outpouring of support many observers say exceeds that of the campaign for the November 1988 elections. The PPP won those elections, the first democratic polls in the country since 1977.

But on Oct. 1, U.S. aid to Pakistan was suspended because President Bush was unable to certify to Congress that Islamabad was not developing nuclear weapons. Fifty-three U.S. senators also wrote to Bush warning that U.S-Pakistan relations could be affected if the elections were held without

Bhutto.

Islamic Pakistan is the third largest recipient of U.S. aid, after Israel and Egypt, and was expecting a $578 million package from Washington for 1991. But its strategic value to the United States has diminished sharply following last year's withdrawal of Soviet troops from neighboring Afghanistan.

The U.S. action provoked impassioned speeches and newspaper articles in Pakistan alleging American interference in the country's internal affairs.

''No self-respecting nation that has any claim to call iteself sovereign can accept another country's right to dictate to it on issues that lie squarely within the purview of domestic politics,'' wrote one political commentator.

Washington's action is ''a God-given opportunity for Pakistan to rid iteself of the shackles of external dictation,'' said an editorial in the English-language newspaper The Muslim.

#90294u0417 10/21/1990 ~United Press International

JOHANNESBURG, South Africa (OCT. 21) UPI - President Frederik de Klerk leaves Sunday on the first trip to the Netherlands by a South African head of government in 42 years of apartheid rule - an important reward by the estranged Dutch fatherland for his racial reform initiatives.

The 54-year-old de Klerk was expected to leave South Africa around midnight at the start of his eighth foreign tour since becoming president in September last year. He travels to Morocco on a similary unprecedented one-day visit before flying to Holland.

The South African leader and veteran Foreign Minister R.F. Pik Botha are likely to hold talks with King Hassan in Morocco Monday in what state-run radio described as De Klerk's first major attempt to improve ties with Arab countries.

When he lands at the Dutch military base Valkenburg in the south of the country Tuesday with his second generation Dutch wife, Marike, de Klerk will receive an official welcome that his spokesman acknowledged Sunday would be a psychological boost to many Afrikaners.

''From a South African point of view it does have psychological significance '' said spokesman Caspar Venter, recalling blood ties began way back in 1592 when Dutchman Jan van Riebeeck became the first white settler in South Africa.

''Holland was one of the European countries that was most vociferous in their criticism of South Africa and their denouncement of South African policies, and consequently I suppose one could say relations were rather cool,'' Venter

said.

De Klerk will address the Dutch Parliament and hold talks in the Hague with Prime Minister Ruud Lubbers that may focus on restoring a formal cultural relationship severed in 1976 during the Soweto riots.

Venter said a resumption of some cultural links was a possibibility but insisted de Klerk was visiting at the government's invitation and had no ''shopping list.''

He will also meet Queen Beatrix at her residence, Paleis Noordeinde, and time permitting during the three-day trip, de Klerk is expected to briefly visit the birthplace of his wife's grandparents in the province of Zeeland. He also will travel to Luxembourg before returning to South Africa.

Following the killings of scores of youths in the black township of Soweto in 1976 during protests against the forced inclusion of Dutch- descended Afrikaans as a language of instruction, formal cultural links established in 1952 were severed.

The Netherlands then became the first European nation to campaign vigorously for the abolition of apartheid. Businesses that maintained links, including Shell, became the target of often violent activist attacks.

The government has aligned itself with the European Community on sanctions against Pretoria and could play a decisive role in selective lifting of punitive measures when it assumes leadership of the EC next year.

Substantial changes in Dutch trade policy as a result of this week's visit are unlikely.

Since assuming office, de Klerk has brought the country's minority whites to the brink of negotiating a power-sharing deal with the black majority in a program that took off in February with the unbanning of the African National Congress and the release of Nelson Mandela from 27 years imprisonment.

Last week, in another step to remove obstacles standing in the way of formal negotiations, de Klerk lifted a 54-month-old state of emergency in the strife-torn province of Natal.

(OCT. 21) UPI - President Aquino warned Philippine residents the nation faces a ''serious economic crisis.'' Aquino used her weekly radio talk show in Manila to appeal to Filipinos to understand that the nation's economic woes stem from the Persian Gulf crisis. Tomorrow trade and government unions plan a general strike to demand higher pay because of an average jump in oil prices

of 29 percent last month.

Hundreds of refugees fleeing civil war in the African nation of Liberia arrived in Sierra Leone on a Nigerian naval vessel, raising fears of a cholera outbreak. Refugees say that during the trip from Liberia's capital, 25 people died. Red Cross officials told U-P-I that most of the dead refugees and sick people on the ship suffered from cholera. Health officials say there is NO supply of vaccines if an outbreak occurs in Sierra Leone.

A former Japanese labor minister is in a coma after being stabbed by a mental patient at a military base in western Japan. Police say the 78- year-old former official was stabbed in the neck by a mental patient armed with a fruit knife. Police immediately arrested a suspect. The official was stabbed at a ceremony marking the founding of the military base, about 175 miles southwest of Tokyo.

Security police took control of a Tamil rebel stronghold in northern Sri Lanka after an eight-hour battle. A government official says 20 rebels and three soldiers died in yesterday's fighting. Security forces have been conducting raids to establish greater military influence in the northern Jaffa peninsula.

#90294u0482 10/21/1990 ~United Press International

BERLIN (OCT. 21) UPI - Former hard-line Communist party officials have obtained key positions on committees designed to help rebuild the legal system in what used to be East Germany, a Berlin newspaper said Sunday.

In the wake of the Oct. 3 unification, 15 committees in five new eastern German states were established to purge the legal system of former Communists and select new judges and prosecutors.

But judges who once served under the hard-line Communist government led by Erich Honecker toppled last fall apparently received positions on the committees, the daily Berliner Morgenpost quoted government sources as saying.

''It's like making Dracula the head of a blood bank,'' said Hans- Juergen Grasemann, spokesman for a crime registration office in Salzgitter set up by the former West German government to document crimes committed by East German authorities.

Judges named to the committees were supposed to be investigated for past involvement with the Communist party and the now-disfunct state security police.

But federal authorities told the newspaper that they were surprised that more thorough background checks on applicants had not been conducted.

Each of the 15 committees is comprised of six state Parliament deputies and four judges. The 10-member committee has to approve a candidate for judge or prosecutor with a seven-vote majority.

Grasemann said the old-guard Communists on the committees could endanger the establishment of an impartial justice system in the new eastern part of the country.

''With their ''no'' (vote), the old (Communist party) judges will be able to block the appointment of candidates who were critical of the Communists in earlier times,'' Grasemann said.

The East German Communists, then called the Socialist Unity Party, had run East Germany along Stalinist lines for 40 years until Honecker was ousted Oct. 18, 1989.

The Communists adopted a pro-reform stance after the collapse of the hard-line Communist system in East Germany, and became an all-German party upon unification, but their role in the future of a united Germany is under close scrutiny.

#90294u0520 10/21/1990 ~United Press International

CAIRO, Egypt (OCT. 21) UPI - The pro-Iraqi terrorists suspected of gunning down Egypt's speaker of Parliament last week may have been aided by Moslem fundamentalists trained at special terrorism camps in Sudan, Egyptian media reported Sunday.

The Rose el-Youssef magazine, which has close connections in Sudan, said the fundamentalist Moslem Brotherhood's international organization had established three camps in the Moslem African country, which borders Egypt.

It said the camps train Egyptians, Algerians and Yemenis - at a rate of 1,800 every six weeks - in assassination techniques, street fighting and how to make explosives.

Parliamentary Speaker Rifaat El Mahgoub was killed along with five others when six assassins opened fire with machine guns on his motorcade last week in the center of Cairo.

Sources within the Interior Ministry say the well-trained killers were probably non-Egyptians working with the Abu Nidal terrorist network at the behest of Iraq, which has become Egypt's bitter enemy over the Persian Gulf crisis.

A senior administration official in Washington said Saturday that Palestinian terrorist groups, including Abu Nidal's, had been gathering in Iraq and that

Washington feared they were planning terrorist strikes against Arab leaders friendly to the United States.

Abu Nidal, whose real name is Sabri el Banah, is the world's most wanted terrorist. He is leader of al Fatah revolutionary council, a splinter group of Yasser Arafat's Fatah group within the Palestine Liberation Organization.

Rose el-Youssef magazine and the Saudi newspaper Sharq al-Awsat, or Middle East, said the pro-Iraqi terrorists suspected of killing el Mahgoub may have been aided by fundamentalists in Egypt who hated the Parliamentary speaker for his tough stand against opposition groups.

The news publications mentioned, but did not directly implicate, Sheikh Omar Abdul Rahman, a blind Egyptian preacher who is believed to spend more time now in Sudan. Abdul Rahman spent several years in jail after his Islamic Jihad group was found guilty of the 1981 assassination of Egyptian President Anwar Sadat.

''Who can exclude the liklihood that a cooperation between this fundamentalist organization and other terrorist organizations was established to carry out this crime (against el Mahgoub),'' Rose el- Youssef said.

The six killers easily escaped from the scene of the assassination on motorcycles and on foot and, although Egyptian authorities have arrested hundreds of men who look like composite sketches of the suspects, they have yet to charge anyone with the killing.

Moslem fundamentalists have been mostly sympathetic toward Iraq and critical of the U.S.-led force deployed to the gulf following Iraq's Aug. 2 invasion of Kuwait.

El Mahgoub would have been an attractive target for the brotherhood, the news publications said, because he used his position as speaker of Parliament to surpress fundamentalist activities.

Both Egypt and Syria have been bitter critics of Iraq and have deployed troops in Saudi Arabia to serve along side Western forces.

El Mahgoub was the No. 2 man in the country after Egyptian President Hosni Mubarak as stipulated by the country's constitution.

#90294u0525 10/21/1990 ~United Press International

BOSTON (OCT. 21) UPI - In the year since his wife's murder, Charles Stuart's name has come to rank with that of the Boston Strangler in the eyes of Bostonians and grief, anger and mystery from his case abound.

Stuart was first thought to be the victim of a heart-breaking crime. Less than 2 1/2 months later, after Stuart had killed himself by jumping off a bridge, he was reviled throughout the city and his case had inflamed racial relations and buried police and the media under a heap of criticism for their handling of it.

The most compelling questions that remain involve not only what spurred Stuart to kill his wife, Carol DiMaiti Stuart, but the level of involvement of his brother, Matthew, in the crime.

The lingering questions add to the torment of the DiMaiti family.

''I think the fact that the case is not resolved and they know nothing further at this point than they did months ago makes it particularly difficult for them to mark this anniversary of Carol's death,'' said family spokeswoman Janey Bishoff.

Many blacks also still feel scarred the case and on Tuesday will mark the one-year anniversary with a protest of police and media reaction.

On Oct. 23, 1989, Carol Stuart, 30, an attorney who was seven months' pregnant was shot in the head. Charles, a Boston furrier, said a black gunman forced his way into the couple's car after they left a birthing class at an inner-city hospital. He said the gunman forced them to drive to the Mission Hill neighborhood, where he robbed and shot them both.

As Carol was dying, Stuart called police from his car telephone. Appearing to fade in and out of consciousness because of his abdominal wound, he gave vague directions but rescue workers were able to track the car.

The case came to symbolize the plague of urban crime and it made headlines across the nation because of the dramatic audio tapes of the police dispatcher's efforts to coax more information from Stuart, video footage obtained by a television crew that happened to be filming in the area and a graphic photo of Carol with her head lolling and mouth agape.

Sympathy for Stuart poured in from across the nation. The story became more painful when the baby Carol was carrying - a boy who was christened Christopher - died 17 days after his delivery by Caesarian section. His father still recovering from his own wounds, was brought by ambulance to be with the dying infant.

The Stuarts were depicted as the perfect couple, living comfortably and happily in suburban Reading until tragedy struck. Boston Mayor Raymond Flynn ordered an all-out search for their attacker and media reports named William Bennett, a black man who had spent 13 years in prison, as the prime suspect.

Everything changed Jan. 4 when Charles Stuart plunged from a bridge into the

Mystic River. As divers recovered his body from the icy water, police revealed that he had become their prime suspect.

Stuart instantly turned from victim to villain, the most heinous in town since the Boston Strangler. Speculation about his motive ranged from rumors of romance with a blond former co-worker, who steadfastly denied any romantic involvement, to reports that Stuart did not want a baby, and finally to the theory that he killed his wife to cash in on insurance policies, possibly to finance his dream of becoming a famous restaurateur.

The day before Stuart's suicide, his brother Matthew had gone to police with evidence implicating his brother in the shootings. Matthew said he became an unwitting accomplice in the crime when he and a friend, John McMahon, met Charles in the Mission Hill neighborhood on the night of the shootings and agreed to dispose of a gun, Carol's purse and several other items. Matthew reportedly told authorities he thought he was aiding in an insurance scam and knew nothing of a murder plot.

Investigators want to know more about Matthew's role but he has apparently refused to testify before a grand jury, although Massachusetts law prevents the prosecution of blood relatives as accessories after the fact of a crime.

Prosecutors are awaiting a decision by the state's highest court on whether they can break the attorney-client confidentiality privilege that prevents Charles Stuart's former lawyer from revealing what he knows about the crime. The attorney, John Dawley, met with Stuart for about two hours on the day before his suicide. Dawley resigned as Stuart's lawyer after the talk and recommended he hire a defense attorney, prosecutors said.

Boston's black community was enraged by the case even before Stuart's deception was revealed. Charges that police harassed black men in their search for a gunman and intimidated witnesses into giving evidence incriminating Bennett still are being investigated. Bennett, who was convicted this month of an unrelated armed robbery, claims he was framed in the Stuart case. Some blacks say that police readily accepted Stuart's story - and that it made national headlines - because he was white and blamed the killing on a black man.

#90294u0548 10/21/1990 ~United Press International

BONN, Germany (OCT. 21) UPI - Six German nationals, on their way home after being released by Iraq, sharply criticized the Bonn government for not doing enough to help the 400 other Germans remaining in Iraq and occupied Kuwait.

Three of the six Germans who arrived in the Jordanian capital of Amman Saturday from Baghdad are expected to arrive in Frankfurt later in the day Sunday, while the other three will follow Monday, officials said.

Two other Germans were expected to leave Baghdad within the next days, German Foreign Ministry officials said.

The six nationals who arrived in Amman over the weekend said they strongly supported a letter the 400 German nationals held in Iraq and Kuwait had written to German Chancellor Helmut Kohl, urging him to do more for the release of all Germans.

The letter urged Kohl to make a ''significantly stronger effort'' to help them.

It noted that former U.S. presidential contender, the Rev. Jesse Jackson, and former British Prime Minister Edward Heath had visited their fellow citizens in Baghdad although they were not on official government missions.

The Germans said the only visitors they had seen so far were two German deputies from the European Parliament who traveled to Baghdad last week.

''We expect (Germany) to do what other countries do and that is visits, visits and again visits - no matter if the visitors are parliamentarians, business leaders, union officials, church leaders or public persons,'' the letter said.

Sources in Bonn said Sunday that former West German Chancellor Willy Brandt might travel to Baghdad soon. Brandt is scheduled to meet with Iraq's ambassador late Monday.

The freed Germans said in a joint statement in Amman, ''The mood among those who remained behind is depressing. Three months is enough, it is nerve-racking.''

The six had been among hundreds of foreigners held by Iraqi authorities since the Aug. 2 Iraqi invasion of Kuwait.

About 76 Germans have reportedly been taken to strategic military installations as ''human shields'' against a possible attack by western forces deployed in the Persian Gulf.

Kohl responded to the letter saying the government is making great efforts to help them.

#90294u0552 10/21/1990 ~United Press International
(OCT. 21) UPI - TODAY'S PEOPLE:

SPOUSES WON'T BE CO-STARS: Actress Kirstie Alley says she never wants to co-star with husband Parker Stevenson. ''We got married to make love with each other, not to star with each other,'' the ''Cheers'' star told the New York

Daily News. ''I'll work with Parker as producer to actor or as director to producer but not as actor to actor. We work horribly together. We have no respect for each other. We direct each other. All the considerations you'd give any other actor we don't give each other.'' Besides, Alley says if she and Stevenson made a movie together, it would deprive them of the side benefit of getting to kiss other people and stay within the bounds of marital fidelity. ''You can't be a secretary and smooch with the sales manager that comes to town,'' she said. ''If you told your husband, he probably wouldn't like it. When I'm smooching with someone in a scene, it's allowed.''

BROKAW WOULD LIKE TIME OFF: Tom Brokaw sounds like he might like to drop his anchor duties. ''What I'd like to do is always keep my hand in television but I would not like to be on every day,'' the NBC newsman told People magazine. ''It seems to most people to be a very glamorous job and many days it is. (But) it's very hard to even think about taking a day off in the course of a month because it's very competitive and the expectations are so high for all three (CBS's Dan Rather and ABC's Peter Jennings and himself).'' Brokaw says the pressure of the job makes him feel like a gerbil. ''We're in a cage running around and around,'' he says. ''After a while, no matter how much they pay you, you get to think you'd like a whole different life.''

LINE IS FOR BOOKS, NOT BORIS: Long lines of people outside Boris Yeltsin's Moscow home set off false rumors about the health of the Russian leader. The crowd had not come to mourn Yeltsin but to buy the first Russian translation of Mario Puzo's novel ''The Godfather'' at a bookstore in Yeltsin's building. Yeltsin's well-being has been a concern since a car accident a month ago and there has been much speculation about how seriously he was injured. A Soviet newspaper said Yeltsin had not deteriorated. ''We know for certain from circles close to the Russian president that his health is in a good state,'' one report said. ''Doctors simply recommended that he rest for a few more days.''

GLIMPSES: Merv Griffin is adding a Hollywood touch to his Resorts casino in Atlantic City, N.J. He's bringing in special slot machines that will feature scenes from famous movies instead of the standard spinning cherries and lemons ... Life behind bars isn't so bad for deposed Panamanian ruler Manuel Noriega. While Noriega awaits trial on drug charges, he is staying in what has become known as the ''dictator's suite'' at the Metropolitan Correctional Center in Miami. The cell has a bedroom, a conference room and an office and is furnished with a color television, a computer, an exercise bike and a paper shredder. There also are two safes containing documents but Noriega can't open them because he doesn't know the combinations.

#90294u0567 10/21/1990 ~United Press International
MOSCOW (OCT. 21) UPI - The largest statue of Vladimir Lenin in Moscow was spray painted this weekend in the first attack on a Lenin monument in the Soviet capital.

The Moskovskaya Pravda newspaper said Sunday that a fire extinguisher filled with paint was used to disfigure the back portion of the Lenin statue in October Square between Friday night and Saturday morning.

Although statues to the Soviet state's founder have been hauled down and then disfigured in other Soviet cities, no such atttacks on Lenin had been reported in Moscow.

The Lenin statue that was attacked towers over a series of statues of early Communists to honor the October 1917 revolution that brought Lenin to power.

In an attempt to stop the dismantling of Lenin's statues across the country, Soviet President Mikhail Gorbachev last week ordered increased protection of the monuments.

His decress also suspended the carrying out of orders by local city councils to dismantle the statues of Lenin in their cities.

The Moscow Communist Party expressed ''a strong protest against the immoral action (in October Square) and urged compliance with Gorbachev's decree.''

The statue of Lenin in October Square is the most prominent in Moscow and the square itself is one of the busiest interchanges in the Soviet capital with constant traffic.

The monuments to other Soviet figures have recently been attacked also in well-traveled major squares.

The statue of Yakov Sverdlov, first president of the Soviet Union, was spray painted last month despite its location in Revolutionary Square not far from the Kremlin.

Lenin was the most revered figure in Soviet history until the 28th Party Congress in July declared him to be just one in a series outstanding socialist thinkers.

(OCT. 21) UPI - President Bush has sent an alternative civil rights bill to

Capitol Hill. The legislation is a bid to avoid a politically damaging veto of the Civil Rights Act of 1990, which Bush says would create unacceptable job quotas. The president is asking Congress to revise its bill before adjourning or he will veto it. But House Speaker Thomas Foley says he doubts whether lawmakers will go back and open up the bill.

Israeli police have arrested a West Bank Arab following the fatal stabbings of three Israelis with a bayonet in Jerusalem. Today's attack is the worst in the city since Israeli security forces killed at least 20 Palestinians during the bloodbath on Temple Mount two weeks ago. The Army says the suspect is a 19-year-old religious Moslem who was seeking revenge.

In Lebanon, unidentified gunmen killed a supporter of ousted Christian General Michel Aoun along with his wife and two sons at their home in Syrian-policed southeast Beirut today. The Christian Voice of Lebanon Radio says the killers, armed with silencer- equipped guns, burst into the apartment of 54-year-old Dany Chamoun after knocking on the door. Witnesses say the bodies of Chamoun and his wife were riddled with bullets.

The Washington Post reports Iraqi military forces are learning how to use sophisticated American anti-aircraft missiles and radar captured during the August invasion of Kuwait. The newspaper quotes a Bush administration official who says Iraq captured about 150 of the highly accurate Hawk missiles. The sources say terrorist teams are learning how to use the weapons and could pose a substantial threat to American and allied aircraft.

Reports from China say damage from an earthquake and aftershocks that rumbled through Gansu Province is heavy. The six-point-two Richter Scale quake was followed by several strong aftershocks, including one measuring five-point-one. The State Seismological Bureau in Beijing says one person is known dead... but the casualty toll is expected to rise. China's official news agency says 30 percent of the buildings at the quake's epicenter were destroyed.

It looks like mid-winter in the Rockies this morning. A cold front pushed across the central United States yesterday leaving up to nine inches of snow on the ground in the mountains of Colorado. Denver got up to four inches of the white stuff. Snow also fell in New Mexico, Nebraska and Kansas.

#90294u0644 10/21/1990 ~United Press International

LONDON (OCT. 21) UPI - Former British Prime Minister Edward Heath announced in Baghdad Sunday he secured the unconditional release of an undisclosed number of sick and elderly British hostages being held in Iraq.

Those allowed to return home were reported to be released Tuesday.

Speaking at a news conference after a three-hour meeting at a secret location with Iraqi President Saddam Hussein, Heath said the Iraqi authorities had agreed to release an unspecified number of British nationals detained in Iraq since the Aug. 2 invasion of Kuwait.

Details were not given on which hostages were to be released or how many, but Heath said he had reached a firm agreement on the categories involved.

Heath had arrived in Baghdad Saturday with an list of people he would like to see released, putting them into categories, including the sick and elderly, those under 21 years and those trapped in Iraq while on transit to other countries at the time of the invasion.

The final list of those to be released is being drawn up by Heath's advisors and the Iraqi authorities.

Most hostages are being held at military and other strategic installations.

Iraqi authorities had not imposed any conditions for the release of the hostages and had asked for nothing in return, Heath said during the news conference, monitored in London from the British Broadcasting Corp.

He said the Iraqi leader recognized the intense dangers of the current crisis and the disastrous effect that warfare could have on the region and on the world economy.

He said Hussein emphasized the desire for a diplomatic solution, but there was no indication that the Iraqis would consider a withdrawal or even a partial withdrawal from Kuwait.

Heath decided to go to Baghdad after receiving dozens of pleas from friends and relatives asking him help get the sick and elderly hostages out of Iraq. His trip was not sanctioned by the British government.

After his arrival in Baghdad Saturday, Heath met with the Iraqi Foriegn Minister, Tariq Aziz. The meeting lasted over two hours and the two politicians are understood to have discussed a wide range of subjects around the gulf crisis.

Following a visit by Austria's Kurt Waldheim, Edward Heath is the most senior Western politician to visit Iraq since the crisis began. Believing him to be against the hardline views of British Premier Margaret Thatcher, the Iraqis have reported Heath's comments on the Persian Gulf crisis in favorable terms.

ATHENS, Greece (OCT. 21) UPI - Iran reopened its embassy in Baghdad Sunday, a

week after the two countries resumed diplomatic relations, the official Iraqi News Agency said.

Iranian Charge d'Affaires Abuqassem Shashat, who arrived in Baghdad Wednesday, said ''the reopening of the embassies in Baghdad and Tehran came as a result of the process of normalization (of) bilateral relations.''

The Iraqi Embassy in Tehran, closed since the start of the Iran-Iraq war in September 1980, was reopened Oct. 14, the day the two sides resumed diplomatic relations.

An INA dispatch monitored in Athens said the Iranian Embassy in Baghdad ''reopened ... with the hoisting of the Iranian flag on its building.''

Regional diplomats said Iranian Foreign Minister Ali Akbar Velayati was expected to visit Baghdad shortly, but there was no immediate confirmation from Tehran.

Iraqi Foreign Minister Tareq Aziz visited Tehran early last month, days after Iraqi President Saddam Hussein began a hurried bid to make peace with Iran following his own invasion of Kuwait and the buildup of U.S. forces in Saudi Arabia.

#90294u0705 10/21/1990 ~United Press International

(OCT. 21) UPI - Iraq today conceded that U-N economic sanctions imposed against Baghdad are having a noticeable effect. But the Iraqi defense ministry's newspaper indicates that Iraq is NOT yet willing to back down. It says the Iraqi army is on full alert and ready to confront U-S- led forces in the Persian Gulf.

In other Gulf developments, former British Prime Minister Edward Heath met with Iraqi President Saddam Hussein today. Heath is on a self-styled mission to free sick and elderly British hostages. Earlier, Heath met with several of the hostages in a downtown Baghdad hotel.

Anti-war groups took to the streets near Tokyo today to protest Japan's plan to send Japanese troops to the Persian Gulf. Organizers say about 23-thousand leftists and pacifists demonstrated peacefully outside the U-S Forces Japan headquarters. The protesters joined hands to form a human chain enclosing around the facility.

Thousands of peace activists demonstrated in 19 cities around the United States yesterday in opposition to America's deployment of troops in the Middle East. In the largest demonstration, some five-thousand protesters took to the streets of New York, chanting anti-war slogans. The protests were reminiscent of the numerous anti-Vietnam War rallies of the 60s and 70s.

President Bush is trying to avoid a politically damaging rejection of major civil rights legislation. The president last night dispatched his own alternate plan to Capitol Hill. Bush says the Civil Rights Act of 1990 passed this week by Congress contained ''critical defects'' that would lead to hiring quotas.

Jerusalem police have arrested a 19-year-old West Bank Arab who stabbed to death three Israelis with a bayonet in a quiet Jewish neighborhood today. Police say the suspect apparently sought to avenge the killing of 20 Arabs on the Temple Mount two weeks ago. It was the worst attack on Jews in Jerusalem since the start of the Palestinian uprising.

As many as 75 people were injured in Dallas last night while waiting for aconcert by the rock group Z-Z Top. Most of the victims collapsed from heat exhaustion after more than 70-thousand people crammed into the stadium and waited for up to seven hours without food or water before the concert.

#90294u0719 10/21/1990 ~United Press International

WASHINGTON (OCT. 21) UPI - President Bush's proposed compromise on the Civil Rights Act of 1990 was angrily rejected as an unacceptable political ploy Sunday by lawmakers and civil rights advocates.

But they conceded it would be difficult, if not impossible, to override Bush's veto of their bill. Bush on Monday plans to issue the veto, the 16th of his administration. He has yet to be overridden.

Bush, jockeying for position in a high-stakes civil rights battle, proposed the compromise late Saturday and challenged Congress to pass it by Monday.

In a statement, the president maintained that his bill would protect employees against discrimination without imposing unacceptable hiring quotas.

''The alternative is a cynical coverup for tomorrow's devastating veto,'' said Ralph Neas, executive director of the Leadership Conference on Civil Rights. ''The so-called compromise is dead on arrival.''

''I don't understand why they sent (Bush's compromise) to us, other than political reasons,'' said Augustus Hawkins, D-Calif., a chief sponsor of the Civil Rights Act of 1990. ''It's a collection of ideas we earlier rejected.''

Backers of the Civil Rights Act of 1990 say their legislation would not lead to quotas, either. But despite numerous revisions, they have not been able to eliminate administration concerns to the contrary.

Neas charged that Bush's bill would ''gut the Civil Rights Act of 1990.'' But

Hawkins said, ''I don't think we have the time to override'' a veto. ''We'll just have to try again next year.''

The Civil Rights Act of 1990 has been one of the most thorny issues between the White House and Capitol Hill in this session of Congress, which is expected to end this week.

The measure would reverse several recent Supreme Court decisions that supporters say made it more difficult for women and minorities to prove discrimination in the workplace.

Last week, the House and Senate each passed the bill by wide margins, but not by the two-thirds vote needed to override a veto.

Rep. Richard Gephardt, D-Mo., appearing on ABC's ''This Week with David Brinkley,'' refused to concede defeat. ''I don't know'' if we have the votes. ''We'll try.''

Neas, in contact with congressional leaders much of the weekend, predicted that Bush's alternative would likely draw less than 30 percent of the vote in the House and the Senate.

Laura Melillo, a White House spokeswoman, said, ''The president feels that once Congress reviews his bill they will pass it. The president wants a civil rights bill.''

Said Hawkins, ''I don't even think we'll bring it up for a vote.''

In a statement Saturday, Bush said the Civil Rights Act of 1990 contains ''critical defects'' that would lead to quota hiring.

''With the changes I am forwarding to the Congress, together we can produce legislation that will strike a blow against racial bias without institutionalizing quotas,'' he said.

C. Boyden Gray, Bush's legal adviser, said the new plan contains several key changes in language aimed at easing the burden on employers, including the placement of a $150,000 cap on punitive and compensatory damages sought by employees charging racial discrimination.

Gray and White House press secretatry Marlin Fitzwater acknowledged Saturday that it was unclear whether Congress would reopen the question, but the spokesman said, ''We hope this bill will pass.''

A Bush veto of a civil rights bill would certainly hurt him in the black community. Recent polls show that while Bush initially had an approval rating of upwards of 70 percent among blacks, it has declined to about 45 percent.

Benjamin Hooks, chairman of the NAACP, said a veto of the legislation would mean, ''that the kinder, gentler nation that we have been looking forward to won't come to pass.''

-30- 4049

#90294u0843 10/21/1990 ~United Press International

(OCT. 21) UPI - President Bush has sent his own compromise civil rights bill to Capitol Hill. But the executive director of The Leadership Conference on Civil Rigths says the president's new compromise plan is D-O-A... ''dead on arrival'' because it woN'T adequately guard against discrimination in the workplace. Ralph Neas predicts that Bush's compromise bill woN'T attract much more than 30 percent of the vote in the House or the Senate.

Despite a big slide in public opinion polls, President Bush still stands tall when compared to his immediate predecessors. Bush's latest public approval ratings dropped as much as 20 points from a month ago... to around 60 percent. But the figures indicate his approval rating remains significantly higher than the average scores posted by former presidents Reagan, Carter or Ford.

The Pentagon says a U-S warship fired warning shots at an Iraqi tanker in the Persian Gulf yesterday. Pentagon spokesman Lieutentant Colonel Steve Roy says the destroyer U-S-S O'Brien intercepted the Iraqi vessel, forcing it to stop by shooting over its bow. He says the ship was boarded... searched... then allowed to proceed on its way.

Iraq today conceded U-N economic sanctions against Baghdad are beginning to hurt, but Iraq indicated it's NOT yet willing to back down. Iraq announced Friday it would begin rationing gasoline this week for private cars, trucks and taxis. Western observers say the austerity measure is a sign that the economic blockade is taking its toll on Iraq.

In Japan, organizers report about 23-thousand leftists and pacifists staged a peaceful demonstration today outside the U-S Forces Japan headquarters near Tokyo. The crowd was protesting Japan's decision to send troops to assist U-S-led multi-national forces in the Middle East. The demonstrators joined hands to form a human chain enclosing the U-S military headquarters. Police say the anti-war demonstration was peaceful and there were NO arrests.

Philippine President Corazon Aquino is appealing for understanding of her nation's ''serious economic crisis,'' which she blames on the Persian Gulf conflict that has sent oil prices skyrocketing. In her taped weekly radio talk show, Aquino says there's a possibility prices could go higher. She indicated gasoline rationing might be ordered.

Aquino's statement comes on the eve of a week-long general strike called by government and trade unions demanding a raise after petroleum prices jumped an average of 29 percent. Defense and security officials have opposed any new

hike in petroleum prices, noting the last three of seven military uprisings against Aquino came after pump prices were adjusted and workers took to the streets.

The Miami-based rap group 2 Live Crew says it will resume touring and will perform concerts in Florida's Broward County, now that a jury has acquitted three band members of obscenity charges. A panel of four women and two men deliberated just two hours before finding the rappers innocent yesterday. The trial was based on a live nightclub performance of songs from an album that a federal judge had declared obscene.

#90294u0932 10/21/1990 ~United Press International

(OCT. 21) UPI - The head of the Leadership Conference on Civil Rights says the civil rights bill proposed by President Bush is ''dead on arrival'' on Capitol Hill. Ralph Neas says congressional leaders give him the feeling the bill woN'T get much more than 30 percent of the vote in the House or the Senate.

President Bush is holding onto a higher approval rating than his immediate predecesors despite a recent 20-point slide. The two latest polls indicate the public gives Bush approval ratings of 56 and 60 percent... higher than Presidents Nixon, Ford, or Carter, and even Ronald Reagan.

Iraq today conceded the international embargo against it is having a ''conspicuous'' effect. But Iraq's official news agency also played up yesterday's peace protests in the United States. In Baghdad, former British Prime Minister Edward Heath met with Iraqi President Saddam Hussein in an effort to free sick and elderly hostages.

A Lebanese group calling itself the ''Islamic Jihad Movement'' is claiming responsibility for today's stabbing rampage that left three Israelis dead in a quiet Jewish neighborhood in Jerusalem. The group issued a statement in Beirut saying the attack was to avenge the Temple Mount killings of 20 Arabs.

Lebanese troops today searched buildings and stormed houses in the hunt for the assassins of a staunch supporter of ousted Christian General Michel Aoun. Officials say unidentified gunmen burst into the home of Dany Chamoun and shot him dead along with his wife and two young sons.

Diplomats say the U-S decision to suspend aid to Pakistan has led to a backlash against deposed Prime Minister Benazir Bhutto. The Islamic coalition which opposes Bhutto says the aid cut- off shows Bhutto is beholden to the United States. Elections on Wednesday are expected to prevent Bhutto's party from holding a majority in parliament.

Ousted Panamanian strongman General Manuel Noriega is awaiting his drug trial

in what one co-defendant's lawyer calls the ''dictator's suite.'' A report today says Noriega's suite near Miami has a conference table, color T-V, exercise bike, private shower, computer and a paper shredder.

South African President Frederik de Klerk departs for the Netherlands today... the first such trip by a South African head of state in 42 years. Pretoria's ties with the estranged Dutch fatherland go back to 1592 when Dutchman Jan van Riebeeck became the first white settler in South Africa.

Nick Navarro, the Florida sheriff who arrested three members of the rap group 2 Live Crew, says he'll arrest them again if they give another performance like the one in June at a Hollywood, Florida, nightclub. A Broward County jury yesterday acquitted the three rappers, ruling the performance was NOT obscene... ending a two-week trial.

#90294u1204 10/21/1990 ~United Press International

LOS ANGELES (OCT. 22) UPI - Retail gasoline prices rose more than 2 cents a gallon in the last two weeks, but the rate of increase slowed to about half the pace reported at the end of September, an industry analyst reported Sunday.

Trilby Lundberg, director of the Lundberg Survey, found on Friday that the average price for a gallon of gasoline was just over $1.47, including tax.

Lundberg's study of some 13,500 retail outlets across the nation indicated the average price was up 2.64 cents from the last survey on Oct. 5.

In the earlier survey, gas prices had risen 5.84 cents from the Sept. 21 price Lundberg said.

She said most retailers have upped their retail prices only as much as the wholesale costs have gone up.

''(The increase is) a simple pass-through of what retailers are paying in increased wholesale prices,'' as they have done since mid- July, she said.

''I see this as their putting on the brakes in order to compete for sales,'' Lundberg said. ''(But) if a station fails over a long enough time to recover its losses, it could be in danger.''

Overall, the average price per gallon has soared nearly 30 cents since July 20 in the wake of the Persian Gulf crisis and its effect on crude oil prices.

Lundberg said although recent figures on fuel consumption have not been compiled, sales have most likely declined since the end of August, the close of the traditional peak driving season.

But Lundberg said it is too soon to tell if higher prices have led drivers to take more short-term conservation measures such as carpooling.

Lundberg said while crude oil prices have slipped in the last few days, oil companies and retailers react as much to political and psychological factors that keep the prices buoyed as they do to the laws of supply and demand. She said even trade analysts have been alarmed with the rapid price fluctuations on the crude oil futures market since Iraq invaded Kuwait.

At the self-service pump on Friday, the average price for regular unleaded gasoline - the most popular grade - was $1.36 a gallon. Premium unleaded sold for $1.53 and regular leaded cost $1.33.

For full-service, regular unleaded cost $1.58 a gallon, premium unleaded $1.71 and regular leaded $1.54.

#90294u1407 10/21/1990 ~United Press International

(OCT. 21) UPI - Budget Director Richard Darman says President Bush is willing to raise the top income tax rate to help settle on a deficit reduction plan. Darman said today that Bush would agree to a 31 percent tax rate for the wealthy... if he got an elimination of the so-called ''bubble'' in the tax rate affecting people who earn 80-thousand to 200- thousand dollars. Some Democrats talked of a higher rate and a surtax on the rich.

Lawmakers reject the president's compromise proposal on civil rights legislation, calling it a political ploy. Senator Edward Kennedy today called the president's last-minute proposal- quote- ''a cynical attempt to appear to support civil rights... while actually satisfying the anti- civil rights forces in his own party.'' President Bush says he will veto the congressional version of the bill... which he says would create hiring quotas.

F-B-I statistics rleased today show violent crime is on the rise across the nation... especially in big cities. The F-B-I's Uniform Crime Report found a 10 percent increase in violent crime nation-wide in the first six months of the year. During that same period... murders in America's biggest cities jumped 20 percent. Lawmakers' efforts to put together a tough anti-crime bill have been stymied by the Persian Gulf crisis and budget problems.

Voters in Arizona will decide November 6th whether to honor Martin Luther King with a paid holiday. Polls indicate 51 percent of Arizona voters support a paid holiday for the slain civil rights leader... in a state where blacks account for less than three percent of the population. Business leaders complain the state is losing Millions of dollars in convention money because of the King controversy.

#90294u1418 10/21/1990 ~United Press International

(OCT. 21) UPI - Chicago police say a woman who shot and critically wounded her daughter in an argument over a pack of cigarettes is in police custody. Authorities say 47-year-old Essie Gill began arguing with her daughter, 32-year-old Patrice Gill, when the daughter refused to give her a pack of cigarettes. The mother then allegedly took her husband's .22-caliber revolver and shot her daughter in the head and chest. Police say the mother showed NO remorse.

Brazilian President Fernando Collor de Mello has slashed inflation in his country... but NOT without problems. He dropped barriers to imports, seized bank accounts, and did away with monthly wage increases tied to prices. Inflation dropped from 82 percent in March to 10 percent in June. But other results are massive lay-offs and low salaries. Some say it's almost impossible for average Brazilians to live on their wages.

-30- 1041

#90294u1558 10/21/1990 ~United Press International

(OCT. 21) UPI - Congressional budget negotiators apparently have hit a roadblock, differing on what approach to use to raise taxes for the wealthiest Americans. Democrats favor a surcharge... while Republicans want to limit tax deductions for those with incomes above one-Million dollars. Democrats and Republicans apparently agree on raising the upper tax rate to 31 percent.

Lawmakers today rejected a challenge from President Bush to pass his version of the Civil Rights Act of 1990. The measure was rejected today by lawmakers and civil rights activists as an attempt to satisfy G-O-P extremists. Bush threatens to veto the congressional version of the civil rights bill.

Iraq concedes that the U-N trade embargo is hurting its people... but indicates it will NOT back down. Baghdad says its army is on full alert and ready to confront U-S-led forces in the Persian Gulf. Iraq also played up yesterday's protests in the United States against American forces in the Middle East.

Israeli Army Radio says an Arab man who stabbed to death three Israelis today was a religious Moslem intent on avenging the deaths of those killed in riots on the Temple Mount two weeks ago. Today's attack was the worst on Jews in

Jerusalem in the nearly three-year-old Palestinian uprising.

South African President Frederik de Klerk is headed to the Netherlands... on the first such trip to the minority white government's estranged Dutch homeland in 42 years of apartheid rule. Racial reforms in South Africa made the visit possible.

Egyptian officials today welcomed a decision by the U-S Senate to cancel Cairo's seven-point-one-BILLION-dollar military debt. They say it's a step in narrowing Egypt's 50-BILLION-dollar outstanding foreign debt.

-30- 1912

#90294u1565 10/21/1990 ~United Press International

(OCT. 21) UPI - The chairman of the National Black United Front is calling on Nike Incorporated to open discount stores in black communities across the nation, and share the profits with black charities. Nike already has such a program in a predominantly black neighborhood in Portland, Oregon, where the shoe manufacturer is based.

Police in Montecatini, Italy, were able to return 44-thousand-dollars worth of stolen jewels to their owner after a thief with a guilty conscience mailed the loot to police. There was also a letter of apology for the theft.

The news alert from Paris for all fashion watchers is- the skin-tight look is out. Influential designer Christian Lacroix became the latest to deal a blow to the look that was just as popular with men as it was with women. Lacroix revived his old triangle shape at his latest fashion show.

-30- 1004

#90294u1636 10/21/1990 ~United Press International

(OCT. 21) UPI - Former British Prime Minister Edward Heath says his meeting with Iraqi President Saddam Hussein in Baghdad has cleared the way for the release of a number of British hostages. Also, six German hostages who were released from Iraq yesterday complain that their government is NOT doing enough to free remaining captives. The six called for repeated diplomatic visits to get the rest out.

An Egyptian magazine says Moslem fundamentalists in Sudan may have trained the pro-Iraqi terrorists who gunned down the speaker of Egypt's parliament in Cairo last week. The magazine says the Moslem Brotherhood runs three camps in Sudan, which borders Egypt. It says the camps train thousands of Egyptians, Algerians and Yemenis in assassination techniques, street fighting and making explosives.

SALT LAKE CITY (OCT. 22) BUSINESS WIRE - Utah Medical Products Inc. (NASDAQ/NMS:UTMD), a manufacturer and marketer of proprietary medical products for use primarily in the critical care areas of hospitals, announces the issuance of a letter of intent to purchase Multi-Technology Inc. (MTI).

MTI, a Salt Lake City-based manufacturer of high-tech disposable laboratory products, was incorporated in 1980. The company's products are used in the clinical laboratory and biotechnology research facilities. The products include pipette tips and micro centrifuge tubes.

The potential market for disposable laboratory products has increased at a consistent rate of 15 percent over the past five years with a continued increase expected at a comparable rate for the next five years.

MTI products are used in such major institutions as Salk Institute, Mayo Clinic, The National Institute of Health, and Dupont.

Said letter of intent expresses Utah Medical's desire to acquire Multi-Technology Inc. (MTI) for an undisclosed sum. Both companies anticipate conclusion of negotiations by Nov. 30.

According to Wm. Dean Wallace, chief executive officer, ''The proposed acquisition of MTI is further affirmation of Utah Medical Products' commitment to continued growth and increased value to the stockholders.''

#90295b0015 10/22/1990 ~Business Wire

FREMONT, CA (OCT. 22) BUSINESS WIRE - Lam Research Corp. (NASDAQ/NMS:LRCX) announced Monday net income of $1.25 million, or 11 cents per share, for the first quarter ended Sept. 30, compared with net income of $2.3 million, or 20 cents per share, for the like period last year.

Revenues for the first fiscal quarter declined to $34.1 million, down from $38.2 million for the first quarter a year ago.

The decrease in revenue for the quarter compared with last year was attributable to a decline in revenues from the company's epitaxy product line and softness in the etch market. Lam announced a restructuring of its epi operations at the end of its June fiscal year, calling for a write-down of certain operations and a renewed emphasis on its profitable core etch business.

The decrease in net income was attributable to the slowdown in the etch business from the comparable quarter last year.

According to Roger Emerick, chairman and chief executive officer, ''Our results were slightly better than expectations and reflect the positive impact of our recent cost reductions. Although we are encouraged by a strong order rate this past quarter and a strengthened backlog position, we still maintain a cautious outlook with the economic uncertainties confronting us.''

Lam Research Corp. is a leading supplier of wafer processing equipment for the worldwide semiconductor industry. The company's broad product offerings are focused on etch and deposition technologies, two of the most vital areas in the fabrication of current and future integrated circuits.

Headquartered in Fremont, Lam maintains customer support centers strategically located throughout the United States, Europe and Pacific Rim to support its global customer base. The company was founded in 1980.

#90295b0017 10/22/1990 ~Business Wire

TROY, MICH. (OCT. 22) BUSINESS WIRE - A subsidiary of Ameritech Publishing Inc. Monday announced its acquisition of a German industrial directory publisher.

Ameritech Industrial Yellow Pages Inc. (AIYP) is the first known American firm to acquire an existing, independent company in Hamburg, Germany, with its

purchase of ''Wer Liefert Was?''

AIYP is the publisher of the Ameritech Industrial Purchasing Guide, 14 regional directories targeted for American purchasers and suppliers.

''Wer Liefert Was?'' was the family-owned and operated publisher of the European industrial directory, Wer Liefert Was? Freely translated, Wer Liefert Was? means ''Who supplies what?'' Wer Liefert Was? is the German market leader, with German and Austrian editions. Additionally, ''Wer Liefert Was?'' plans to introduce a directory in Switzerland.

''The relationship formed between AIYP and 'Wer Liefert Was?' is one based on respect and the understanding that together we can provide an outstanding product to our customers,'' said Tom Kaeding, president of AIYP. ''By entering into this agreement, we have created a strong and experienced team prepared to address the needs of the international industrial marketplace.''

Ameritech Industrial Yellow Pages Inc., is a subsidiary of Ameritech Publishing Inc., provider of Ameritech PagesPlus directories in Illinois, Indiana, Michigan, Ohio and Wisconsin, and directories in Tokyo and Osaka, Japan.

ORLANDO, Fla. (OCT. 22) BUSINESS WIRE - CBIS, Cincinnati Bell Information Systems Inc. announced Monday that it has entered into an agreement with Unisys which will enable the companies to jointly deliver check imaging solutions to the banking industry.

This agreement reflects CBIS's ongoing commitment to provide additional opportunities for bankers to affect the transition to check image processing and statement rendition with a proven, installed system that is designed for compatibility with long-term imaging strategies.

''Unisys InfoImage IIPS (Image Item Processing System) customers can now take advantage of ImageBanc, the first installed and proven imaged statement application for financial institutions,'' explained Dan Welbaum, director of sales and marketing for CBIS's Composed Applications business unit. ''And our ability to interface the ImageBanc/IIPS solution with an IBM host system makes it usable by those financial institutions with Unisys InfoImage IIPS check processing system and IBM host-based core accounting applications.''

The Unisys InfoImage IIPS is a high-speed payment processing platform system for the financial industry. Coupled with Image Check Processing system (ICPS) software, the IIPS system can process and store 1,800 double-sided document images per minute for check processing. IIPS will ''present'' check images to ImageBanc installed on the IBM host for imaged statement rendering.

''Unisys is excited about our relationship with CBIS, as it allows our check image customers the ability to quickly implement a proven statement print application. Additionally, it combines the resources of two leading vendors in check imaging, and brings an expanding suite of imaging solutions to the marketplace. This application is a prime example of Unisys' ability to co-exist in a multi-vendor environment and to deliver a total solution to our customers,'' stated Denny Farkas, vice president, Financial and Imaging Programs, Unisys Corp.

Imaged statement technology provides bankers both a strategic marketing advantage and significant operational cost saving opportunities. Instead of handling and returning cancelled checks each month, the ImageBanc/IIPS solution reduces banks' processing costs and provides customers with an easy-to-read, ''checkless'' imaged statement. By offering an imaged statement product, bankers can attract new customers, increase fee income, reduce postage and check-handling costs, and enhance customer loyalty.

CBIS, a subsidiary of Cincinnati Bell Inc., provides information management solutions to financial, telecommunications and government entities. Its Composed Applications group specializes in image and document management applications and is an industry leader in providing mainframe, open-ended image processing solutions.

Unisys Corp. is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 75,000 employees and 60,000 customers in over 100 countries.

NOTE: ImageBanc is a service mark of Cincinnati Bell Information Systems Inc. InfoImage is a trademark of Unisys Corp.

DENVER (OCT. 22) BUSINESS WIRE - Cohig & Associates Inc., Monday announced it has signed an investment banking agreement with Wasatch Fiber Group Inc., the Ogden, Utah-based maker of high performance golf shafts.

Under terms of the agreement, Cohig & Associates will provide Wasatch with counsel on a variety of issues relating to enhancing shareholder value. These

issues will include business and financial planning, capital formation and investor relations.

Cohig & Associates is a full-service investment banking firm specializing in capital formation for companies with revenue in the $3 to $50 million range. The firm's particular emphasis is on established public companies that have a need for working capital to fund promising business opportunities or late-stage product development.

Wasatch Fiber Group's principal product is the Carbon Fiber golf club shaft, which delivers longer and more accurate golf shots. More than 40 percent of the company's sales are made to Wilson and Dunlop, two of the world's leading providers of golf products.

Other customers include discount golf retailers and more than 1200 ''green grass'' pro shops across the country. Wasatch recently reported record net income of $428,000, or 5 cents per share, on record revenue of $3.2 million for the fiscal year ended July 31, 1990. The company has $2 million in total assets, $600,000 in working capital and $1.2 million stockholders' equity.

''Wasatch is indicative of the type of company Cohig & Associates is looking for - well-managed, profitable, young companies with progressively developing business opportunities,'' said Eugene McColley, vice president of corporate finance for Cohig & Associates.

Wasatch joins Charter Golf Inc. and Square 2 Golf as Cohig & Associates third golf industry client company. San Diego-based Charter Golf manufactures and markets the ''Ashworth'' product line which, with more than 3,500 green grass accounts nationwide, is the fastest-growing golf apparel maker in the United States.

Square 2 Golf manufactures a full line of state-of-the-art golf clubs sold in pro shops throughout America. Both Charter Golf and Square 2 Golf have recently reported record sales and earnings.

#90295b0025 10/22/1990 ~Business Wire

LOS ANGELES (OCT. 22) BUSINESS WIRE - Ducommun Inc. (ASE/PSE:DCO) reported net income of $727,000, or 20 cents per share, on sales of $19,132,000 for the quarter ended Sept. 29, 1990.

This compares with net income of $422,000, or 13 cents per share, for the third quarter of 1989 on revenue of $16.81 million.

For the first nine months of 1990, net income was $1,623,000, or 47 cents per share, compared with net income of $859,000, or 26 cents per share, for the first nine months of 1989. Sales were $57,031,000, compared with $51,129,000, an 11.5 percent gain from 1989.

The company recorded an extraordinary tax credit of $311,000, or 9 cents per share, in the third quarter and $703,000, or 21 cents per share, in the first nine months of 1990 for utilization of net operating loss carryforwards, substantially offsetting the provision for taxes.

These amounts are reflected in the net income reported for both periods. Approximately $57 million of federal net operating loss carryforwards remain unutilized subject to certain limitations.

Since July 1988, bank debt has been reduced by 67 percent from $22,996,000 to $7,575,000. Reflecting strong cash flow and improving financial performance, the company and its senior lender renegotiated their bank agreement.

The bank has agreed to lower the interest rate, extend the maturity and allow the company to begin to repurchase its 7-3/4 percent convertible subordinated debentures due 2011.

The board of directors authorized the company to repurchase from time to time up to $2 million principal amount of debentures in the open market or through private transactions depending on market conditions.

Ducommun manufactures components and assemblies for the aerospace industry. The company's product mix during 1990 is expected to be 60 percent commercial, 30 percent military and 10 percent space oriented.

#90295b0029 10/22/1990 ~Business Wire

MILWAUKEE (OCT. 22) BUSINESS WIRE - Autotrol Corp. (NASDAQ:AUTR) Monday reported continued gains in sales and earnings for the third quarter ended Sept. 30, compared to the like period in 1989.

This marks the seventh consecutive quarter in which sales and earnings improved over the prior year.

For the three months ended Sept. 30, 1990, net income was $484,421 as compared with $200,793 in the like 1989 period. Net income per share was 18 cents vs.

10 cents for the year-earlier quarter. Income per share results are not directly comparable due to the additional 780,000 shares issued on completion of the company's rights offering in May 1990. Sales of $9,208,982 were up 8 percent from $8,492,869 a year ago.

''Although consolidated third quarter and year-to-date results compare favorably with last year, our overall business is being negatively effected by the downturn in the economy,'' James W. Schwerdt, president said. ''The performance of our Controls Group was good but did not meet original expectations. However, operating profit at our Aquatrol subsidiary exceeded expectations. Additionally, by retiring all long-term debt in May with the proceeds from the rights offering, we substantially reduced interest expense.''

For the nine months ended Sept. 30, 1990, net income rose 50 percent to $2,284,869 as compared with $1,521,394 a year earlier. Net income per share for the nine months ended Sept. 30, 1990, was 96 cents vs. 78 cents in 1989. Sales were $28,899,777 for the nine months, up 9 percent from $26,439,474 in 1989.

Autotrol Corp. designs and manufactures process controls and systems used principally in the treatment of water and wastewater. The company serves residential, industrial, commercial and municipal markets and over one-quarter of its business is in international sales.

#90295b0033 10/22/1990 ~Business Wire

SEATTLE (OCT. 22) BUSINESS WIRE - SAFECO Corp. Monday reported income before gains from investments of $53.0 million, or $0.84 per share, for the third quarter of 1990, compared with $1.19 per share for third quarter 1989.

Net income per share, which includes gains from investments, was also $0.84 for the quarter, compared with $1.29 for the same period in 1989. Income before gains from investments was $2.80 per share for the first nine months of 1990, compared with $3.12 per share in 1989.

Chairman and Chief Executive Officer Bruce Maines said that the corporation's life and health insurance operations and non-insurance subsidiaries continue to produce strong earnings, but that underwriting losses in property and casualty insurance were higher than usual, due in part to a $16.5 million loss resulting from a severe hailstorm that hit Denver in July.

Third quarter underwriting losses in property and casualty insurance operations were $37.6 million, compared with a loss of $6.8 million a year ago. For the first nine months of 1990, underwriting losses totaled $88

million, compared with $36.9 million for the same period in 1989.

Maines said that losses in the voluntary personal auto line increased from $4.2 million for the first nine months of 1989 to $29.7 million for the first nine months of 1990, primarily due to significantly higher bodily injury claims costs. Non-voluntary personal auto (assigned risk) losses were $19.4 million for the first nine months of 1990, with $14.5 million attributable to California.

Property and casualty investment income for the first nine months of 1990 was $210.4 million, compared with $193.6 million for 1989.

All SAFECO life and health product lines again reported strong earnings. Operating income for the first nine months of 1990 was $84.3 million compared with $80.9 million for the same period in 1989.

SAFECO's non-insurance subsidiaries also produced positive results. SAFECO Properties Inc. reported a pre-tax profit of $2.3 million for the quarter, compared with $1.9 million for 1989.

MILPITAS, Calif. (OCT. 22) BUSINESS WIRE - Plus Development Corp., a wholly owned subsidiary of Quantum Corp. (NASDAQ:QNTM), Monday announced the availability of its new 9 millisecond (ms) Hardcard II XL 50 and Hardcard II XL 105 hard disk drives, at retail outlets, value-added resellers and independent distributors.

Early demand has quickly moved Hardcard II XL into the top-selling position among all Plus products.

''We knew Hardcard II XL would be well-received,'' said Jeff Heimbuck, president, Plus Development. ''However, dealer demand thus far has exceeded our expectations.''

''Judging from early customer demand for Hardcard II XL, it will be our hottest selling hard disk drive this quarter,'' said Vicky Cotten, general manager, mass storage division, Ingram Micro D.

''Clearly, resellers are attracted to the excellent price/performance offered by XL for the 286- and 386-based personal computer upgrade market.''

The world's fastest 3.5-inch disk drive, Kardcard II XL provides users of vintage 286- and 386-based personal computers up to nine times the performance

at the same price, as conventional 28 ms ST-506 disk drives.

The Hardcard II XL combines a 3.5-inch Winchester disk drive with fully integrated drive and controller electronics on a single card. Its slim form factor (less than one inch) enables it to be installed in a single 16-bit slot of a 286- or 386-based industry standard PC.

No other 3.5-inch disk drive with up to 120 megabytes of capacity can match the speed and performance of Hardcard II XLs, according to Dataquest, a San Jose, Calif.-based computer industry market research firm.

''Hardcard II XL drives not only outperform all conventional disk drives, but also set a new standard for disk drive price/performance by breaking technological and pricing barriers for disk drives in the retail channel. It's a technological achievement at a great price,'' said Phil Devin, disk drive analyst at Dataquest.

Hardcard II XL 50 and Hardcard II XL 105 have suggested retail prices of $579 and $999, respectively. Dealers project street prices at or below $399 and $699, respectively.

Plus Development is one of the leading suppliers of mass storage solutions for a wide range of personal computer systems. The company's original Hardcard product line pioneered the hard-disk-on-a-card technology.

In addition to its original 8-bit Hardcard 20 and 40 and 16-bit Hardcard II 40 and 80 families, Plus offers the Plus Impulse, AT Series and SCSI Series, of fixed drives for high performance applications and the Plus Passport line of removable hard disk drives. The company's products are sold worldwide through retail outlets, value-added resellers and systems integrators.

Based in Milpitas, Plus Development is a wholly owned subsidiary of Quantum Corp., a leading manufacturer of hard disk drives for personal computers and workstations for the original equipment manufacturer marketplace.

Note to Editors: Harrdcard, Hardcard II, Hardcard II XL, Impulse and Passport are trademarks of Plus Development Corp.

LOUISVILLE, Ky. (OCT. 22) BUSINESS WIRE - Skolniks Inc. (NASDAQ:SKNS -- Warrants:SKNWS) Monday announced that management had revised downward their

earning estimate for the fiscal year ended July 28, 1990.

Company officials said that accounting adjustments were anticipated in non-cash items such as depreciation, amortization, and deferred taxes which would reduce anticipated earnings. Write-offs of previously deferred pre-opening expenses relating to new restaurants are also expected to affect earnings.

''While we still are profitable for the year, these items will reduce our expected earnings,'' said Chairman, Joe R. Love. While no estimate was made on the actual year-end earnings, Love did say that the company expected to announce its year-end results in the next few days.

Skolniks operates and franchises 45 bakery restaurants under the name Skolniks Bagel Bakery Restaurants in Ohio, Pennsylvania, Illinois, New Jersey, Wisconsin, Maryland, Virginia, Kentucky, Iowa, Tennessee and Colorado.

RENO, NEV. (OCT. 22) BUSINESS WIRE - International Game Technology (NASDAQ:IGAM), announced that the board of directors has increased its stock repurchase authorization by an additional 1,500,000 shares to a total of 2,950,000 shares of its common stock.

To date, the company has purchased, pursuant to this program, 1,392,000 shares (approximately 300,000 of such repurchases being within the last two weeks).

The company also reported Oct. 19, 1990 that the anticipated losses announced Monday at 45 percent-owned Electronic Data Technologies will have an adverse effect on IGT's fourth quarter results. While the exact size of EDT's losses is not presently known, IGT nonetheless currently anticipates that its own fourth quarter and full year results will be within the range of most analysts' current estimates.

SEATTLE (OCT. 22) BUSINESS WIRE - Tera Computer Co. announced Monday that Daniel J. Evans, former U.S. senator, has joined the board of directors of this emerging supercomputer firm.

Tera also announced it has been awarded a new contract for up to $1 million by the Defense Advanced Research Projects Agency to continue development of the company's general purpose supercomputer system. The new contract is in addition to a $1.8 million contract which funded initial development.

Evans served as U.S. senator from the state of Washington from 1983-1989. In 1988 he decided not to seek another term, and upon leaving the senate, formed a consulting firm, Daniel J. Evans Associates.

Evans was president of The Evergreen State College from 1977-1983 and was a three-term governor of the state of Washington, serving from 1965-1977. Prior to assuming elected office, Evans was a partner in the engineering firm of Gray and Evans. Evans received an M.S. degree in civil engineering from the University of Washington.

Besides his Tera directorship, Evans' current responsibilities include the positions of fellow at the Graduate School of Public Affairs at the University of Washington; chairman of the National Academy of Sciences Commission on Policy Options for Global Warming; and a director of Washington Mutual Savings Bank and McCaw Cellular Communications.

Tera Computer Co., headquartered in Seattle, is a supercomputer company with the charter to develop and deliver the most powerful general purpose supercomputer systems available. Currently in the development stage, Tera is designing a scalable shared memory system based on a proprietary parallel architecture that will allow the system to set new standards for computational performance and provide unsurpassed price/performance characteristics. Product availability is slated for late 1993.

GOLETA, CA (OCT. 22) BUSINESS WIRE - Applied Magnetics Corp. (NYSE:APM), the leading independent manufacturer of disk and tape heads for the computer industry, announced operating results for the fourth quarter and year ended Sept. 30, 1990.

William R. Anderson, president and chief executive officer, stated that the company's unaudited financial results reflect record sales of $105,514,000 for the quarter and $368,349,000 for the year. Sales for the fourth quarter are 30.6 percent above the fourth quarter last year.

Sales increased quarter by quarter throughout this year resulting in an overall 17.3 percent increase for the full year.

Net income for the fourth quarter was $1,452,000, or 9 cents per share, compared with a net loss of $6,158,000, or 39 cents per share, for the fourth quarter last year. Net loss for the year was $10.02 million, or 62 cents per share, compared with net income of $1,162,000, or 7 cents per share, in the prior year. This year-end figure includes a net provision of $15.5 million related to a customer involved in a bankruptcy filing.

A net reserve reduction of $300,000 is included in the fourth quarter income before tax, related to inventory recovery associated with this customer. Last year-end income figures included a provision of $7.5 million related to customers experiencing financial difficulties.

Backlog of open orders at Sept. 30, 1990, totaled $178,859,000 compared with $167.8 million at June 30, 1990, and $108.45 million at Sept. 30, 1989.

LOS ANGELES (OCT. 22) BUSINESS WIRE - The ''Fall of The Wall,'' ''Oil Hostages'' and other topics covering the dramatic shifts in the global financial community will be discussed at the Third International Investing Seminar to be held Tuesday, Oct. 23, at 7:30 a.m. in the J.W. Marriott Hotel in Century City, and 12 noon in the Biltmore Hotel's Gold Room in downtown Los Angeles.

Sponsored by Northern Trust of California, the seminar will provide Southern California investors with timely insights into new international investing opportunities. Subjects to be discussed include:

o potential emerging markets as capital flows toward cheaper

labor and more stable political environments;

o the expansion of Asia and its key economic centers;

o the accelerated growth of Europe, with reduced market barriers

and the extension of capitalism to over 140 million new

consumers.

The media is invited to attend either seminar. For a copy of the invitation and a complete package of information, please contact John Lockhart at The Halsted Organization, 213/937-4000.

Northern Trust of California, a wholly-owned subsidiary, now manages over one billion dollars in assets for individuals, not-for-profit organizations and private businesses through its offices in Los Angeles, Newport Beach, San Diego, San Francisco and Santa Barbara.

MENLO PARK, CA (OCT. 22) BIZWIRE - Objectivity Inc. Monday announced that it will market its engineering database management system, Objectivity/DB, for the IBM RISC System/6000 family.

Availability on the IBM RISC System/6000 extends Objectivity's unique support for distributed networks of heterogeneous workstations. Objectivity/DB provides automatic and transparent conversion of incompatible data formats between dissimilar systems.

Objectivity/DB currently supports Sun-3, Sun SPARCstation and DECstation families of computers and has announced support for VAX Ultrix and VAX VMS.

Objectivity's development efforts are in response to customer demand. ''The IBM RISC System/6000 is rapidly becoming a major platform for engineering computing and we are responding to customer requests with this port,'' said Bob Field, president of Objectivity.

''Bringing IBM RISC System/6000 users the advantages of Objectivity/DB is an important step towards Objectivity's goal of becoming the leader in engineering database management systems.''

''The performance of the RISC System/6000 and the functionality of Objectivity/DB combine to deliver a powerful platform for engineering applications,'' said Marilyn Miller, manager of electrical systems, industrial sector division, at IBM.

Beta testing of Objectivity/DB for the RISC System/6000 will take place during the fourth quarter of 1990 with production release planned for the first quarter of 1991.

Objectivity Inc., located at 800 El Camino Real, 4th Floor, Menlo Park, Calif. 94025, provides engineering database management software and support services worldwide. The marketing focus is on providing a foundation level DBMS with the specific functionality and performance demanded by the engineering and scientific markets.

#90295b0097 10/22/1990 ~Business Wire

SANTA CLARA, CA (OCT. 22) BUSINESS WIRE - Applied Materials Inc. Monday announced new aluminum etch capability with its single-wafer, multi-chamber Precision 5000 Etch system.

The addition of this aluminum etch process to the system's well-developed capabilities in single-crystal, polysilicon and silicon dioxide etching gives the Precision 5000 family of Etch systems the full range of etch technologies needed for the most advanced integrated circuits being designed today. At the time of introduction, orders have been received for six systems with metal

etch capability that had been shipped to beta site customers in the United States and Japan.

Applied Materials currently is a worldwide leader in metal etching with its Precision 8330 Etch system, which uses a ''hexode'' architecture for batch processing. Metal etch applications comprise about 30 percent of the estimated $600 million dry etch market in 1990, Wang stated. The Precision 5000 family of Etch and CVD systems currently has an installed base of well over 500 systems worldwide.

The new process uses a plasma etch technology that provides inherently anisotropic results and excellent uniformity across the wafer. The system first etches the wafer in an etch chamber, then automatically transfers the wafer under vacuum to a photoresist strip chamber, where the photoresist mask is removed. Chlorine presence in photoresist is a key contributor to corrosion in aluminum.

The photoresist strip chamber was jointly developed with GaSonics Inc., whose downstream microwave source technology provides the basis for the low-damage integrated stripping process.

The system's metal etch processes feature aluminum as well as barrier films, including TiN, Ti and TiW. Etch rate for aluminum is about 5000 A/minute.

With government restrictions on the use of chlorofluorocarbon-based (CFC) chemistries increasing worldwide, many etch system suppliers are faced with the problem of converting their processes to environmentally benign chemistries. Applied Materials uses no CFC-based gases in the new system's aluminum etch processes.

Applied Materials Inc. is a global growth company based in Santa Clara, Calif. and is the leading independent supplier of wafer fabrication systems to the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition. The company is also a leading manufacturer of ion implantation and physical vapor deposition (PVD) systems.

OAKLAND, CA (OCT. 22) BUSINESS WIRE - Henry J. Salvo, 42, has been elected

vice president-controller, The Clorox Company (NYSE,PSE:CLX), effective Nov. 1.

The diversified manufacturer and marketer of household grocery products announced last August that Salvo would be elected to the post after completing responsibilities associated with the acquisition of the Pine-Sol cleaner and Combat insecticide brands. He succeeds Peter N. Louras, who was appointed vice president-international.

Salvo is an 18-year Clorox veteran. Prior to his most recent assignment as director of business development, he had served as controller for three of the company's operating units. Earlier, he had held management positions in the household products accounting function and in the corporate treasury department.

The Oakland native is a graduate of the University of California (Berkeley-BA, finance), and earned his MBA at California State University at Hayward. He and his family reside in Alamo.

SEATTLE (OCT. 22) BUSINESS WIRE - Horizon Air announced Monday that it will increase its Sun Valley flights, expand its marketing agreement with Northwest Airlines to include Sun Valley, and offer reduced fares from Boise and Sun Valley to Salt Lake City starting Dec. 16.

Horizon will add a fifth Boise-Sun Valley flight, making more service available to those making connections in Boise to Sun Valley from other cities particularly in the Pacific Northwest and California. Moreover, Horizon will double its Seattle-Sun Valley weekend nonstop service from last year, with four nonstops on Saturday and three on Sunday during the ski season.

The added flights are due to a forecasted increase in demand as well as a significant improvement in winter operations. The latter is attributable to Horizon's unique, state-of-the-art Microwave Landing System (MLS) which has enabled Horizon to receive FAA approval for special ''landing minimums'' (the weather conditions required for landing) at the Sun Valley airport in Hailey.

Horizon is the only airline authorized to use the Sun Valley MLS and all of its 37-seat Boeing de Havilland Dash 8s are equipped for its use. The new approval is expected to increase reliability and on-time performance for Horizon's Sun Valley flights.

Passengers flying Northwest Airlines connecting to Horizon Air Sun Valley flights at Salt Lake City or Seattle will enjoy coordinated schedules,

money-saving fares, and one-stop check-in. They will receive their seat assignments and have their luggage checked to Sun Valley when they check-in at their origin city.

As an additional benefit, passengers can earn mileage in either the Alaska Airlines Mileage Plan or Northwest WORLDPERKS frequent flier program for the entire trip.

Horizon Air serves 34 cities throughout five Northwest states and British Columbia. Horizon and Alaska Airlines are wholly owned subsidiaries of Alaska Air Group Inc.

CUPERTINO, CALIF. (OCT. 22) BUSINESS WIRE - The Opus Systems Technology Group announced Monday a manufacturing kit licensing program that allows manufacturers, system integrators and OEMs to manufacture their own Sun Microsystems SPARCstation-compatible workstations.

The Opus Systems Technology Group designed the fully compatible motherboard and ported the SunOS operating system and all other system software to the design.

In a related announcement Monday, Opus Systems Commercial Group announced a broad product line of SPARC-compatible Personal Mainframe products including turnkey desktop workstations and servers, PC add-in boards, and a system motherboard product.

Several major PC manufacturers and distributors that have already purchased manufacturing kits are expected to announce their SPARC-compatible workstations in the upcoming weeks, with mass distribution shortly thereafter.

The manufacturing kit, available from Opus Systems and authorized Opus Systems

resellers, consists of hardware and software components. The software binary distribution tape includes SunOS 4.1, SunView 1.8, C Compiler, NFS, TCP/IP and all SunOS utilities.

The hardware components of the kit include a fully functional motherboard, a bare PCB, film, schematics assembly drawing, FAB drawings, gerber tape and complete bill of materials. The motherboard includes the LSI Logic SparKIT processor chip set announced in March of this year. The one-time price for the manufacturing kit is $25,000.

Like the manufacturing kit, the new Opus Personal Mainframe workstation, server, add-in and motherboard products are 100 percent binary compatible with Sun Microsystems' SPARC family and support the SunOS operating system, SBus peripherals and more than 2,000 SPARCware software applications.

The products will be sold through existing PC/DOS sales channels, targeted primarily at commercial applications.

Opus Vice President of Marketing Tom Lacey stated: ''The availability of SPARCstation-compatible operating system software will facilitate the delivery of a large number of low-cost, high performance, SPARC-compatible workstations built upon the framework of personal computer systems.

Opus Systems, founded in 1983, is dedicated to providing leading edge technology with ease of use through the combination of workstation performance with PC packaging. The products are sold by OEM's, resellers, and a direct sales force both domestically and internationally. Opus Systems is headquartered at Cupertino. Telephone: 408/446-2110.

#90295b0142 10/22/1990 ~Business Wire

IRVINE, CA (OCT. 22) BUSINESS WIRE - Meridian Software Systems Inc.'s newest product, AdaZ breaks down the price and functionality barriers to mainstream Ada use.

AdaZ is the first validated, non-restricted, fully featured Ada development system to be offered for under $500.

AdaZ is an Ada development system that provides a programming environment and tool set similar to many popular software programs today, such as Turbo Pascal and Microsoft C. Its ''DOS-like'' programming environment is designed for exceptional ease of use, via a menu-driven, multiwindowed interface, from which any tool or compiler operation may be invoked.

Ada was originally developed in the mid 1970s to help the government standardize on a common language and help control runaway maintenance costs. Since then its reputation for producing programs that are reliable, reusable and easy to maintain has generated interest beyond government usage. Focused Ada Research, a market research firm, estimated that the Ada market surpassed $1 billion in 1989.

AdaZ is a serious compilation system that offers a fast, efficient, complete, production-quality, validated Ada compiler/a. The package includes the following: the Ada Compiler Environment; a menu driven, multiwindow interface tightly integrated with the compliation system; the DOS environment library; a language sensitive editor; an online language reference manual; a complete set of development tools, including an automatic recompilation tool; a source level Ada specific debugger; library management tools; utility libraries; graphics interface; and friendly documentation.

As an introductory offer, AdaZ is now available directly from Meridian for $149. This introductory price will be offered for 60 days, thereafter AdaZ will list for $495. AdaZ will be demonstrated at the TRI-Ada show held in Baltimore, Dec. 4-6.

AdaZ requires an IBM PC, PS/2 or compatible using MS-DOS version 2.1 or higher. It requires 640K of RAM and a hard disk. The product is available in the 3.5-inch or 5.25-inch diskettes.

Meridian Software Systems, founded in 1981, is the leader in desktop development systems. Continuing its tradition of firsts, AdaZ joins other company product lines including Meridian Ada for the PC (DOS and 386IX), Macintosh (Finder and A/UX), DECstation (ULTRIX), VAX (ULTRIX and VMS), Sun (SUN OS) and Stardent Titan (UNIX) platforms.

#90295b0155 10/22/1990 ~Business Wire

SAN FRANCISCO (OCT. 22) BUSINESS WIRE - First Republic Bancorp Inc. (ASE/PSE:FRC) Monday reported its results for the third quarter of 1990.

Net income in the third quarter of 1990 was $1,192,000, an increase of 346 percent over net income of $267,000 in the third quarter of 1989. Quarterly earnings were 32 cents per share in 1990, up 300 percent compared with 8 cents per share for the like quarter in 1989. For the quarter ended Sept. 30, 1990, net interest income was $4,248,000, up 111 percent compared to $2,014,000 for third quarter of 1989.

For the nine months ended Sept. 30, 1990, First Republic reported net income of $2,510,000, up 231 percent from $759,000 during the first nine months of 1989. For the nine-month period, earnings per share were 70 cents in 1990, up 218 percent compared to 22 cents per share a year ago.

Consolidated assets were $669,959,000 at Sept. 30, 1990. Substantially all of the company's $547,757,000 loan portfolio consists of adjustable rate, first trust deed, California and Nevada real estate secured loans.

As of Sept. 30, 1990, loans and investments over 90 days delinquent had declined to $2,135,000, or less than 1/3 of 1 percent of total assets. The company owned no foreclosed assets.

First Republic continues to maintain a strong capital base. At Sept. 30, 1990 total capital and reserves of $59,320,000 represented 8.9 percent of total assets.

First Republic originated $100 million of loans in the third quarter and has originated a total of $252 million for the nine months ended Sept. 30, 1990.

During 1989, loan originations in the third quarter were $88 million and were $224 million for the first nine months. Real estate loans serviced for third-party investors were $551 million at Sept. 30, 1990, up from $426 million at Dec. 31, 1989.

First Republic Bancorp Inc. functions as both a mortgage banker and direct lender through its two California-chartered FDIC-insured industrial banking subsidiaries, First Republic Thrift & Loan (San Francisco and Los Angeles) and

First Republic Thrift & Loan of San Diego, and a mortgage banking subsidiary in Las Vegas.

SAN JOSE, CALIF. (OCT. 22) BUSINESS WIRE - Hyundai is expanding its line of monitors with the introduction of two new VGA models: the HMM-202 12-inch monochrome, and the HCM-402B color VGA with .39mm dot pitch.

The HMM-202 is priced at $179, the HCM-402B at $499 (both prices are suggested retail). Both models are available immediately. The HMM-202 monochrome VGA

Hyundai's HMM-202 can be used as an economical, high quality monitor with any IBM PS/2 or PC compatible personal computer. Its competitive price makes it a feasible choice for any PC user, and its high resolution is ideal for graphics users not requiring a color display.

The HMM-202 features a 12-inch non-glare screen with paper white display, and an ergonomic tilt and swivel stand. It offers three resolution modes: 640 by 480, 720 by 400, or 720 by 350 pixels. And, it supports 64 grey scales. The HCM-402B color VGA

Hyundai's HCM-402B has a 14-inch screen with .39mm dot pitch, and offers three resolution modes: 640 by 480, 720 by 400, or 720 by 350 pixels. The HCM-402B is IBM PS/2 and PC compatible. It features a non-glare dark face screen, with ergonomic tilt and swivel stand.

In addition to the new HCM-402B and HMM-202, Hyundai's monitor family includes the HCM-402C 14-inch color VGA monitor with 0.31 dot pitch; the HMM-1900, a 19-inch one megapixel double-page monochrome monitor; and a selection of 12-inch and 14-inch TTL monochrome displays.

Hyundai Electronics America is a major supplier of a full line of quality, reliable monitors and personal computer products that are competitively priced.

#90295b0162 10/22/1990 ~Business Wire

SAN JOSE, CALIF. (OCT. 22) BUSINESS WIRE - Hyundai is introducing a new model 16MHz 80386SX personal computer, the Super-386SE.

The new Super-386SE is 8/16MHz switchable, with 0 wait state. It comes with 2MB RAM installed, and can be expanded to 16MB with 1MB SIMM modules and an 8MB memory board. It features support for EMS LIM 3.2 and 4.0, five expansion slots (one 8-bit, four 16-bit), two serial and one parallel port, and includes MS-DOS 4.01. Models are available with hard disk drive options of 40, 100 and 200MB.

The Super-386SE is compatible with OS/2, Windows 3.0 and MS-DOS applications. It is a reliable, versatile system for users wanting to run 80386 applications without having to pay the higher price of a full 80386 machine. According to Dan Lott, Hyundai's director of Marketing, the Super-386SE is undergoing certification by Novell for use as a LAN workstation or file server.

The Super-386SE has 64KB ROM, expandable to 128K. An IDE hard disk drive interface, floppy drive controller and clock/calendar are built in. It includes a 135-watt power supply and a 101-key keyboard.

The Super-386SE has space for three drives: two half-height drives and one slim-line type. The basic system includes a 5.25-inch 1.2MB floppy drive. A 40, 100 or 200MB hard drive is optional. An 80387SX math coprocessor can be added.

Price -- The suggested retail price of the Super-386SE starts at $1,595 for the single floppy drive model; $2,195 with 40MB hard drive; $2,795 with 100MB hard drive; and $3,295 with 200BM hard drive. It is available immediately.

As are all Hyundai personal computer products, the Super-386SE is covered by Hyundai's 18-month warranty, one of the longest in the industry.

Hyundai Electronics America is a major supplier of a full line of quality, reliable personal computer products that are competitively priced.

Hyundai is located at 166 Baypointe Parkway, San Jose, CA 95134; phone 408/473-9200.

#90295b0168 10/22/1990 ~Business Wire

ANAHEIM, CA (OCT. 22) BUSINESS WIRE - Pacific Inland Bancorp (NASDAQ:PIBC) Monday announced that Timothy McLoughlin has been appointed vice president, marketing, at its Pacific Inland Bank subsidiary.

In his capacity within the bank's financial services division, McLoughlin will assist in the continued development and implementation of marketing programs directed at the title and escrow industry. He has extensive sales and sales management experience in that industry and has held increasingly responsible sales and marketing positions for the past 17 years, primarily in Ventura County and throughout Southern California.

He most recently served as vice president/sales manager at North American Title Co. from 1986 to 1990. Prior to holding that position, McLoughlin was senior vice president/marketing director at Fidelity National Title Insurance Co.

Pacific Inland Bancorp is a financial services holding company with headquarters in Anaheim. The Bancorp is comprised of Pacific Inland Bank, a business and professional bank based in Anaheim; Trident Investment Management a registered investment advisor, also based in Anaheim; and PIB Mortgage Co., a wholesale mortgage banking operation with branch offices in San Jose and Anaheim.

#90295b0178 10/22/1990 ~Business Wire
FREMONT, CALIF. (OCT. 22) BUSINESS WIRE - Sigma Designs Inc. (NASDAQ:SIGM) Monday announced that it will integrate into each of its monochrome and grayscale display products the proprietary circuitry used to reduce electromagnetic field (EMF) radiation typical to all CRT-based monitors and display systems.

It is the first time in the personal computer industry that low-EMF technology has been offered as a standard feature on both Macintosh and IBM-compatible computer monitors.

In July, Sigma brought its low-radiation products developed for Swedish consumers to the American market and made them available through its U.S. dealers at $200 above suggested retail prices. Beginning Nov. 15, 1990, Sigma will offer its proprietary Low-Emissions technology at no additional cost in its entire line of monochrome and grayscale products for Macintosh and IBM-compatible computers.

The monitors will bear Sigma's Low-Emissions logo and are targeted at the desktop publishing, document imaging and standard office markets.

Over the last two decades, researchers have focused on the potential health hazards of EMFs from many electronic devices, including power lines, electric blankets, and computer monitors and video display terminals. Some have attempted to link the exposure of EMFs emitted by electrically powered systems to specific health problems, including cancer and miscarriage. (A bibliography of related studies is available from Sigma.)

Sigma also today announced the availability of PageView GS, a 15-inch monitor for Macintosh that offers all the basic capabilities of the Apple Portrait 15-inch monitor and is priced at $899. It is the first Macintosh monitor to offer Sigma's Low-Emissions technology as a standard feature.

#90295b0184 10/22/1990 ~Business Wire

SANTA ANA, CALIF. (OCT. 22) BUSINESS WIRE - California Commercial Bankshares (OTC), parent of National Bank of Southern California, Monday reported that its net income increased 20 percent to $800,641 for the third quarter ended Sept. 30, 1990, compared with income of $665,670 for the third quarter last year.

Earnings per share increased 9 percent from 32 cents per share in the quarter ended Sept. 30, 1989, to 35 cents per share for the quarter ended Sept. 30, 1990. Per-share information gives effect to the 3-for-2 stock split paid July 16, 1990, to shareholders of record June 29, 1990.

Income for the nine months ended Sept. 30, 1990, increased 42 percent to $2,408,263 and earnings per share increased 32 percent for the nine months ended Sept. 30, 1990.

Total assets increased 22 percent to $330,177,376 compared with assets of $270,287,918 one year ago. Shareholders' equity increased to $16.52 million from $13.18 million at the end of the third quarter last year.

William Jacoby, president and chief executive officer of California Commercial Bankshares, said: ''The amount of the solid third-quarter earnings was very similar to the results posted during the first two quarters of this year. The net income increase was again due to the substantial increase in earning assets in the company's primary subsidiary, National Bank of Southern California.''

California Commercial Bankshares is a publicly traded bank holding company which owns 100 percent of National Bank of Southern California. The Bank has regional offices in Santa Ana, El Toro and Orange and specializes in serving businesses, professionals and the real estate industry.

#90295b0200 10/22/1990 ~Business Wire

SAN FRANCISCO (OCT. 22) BUSINESS WIRE - US Sprint Monday announced the TPX400(sm), an X.400 messaging switch that will allow large organizations with multiple electronic messaging systems to exchange messages through a single communications processor.

Without the TPX400, organizations with several different messaging systems must use costly dedicated lines or a public electronic messaging service to communicate. The TPX400 allows those disparate systems to exchange X.400-formatted messages directly with one another through routing and delivery schemes they can control.

It complements existing messaging systems, including US Sprint's Telemail(R) systems, by offloading the processing of X.400 messages to a specialized system.

The TPX400 is based on the 1984 CCITT-recommended X.400 standard for universal message exchange. It is designed to work with all X.400-based electronic messaging systems in either local area network (LAN) or wide area network (WAN) environments. This includes interconnecting office automation systems and large distributed electronic mail networks such as US Sprint's Telemail(R) systems.

The TPX400 functions within a private electronic messaging network much like an X.25-based packet switch in a data communications network. The TPX400 allows disparate electronic mail systems to efficiently route traffic via

point-to-point leased circuits, LANs, WANs and dial-up telephone connections.

The TPX400 provides private network users a single communications concentrator through which multiple messaging networks can be interconnected and resources can be maximized.

It offers dynamic alternate routing capabilities, store-and-forward functions that take advantage of off-peak transmission times, and acts as a front-end processor to protect the data integrity of the host computers that are connected to it.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

UNIX is a registered trademark of AT&T.

#90295b0204 10/22/1990 ~Business Wire

FREMONT, CALIF. (OCT. 22) BUSINESS WIRE - Focus Information Systems Inc. announced Monday the 2theMax 486I motherboard for IBM 486 PCs and compatibles.

The 2theMax 486I represents Focus' initial entry into the IBM 486 motherboard marketplace. The product will be available in early December of 1990.

With a flexible burst secondary cache expandable from 64K to 128K to 256K, the 2theMax 486I uses the latest Intel CPU-486 technology to enhance board performance. Significant features include Weitek 4167 coprocessor support and up to 32MB of on-board memory.

''The 2theMax 486I provides manufacturers and users of 486-based PCs and compatibles with a superset of features not found in most competitor boards,'' said Jose Shen, Focus' vice-president of engineering.

''What we are seeing in the 486 PC market place is a need for maximum performance in many applications, such as computer-aided design, and UNIX or Novell file servers. The 2theMax 486I motherboard with attributes such as built in secondary cache memory will significantly contribute to that performance,'' added Shen.

The 2theMax 486I is accompanied by a one year guarantee and a seven-day turn-around service program. Focus also provides telephone support for the 2theMax 486I.

The 25MHz 2theMax 4861 with a 128K secondary cache retails for $2,800. The

33MHz with a 128K secondary cache retails for $2,950.

Located in Fremont, Focus Information Systems Inc. is a two-year-old manufacturer and designer of high-resolution Super VGA cards; and, ISA and EISA 486 motherboards. By using state-of-the-art surface mount technology, Focus delivers low-cost, high-performance products to the distributor, reseller and OEM markets.

IRVINE, CALIF. (OCT. 22) BUSINESS WIRE - Each time Mr. Fax customers order paper for their fax machines, the Irvine company is sending a tin of Famous Amos Homestyle Cookies to a soldier in the Persian Gulf.

Sent with the cookies is a personalized note from the Mr. Fax customer.

Companies wishing to send cookies to a soldier can call Mr. Fax toll-free at 800/262-8214 (in California call 714/830-9861).

Olive Kaplanis, a Mr. Fax customer in Sacramento, said, ''Our office has to order fax paper anyway and this is a great opportunity to do something nice for a G.I.''

California state Assemblyman Gil Ferguson, decorated combat veteran of three wars, said: ''Support on the home front by sending care packages does wonders for morale. The effort by Mr. Fax and other patriotic Americans is an example of the good that comes out of the people of this nation when faced with a crisis.''

Mr. Fax manufactures and sells fax paper to more than 60,000 American businesses.

''Mr. Fax customers are showing support for all American men and women assigned to the Persian Gulf region. We hope this will help brighten the spirits of the G.I.'s,'' said Mr. Fax Marketing Manager Kristie Schwab.

SAN FRANCISCO (OCT. 22) BUSINESS WIRE - US Sprint Monday announced two new enhancements to its SprintMail(sm) electronic messaging service: a SprintMail news clipping service and Mac SprintMail, a communications software package geared specifically for the Apple(R) Macintosh(R) family of personal computers.

The SprintMail news clipping service allows SprintMail users to custom-design a news clipping profile which will bring the latest newswire information right to their SprintMail mailboxes.

The service ''filters,'' from some 15 international news services, only those stories of interest to the user. The SprintMail news service scans approximately 6,000 daily newswire stories for domestic and international news market, weather and sports information, SEC filings and feature stories which match the user's profile.

The pre-selected stories are automatically delivered to the user's SprintMail mailbox, usually within minutes after the wire services post the news. Upon receipt, the SprintMail news clipping service formats and distributes high-priority stories.

There is no monthly charge for the SprintMail clipping service. Users will be billed only for normal character and access charges, the same as incurred when receiving any SprintMail electronic message.

Mac SprintMail lets Macintosh users access SprintMail through familiar commands, and offers word processing capabilities that allow them to reduce communications costs.

Mac SprintMail offers a single, user-friendly interface through which users can compose electronic messages off-line, reducing on-line service charges. Mac SprintMail, scheduled for release in January 1991, also will allow users to send fax, telex and hard copy messages right from their Macintosh PCs.

A unique Mac SprintMail feature allows users to combine ASCII and binary files within a single message. For example, an engineer working on a Macintosh in Chicago would be able to send a proposal containing both text and schematics to a colleague in New York, in one Mac SprintMail document.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

#90295b0216 10/22/1990 ~Business Wire

CLEVELAND (OCT. 22) BUSINESS WIRE - Cleveland-Cliffs Inc. today reported earnings, before special items, of $1.7 million, or 15 cents per common share, for the third quarter of 1990. Comparable earnings in the third quarter of 1989 were $16.9 million, or $1.46 a share.

For the first nine months of 1990, the Company recorded earnings, before special items, of $22.4 million, or $1.92 a share, versus comparable earnings of $40.4 million, or $3.49 a share in the first nine months of 1989.

The decline in third quarter operating results was mainly due to the strike on Aug. 1 by hourly employees of the Empire and Tilden mine partnerships which are managed by Cliffs in the Upper Peninsula of Michigan. The continuing work stoppage resulted in idle costs, lower royalty and management fee income, and lower sales profit.

The decline in nine month operating results was caused by the third quarter strike, plus lower sales and production volumes and higher operating costs in the first half of 1990 due mainly to the Tilden magnetite pellet production plan and start-up problems. These factors were partly offset by lower net interest expense.

Including the special items, 1990 third quarter net income was $4.2 million or 36 cents per share, versus $16.5 million or $1.42 a share in 1989, and 1990 nine-month net income was $23.8 million or $2.04 cents a share, versus $47.3 million, or $4.08 a share in 1989.

Cliffs-managed mines in North America produced 25.1 million tons of pellets in the first nine months of 1990 versus 30.0 million tons in the first nine months of 1989. Third quarter production was 7.1 million tons in 1990 versus 9.7 million tons in 1989. Lower production for the first nine months was due to the strike at Empire and Tilden Mines, a programmed decrease in production at the Tilden Mine, and the closing of the Sherman and Adams Mines in Ontario, Canada on March 31, 1990. Lower production for the quarter was caused mainly by the strike.

Cliffs' total operating revenues from continuing operations were $89.6 million and $232.3 million for the third quarter and first nine months of 1990, respectively. These compare with revenues of $94.8 million and $262.4 million in the corresponding 1989 periods. Pellet sales in the first nine months of 1990 were 5.0 million tons compared with 5.6 million tons in 1989. Third quarter sales were 2.2 million tons in 1990 versus 2.0 million tons in 1989.

Subsidiaries of Cleveland-Cliffs Inc manage six iron ore mines in North America and Australia. The Company holds a major iron ore reserve position in the United States and is a substantial iron ore merchant.

ST. GEORGE, UT (OCT. 22) BUSINESS WIRE - SkyWest (NASDAQ:SKYW), The Delta Connection, announced that September traffic reached 17.4 million revenue passenger miles, a 7.7 percent increase over the same period in 1989.

Available seat miles were up 18 percent to 45.8 million miles resulting in a 38 percent load factor for the month. SkyWest airline boarded 87,900 passengers during September.

Commenting on the statistics, Ron Reber, vice president of sales and market planning, said: ''Our September traffic was adversely affected by both the economic situation and the Middle East crisis. The recent fare increases are forcing our business customer to closely evaluate and possibly eliminate all nonessential travel.

''We are managing our seat inventory with guarded precision and in an attempt to provide the right mix of coach, discount and deeply discounted seats for our customers. Our October traffic appears to be stabilizing directly reflecting the mood of the business community.''

SkyWest Airlines is a Delta carrier providing scheduled air service to 43 cities in eight western states. The regional airline recently announced that it had signed an interim agreement to purchase 20 Saab 2000 regional jetprop aircraft. Delivery for the high-speed 50-passenger aircraft is scheduled to begin in 1994. The aircraft will supplement SkyWest's existing fleet of Fairchild Metros and Embraer EMB-120s.

#90295b0238 10/22/1990 ~Business Wire

PALO ALTO, CA (OCT. 22) BUSINESS WIRE - Collagen Corp. Monday announced first quarter earnings of $479,000, or 5 cents per share, on total product revenues of $15,783,000.

This compares to earnings of $859,000, or 10 cents per share, on product revenues of $12,438,000 for the first quarter of FY 1990.

The decline in income is attributable principally to the decision by Bristol-Myers Squibb in July 1990 not to renew a joint development program with the company's Celtrix Laboratories subsidiary.

First quarter revenues at Collagen Biomedical were $13,223,000, while revenues at the Target Therapeutics subsidiary totaled $2,465,000. Compared to the like period last year, revenues at these two divisions increased by 27 percent.

In late September, the company announced that continued ownership of its Celtrix Laboratories subsidiary would reduce earnings during the first half of FY 1991 to approximately half of last year's income. Without Celtrix and excluding a one-time payment during the first quarter of FY 1990, the company's operating income would have shown a 34 percent increase over the prior year period.

Collagen Corp. develops, manufactures and markets biomedical implants for the augmentation and repair of aged or damaged tissues, and specialized catheter systems for the treatment of neurovascular disorders.

SCOTTS VALLEY, CA (OCT. 22) BUSINESS WIRE - Seagate Technology Inc. (NASDAQ/NMS:SGAT) Monday reported net sales of $630,006,000 and net income of $13,930,000, or 22 cents per share, for the three months ended Sept. 30, 1990.

Results for the quarter ended Sept. 30, 1990, include the operations of Imprimis Technology (''Imprimis''). Imprimis, the former disc drive and related technologies subsidiary of Control Data Corp., was purchased by the company effective Oct. 2, 1989. The acquisition has been treated as a purchase for accounting purposes.

Seagate is the world's leading supplier of disc storage products to original equipment manufacturers and remarketers.

IRVINE, CA (OCT. 22) BUSINESS WIRE - McGaw Inc., formerly known as Kendall-McGaw Laboratories Inc., begins operations Monday as an autonomous company for the first time in four decades, following the acquisition of this Irvine-based manufacturer of fluid, drug-delivery and nutritional products from Kendall Co. of Boston.

''McGaw returns to its roots today as an independently owned company,'' said James M. Sweeney, who headed the investor group that purchased the company and who will serve as chairman and chief executive officer. ''We are now completely responsible for our own destiny and success.''

McGaw Begins on Solid Footing

Financing for the transaction was secured with the assistance of Alex. Brown & Sons in Baltimore and Donaldson, Lufkin & Jenrette Securities in New York, both highly respected investment bankers. Debt financing was provided by some of the nation's most prominent companies and their subsidiaries, including Wells Fargo Bank, General Electric, Equitable Life, General Motors and Security Pacific Bank.

Sweeney, Alex. Brown, Donaldson, Lukin & Jenrette, Equitable Life, General Motors, General Electric and Wells Fargo also provided equity funding, as did two venture-capital funds, Ventana Growth Funds and Enterprise Partners.

''The fact that this transaction has been successfully consummated with such favorable financing is an extremely positive reflection on the strength of the new management team and the company's capitalization,'' said Thompson Dean, senior vice president of Donaldson, Lufkin & Jenrette.

Added Rick Bryant, managing director of Alex. Brown: ''Jim Sweeney has a proven track record of success. We have great confidence that he will make McGaw a top player in the fluid, drug-delivery and nutritional support products business.'' Sweeney Returns ''Home''

Sweeney already possesses considerable familiarity with McGaw. He was the marketing director at American-McGaw in the 1970s. In 1979 he left to form Home Healthcare of America, the nation's first home infusion therapy company, whose name was later changed to Caremark Inc.

Caremark went public in 1983, and was subsequently sold in 1987 to Baxter International for $586 million. In 1988 Sweeney left Caremark to form Add Value Partners, a private investment firm.

''Our industry is ready for alternative ways of doing business, and McGaw is well positioned to provide a new direction and approach,'' said Sweeney. ''We will be a marketing-oriented, customer-driven company that will capitalize upon our size, agility and entrepreneurial spirit to respond quickly to changes in the marketplace to meet our customers' needs.''

#90295b0264 10/22/1990 ~Business Wire

SAN JOSE, CA (OCT. 22) BUSINESS WIRE - International CMOS Technology Inc. (ICT) (OTC, Pink Sheets) Monday announced the immediate availability of two new speed enhanced PEEL (Programmable Electrically Erasable Logic) Arrays supporting system clock rates approaching 60 MHz.

PEEL Arrays, a family of ''multi-level'' PLDs (Programmable Logic Devices), offer a hybrid solution between FPGA (Field Programmable Gate Arrays) and traditional PLDs. PEEL Array architectures combine the logic cell flexibility of FPGAs, with the ''wide-gate'' speed performance of traditional PLDs, in a mid-range density and pin-count.

The new PEEL Arrays, the PA7024P-1 and PA7024J-1 in 24 pin DIP and 28 pin PLCC packages respectively, have 20 I/Os (with register/latch), 2 input/system-clocks, and 20 burried logic control cells. Each cell can be user configured to have D, T or JK registers with independent or global clocks presets and resets.

With two outputs per cell the PA7024 can implement up to 40 output logic functions, 20 of which can be burried for multi-level logic.

''The multi-level logic architecture of PEEL Arrays make them ideal for

integrating multiple low density PLDs plus random logic without the performance loss encountered with FPGAs,'' stated Robin Jigour, ICT's director of Marketing.

''Designs currently requiring 'PLD to PLD' interconnections can now be integrated into our new PEEL Arrays taking advantage of 13ns combinatorial delays and 58.8 MHz clock rates for wide binary counters and state machines.''

PEEL Arrays are one of a new breed of ''multi-level'' PLDs that have emerged over the last year. Others include Altera's MAX and AMD's MACH.

''We're often asked how PEEL Arrays compare,'' said Jigour, ''It's fairly simple, the MAX architecture sacrifices speed for flexibility, and MACH sacrifices flexibility for speed. PEEL Arrays provide both speed and flexibility eliminating design trade-offs.''

The PA7024P-1 and the PA7024J-1 are currently available in commercial versions and are priced at $16.67 and $17.42 respectively in 1,000-piece quantities. Development support is provided with ICT's PLACE Advanced Development Software, PDS-1 PEEL Development System as well as third party programmer manufacturers.

International CMOS Technology Inc. (ICT) designs, manufactures and markets user programmable integrated circuits. ICT's products include a variety of memory and logic devices, and the development tools for designing with user programmable products. ICT is publicly owned.

CARPINTERIA, Calif. (OCT 22) BUSINESS WIRE - Digital Sound Corp. (NASDAQ/NMS:DGSD) Monday announced that its board of directors has authorized the company to repurchase up to 2.85 million shares of common stock for cash in the open market, or in negotiated or block transactions, from time to time as market and business conditions warrant.

The company has approximately 17.7 million shares outstanding.

A portion of the repurchased shares may be used for the company's employee benefit plans, and the balance will be available for other general corporate purposes. No time limit was set for the completion of the program.

Bryan Grummon, the company's president, stated that the board decided to pursue this course of action after a review of the company's financial position. ''Under current market conditions, we may have an opportunity to

buy back our shares at what we believe are attractive levels.''

Digital Sound Corp. designs, manufactures and markets general purpose voice processing platforms for voice messaging, interactive voice response and other applications. For further information, contact Eugene F. Hovanec, vice president-finance and chief financial officer, Digital Sound Corp., 6307 Carpinteria Ave., Carpinteria, Calif. 93013, telephone 805/566-2000.

SALISBURY, N.C. (OCT. 22) BUSINESS WIRE - Omni Capital Group Inc. (NASDAQ:OCGI) Monday announced financial results for its first quarter ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, net income rose 27.8 percent to $1,392,000, or 55 cents per share, compared with net income of $1,089,000, or 43 cents per share, in the same period last year.

At Sept. 30, 1990, total assets were $534,180,000, (an increase of 3.8 percent over 1989), net loans and mortgage-backed securities were $474,918,000, (an increase of 5.6 percent over 1989), and deposit accounts were $449,721,000, (an increase of 4.1 percent over 1989). Total stockholders' equity was $55,785,000, or 10.4 percent of total assets as of Sept. 30, 1990.

Commenting on the results, David B. Jordan, president and chief executive officer, said: ''In light of recent happenings in some financial institutions we are pleased with the strength and quality of Omni's results for the first quarter.

''Our continued earnings growth is attributable to an increased net interest income margin and operating efficiences resulting from our merger/conversion transactions.''

Omni's asset quality remained extremely high, with non-performing assets amounting to approximately 0.5 percent of total assets at Sept. 30, 1990.

Jordan also announced that on Oct. 18, 1990, the board of directors of Omni declared a quarterly cash dividend of 7 cents per share payable on Nov. 12, 1990, to shareholders of record at the close of business on Oct. 29, 1990.

Omni Capital Group Inc., is a multi-thrift holding company headquartered in Salisbury, with three wholly owned subsidiaries: Home Federal Savings Bank of Salisbury, Citizens Savings, FSB of Concord, and Home Federal Savings Bank of Kings Mountain.

Home Federal-Salisbury serves Salisbury and the surrounding area through its home office and two full service branch locations, Citizens serves the Concord Kannapolis, and Harrisburg markets through its main office and four full service branch locations, and Home Federal-Kings Mountain serves Kings-Mountain, Gastonia and Bessemer City through its home office and two full service branch locations.

#90295b0610 10/22/1990 ~Business Wire

FULLERTON, CALIF. (OTC. 22) BUSINESS WIRE - Beckman Instruments Inc. (NYSE:BEC) reported Monday sales of $201 million for the third quarter ended Sept. 30, 1990, an increase of 7.7 percent from the same period a year ago.

Sales for the first nine months of the year were $589.4 million, compared with $586.2 million in 1989.

Net earnings for the third quarter were $9.6 million, a 2 percent increase from 1989. Earnings per share remained constant at 33 cents. Earnings for the first nine months were $26.2 million, or 91 cents per share, compared with $31.5 million, or $1.11 per share in the year-ago period.

During the third quarter Beckman began taking orders for the Synchron CX7 clinical chemistry system, the largest member of the company's modular family of blood-chemistry analyzers, and for the Array 360 system, which performs sophisticated analyses of circulating proteins. Delivery of both will begin in 1991.

These and other new products are the result of Beckman's ongoing investment in research and development, which totaled $59.7 million during the first nine months of the year, a 17 percent increase year to year.

Sales revenues thus far in 1990 have been affected by budget limitations among publicly funded research laboratories and by a trend among clinical laboratories toward leasing rather than outright purchase of instrument systems.

Lou Rosso, president and chief executive officer, said: ''Among users of bioanalytical research instruments, the fact that there have been fewer research grants available in the United States has meant fewer purchases of new instruments.

Beckman Instruments develops, manufactures and markets automated systems and supplies used for biological analysis in laboratories for research, quality control and clinical diagnostics. The company has 7,100 employees in 36

facilities throughout the world and operates in more than 120 countries.

#90295b0626 10/22/1990 ~Business Wire
ALAMEDA, CALIF. (OCT. 22) BUSINESS WIRE - Ithaca Software has appointed Glen D. Vondrick as vice president of sales and marketing.

Prior to joining Ithaca Software, Vondrick was vice president, sales of the Computer-Aided Design Group (CADG), a leading supplier to the Fortune 500 of facilities management software. Vondrick joined CADG as one of its first salesmen during its start-up phase. Four years later, he led a worldwide sales organization of professionals to record sales.

Vondrick's earlier experience over the last 12 years, includes senior sales and marketing management positions at Prime Computer Inc., Pyramid Technology Corp. and Honeywell Information Systems.

Vondrick received his bachelor of science in public management from the University of Arizona.

''Glen Vondrick is a very skilled and proven manager of software sales organizations that market complex products and services into sophisticated customer bases. His leadership and experience, coupled with the outstanding team already in place, puts Ithaca Software in position to fully capitalize on its technical achievements,'' said Stephen F. Mendel, Ithaca Software's president and chief executive officer.

In August of 1986, Ithaca Software introduced the HOOPS Graphics System at ACM Siggraph '86. Since 1987, HOOPS has been licensed to thousands of software developers at more than 500 commercial and 100 academic sites. HOOPS was the first 3-D graphics tool system available on X Windows, DOS, Macintosh and OS/2 machines.

It is the only system capable of producing advanced graphics applications across the entire spectrum of engineering workstations and personal computers. In 1988, HOOPS won a Digital Review Target Award Nomination. In 1989, HOOPS received BYTE magazine's Award of Distinction.

Ithaca Software develops, markets and supports graphics development systems for personal workstations. Ithaca Software incorporated in 1985, is a privately held company based in Alameda, Calif., with sales and support offices in Dallas, Tokyo and Basel, Switzerland.

#90295b0627 10/22/1990 ~Business Wire

BAKERSFIELD, CALIF. (OCT. 22) BUSINESS WIRE - Cal Rep Bancorp Inc. (NASDAQ:CRBI), the one-bank holding company for California Republic Bank, reported its net income for the first nine months of 1990.

Net income for this time period was $4,911,115, a decrease of 6.7 percent over the net income of $5,266,610, earned in the comparable period in 1989. On an earnings per share basis this reflects $1.77 per share for the first nine months vs. $1.90 earned in 1989.

For the third quarter of 1990, net income totaled $1,605,740, or 58 cents per share. This represents a decline of 13.6 percent from $1,857,758, or 67 cents per share, earned in the comparable quarter of 1989.

Net interest income for the first nine months of 1990 totaled $23,491,633, an increase of 7.1 percent over the same period in 1989. At Sept. 30, 1990, loans totaled $347,265,527, this represented a 6.2 percent increase over last year. Although loans have grown over last year's totals, during the third quarter of 1990, loan demand has softened.

At June 30, 1990, loans totaled $351,048,393. Deposits for the first nine months of 1990, totaled $511,593,909, an increase of 8.5 percent over the same period of 1989. The net interest margin for the total earning assets during the first nine months of 1990 was 6.85 percent, compared with 7.48 percent in 1989.

''The net interest margin declined because we were unable to invest the

increased deposits in the most profitable manner, for example, the lack of loan demand precludes investing in new loans yielding a market rate of approximately 12 percent vs. market investments yielding 8 to 9 percent,'' stated Leo J. Pierucci, president and chairman of California Republic Bank.

Total assets at Sept. 30, 1990, were $559,205,160, an increase of 9.5 percent over the same time period in 1989.

California Republic Bank is an independent bank with corporate office headquarters in the Southern San Joaquin Region of California. The bank, founded in 1953, operates 16 branches; 12 in the Bakersfield metropolitan area two in the communities of Frazier Park and Tehachapi and four in Northern Los Angeles County; in the communities of Lancaster, Palmdale and Quartz Hill.

LYNNWOOD, WA (OCT. 22) BUSINESS WIRE - INTERMEC Corp. (NASDAQ:INTR), world leader in automated data collection for information management, Monday reported revenues and earnings for the second quarter and first half of fiscal 1991.

INTERMEC said revenues were $46.4 million in fiscal 1991's second quarter, higher than any previous quarter in the company's history. Second quarter revenues were up 15 percent from revenues of $40.4 million a year ago. The commercial business, which comprises about 90 percent of INTERMEC's revenues, has grown at 18 percent for the most recent three quarters compared to the like three quarters a year ago. Net income was $1,578,000 or $.20 per share for the period ended Sept. 30, 1990, compared to $2,721,000 or $.37 per share in last year's second quarter. Revenues under the LOGMARS contract were $1.9 million as a result of increased spending by the Department of Defense at the government's fiscal year end.

For the first half of fiscal 1991, INTERMEC's revenues rose 13 percent to $88,282,000 compared to $78,230,000 in fiscal 1990's first six months. Net income for the first half ended Sept. 30, 1990, was $1,725,000 or $.21 per share compared to $4,771,000 or $.65 per share in the like period a year ago.

''INTERMEC's record second quarter revenues attest to the solid, world-wide customer base the company has developed in automated data collection systems '' said John W. Paxton, chairman, president and chief executive officer. ''In addition to record revenues, the company ended the quarter with a strong backlog of orders for future shipment.

''Our earnings last quarter were lower than we would like, but we hope that

the investments we are making will prove to be of long term benefit to our shareholders. INTERMEC has made significant investments in new product introductions, established a European headquarters and acquired a label products firm in The Netherlands. We have also made significant investments in our new state-of-the-art facility, in the acquisition of our domestic distribution channels and in our employees. These investments are beginning to pay off through greater manufacturing efficiencies and higher employee productivity,'' Paxton said.

The company also reduced inventory by $200,000 in the second quarter to $31.8 million from $32 million, and by over $2 million since the beginning of the fiscal year.

Earlier this month at SCAN-TECH '90 in Atlanta, INTERMEC announced that the Federal Communications Commission has granted the company the first and, so far, only license for the sale of spread spectrum Radio Frequency Data Collection systems. This new system eliminates the need for cables and hard-wiring of interconnected devices, requires no FCC site license and transmits data at a much faster rate and with less interference than conventional, narrow band, radio frequency technology.

During the quarter INTERMEC introduced Collect, a data collection software package which runs on Windowst 3.0 and enables users to quickly configure their own batch data collection system on a PC.

''With the tremendous popularity of Windows, Collect is an important addition to our software line,'' Paxton stated. INTERMEC also introduced DCM/2, a new data collection software package for OS/2-based systems, as well as added enhancements to ShopScan 3.0, the existing MS/DOS-based software systems. ''INTERMEC systems are designed to work with all major computer platforms. We will continue to create hardware, software, and services designed to respond to our customers' changing needs,'' he added.

On March 30, INTERMEC said management had been authorized by its board of directors to repurchase up to 1 million shares of its common stock. The company has now repurchased approximately 575,000 of its shares in the open market.

''Despite the cost of these repurchases, our cash position is healthy, because lower inventories and shorter receivable collection periods helped increase cash-flow from operations,'' Paxton noted.

INTERMEC Corp., a pioneer in bar code technology and world leader in automated data collection for information management, is a fully-integrated data collection systems company which designs, manufactures and markets the most comprehensive line of hardware, software, systems, service and supplies available world wide.

BREMERTON, WA (OCT. 22) BUSINESS WIRE - GNW Financial Corp. (NASDAQ:GNWF), the holding company for Great Northwest Federal Savings and Loan Association, Monday reported that net income increased 15.6% in the third quarter ended Sept. 30, 1990, compared to the same quarter a year ago.

''Continued economic strength in our primary markets of Bremerton and Washington's Olympic peninsula contributed to the 46% increase in loan production compared to last year's third quarter,'' stated Raymond L. Soule, chairman and chief executive officer.

GNW Financial's third quarter net income was $1,057,000, or $.52 per share, compared to $914,000, or $.45 per share, in the same quarter a year ago. For the first nine months of 1990, net income increased to $2.9 million, or $1.44 per share, from $2.7 million, or $1.32 per share, in the first nine months of 1990.

Net interest income, after loan loss provision, increased 16.5% to $4 million compared to $3.4 million in the third quarter a year ago. Non-interest expense, which has consistently been below net interest income for several years, totaled $3.4 million in the quarter ended Sept. 30, 1990, compared to $3 million in the like quarter a year ago. Net interest margin this quarter was 2.78% compared to 2.54% in the third quarter last year. Non-interest income increased 28% to $1,037,000 compared to $808,000 in the third quarter of 1989.

''In the last nine months we have reduced our portfolio of foreclosed real estate by almost 60%, enabling us to put more than $1.5 million back into interest earning assets. Even though REO is lower than it has been in a decade, our goal is to further reduce this portfolio in the coming quarters,''

said Soule.

''Growth in non-interest income and our conservative lending practices have allowed us to buck the trends in our industry,'' noted Soule. ''Our annualized return on average tangible equity reached 11.1% for the third quarter,'' Soule added.

GNW Financial reported a 30% decrease in non-performing assets during the first nine months of 1990, while average interest earning assets increased 5.1%. Non-performing assets declined to $4.9 million or 0.76% of assets at Sept. 30, 1990, from $7.0 million or 1.14% of assets at the beginning of the year.

The corporation also announced that its board of directors declared GNW Financial's sixth consecutive regular quarterly cash dividend of $.05 per share payable on Nov. 15, 1990, to shareholders of record Oct. 30, 1990.

Total assets were $647.5 million at Sept. 30, 1990, compared to $617.4 million at Dec. 31, 1989. Deposits increased $19.1 million to $508.2 million since Dec. 31, 1989. The deposit growth resulted principally from successful marketing campaigns for longer-term certificate of deposit accounts during the second quarter.

Shareholders' equity increased to $47.7 million as of Sept. 30, 1990, compared to $44.9 million at the end of 1989. Stated book value at the end of the quarter was $24.32 per share and tangible book value, excluding goodwill, was $19.74 per share.

Great Northwest Federal Savings and Loan Association has applied to convert to a state-chartered savings bank. When this application is approved, GNW Financial Corp. plans to convert to a bank holding company. This conversion will provide the corporation with new growth and expansion opportunities.

Great Northwest Federal Savings and Loan Association was established in Bremerton in 1916 and operates 17 branches in the Puget Sound and Spokane areas.

#90295b0632 10/22/1990 ~Business Wire

BELLEVUE, WA (OCT. 22) BUSINESS WIRE - Charles M. Pigott, chairman and chief executive officer of PACCAR Inc, announced Monday the following results for the third quarter and first nine months of 1990:

(in thousands except per share amounts)

	3 months ended Sept. 30		9 months ended Sept. 30	
	1990	1989	1990	1989
Manufacturing net sales	$617,620	$833,611	$1,908,350	$2,518,402

Financial services interest income and other	47,262	48,733	142,657	142,741
Net income	$ 14,044	$ 48,263	$ 57,921	$ 143,049
Net income per share	40 cents	$ 1.38	$ 1.66	$ 4.07

Worldwide sales and backlogs in 1990 for the Class 8 truck industry continue at levels well below those of 1989. PACCAR's sales reflect this industry trend with third quarter 1990 truck sales comparable to second quarter sales, but industry overcapacity has impacted pricing. Consequently, third quarter 1990 net income was 25 percent lower than second quarter. While still below year-earlier levels, backlogs are up over the end of second quarter 1990 as both Kenworth and Peterbilt have seen a modest rise in orders.

Profitability of PACCAR's financial services companies in the third quarter was above second quarter but remains behind the third quarter and first nine months of 1989. The decline continues to be principally attributable to credit losses resulting from the difficult economic conditions for freight carriers impacted by higher fuel costs not compensated by higher freight rates.

PACCAR Inc.

CUPERTINO, CALIF. (OCT. 22) BUSINESS WIRE - Symantec Corp. (NASDAQ:SYMC) Monday announced financial results for its second fiscal quarter ended Sept. 30.

Revenues increased 54 percent to $27.5 million as compared to $17.9 million in the quarter ended Sept. 30, 1989.

On Aug. 31, Symantec completed the merger of Peter Norton Computing Inc. into Symantec. The Peter Norton Computing merger has been accounted for as a pooling of interests. As a result, all financial information has been restated to reflect the combined financial results of both companies.

As disclosed in the prospectus/proxy statement of Aug. 8, completing the merger required a one time charge of $6.5 million for investment banking, legal fees and other costs associated with an acquisition.

Including these charges results in a loss of $933,000, or 10 cents per share, for the September quarter. Excluding these charges, net income for the quarter increased 39 percent to $3,291,000, or 33 cents per share. This compares to $2,366,000, or 25 cents per share, for the quarter ended Sept. 30, 1989.

''We're extremely pleased with this quarter's strong operating performance,'' said Gordon E. Eubanks Jr., president and chief executive officer. ''We continue to see robust demand for software, especially utility and productivity products.''

During the quarter, the company shipped enhanced versions of The Norton Utilities (version 5.0) and GrandView (version 2.0), delivered The Norton Utilities for the Macintosh, and announced The Norton AntiVirus.

Symantec is a leading international software company which provides award-winning application and system software products for IBM PC and Apple Macintosh computer users. Founded in 1982, Symantec is a public company traded on the NASDAQ National Market System (SYMC). The company is based in Cupertino. -0- NOTE TO EDITORS: Other brands and products are the trademarks of their respective holders and should be noted as such. -0- T

#90295b0637 10/22/1990 ~Business Wire

VIENNA, VA (OCT. 22) BUSINESS WIRE - LEGENT Corp. (NASDAQ: LGNT) Monday reported that, with new sales rising 38 percent to a record $31,413,000, its total revenues for the fourth quarter ended Sept. 30, 1990 grew to $46,526,000 from $35,022,000 in fiscal 1989's final period.

Due primarily to costs associated with expanding the company's sales organization by more than 20 percent during the last three months, and to seasonally lower recurring revenues, LEGENT said net income rose less sharply than new sales, to $8,883,000, or 42 cents per share, up 18 percent from $7,523,000, or 35 cents per share a year earlier.

The company noted that it also took charges totalling approximately $1.0 million, or 3 cents per share in the latest quarter, related primarily to severance costs, receivables, and special sales commissions resulting from a restructuring of its operations earlier in the year.

For the full year, the company's net income amounted to $32,897,000, or $1.52 per share, compared with $24,844,000, or $1.15 per share, in earnings for fiscal 1989. Revenues improved 25 percent to $169,531,000 from $135,115,000 in fiscal 1989.

These results include costs related to LEGENT's acquisition of Business Software Technology Inc. in last year's first quarter and to the formation of LEGENT the previous year, amounting to $975,000, or 4 cents per share last year and $5,874,000, or 21 cents per share, in fiscal 1989.

International sales and the strong performance of the company's Systems Productivity division both accounted for the rapid gains in new sales during the latest quarter, LEGENT said, noting that initial sales of its AutoMate, DASDMON and NetSpy products collectively jumped more than 90 percent from last year's final period.

While the Software Management division grew 40 percent in the fourth quarter, the cmpany said its newest business nonetheless registered more than 70 percent growth for the year.

LEGENT Corp. is a leading independent supplier of systems software and services for the management and operation of information services, or IS organizations. With more than 40 products designed for IS enterprises which support diverse networks managed by IBM mainframes, LEGENT today employes over 1,000 people and serves approximately 3,500 customers worldwide.

SALT LAKE CITY (OCT. 22) BUSINESS WIRE - American Co-operative Services Ltd., the only national purchasing agency devoted exclusively to family farmers and ranchers, Monday announced the endowment of a $5,000 agriculture scholarship.

''This money shall be made available to deserving students from farming and ranching families,'' said Anthony J. Ball Sr., executive vice president. ''The plight of the American family farmer or rancher is sad, and for most of them, it's not getting a whole lot better any time soon.

''However, by assisting them to obtain the lowest possible prices for their necessary supplies and equipment, we are helping some of these families to keep their places and stay in the business. But, if we can also help some of them by providing scholarships too, then we have a moral obligation to do so.

''Hopefully, this is only a small beginning from which a much greater fund will grow,'' he added. ''We invite and encourage all other organizations involved in the family farm and ranch market to join us in providing the funds necessary to assist many more of these deserving students obtain higher educations.

''Whether they be colleges, universities or trade schools is not important. What's important is that deserving students with the capability and the desire have the opportunity to pursue their education; to gain the vital specialized knowledge so necessary in our ever changing agriculture environment.''

The scholarship funds are held in trust by Guardian State Bank, Sandy, Utah, 84070. For details concerning the scholarship, please write Scholarship, c/o American Co-operative Services Ltd., P.O. Box 57766, Murray, Utah, 84157. The closing date is Aug. 1, 1991, and it is open to qualified citizens of the United States regardless of race, color or creed.

IRVINE, CA (OCT. 22) BUSINESS WIRE - Irvine-based BoMed Medical Manufacturing Ltd. (NASDAQ:BOMD), developer and manufacturer of the CardioDynamic Data Processing (CDDP) system, a non-invasive hemodynamic patient-management system that evaluates cardiac output together with other important vital parameters, has opened a sales office in Prague, Czechoslovakia.

Establishment of the office follows the enactment of a new Czech foreign-relations law encouraging U.S. and other foreign businesses to operate in Czechoslovakia. BoMed is one of a growing number of medical device manufacturers in the United States expanding into Eastern Europe as trade restrictions ease and as Eastern bloc countries become more interested in attracting firms from other parts of the world.

''Czechoslovakia is our home country, and that gives us an important advantage with both the language and our understanding of the medical system there,'' says Hevka Sramek, BoMed president and a Czech native. ''Because it is the most sophisticated of the Eastern European bloc countries, we believe Czechoslovakia will be especially receptive to the technology we offer.''

Since opening the office in June, BoMed has already reported $100,000 in sales. Due to the severe shortage of funds to buy medical equipment in the Eastern European nation, BoMed has offered lease options of its equipment to select doctors and medical facilities.

''This is not only a tremendous opportunity for the company,'' Sramek said, ''but we hope to significantly improve the accuracy and efficiency of heart evaluation and treatment in Eastern Europe.''

BoMed is a leader in the field of non-invasive cardiodynamic monitoring. The company develops, manufactures and markets technically advanced instruments for a broad range of patient monitoring and therapeutic management applications.

#90295b0643 10/22/1990 ~Business Wire

ATLANTA, GA (OCT. 22) BUSINESS WIRE - Advanced Telecommunications Corp. (NASDAQ/NMS:ATEL) Monday announced strong revenues and earnings for the second quarter ended Sept. 30, 1990.

Revenues for the three-month period were $87.7 million compared with $83.4 million in the same period last year, an increase of over 5 percent. ATC recorded strong volume growth of 17.1 percent for the quarter offset by prices that were 10.3 percent lower than last year.

Earnings per share grew 17.9 percent to 33 cents from 28 cents in the same quarter last year. Net income also increased by 8.5 percent to $7.0 million from $6.5 million in the year-earlier period.

For the six months ended Sept. 30, 1990, revenues grew to $169.0 million from $166.5 million in the same period last year. Earnings per share increased 17 percent to 63 cents compared with 54 cents for the first six months of fiscal 1990. Net income grew 6.6 percent from $12.5 million a year ago to $13.3 million.

During the quarter, ATC expanded its market share in the southwest region, winning three major contracts to provide service to the Texas Department of Highways, Cave & Associates, and all pay telephones for the State of Louisiana.

In the Southeast, several contracts were expanded, allowing us to gain additional revenues from existing customers.

Some of these include service for more than 340 branches of First Union National Bank of Florida, over 350 Publix Supermarkets, more than 50 branches of AmeriFirst Bank and a joint contract to provide interstate service on the SUNCOM network for the State of Florida.

Raville said, ''These contracts represent a potential revenue gain for the company of over $11.7 million annually.''

ATC, headquartered in Atlanta, is one of the largest publicly held long distance carriers in the United States. It provides domestic and international long distance telephone services to business and residential customers in the rapidly growing markets of the Southwest and Southeast.

The common stock of ATC is traded in the National Market System under the NASDAQ symbol ATEL.

#90295b0646 10/22/1990 ~Business Wire

CHATSWORTH, CALIF. (OCT. 22) BUSINESS WIRE - NMB Technologies Inc., Monday introduced its new AAA1M300 series 1 Mbit DRAM, the world's fastest CMOS DRAM

at 53 ns.

The new high-speed 1 Mbit DRAM is offered in 1M x 1 and 256K x 4 versions and is now available in production quantities. First customer shipments occurred in July 1990.

The new high-speed devices are specified in each organization with maximum access times of 53, 60 and 70 ns. Read/Write cycle times are as low as 100 ns. The high-speed design allows for direct memory access with 16 MHz and 20 MHz microprocessors; eliminating the need for cache memory, and improving system performance.

''Our commitment to the full-scale production of these DRAMs enables us to serve in 1991 those customers who have already tested and specified our 60, 70 and 80 ns memories,'' said Myron Jones, senior vice president of NMB Technologies.

''Our customers can expect ongoing support for their systems and programs -- backed by the same high-quality support and service they've received with our previous DRAM product lines.''

The AAA1M300 is available in enhanced-page mode with page mode Read/Write cycle time of 40 ns. Operating voltages range from 4.5 to 5.5V and temperatures from 0 to 70 degrees Celsius. Power consumption for the new 53 ns 1 Mbit DRAM is 400 milliwatts with 5.0 volts vcc.

The new high-speed 1 Mbit DRAMs are manufactured using six-inch wafers with 1.2 micron line widths in fully automated Class 1 clean room facilities.

The device offers significant performance and cost advantages. The 100 ns Read/Write cycle time allows designers to create zero wait-state systems utilizing 20 MHz microprocessors, without resorting to complex interleaving or caching schemes.

NMB Technologies is the world's leading supplier of broad-based products for the computer market. NMB Technologies is the electronics marketing division of NMB (USA), Inc., the North American headquarters of the Minebea Group of companies. Minebea produces a wide variety of electronic components, including DRAMs, keyboards, step motors, sensors, axial fans and audio speakers.

BELLEVUE, WA (OCT. 22) BUSINESS WIRE - T. Ronald Morton, president of PACCAR Financial Corp., the wholly owned U.S. finance subsidiary of PACCAR Inc, Monday announced the financial results for the third quarter and nine months ended Sept. 30, 1990.

Summary Earnings Statement
(Thousands of Dollars)

	Three Months Ended Sept. 30		Nine Months Ended Sept. 30	
	1990	1989	1990	1989
Revenue	$31,770	$34,331	$97,706	$101,624
Interest expense	19,665	21,610	61,575	65,259
Finance margin	12,105	12,721	36,131	36,365
Operating expense	5,360	4,614	15,186	13,120
Loss provision	4,197	1,912	14,058	6,283
Income before taxes	2,548	6,195	6,887	16,962
Income taxes	982	2,207	2,676	5,979
Net income	$ 1,566	$ 3,988	$ 4,211	$ 10,983

Third quarter 1990 net income of $1.6 million was down 61 percent compared to 1989. The company's assets remained level at approximately $1.2 billion during the first three quarters of 1990. The company's finance margin in the first three quarters of 1990 was similar to 1989. Higher operating expenses in 1990 reflect efforts to strengthen credit controls and collection activities. The increase in the loss provision is due to continuing difficult economic conditions for freight carriers. PACCAR Financial's primary business is to provide wholesale, retail and lease financing to support the sale of Kenworth and Peterbilt heavy-duty trucks.

CAMPBELL, CA (OCT. 22) BUSINESS WIRE - DA Systems Inc. and Mercantile Telecommunications Ltd., based in Hong Kong, jointly announced the interconnection between Mercantile Telecommunications' MercanMail Service and DA Systems' DASnet Messaging Service.

The interconnection opens communications between MercanMail, with hosts based in Hong Kong and Tokyo, and an estimated 4 million people worldwide using electronic mail systems interconnected by the DASnet Inter-System Messaging Service.

In addition, Mercantile Telecommunications has chosen DASnet channels as the

means of integrating its various electronic-mail and value-added services. Among these are the following:

- MercanFax. Through MercanFax, messages can be sent from a customer's computer anywhere in the world through the DASnet Service directly to MercanFax nodes for local FAX delivery in Japan, Taiwan, Hong Kong, Korea, China, Macau, Thailand and the Philippines. Access to MercanFax is available to all DASnet customers as a standard feature.

- MercanMail Abroad. For the business traveler or executive-on-the-run, MercanMail offers a unique hand-held terminal which can be used for electronic mail and for FAX or hardcopy (postal) delivery of electronic mail messages from virtually any phone; e.g. a cellular telephone or a pay phone. DASnet interconnectivity and a personal Telex number are included as standard features.

Mercantile Telecommunications Ltd. is a member of the Mercantile Group, with offices in Hong Kong, Taipei, Seoul, Tokyo, Manila and Zurich. The host-computer operation of MercanMail is a joint venture with major European, Hong Kong, and Japanese telecommunications interests. Its mandate is to form one of Asia's largest private packet switching networks and electronic mail services, providing the largest and most cost-efficient telecommunications networks by satellite.

Mercantile Telecommunications' associates and supporting companies in this project are the Japanese firms Sumitomo, Intec, IDC, Tokyo Power, and Japan Airlines plus GTE Telenet of America.

DA Systems is a privately-held corporation located in Campbell, which delivers solutions for internetworking and networked applications. Its DASnet Service provides communications between otherwise-incompatible or unconnected systems. Offerings are available for electronic mail providers, for organizations which have installed their own internal electronic mail systems, and for individual subscribers to electronic mail services.

MOUNTAIN VIEW, CALIF. (OCT. 22) BUSINESS WIRE - ASK Computer Systems (ASKI) Monday announced that its wholly owned subsidiary, Palette ACQ Corp., has accepted for payment at $9.25 per share in cash all shares of Ingres Corp. common stock tendered and not withdrawn.

Pursuant to its offer to purchase all outstanding Ingres shares, approximately 10,753,400 shares, representing 94 percent of the outstanding shares, were tendered and not withdrawn before the expiration of the tender offer at midnight on Friday, Oct. 19. Payment for the shares will be made promptly.

Palette will be merged as soon as practicable with Ingres, and Ingres wil become a wholly owned subsidiary for ASK. Ingres stockholders who did not tender their shares in the tneder offer will be entitled to receive $9.25 per share in cash in the merger.

Simultaneously, ASK announced that EDS Corp. and Hewlett-Packard Co. purchased approximately 5.6 million shares of ASK common stock for a total of $60 million in cash. As a result of this transaction, ASK will have approximately 18,840,000 shares outstanding, of which EDS will hold 19.7 percent and HP will hold 9.8 percent. All the proceeds from the sale of ASK stock to EDS and HP will be used to fund, in part, the purchase of Ingres shares.

ASK also announced that it has signed a definitive bank credit agreement with The Chase Manhattan Bank, N.A. under which ASK may borrow up to $50 million in order to fund, in part, the purchase of Ingres shares and to pay a portion of the costs of the acquisition. ASK will use approximately $15 million of its working capital to purchase tendered shares of Ingres.

ASK has requested the NASD to move trading in its common stock to the regular NASDAQ over-the-counter market effective Tuesday, Oct. 23, 1990.

ASK Computer Systems is a leader in enterprise-wide information systems. ASK has 930 employees worldwide and completed its 1990 fiscal year in June with revenues of $207 million.

Ingres Corp. is a world leader in informtion integration products, with approximately 1,200 employees worldwide. The company's advanced relational database management system is installed on 11,000 manufacturing and commercial computer systems worldwide, and is available on more than 40 types of computers. Ingres was founded in 1980 as Relational Technology Inc.

It completed its 1990 fiscal year in June with revenues of $157 million.

EDS, a wholly owned, independently operated subsidiary of General Motors based in Dallas, has operations in 27 countries and is the leader in providing information technology services to customers around the world.

CHARLOTTE, NC (OCT. 22) BUSINESS WIRE - CEM Corp. (NASDAQ/NMS:CEMX) Monday announced record net sales and earnings for the first fiscal quarter ended Sept. 30, 1990.

For the quarter, net sales rose 29 percent to $4,991,000 versus $3,860,000 in the year-earlier period. Net income for the first quarter of fiscal 1991 totaled $626,000 compared with $541,000 a year ago; and earnings amounted to 14 cents per share versus 12 cents per share.

In announcing results, Michael J. Collins, president and chief executive officer, attributed the quarterly gains to higher shipments throughout CEM's line of microwave- based instruments. He remarked,

CEM produces microwave-based instrumentation for testing and analysis. The company's products are used in many manufacturing and processing industries, including chemical and food processing, and the general analytical laboratory market.

The company's shares are traded over-the-counter under the National Market System symbol CEMX.

LAWRENCEVILLE, NJ (OCT. 22) BUSINESS WIRE - Monday, Multi Soft Inc. (NASDAQ:MSOF) announced that its Ferntree Computer Services distributorship in Australia has concluded an agreement with Honda Australia Pty. Ltd.

Under the terms of the contract, Multi Soft and Ferntree consultants are jointly developing, with Honda, the Honda Dealer Network System, a new generation of on-line order processing using Multi Soft's INFRONT/HPO (Host Processing Option) and INFRONT/SDF (Software Distribution Facility). The project, which began in September, is slated for rollout in early December.

According to Jon Rubin, Multi Soft's director of reseller/distribution operations, ''The tremendous productivity that INFRONT offers enhances our ability to deliver complex information systems in a fraction of the time it takes using traditional tools.

''Honda wanted a cooperative processing system, using PCs in dealerships connected to its SQL databases in the home office. INFRONT/HPO is the ideal tool for this project.''

Rubin added, ''Using INFRONT, Honda dealers will be able to access complex data using a mouse to point-and-choose information. The system, which includes extensive built-in help facilities, minimizes the dealers' learning curve, by providing a common user view to disparate computer programs at Honda. Best of all, INFRONT ensures that this system is on-line quickly so that its cost-saving benefits are realized early.''

Charles J. Lombardo, Multi Soft's chairman, commented, ''We are very proud of all our distributors. We foresee a period of dynamic growth in the worldwide use of INFRONT, because our technology makes its possible to use PCs as more than just dumb terminals.

''Also, the use of our INFRONT/SDF product ensures that each workstation has the proper files and programs that the user needs to be successful during the workday. Relationships with quality organizations like Honda will certainly lead to additional business for us,'' Lombardo concluded.

Multi Soft Inc. (NASDAQ:MSOF) is a subsidiary of Multi Solutions (NASDAQ:MULT) and has provided state-of-the-art cooperative processing software and solutions for production operating platforms and communications environments since 1985.

NEW YORK (OCT. 22) BUSINESS WIRE - PolyGram (NYSE:PLG) Monday announced its interest in acquiring certain compat disc manufacturing operations from Philips, subject to agreement being reached on terms.

The announcement follows news that Philips intends to acquire Du Pont's

interest in the consumer disc manufacturing operations of their joint venture Philips and Du Pont Optical Co. (PDO) by the end of this year.

Said David G. Fine, president and chief executive officer of the PolyGram Group; ''The compact disc is the fastest growing music carrier of all time and we anticipate that PolyGram's global requirements by 1991 will be in excess of 150 million compact discs. With a manufacturing demand of this scale there may now be economic advantages in controlling our own source of disc supply for a significant portion of our requirements.''

''The termination of the PDO joint venture may afford us an opportunity to acquire this source, subject to reaching a satisfactory agreement with Philips '' he continued.

Negotiations between PolyGram and Philips will commence in the near future.

LOS ANGELES (OCT. 22) BUSINESS WIRE - Turner Broadcasting System Inc. (ASE:TBS) and Pathe Communications (NYSE:PCC) announced Sunday a broad-ranging series of agreements under which TBS' two entertainment networks, TBS SuperStation and Turner Network Television (TNT), will license exclusive English-language television exhibition rights in the United States to nearly 1,000 films in the MGM/UA feature film library.

The TBS exhibition period for each film generally will be 10 years commencing upon availability.

The license agreements cover films released theatrically by MGM/UA through December 1988, as well as certain 1989 releases. Among the features licensed to TBS are: the first 16 James Bond movies; ''Rocky I'' through ''Rocky IV;'' the Pink Panther films; contemporary movies such as ''Rainman,'' ''A Fish Called Wanda,'' ''Wargames'' and ''Yentl;'' and classic titles like ''West Side Story,''
''The Good, The Bad and The Ugly,'' ''Annie Hall,'' ''Fiddler on the Roof'' and ''Some Like It Hot,'' among others.

The agreements do not include any future MGM/UA productions.

TBS' rights pursuant to the license agreement are subject to consummation of the closing of the planned merger of MGM/UA Communications Co. with a subsidiary of Pathe Communications Corp. The first installation of the license fees will be funded on Monday, Oct. 22, 1990, in anticipation of the planned closing of the merger.

In making the announcement, TBS Board Chairman and President R.E. Turner stated: ''The MGM/UA film library is the finest collection of contemporary and classic movies available for license in the market today. We are extraordinarily pleased to be able to offer this programming to the viewers of our networks in the coming years.''

MGM/UA also will license to TBS SuperStation and TNT the exclusive U.S. television rights to the Pink Panther cartoons, ''The New Twilight Zone'' and the classic science fiction series ''Outer Limits.'' Each license period is approximately 10 years.

In another transaction, MGM/UA also will license 300 films from the MGM/UA library for use on TBS' recently announced satellite-delivered, English-language TNT feed to Latin America. The service is scheduled to begin operation in 1991.

The exhibition period for each film is generally five years.

#90295b0679 10/22/1990 ~Business Wire

WESTBORO, MA (OCT. 22) BUSINESS WIRE - In a move to bring the benefits of graphics to greater numbers of AViiON systems users, Data General Corp. Monday announced the AV 100 graphics workstation.

Priced at $3,995, the AV 100 offers the best price/performance ratio of any RISC-based desktop in the industry. The newest member of the AViiON family of workstations, servers and multi-user systems, the AV 100 provides a powerful alternative to X-terminals or personal computers as a graphics-based interface to UNIX applications.

Running at 17 MIPS (million instructions per second), the AV 100 is not only more powerful but also $1,000 less expensive than its closest RISC rival, Sun

Microsystem's SLC, which runs at 12.5 MIPS. The AViiON line offers a full range of cost-effective products with compatible architecture, starting at a $3,995 desktop and extending through 50 MIPS, high-performance systems.

The AV 100 is based on the 16MHz Motorola 88100 chip and includes 8MB of memory, a 20-inch monochrome monitor, SCSI interface, Ethernet interface, and two serial ports. The system can support a maximum of 16MB of memory and up to 4.0 GB of external hard disk.

Data General has also expanded the capabilities of its existing AV 200 and AV 300 models. The AV 200 Plus will support up to 28MB of memory and the AV 300 will support new 16MB memory modules, extending its maximum memory to well beyond the current 28MB. The new memory modules will be available in the first calendar quarter of 1991.

Data General is a worldwide manufacturer of computer and communications systems for business, industry, healthcare, education and government. The company reported revenues for fiscal year 1989 of $1.31 billion.

#90295b0681 10/22/1990 ~Business Wire

MENLO PARK, Calif. (OCT. 22) BUSINESS WIRE - Informix Corp. (NASDAQ:IFMX) Monday announced revenues of $44,334,000 for the third quarter ended Sept. 29, 1990, compared to revenues of $37,178,000 for the like period last year, a 19 percent increase.

The comparison of third quarter 1989 to third quarter 1990 is as follows:

	Q3 1989	Q3 1990
Revenues	$37,178,000	$44,344,000
Net income	$ 2,078,465	$ 2,044,000
Earnings per share	16 cents	16 cents

Year-to-date revenues and net income were $129,868,000 and $6,708,000, respectively. For the like period last year, revenues were $101,788,000 with net income of $3,672,000.

During the third quarter, Informix announced plans to make its high-performance database engine, Informix-OnLine, available as a NetWare Loadable Module for NetWare 386 in the fourth quarter of 1990. OnLine is expected to be the first database server for NetWare 386 to provide fault tolerant, on-line transaction processing performance for users on Novell local area networks.

Informix also announced that it is developing Informix-OnLine/Secure, a multi-level secure database expected to achieve the United States Department of Defense B1 security rating. Informix-OnLine/Secure will support all major secure versions of the UNIX operating system across a wide variety of UNIX-based platforms. It is expected to be available during the first half of 1991.

Informix's mobile demonstration center was launched during the third quarter. This 73-foot truck contains a theatre and a variety of personal computers, workstations and a multiprocessor system for demonstrating Informix's desktop through the database information management solutions.

Informix Software Inc., the operating subsidiary of Informix Corp., is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems, robust application development tools and graphical- and character-based productivity software for delivering information to every significant desktop platform.

IRVINE, CA (OCT. 22) BUSINESS WIRE - LASER PRECISION CORP. (NASDAQ:LASR) announced Monday that it has signed a letter of intent to sell its Irvine, California-based Analytical Division to AIR & WATER TECHNOLOGIES CORP. (ASE:AWT) for approximately $5 million subject to adjustment.

The transaction is expected to close during the first quarter of 1991. The final purchase price will be paid in cash and notes due within three years, and is subject to due diligence, including confirmation of the value of certain assets. Laser Precision Analytical (LPA), headquartered in Irvine, California, also known as Analect Instruments, is the worldwide leader in on-line process FT-IR (Fourier Transform Infrared) analyzers. LPA also manufactures and markets FT-IR spectrometers for laboratory applications.

''Air & Water Technologies' strong position in the environmental market is expected to enhance Analect's environmental and ambient air product market penetration,'' said David M. Goodman, Laser Precision chairman, president and chief executive officer.

Air & Water Technologies Corp. provides a broad range of environmental services for air pollution control, water resources management, and the

disposal and re-use of waste by- products.

Laser Precision Corp. is a manufacturer of test and measurement instruments combining advanced optical designs with microprocessor technology. The company's products are used in fiber optic telecommunications, data communications and laser research.

#90295b0685 10/22/1990 ~Business Wire

HOUSTON (OCT. 22) BUSINESS WIRE - Lyondell Petrochemical Co. (NYSE:LYO) Monday reported net income of $50 million, or 63 cents per share, for the third quarter of 1990.

Bob G. Gower, president and chief executive officer of Lyondell Petrochemical Co., said, ''Margins for both petrochemical and refined petroleum products were significantly lower in the third quarter compared to the second quarter of 1990 due to product price increases lagging rapidly escalating raw material costs brought about by the Middle East crisis.

''This was the primary reason for the decline in third quarter earnings vs. the second quarter of 1990.'' Lyondell earned $155 million in the second quarter.

Lyondell's refining earnings were also affected by the unscheduled shutdown of the fluid catalytic cracking unit during the quarter. This reduced margins and resulted in lower sales volumes vs. the second quarter of 1990.

The effect of higher raw material costs on ethylene margins was partially offset by higher sales volumes and prices. Ethylene and propylene sales volumes in the third quarter of 1990 set a new company record.

Third quarter 1990 earnings declined 31 percent from the $73 million reported for the third quarter of 1989. The decline from the year ago period was due primarily to lower ethylene margins in this year's third quarter resulting from significantly higher raw material costs combined with lower ethylene prices.

This was partially offset by higher petrochemical sales volumes and lower maintenance expenses in the 1990 third quarter vs. the like period last year. Refining earnings were relatively flat in the third quarter compared with the like period last year.

''Due to the current market uncertainty,'' Gower said, ''we have increased our efforts to remain a low-cost producer and implemented programs to reduce working capital, minimize expenses and reduce capital spending.''

Strong year-to-date cash flows enabled Lyondell to reduce debt by $50 million in the third quarter. The company has also repaid an additional $38 million in the fourth quarter.

For the first nine months of 1990, net income was $283 million, or $3.54 per share, compared with $310 million, or $3.87 per share, in the first nine months of 1989. Results in 1990 reflect lower margins for ethylene, methanol and aromatics caused by lower sales prices and higher raw material costs.

These lower petrochemical margins were partially offset by the substantial improvement in the refining business during the first half of 1990. Nine month 1990 results were increased by $4 million associated with anticipated LIFO inventory reductions vs. a $14 million LIFO benefit in the like period in 1989.

Lyondell Petrochemical Co., headquartered in Houston, manufactures and markets a wide variety of petrochemicals, including olefins (primarily ethylene, propylene, butadiene and butylenes), methanol, aromatics and specialty products, polyethylene and polypropylene and refined petroleum products, including gasoline, heating oil, jet fuel and lubricants.

STAMFORD, CONN. (OCT. 22) BUSINESS WIRE - NYCOM Information Services Inc. (NASDAQ:NYCM) Monday reported its second successive profitable quarter of operations, for the period ended Sept. 30, 1990.

Net profit was $1,036,653 vs. a loss of $2,711,037 for the same period for the

comparable 1989 quarter.

Revenues increased to $12,872,494 from $2,007,640 for the comparable 1989 quarter. During the nine month period ending Sept. 30, 1990, reveneus increased to $27,376,231 from $2,773,374 while losses were reduced to $233,082 from $7,192,770 in the like period in 1989.

The third quarter performance reflects the continuing expansion of the subscriber base and bottom line improvement of the AMNEX network operations subsidiary.

The company completed its acquisition of Communication Technologies Inc. (''COMTEC''), an interactive voice and information services company, and Eastern Pay Phones Inc. (''EASTERN''), an operator of private pay telephones in October. David A. Lyons, chief executive officer of NYCOM stated, ''These two acquisitions put in place the foundation for our long term strategy of offering a growing range of basic and enhanced services directly to the subscriber base.

''We expect the next few quarters to be characterized by the continued growth of AMNEX, along with the impact of the integration of Comtec and Eastern into NYCOM.

These events combine to further enhance NYCOM's long term performance.

NYCOM Information Services Inc. has established itself as one of the nation's fastest growing telecommunications network services providers.

Via its leading edge technology and national telecommunications network, NYCOM offers a broad spectrum of standard and enhanced calling features and information services to meet the needs of the transient telephone user within the payphone, hotel, hospital, interexchange carrier and business user marketplace.

#90295b0695 10/22/1990 ~Business Wire

WALTHAM, Mass. (OCT. 22) BUSINESS WIRE - Parametric Technology Corp. (NASDAQ: PMTC) Monday announced that net income for the fiscal year ended Sept. 30, 1990, increased 252 percent to $5.6 million, or $0.65 per share, from 1989's income before extraordinary credit of $1.6 million, or $0.22 per share.

Revenues for 1990 rose 131 percent to $25.5 million, compared with fiscal 1989's level of $11.0 million.

For the fourth quarter ended September 30, 1990, net income increased 170 percent to $1.8 million, or $0.20 per share, compared with income before extraordinary credit of $652,000, or $0.09 per share, for the fourth quarter of 1989. Revenues for the fourth quarter of 1990 were $8.0 million, a 98 percent increase from $4.0 million for the same period a year ago.

''Fiscal 1990 was a year of tremendous growth and prosperity for the company '' said Steven C. Walske, president and chief executive officer. ''Our financial performance reflects the rapid acceptance of our technology by leading manufacturers. On a cumulative basis, we have sold approximately 2,750 seats of software representing 16,000 software modules, compared with last year's levels of 1,200 and 6,000, respectively.

Our customer base grew from 330 to 700 during the same period. Repeat business from existing customers, such as Whirlpool, General Electric, Northern Telecom Chrysler and Motorola represents 63 percent of total revenues. New customers include Matsushita, Aerospatiale and Hughes EDSG.

''We are especially pleased to have increased our pre-tax profitability to 34 percent in 1990, up from 21 percent in 1989.''

Concluded Walske, ''These results demonstrate that Parametric Technology can expand market penetration and maintain its technological advantage, while substantially increasing profitability. Given the increasing reliance of the marketplace on design-productivity tools, we are confident that Parametric Technology's strong momentum can continue through 1991.''

Parametric Technology Corp. is a leader in the mechanical design automation industry. Its new generation of CAD/CAM/CAE technology is revolutionizing the mechanical design automation process with a strategy that emphasizes technological leadership, aggressive price/performance, hardware independence, worldwide distribution and extensive customer support.

Condensed consolidated statements of operations for the fourth quarter and fiscal year are attached.

#90295b0698 10/22/1990 ~Business Wire

SACRAMENTO, Calif. (OCT. 22) BUSINESS WIRE - Foundation Health Corp. (AMEX:FH) Monday announced that earnings for the first quarter ended Sept. 30

more than quadrupled to $3,359,000, or 28 cents per share, from $607,000, or 5 cents per share, during the comparable fiscal quarter a year ago.

Daniel D. Crowley, president and chief executive officer of Foundation Health Corp., noted that the company's performance in the quarter was even stronger than the net income figure implies.

''Our cash flows remain strong,'' he noted, ''in both absolute terms and relative to peer companies. These cash flows, along with proceeds from financing activities, have helped the company to reduce debt from $92.2 million at June 30 to $50 million at Sept. 30. The company receives the benefit of $1.3 million a quarter in free cash flow from the amortization of intangibles associated with its 1986 LBO.''

Operating income amounted to $6 million for the first quarter compared with $3.8 million a year ago. Pre-tax income increased more that 500 percent from $625,000 a year ago to $4 million in the first quarter of fiscal 1991.

Total revenues for the first quarter increased 8.6 percent to $227.6 million from the $209.6 million recorded in last fiscal year's first quarter.

Crowley attributed the continued strong financial gains to general growth in both its CHAMPUS government contract and California HMO services, as well as successful control over healthcare and corporate costs.

''Foundation continues to be an industry leader in managing healthcare costs -- which is the key indicator of success for an HMO,'' Crowley said, noting that Foundations HMO healthcare expenses as a percentage of premiums were 81.6 percent for the first quarter, compared to 83.2 percent a year ago. ''Industry statistics indicate that most HMOs are in the 90 percent range.''

Crowley pointed out that Foundation's gross revenues in the current quarter will be boosted by an additional $6.2 million a month resulting from the burden Operation Desert Shield has placed on the capacity of military hospitals in California and Hawaii.

Foundation Health Corp. is the fifth largest IPA-model (''open-panel'') HMO in the United States and the largest in California, where it serves nearly 290,000 individuals. The company is also the country's 29th largest defense contractor as the result of administrating the Pentagon's CHAMPUS Reform Initiative program for 860,000 people in California and Hawaii.

#90295b0699 10/22/1990 ~Business Wire

MANSFIELD, Mass. (OCT. 22) BUSINESS WIRE - Augat Inc. (NYSE: AUG), a leading manufacturer of interconnection products for the worldwide computer, automotive and communications markets, Monday announced that net income for the third quarter ended Sept. 30, 1990, increased 12 percent to $4.6 million, or $0.25 per share, versus $4.1 million, or $0.23 per share, for the third quarter ended Sept. 30, 1989.

Sales for the third quarter were $76.3 million, an increase of six percent, compared with $71.9 million for the third quarter of 1989.

For the nine months ended Sept. 30, 1990, Augat reported net income of $12.8 million, or $0.71 per share, on sales of $225.8 million. This compares with net income of $9.3 million, or $0.52 per share, on sales of $232.3 million in the comparable 1989 period.

''Augat's three-pronged strategy to improve manufacturing efficiencies, expand our overseas presence and introduce new products at an aggressive rate, contributed to the company's excellent performance this quarter,'' said Marcel P. Joseph, chairman and chief executive officer.

''Our programs to enhance quality and productivity were particularly noteworthy this quarter in our Automotive Division. During the quarter, one of our automotive manufacturing facilities secured 'Ford Motor Company's Q1 Preferred Supplier Award' status, recognizing Augat's commitment to quality, service and technological leadership. This was our fourth plant to receive this recognition from Ford.''

Management reported that international sales grew 32 percent through the first nine months of the year and contributed to Augat's profitability, reflecting the success of the company's strategy to build market share in Europe and the Far East.

Domestic sales reflected a slower economic climate. Compared with last year's third quarter, the Interconnection Products Division reported higher earnings, based on slightly lower sales, due to a downturn in the computer industry. The company said that growing acceptance of newer products, such as Augat's EII connector and Land Grid Array, positions the division for ongoing improved performance. The Communications Division recorded significantly higher U.S. sales and increased earnings versus the prior-year's third quarter, while order rates began to slow, compared with previous quarters.

Domestic sales in the Automotive Division were slightly lower than last year's third quarter. However, the quality of income improved as a direct result of Augat's aggressive productivity program initiated early in the year.

The company reported that incoming orders for the third quarter of 1990 were $67 million, compared with $79 million in the third quarter of 1989; and backlog, as of Sept. 30, 1990, was $56 million, the same as last year's third-quarter level.

Joseph concluded, ''We are pleased with Augat's ability to generate strong earnings in a difficult economic environment. As the domestic marketplace continues to slow, we are actively controlling costs, focusing on productivity improvements and maintaining a strong balance sheet. As a result, we believe that Augat is positioned to perform well in the uncertain economic climate.''

Augat Inc. is a leading supplier of interconnection products to the worldwide computer, automotive and communications markets.

SAN DIEGO (OCT. 22) BUSINESS WIRE - Gensia Pharmaceuticals Inc. Monday announced it has signed a definitive agreement with The Kendall Company to acquire the business of Kendall McGaw Pharmaceuticals (KMP) for $15 million, contingent upon financing.

KMP, located in Irvine, Calif., manufactures small volume injectable pharmaceuticals for the acute-care hospital market.

''The acquisition of KMP represents a significant acceleration of Gensia's strategic plan to develop, manufacture and market pharmaceutical products for the acute-care hospital market,'' according to David F. Hale, president and chief executive office of Gensia.

''The products developed by KMP clearly fit our strategy to license-in and market hospital-based products that are compatible with the acute-care products we are developing at Gensia. We plan to begin building a small hospital sales organization to sell these products, which we believe will generate near term revenue for Gensia.

''Kendall McGaw Pharmaceuticals has a premier facility for the manufacture of injectable pharmaceuticals,'' Hale added. ''This facility will give Gensia the manufacturing capability to produce Arasine and arbutamine (the drug in Gensia's ESA system) for our Phase 3 clinical trials and for market introduction once these products are approved by the regulatory authorities in

the United States and Europe.''

Gensia is currently in Phase 2 clinical trials in the United States and Europe with Arasine, a drug which shows promise in reducing tissue damage from ischemia which is associated with coronary artery disease and with certain surgical procedures such as coronary artery bypass graft surgery.

The ESA System, which is also in Phase 2 clinical trials, combines a novel drug (arbutamine) and a computer controlled delivery system designed to aid in the diagnosis and evaluation of coronary artery disease.

KMP has operated as a business unit within Kendall McGaw Laboratories since 1987 and currently employs approximately 90 people in product development, manufacturing, quality assurance, quality control and regulatory affairs. Since 1988, KMP has filed 35 Abbreviated New Drug Applications (ANDAs) with the Food and Drug Administration (FDA) and has received FDA approval to manufacture three pharmaceutical products under five ANDAs.

KMP also currently performs product development and manufacturing under contract for other pharamaceutical companies, including Gensia.

As a result of a restructuring program, The Kendall Company is focusing on specialty institutional health care markets, including wound healing, vascular compression, critical care and urology.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel pharmaceutical products for the treatment and diagnosis of human disease.

WASHINGTON (OCT. 22) BUSINESS WIRE - AT&T Monday announced plans to increase basic night/weekend long-distance prices 2.2 percent, or about 0.3 cents per minute, effective November 2.

The increase -- about $39.4 million -- will amount to approximately five cents on an average $16 monthly long- distance telephone bill.

AT&T said the change applies only to out-of-state direct-dialed long-distance calls made during night and weekend hours: after 11 p.m. Sunday through Friday and all weekend until 5 p.m. Sunday. It does not apply to AT&T's Reach Out(R) America calling plans.

AT&T reduced prices on out-of-state and international long-distance services

by more than $300 million in July. The company said its out-of-state direct-dialed long-distance prices have gone down about 42 percent overall since the breakup of the Bell System in 1984.

''The change is necessary to bring prices in line with costs,'' said Merrill Tutton, vice president, AT&T Consumer Services.

NOVATO, CA (OCT. 22) BUSINESS WIRE - WordStar International Inc. (NASDAQ:WDST) announced Monday the appointment of David E. Patrick as vice president of marketing, development and strategic planning.

The appointment is part of WordStar's management restructuring efforts, which include the recent announcement of Ronald Posner, former president of Peter Norton Computing, as chief executive officer.

Prior to joining WordStar, Patrick was vice president of worldwide sales and marketing at Sitka Corp., formerly TOPS, a wholly owned subsidiary of Sun Microsystems. While at Sitka, Patrick increased sales more than 50 percent, established a European operation and successfully launched the release of a number of software products.

''Bringing in David is the first step we are taking to initiate a more aggressive marketing program within the company,'' said Posner. ''David's extensive marketing background in the PC software industry will be a great asset to WordStar.''

Prior to Sitka, Patrick was president and chief operating officer of Migent International from September 1986 to September 1988. He was also the international sales and marketing director in London for Ashton-Tate, and was manager of sales operations at Lotus Development Corp.

WordStar International, founded in 1978 as MicroPro International, is a leading supplier of business productivity software products for IBM PC users. These products are among the largest-selling microcomputer software programs in the world, having been translated into 14 languages and having built a 3.5 million installed user base.

CHATTANOOGA, TENN. (OCT. 22) BUSINESS WIRE - First Chattanooga Financial Corp. (NASDAQ/NMS:FCHT) Monday reported results for the first quarter ended Sept. 30, 1990.

Commenting on the results, Spencer H. Wright, chairman of the board, said: ''Net income for the latest quarter exceed that of the same period last year by 16 percent, while earnings per share increased by 19 percent, as we continued with programs to strengthen our operations.

''Net income for the quarter was $1,003,000, as compared to $868,000 in the first quarter of last year. Earnings per share were 37 cents vs. the 31 cents per share reported in the same period of the previous year.

''In keeping with our conservative policy to maintain strong reserves, during this quarter we established a net increase of approximately $200,000 to the loan reserve and increased it to more than $5.2 million.

''The corporation has proceeded with the stock repurchase program and acquired more than 312,000 shares during this quarter. We continue to feel that this is the best investment opportunity available to our company.

''The weighted average number of shares outstanding for the most recent quarter was 2,741,494 in 1990 and 2,798,638 in 1989.

''As of Sept. 30, deposits were $551,070,000 and total assets were $635,644,000. Stockholders' equity was $73,791,000. With an equity to asset ratio in excess of 11.6 percent after reserves and write-downs, First Chattanooga continues to be one of the strongest financial institutions of its size in the United States, and far exceeds all regulatory capital requirements.

''The board of directors declared our fourteenth quarterly cash dividend of 8 cents per share. The dividend is payable Dec. 14, 1990, to shareholders of record at the close of business Nov. 16, 1990.''

First Chattanooga Financial Corp. is the holding company and parent of First Federal Savings and Loan Association of Chattanooga, a federally chartered, FDIC-insured savings and loan. It operates 11 offices in southeastern Tennessee.

#90295b0709 10/22/1990 ~Business Wire

BALTIMORE (OCT. 22) BUSINESS WIRE - Allied Research Corp. (NASDAQ:ARAI) has received a $24.3 million contract for 105mm armor piercing tungsten dart ammunition (APFSDS).

Allied Research said that the contract is the largest production contract it has ever received.

Allied reported that this round was developed and tested by Mecar S.A., Allied Research's Belgian unit. Allied Research said it expected additional interest from countries planning to upgrade their tanks firepower performance.

The ammunition is designed for a variety of main battle tanks and light armored vehicles, including the French AMX 30 tank and the U.S. M60 and M48 tanks. A 100mm variant of the Mecar round is available for the T50 series of Russian and Chinese tanks.

Additionally, the Mecar 105mm round is matched to all American, French and British 105mm guns.

The contract calls for delivery of all the rounds in 1991.

Allied Research Corp. is a leading developer and producer of ammunition systems, supplier of engineering services to defense departments worldwide and designer of advanced products and systems for industry.

DALLAS (OCT. 22) BUSINESS WIRE - DSC Communications Corp. (OTC: DIGI) announced Monday net income of $5.2 million, or 12 cents per share, for the three months ended Sept. 30, 1990, compared to $8.4 million, or 20 cents per share, for the third quarter of 1989 on revenue of $127.4 million and $106.3 million, respectively.

For the nine months ended Sept. 30, 1990, revenue and income before an extraordinary item were $364.7 million and $20.9 million, or 49 cents per share, respectively, compared to $300.4 million and $21.8 million, or 52 cents per share, respectively, for the first nine months of 1989.

Net income for the nine months ended Sept. 30, 1990 of $13.2 million, or 31

cents per share, are net of an extraordinary charge of $7.7 million, or 18 cents per share.

Revenue grew 20 percent in the 1990 third quarter from the like period in 1989 while year to date revenue exceeded the prior year's level by 21 percent. In addition to continued higher volume of intelligent network equipment, such a signal transfer points and digital cross-connect systems, customer installation of the first MegaHub(R) 600E switching systems began in the 1990 third quarter.

Operating results for the third quarter of 1990 declined from the prior year period as the higher volume of revenue was offset by lower gross margin content and a higher level of operating expenses and financing costs.

Gross margins were impacted by the shift in product mix to newer products, including the MegaHub(R) 600E, which initially have lower gross margins. DSC's third quarter 1990 net income includes the operating results of Optilink Corporation which was acquired at the end of July 1990.

The higher operating and financing costs were due in part to the Optilink acquisition. The extraordinary item included in net income for the nine months ended Sept. 20, 1990, represents the estimated cost, net of income taxes, for the settlement of a shareholders' class action lawsuit originally filed in 1985.

DSC Communications Corp. is a leading designer, developer, manufacturer, and marketer of digital switching, transmission and private network system products for the worldwide telcommunications marketplace.

#90295b0711 10/22/1990 ~Business Wire

BOGOTA, NJ (OCT. 22) BUSINESS WIRE - The board of directors of Del-Val Financial Corp. (NYSE:DVL), a real estate investment trust, Monday announced the suspension of the company's monthly dividends beginning with the dividend payable Nov. 1.

At the same time, the company's management has entered into negotiations with the board to offer shareholders deferred payment debt instruments in exchange for their shares.

Del-Val invests primarily in mortgage loans to Kenbee Management Inc., its manager and largest obligor, and to Kenbee-sponsored partnerships, secured by income-producing commercial, office and industrial properties.

The board suspended the dividend upon being advised by management that Del-Val and Kenbee face a liquidity problem because of their inability to continue to obtain financing in the current credit and deteriorating real estate environment.

The board said it took this step now to preserve the underlying value of the company's assets to the greatest extent possible. Rent payments are being made on schedule for virtually all the properties on which Del-Val has made loans.

Del-Val has paid every monthly dividend since 1973, when it went public.

As of June 30, Del-Val had investments in about 175 mortgage loans totaling $139,764,000, secured by properties located in 36 states and leased, typically on a long-term basis, by tenants chosen for their financial stability and record of growth.

#90295b0713 10/22/1990 ~Business Wire

SACRAMENTO, CALIF (OCT. 22) BUSINESS WIRE - Foundation Health Corp. (AMEX:FH) Monday announced that earnings for the first quarter ended Sept. 30 more than quadrupled to $3,359,000, or 28 cents per share, from $607,000, or 5 cents per share, during the comparable fiscal quarter a year ago.

Daniel D. Crowley, president and chief executive officer of Foundation Health Corp., noted that the company's performance in the quarter was even stronger than the net income figure implies.

''Our cash flows remain strong,'' he noted, ''in both absolute terms and relative to peer companies. These cash flows, along with proceeds from financing activities, have helped the company to reduce debt from $92.2 million at June 30 to $50 million at Sept. 30. The company receives the benefit of $1.3 million a quarter in free cash flow from the amortization of intangibles associated with its 1986 LBO.''

Operating income amounted to $6 million for the first quarter compared with $3.8 million a year ago. Pre-tax income increased more that 500 percent from $625,000 a year ago to $4 million in the first quarter of fiscal 1991.

Total revenues for the first quarter increased 8.6 percent to $227.6 million from the $209.6 million recorded in last fiscal year's first quarter.

Crowley attributed the continued strong financial gains to general growth in both its CHAMPUS government contract and California HMO services, as well as

successful control over healthcare and corporate costs.

''Foundation continues to be an industry leader in managing healthcare costs -- which is the key indicator of success for an HMO,'' Crowley said, noting that Foundations HMO healthcare expenses as a percentage of premiums were 81.6 percent for the first quarter, compared to 83.2 percent a year ago. ''Industry statistics indicate that most HMOs are in the 90 percent range.''

Crowley pointed out that Foundation's gross revenues in the current quarter will be boosted by an additional $6.2 million a month resulting from the burden Operation Desert Shield has placed on the capacity of military hospitals in California and Hawaii.

Foundation Health Corp. is the fifth largest IPA-model (''open-panel'') HMO in the United States and the largest in California, where it serves nearly 290,000 individuals. The company is also the country's 29th largest defense contractor as the result of administrating the Pentagon's CHAMPUS Reform Initiative program for 860,000 people in California and Hawaii.

#90295b0715 10/22/1990 ~Business Wire

SAN JOSE, CALIF (OCT. 22) BUSINESS WIRE - Silicon Valley Group Inc. (NASDAQ:SVGI) Monday reported sales of $184,289,000 for its fiscal year ended Sept. 30, an increase of 41 percent from sales of $131,080,000 in fiscal 1989.

Net income for the year was $4,449,000, a decrease of 54 percent from the net income of $9,612,000 in the prior fiscal year. Net income per share decreased to 42 cents from 94 cents in the prior fiscal year. The fiscal 1990 financial information included results of SVG Lithography Systems Inc. (formerly the Optical Lithography Operations of the Perkin-Elmer Corp.) which was acquired in May, and includes the entire year's results of the Thermco Division acquired in December of 1988.

In the fourth quarter, SVG reported sales of $62,715,000, an increase of 33 percent from the level of the third quarter of 1990, and an increase of 60 percent from sales of $39,264,000 in the fourth quarter of 1989. Excluding SVG Lithography, sales for the fourth quarter were approximately equal to the preceding quarter and were 15 percent less than the fourth quarter of fiscal 1989.

Net income for the fourth quarter of $215,000, or 2 cents per share, declined from the amounts in the previous quarter and corresponding quarter of the previous fiscal year of 4 cents per share and 27 cents per share, respectively.

The current quarter was impacted by expenses associated with its recently announced reduction in force and expenses related to a cancelled secondary public offering, and reflects the continued high level of R&D spending in Track and Thermco Divisions for new product and process development, as well as the R&D spending in SVGL which is recorded net of funding provided by outside parties.

The company stated that it has witnessed indications of uncertainty in the semiconductor marketplace and that a few customers deferred or cancelled orders in the fourth quarter of fiscal 1990.

Although backlog at Sept. 30 for the Track and Thermco Divisions was at the same approximate level as the third quarter, the company believes that the economic uncertainties may cause revenues to remain at current levels for the next several months.

Nevertheless, its expects to maintain its commitment to R&D and customer support. The company is encouraged by the orders received for its new 90 Series track system and its Vertical Thermal Reactor and is also pleased by the progress being made by its newly acquired SVG Lithography operation.

''We continue to be positive regarding SVG's prospects for the future with its new products and the SVG Lithography acquisition,'' said Papken S. Der Torossian, president and chief executive officer. ''However, we feel that we need to continue to monitor the business and economic climates and act accordingly.''

Silicon Valley Group Inc. is a leading supplier of automated wafer processing equipment for the worldwide semiconductor industry. The company's operations consist of the Track Systems Division, focused on photoresist processing equipment, the Thermco Systems Division, offering oxidation, diffusion and low pressure chemical vapor deposition processing systems, and SVG Lithography Systems Inc. which delivers photolithography exposure tools utilizing step-and-scan technology.

SVG is listed on the NASDAQ National Market System under the symbol SVGI.

#90295b0716 10/22/1990 ~Business Wire

HAWTHORNE, NY (OCT. 22) Business Wire - Peoples Westchester Savings Bank (NASDAQ: PWSB) Monday reported earnings of $1.16 million, or 22 cents per share, for the three months ended Sept. 30, vs. earnings of $1.48 million, or 28 cents per share, for the same quarter in 1989.

Nine month earnings for the current year totalled $4.82 million, or 91 cents per share, vs. $7.01 million, or $1.32 per share, for the comparable year-ago period. Earnings per share calculations for the prior year have been adjusted to reflect a 5 percent common stock dividend declared on Oct. 17, 1989.

Third quarter earnings reflected an increase in other expenses from $10.14 million for the three months ended Sept. 30, 1989 to $11.06 million for the three months ended Sept. 30, 1990, primarily due to $1.2 million in provisions for possible losses relating to the bank's real estate joint venture investments and other real estate owned. The provision for real estate losses for the third quarter of last year was $80,000.

Also impacting the current quarter's results were an increase in the provision for loan losses and a rise in taxes on income. The provision for loan losses rose from $400,000 for the three months ended Sept. 30, 1989 to $750,000 for the current quarter, while taxes on income grew from $1.31 million to $1.90 million.

The $593,000 increase in taxes on income was principally due to the combined effect of the increase in pre-tax income and the higher provisions for losses on loans and other real estate owned, for which tax benefits are not recorded.

These factors were partially offset by a notable improvement in net interest income from $12.31 million for the three months ended Sept. 30, 1989 to $13.61 million for the current quarter, reflecting a continued reduction in the bank's interest expense. The bank's net interest margin was 3.36 percent for the three months ended Sept. 30, 1990 compared to 3.04 percent for the third quarter of 1989.

Other income also rose, from $1.02 million to $1.12 million, primarily due to a gain on the sale of other real estate owned during the third quarter of the current year.

Discussing the bank's third quarter results, management pointed to ongoing weakness in the economy and the real estate market. ''We are taking a very conservative approach,'' stated Chairman, President, and Chief Executive Officer, William F. Olson. ''Given the current market, increasing our provisions for losses on loans and real estate investments was the most prudent action. Our focus today is on the origination of quality assets, not on the generation of short-term earnings growth.''

The decline in nine month earnings stemmed from increases in other expenses and in the provision for loan losses, at a time when other income decreased and net interest income remained relatively flat.

Other expenses increased $2.24 million, due to the provision for possible real estate losses. Excluding said provision, and in spite of a $421,000 increase

in the bank's FDIC deposit insurance premiums, other expenses declined $190,000. The decline in other income reflected a substantial gain on the sale of other real estate owned that took place in the first quarter of 1989.

The allowance for loan losses was $6.39 million at Sept. 30, 1990, compared to $5.97 million at June 30, 1990 and $7.03 million at Dec. 31, 1989. Nonperforming assets totalled $19.38 million, or 1.16 percent of total assets at Sept. 30, 1990, compared with $16.66 million, or .99 percent of total assets, at June 30, 1990 and $17.17 million, or 1.02 percent of total assets, at year-end 1989.

#90295b0722 10/22/1990 ~Business Wire

STAMFORD, CT (OCT. 22) BUSINESS WIRE - For the third quarter and first nine months of 1990, American Television and Communications Corp. (NASDAQ: ATCMA) once again produced record revenues, net income, operating cash flow and operating cash flow margins.

This performance is attributable to a larger basic-service customer base, higher per-subscriber revenues and improved performance by the company's cable equity affiliates.

Revenues for the three months ended Sept. 30 were $278.0 million, a 13.8 percent increase compared with third quarter 1989 revenues of $244.2 million. Net income for this year's third quarter rose 34.5 percent to $32.1 million,

or 29 cents per share, compared with $23.8 million, or 22 cents per share, for the same period last year.

Operating cash flow (operating income before depreciation and amortization) for the third quarter was $128.4 million, 17.8 percent higher than the $108.9 million recorded for third quarter of 1989. Operating cash flow margin (operating cash flow as a percentage of revenues) reached 46.2 percent, up from 44.6 percent for last year's third quarter. Operating income of $76.7 million was 19.6 percent higher than the $64.2 million recorded a year ago.

Interest expense decreased in the third quarter of 1990 primarily because of lower rates.

Equity in losses of affiliates decreased to $2.3 million for the third quarter of 1990 compared with $5.3 million for the same period a year ago because of continued improved operating results for ATC's cable affiliates.

In announcing the third quarter financial results, ATC Chairman and CEO Joseph J. Collins said:

Revenues for the nine months ended Sept. 30, 1990 were $819.8 million, a 14.3 percent increase from $717.1 million for the same period in 1989. Net income for the nine-month period rose 26.9 percent to $87.3 million, or 80 cents per share, compared with $68.8 million, or 63 cents per share.

Operating cash flow for the first three quarters was $374.8 million, up 19.1 percent from $314.8 million recorded for the same period of 1989. Operating cash flow margin reached 45.7 percent, up from 43.9 percent for the same period last year. Operating income rose to $222.5 million, a 19.4 percent increase from $186.4 million for the comparable period last year.

Interest expense increased for the first nine months of 1990 because of higher average debt balances, partially offset by lower rates. Equity in losses of affiliates decreased to $14.3 million for the first three quarters of 1990 from $17.1 million a year ago. The reduced losses came principally from improved operating results at ATC's cable affiliates.

ATC, an 82 percent-owned subsidiary of Time Warner Inc., owns or manages cable television operations serving approximately 4.5 million basic cable customers with 3.22 million premium subscriptions in 33 states and is a unit of the Time Warner Cable Group.

#90295b0723 10/22/1990 ~Business Wire

CHATTANOOGA, Tenn. (OCT. 22) BUSINESS WIRE - Signal Apparel Co. Inc. (NYSE:SIA) Monday reported net sales of $18,175,000 for the third quarter ended Sept. 30, 1990, compared with $20,453,000 a year ago.

The company reported a net loss of $643,000 for the third quarter of 1990 compared with a net loss of $662,000 for the same quarter in 1989.

The net loss per common share (primary) was 23 cents for the third quarter of both 1990 and 1989.

For the nine months ended Sept. 30, 1990, net sales were $64,554,000 compared with $70,246,000 in the year-earlier period. The net loss for the latest nine months was $867,000, or 34 cents per share (primary).

This compares to net earnings in the first nine months of 1989 of $124,000, or a loss of 2 cents per share (primary) after the provision for preferred dividends.

Net earnings for the 1989 period included a gain of $585,000, or 19 cents per common share, resulting from a reversion of assets from a terminated pension plan and an increase of $292,000, or 9 cents per common share, from a change in accounting method related to inventory valuation.

The loss for the three and nine months ended Sept. 30, 1990, is attributable to lower sales volume resulting from soft market conditions, the discontinuance of underwear products, the closing of a textile manufacturing operation, markdown of obsolete inventory, and manufacturing variances which, although considerably improved from a year ago, were unfavorable.

Despite weak market conditions, Signal has made substantial progress in reducing inventories.

Signal has developed several new marketing programs, including the NFL license program and a Signal Sport Collection, which will favorably affect performance in 1991. Also, a servicing agreement with a new customer will add significant dozens to Signal's backlog of orders for 1991.

Signal Apparel Co. Inc. is engaged in the manufacture and marketing of apparel including knit sportswear, sweaters and knit shirts for men and boys, and women's apparel. The company's common stock is traded on the New York Stock Exchange under the symbol SIA.

UPPER SADDLE RIVER, NJ (OCT. 22) BUSINESS WIRE - Western Union Corp. and Wang Laboratories Inc. Monday announced the completion of joint testing and certification for connectivity between the Wang OFFICE/X.400 Gateway and Western Union 400 (SM) service.

This interoperability certification introduces an added level of enterprise mail interconnectivity to customers using Western Union and Wang electronic mail products. According to Donald P. Casey, Director of External Affairs for Western Union's Business Services unit and Product Manager for Western Union 400 service, ''This certification is a further step for Western Union in enhancing its position as a leading provider of X.400 messaging services and open interconnection.''

''Wang's certification with Western Union 400 service enhances our position as a leader in multivendor electronic mail messaging,'' said Stephen R. Levine, Wang's Director of Core Applications. ''It also furthers our goal of providing meaningful end-user applications and helping customers manage 100 percent of their business information.''

Western Union, with its EasyLink (R) service, is the nation's largest supplier of public electronic mail services for the business community. The company already has announced commercial X.400 interconnections with nine domestic and international X.400 public service providers, in addition to its certification of software vendors. The Wang OFFICE/X.400 Gateway allows mail and document exchange between Wang systems and other vendors' X.400-compliant services. The gateway runs on Wang VS mid-range systems and is fully compatible with the 1984 CCITT X.400 recommendations. It operates over X.25 data networks and 802.3 local area networks.

Wang Laboratories Inc. headquartered in Lowell, Mass., is a leading worldwide supplier of computer-based information processing systems, including data, text, image and voice processing, as well as telecommunications and networking products. Western Union provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The company's electronic mail services enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

SUGAR LAND, TX (OCT. 22) BUSINESS WIRE - BMC Software Inc. (NASDAQ: BMCS) Monday reported revenues of $31,503,000 for the second quarter of its 1991

fiscal year ending March 31, 1991, a 50 percent increase over revenues of $21,049,000 for the like period in fiscal 1990.

Net income increased 55 percent to $6,953,000 (28 cents per share) compared to $4,484,000 (18 cents per share) for the like quarter in fiscal 1990.

For the six months ended Sept. 30, 1990, revenues increased 50 percent to $58,505,000 from $39,084,000 for the like period last year. Net income for the six months ended Sept. 30, 1990, rose 54 percent to $12,902,000 (52 cents per share) compared to $8,351,000 (34 cents per share) for the comparable period last year.

North American license revenues for the second quarter increased to $11,181,000, up 44 percent over $7,777,000 for the second quarter of fiscal 1990. International license revenues were $9,508,000 for the second quarter, a 44 percent increase from the fiscal 1990 second quarter.

During the second quarter, BMC announced the general availability of RECOVERY PLUS and introduced a new version of 3270 SUPEROPTIMIZER(R)/VM.

BMC Software Inc., an international company headquartered in the Houston suburb of Sugar Land, develops, markets and supports systems software products to enhance IBM's data base management and data communication systems, principally IMS, DB2 and CICS.

BMC currently markets a total of 42 products to customers in 42 markets. The firm's international subsidiaries are located in Melbourne, Australia; Copenhagen, Denmark; Camberley, England; Paris, France; Milan, Italy; Tokyo, Japan; Madrid, Spain and Frankfurt, Germany. BMC is represented by independent agents in Brazil, South Korea and Yugoslavia.

NEW YORK (OCT. 22) BUSINESS WIRE - North American Philips Corp. Monday announced the appointment of Gary D. Clarke, 49, as president of Magnavox Industrial Electronics Co., a newly formed division.

Formerly, this division was a unit of Magnavox Government and Industrial Electronics Co. (MAGIEC), also a division of North American Philips Corp.

The announcement was made by Stephen C. Tumminello, president and chief executive officer, North American Philips Corp.

Headquartered in Auburn, Ind., Magnavox Industrial Electronics Co. designs,

develops and manufactures transportation electronic systems, modules and sensors. The division joins ranks with Airpax Co. and other Philips companies serving the U.S. automotive electronics and related OEM markets.

Clarke joined the engineering/technical staff of MAGIEC in 1967 and successively became program manager, senior product manager and business area manager, Sensors. In 1984, Clarke was appointed vice president and general manager of the MAGIEC Industrial Electronics Division.

A native of Long Beach, Calif., Clarke received an associate of arts degree from Long Beach City College, a bachelor of science degree in Physics from the University of Utah and a master of science degree in business administration from Indiana University.

He serves in the United States Navy, where he rose to the rank of lieutenant.

Clarke is a member of the board of directors of the Fort Wayne, Allen County Historical Society; the Society of Automotive Engineers and Leadership Fort Wayne. His other memberships include the Magnavox Management Club, Sycamore Hills Golf Club and Phi Delta Theta Fraternity.

He and his wife, the former Gail Hawthorne, have two children, Michael A. and David S. The Clarkes reside in Fort Wayne, Ind.

North American Philips Corp., a wholly owned subsidiary of N.V. Philips of the Netherlands, is one of the 100 largest industrial companies in the United States with operations in consumer products, lighting products, electrical and electronic components, medical diagnostic imaging systems and other professional equipment marketed under many well known brands including Philips Magnavox, Norelco, Philco and Sylvania audio-video.

PHILADELPHIA (OCT. 22) BUSINESS WIRE - Patti Goodman, a Campbell's marketing exeuctive for the past 10 years, is leaving the company to become the new V.P. of marketing for Whitman's Chocolates, America's oldest maker of boxed chocolates, Jay G. Shoemaker, Whitman's president announced Monday.

Goodman, who is currently director of marketing for Swanson dinners and entrees, the largest volume contributor to the company's frozen foods business begins her new position on Oct. 29.

''I'm fortunate to have had numerous business challenges while at Campbell's '' said Goodman, who has excelled in re-positioning existing products and launching new ones. ''Whitman's is a household name in the candy industry,

and it's a wonderful opportunity to join the company in the midst of its ambitious restructuring program.''

Shoemaker, who recently announced plans to restructure the company by reducing its product line and concentrating on its core business, praised Goodman as ''an innovative marketing professional with unusually keen business sense.''

''Patti will be a great asset in helping us position the company as the dominant boxed candy manufacturer in the country,'' he said. ''She comes at an exciting time as we near our 150th anniversary in 1992, and she'll be an important part of the success story we're about to write.''

Goodman, a Philadelphia-area native, received her undergraduate degree from Georgetown University and an MBA from Rutgers.

NASHUA, NH (OCT. 22) BUSINESS WIRE - Ekco Group Inc. (NYSE:EKO) Monday announced that for its third quarter ended Sept. 30, 1990, the company reported net income of $2.3 million, or 14 cents per share, compared with net income of $1.2 million, or 6 cents per share, for the same period in 1989.

For the nine months ended Sept. 30, 1990, the company reported a net loss of $3.1 million, or 21 cents per share, including a $3.6 million first-quarter restructuring charge. The company reported a loss of $1 million, or 6 cents per share, for the first nine months of 1989.

Revenues in the third quarter of 1990 were $42.7 million, compared with $44 million in the comparable 1989 period. Revenues for the first nine months were $113 million, compared with $116 million for the same period in 1989. Last year's nine-month revenues included $10 million from product lines which were sold or liquidated during 1989.

Ekco Group Inc. manufactures and markets a variety of consumer products which it broadly markets through leading retail outlets, including a range of household and recreational products carrying the ''EKCO,'' ''Baker's Secret,'' ''Best Results,'' ''Victor,'' ''Woodstream'' and ''Havahart'' brand names.

NEW YORK (OCT. 22) BUSINESS WIRE - Borland International (NASDAQ:BORL) and Brilliant Image announced Monday that Quattro Pro 2.0 users now can obtain full color, boardroom-quality slides, overhead transparencies and prints directly form their spreadsheet software.

Quattro Pro 2.0, Borland's high-end spreadsheet package, includes a built-in graphics program suitable for designing professional presentations. Users simply export their Quattro Pro graphics in EPS-Slide format and send them to Brilliant Images's Computer Picture Service via disk or modem for conversion into visual aids in as few as four hours.

To design even more attractive and presuasive presentations, Quattro Pro users will want to use the tools available in Borland's new ProShow Power Pack, sold in conjunction with Quattro Pro 2.0.

''The ProShow Power Pack offers Quattro Pro 2.0 users additional graphic enhancements to augment those already found in Quattro Pro 2.0,'' said Stephen Kahn, vice president and general manager of the spreadsheet business unit at Borland.

''With the ProShow Power Pack, Quattro Pro users can create professional presentations rivaling those created by stand-alone graphics packages.''

Included in the ProShow Power Pack: the Pro Show Slide Show Guide, a full color guide for creating professional presentations; the Power Macro Library, marco to streamline the process of creating presentations; 100 full-color CGM clip art images from Marketing Graphics Inc. (MGI). Also included is a coupon for $100 worth of free slide services from Brilliant Image.

Borland International Inc. (Scotts Valley, Calif.) is a leading developer of object-oriented programming languages, tools and business software. Borland offers some of the world's most widely used PC software, including Paradox, QuattroPro, Sidekick, Turbo C++ and Turbo Pascal with Objects. Telephone 408/438-8400.

Brilliant Image Inc., (New York, N.Y.) is the nation's leading slide service bureau. Open 24 hours a day, it converts files from three dozen PC and Mac graphic software packages into color slides, overheads and handouts.

#90295b0734 10/22/1990 ~Business Wire

PROVIDENCE, RI (OCT. 22) BUSINESS WIRE - Old Stone Corp., a Providence-based $3.7 billion asset diversified financial services company, Monday announced a small third quarter loss in line with its previous projections.

For the period ending Sept. 30, 1990, the net loss was $1.4 million and includes an addition of $6.8 million to loan loss reserves. Year-to-date 1990 net income was $6.0 million.

In comparing the third quarter to the same period last year, consideration must be given to the variety of unusual events for that period. The third quarter 1989 loss of $51.3 million was a direct result of increased loan loss reserves to cover outstanding loans to lesser developed countries and the writedown of certain real estate related investments.

Net interest income of $19.7 million for the third quarter of 1990 compares to $29.6 million for the same period in 1989. The reduction is attributable to an approximate $800 million smaller asset base and higher level of non-performing assets in 1990. In conjunction with its restructuring plan announced in September, 1989, the corporation has reduced its assets to meet the risk-based capital requirements of its principal subsidiary, Old Stone Bank, FSB. In so doing, the corporation has divested several subsidiaries and/or divisions.

The corporation's recent reduction of the quarterly dividend on its common stock further reflects its desire to retain capital in anticipation of increased regulatory capital requirements. Old Stone Bank, FSB and the corporation's other thrift institutions meet all current regulatory capital requirements.

Non-interest income of $16.7 million for the third quarter of 1990 compares to $2.2 million for the same period last year.

However, 1989's third quarter included $16.8 million in net losses on investments in joint ventures compared to $1.6 million this year. On a year-to-date basis, net losses in joint ventures are $14.2 million this year and $17.8 million for 1989.

Non-interest expense (excluding provisions for loan losses) for the third quarter of 1990 was $31.0 million and $56.9 million for the same period last year. However, last year's results included a $21.6 million adjustment to net realizable value for its real estate owned. Operating expenses for 1990's third quarter are approximately $5 million lower than the same period last year, of which $3 million represents lower salaries and benefits expense.

Old Stone's provision for loan losses during the third quarter of 1990 was

$6.8 million. The total reserve for loan losses at Sept. 30, 1990 was $57.2 million, or 2.0 percent of total loans. Last year an additional $19.4 million provision for loans to lesser developed countries was made in the third quarter.

As of Sept. 30, 1990, non-performing, and restructured loans and other real estate owned remained relatively flat to June 30, 1990 levels at $375.3 million.

Old Stone Corp. operates 169 offices in 26 states. It engages in retail, mortgage banking, commercial lending as well as money management and trust services. Its stock is traded on the NASDAQ National Market System (OSTN).

#90295b0735 10/22/1990 ~Business Wire

WASHINGTON (OCT. 22) BUSINESS WIRE - The Communications Satellite Corp. (COMSAT) (NYSE:CQ) Monday announced that consolidated net income for the quarter ended Sept. 30, 1990, was $12.3 million, or 65 cents per primary share a decrease of $7.8 million, or 43 cents per share, from the same period of 1989.

Revenues for the 1990 third quarter were $112.4 million, an increase of $1.6 million from the third quarter of 1989. Operating income was $21.2 million compared to $25.8 million for the same quarter of 1989.

International segment revenues were up $1.4 million third quarter to third quarter. This segment is made up of both the INTELSAT Satellite Services (ISS) business and the Mobile communications business. The increase was due to results from the Mobile communications business which more than offset the revenue decrease from ISS.

The ISS decrease resulted from the effects of promotional tariffs to customers offered beginning in July 1990. International segment operating income decreased overall by $2.4 million from the effect of promotional tariffs in the ISS business and increased depreciation from the launch of three INTELSAT satellites (since the end of the third quarter of 1989).

Systems segment revenues and operating income for the quarter were slightly lower than the same third quarter of 1989.

The Video Entertainment segment revenues were up $1.8 million over the third quarter of 1989. The operating loss of this business segment increased due to operating costs and promotional incentives offered as part of new program offerings and testing.

Other income decreased this quarter over the 1989 third quarter due to operations of the Denver Nuggets partnership as well as interest associated with a favorable tax settlement in 1989.

COMSAT also announced the declaration of a regular quarterly dividend of 33 cents per share, payable Dec. 10, 1990 to shareholders of record Nov. 9, 1990. This dividend is the 81st consecutive quarterly dividend declared by the corporation to its shareholders.

COMSAT is a publicly traded corporation which provides international, domestic and mobile communication and information and entertainment services and conducts research on advanced communications techniques.

COMSAT represents the U.S. in the International Telecommunications Satellite Organization (INTELSAT) and the International Maritime Satellite Organization (INMARSAT).

#90295b0745 10/22/1990 ~Business Wire

PITTSBURGH, PA (OCT. 22) BUSINESS WIRE - Hallwood Industries Incorporated (NASDAQ:HWDI), operator of automotive parts distributor Steel City Products, today announced results of operations for the second quarter and six months ended September 1, 1990.

Revenues for the second quarter totaled $8.6 million, compared with $6.4 million in the quarter ended August 26, 1989, and there was a net profit from continuing operations of $104,000 ($0.04 per share) compared with $74,000 ($0.03 per share) in the second quarter last year.

For the six months ended September 1, 1990, revenues totaled $16.8 million, compared with $13.3 million last year, and there was a net profit from continuing operations of $305,000 ($0.11 per share) compared with $278,000 ($0.10 per share) in the first half last year. In the second quarter of the current year, there was income of $83,000 (after taxes of $55,000) from discontinued retail operations. Prior year results reflected a loss from operations of the discontinued retail division of $6.9 million, after taxes, for the quarter ended August 26, 1989, and $10.4 million, after taxes, for the six months ended on that date.

Profits for the six months ended September 1, 1990 reflect a deduction of $257,000 for income taxes. Such tax provision will be fully offset by the Company's substantial tax loss carryforwards, currently exceeding $120 million; however, accounting treatment requires that this offset be reported as an addition to paid-in capital in the Company's balance sheet, rather than as an extraordinary credit to the income statement.

Including this adjustment, stockholders' equity increased this year by $314,000 (equivalent to $0.11 per share) in the second quarter, and by $645,000 (equivalent to $0.23 per share) in the first half, from results of operations.

Commenting upon the revenue and profit performance reported for the second quarter, Maarten Hemsley, the Company's Chief Financial Officer, noted that the principal improvement came from an increase of $1.6 million in sales by Steel City to unaffiliated customers, representing a 24% improvement over last year's second quarter. In addition, sales by Steel City to the stores formerly operated by the Company's retail division, which aggregated $500,000 in the second quarter this year, are included in consolidated revenues; last year such sales, totalling $1.2 million, were treated as inter-company transactions and not included in revenues of continuing operations.

Although gross margins reported in the second quarter increased by about $120,000 due in part to the higher revenues, Hemsley said that the increase is also partly attributable to the inclusion of profits earned on sales to stores formerly operated by the retail division; margins on such sales were previously excluded as inter-company transactions. Gross margins were approximately 14% in the second quarter, compared with approximately 16% last year.

Steel City's operating and overhead expenses increased in line with the growth in revenues. Additionally, corporate overheads of approximately $100,000 in the second quarter were charged to continuing operations, whereas last year such expenses were absorbed by the discontinued retail division.

Hemsley said that management was encouraged by the strong second quarter sales performance, which he attributed to Steel City's continuing efforts to provide the products and services demanded by its customers. However, he cautioned that the weak retail climate could adversely affect certain of the Company's customers. The Company's recently-announced plans to acquire A & B Auto Supply of Albany, New York, reflect management's efforts to improve the geographic diversity of the Company's customer base to enable it to better react to any future retail weaknesses, Hemsley said.

FRAMINGHAM, MA (OCT. 22) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software) rounded out its financial product line for Digital Equipment Corp. VAX computers Monday with the announcement of three new Millennium products; Purchase Order, Accounts Receivable and Capital Projects.

D&B Software DEC Business Unit Vice President John Koles said the addition of the new products, coupled with existing general ledger, fixed asset and accounts payable solutions, ''allows D&B Software to provide the most comprehensive line of integrated financial solutions in the Digital market.

Purchase Order, a purchasing management system, provides complete management capabilities, from initial requisition to purchase order printing, through subsequent receipt, inspection and debit memo processes. The Accounts Receivable system streamlines receivables and credit processing.

The system's credit management tools allow users to monitor customer performance, collect customer obligations and evaluate possible risks and reduce losses due to unresolved disputes or deductions. Capital Projects provides on-line capabilities to track project progress and immediate access to budget vs. actual totals to ensure company projects are completed within budget.

D&B Software also offers tools products for the VAX market, including PC Link, a micro-to-host link and the Systems Development Tool, a fourth generation application development tool for designing and executing on-line applications.

Purchase Order, Accounts Receivable and Capital Projects run under the VAX VMS operating system and are fully integrated with the General Ledger, Fixed Asset and Accounts Payable Millennium applications and tools. Available immediately Purchase Order is priced from $38,000. Accounts Receivable is priced from $47,000 and will be available in November. Capital Projects is priced from $20,000 and is available immediately.

Dun & Bradstreet Software, a division of The Dun & Bradstreet Corp., is the world's largest provider of financial, human resource, materials management, manufacturing and higher education software solutions, tools and services.

D&B Software was formed in 1990 by the merger of two industry giants, McCormack & Dodge Corp. and Management Science America Inc.

The company serves more than 10,000 customers worldwide, including 75 percent of the Fortune 500. D&B Software is also a member of Digital's Cooperative Marketing (CMP) and Rdb Solutions Vendor (RSVP) Programs.

PERRY, FLA (OCT. 22) BUSINESS WIRE - First Federal Savings Bank of Perry (NASDAQ:FPRY) announced Monday that the board of directors voted to pay an initial dividend of 20 cents per share from the earnings for the fiscal year ended Sept. 30.

The 20 cents per share dividend will be payable Nov. 30 to shareholders of record Nov. 15.

First Federal reported that net earnings for the 12-month period ended Sept. 30 were $543,720 or 85 cents per share, compard to $505,171, or 79 cents per share, for the like period one year ago.

First Federal is located in North and Central Florida with five offices serving Leon, Jefferson, Taylor, Madison and Suwannee Counties in North Florida; and two offices serving Pasco and Hernando Counties in Central Florida. The Bank's shares of common stock are quoted under the symbol ''FPRY'' in the NASDAQ National Market System.

BIRINGHAM, ALA (OCT. 22) BUSINESS WIRE - Birmingham Steel Corp. (NYSE:BIR) Monday announced earnings of $5,308,000 and earnings per share of 44 cents for the quarter ended Sept. 30, 1990.

Earnings for the same period last year were $7,810,000, or 63 cents per share. Net sales for the quarter were $114,531,000, compared with $116,812,000 reported a year ago. Steel shipments increased 2 percent to 339,000 tons from 332,000 tons in the first quarter of fiscal 1990.

James A. Todd, Jr., president and chief executive officer commented:

''Consolidated steel shipments for the first quarter were up slightly despite varying performance levels on a regional basis. Steel shipments reflected a softening in the East Coast and West Coast markets with an offsetting increase from continued strong demand in the industrial Midwest.

''Widespread predictions of a general economic slowdown continue to influence competitive pressures with steel selling prices substantially below the levels for the prior-year period.''

Birmingham Steel operates steel mini-mills producing steel and steel products, primarily reinforcing bar, and is the largest U.S. manufacturer of steel roof support systems used in underground coal mining. The common stock of Birmingham Steel Corp. is traded on the New York Stock Exchange under the symbol ''BIR.''

#90295b0750 10/22/1990 ~Business Wire

PALO ALTO, CALIF (OCT. 22) BUSINESS WIRE - ALZA Corp. (AMEX:AZA) announced Monday net income of $6.5 million or 18 cents per common share for the quarter ended Sept. 30, 1990, compared to net income of $4.5 million or 13 cents per common share for the quarter ended Sept. 30, 1989.

Net income for the nine months ended Sept. 30, 1990, was $18.1 million or 51 cents per common share, compared to $13.3 million or 39 cents per common share for the first nine months of 1989. Revenues for the third quarter of 1990 were $29.2 million compared to $22.6 million for the same quarter of 1989.

The increases in net income and revenues for the third quarter of 1990 were due primarily to royalties received from Pfizer Inc. based upon sales of Procardia XL7/8 in the United States. Procardia XL was introduced by Pfizer in the United States in October 1989 for the treatment of angina and hypertension and has rapidly gained market share.

Internationally, where the product will be marketed by Bayer AG, of Leverkusen West Germany, requests for marketing approvals are now pending in a number of countries.

Earnings per share for the most recent quarter were reduced by approximately 2 cents per share ($1.3 million pre-tax income) due to the initial activation of ALZA's large-scale manufacturing facility in Vacaville, Calif.

The company previously stated that during the early stages of activation, pre-tax income could be reduced by up to $1 to $1.5 million per quarter.

ALZA Corp., headquartered in Palo Alto, Calif., is a leading drug delivery systems company focusing on the development, manufacture and marketing of a broad range of proprietary pharmaceutical products. ALZA's therapeutic systems provide rate-controlled programmed administration of medication for both human and veterinary applications.

ATLANTA (OCT. 22) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software) announced Monday Human Resources DB2 (HR DB2), integrated relational payroll and personnel packages that are specifically designed to provide application users with precise and easy access to all human resource information.

''This integrated payroll/personnel solution, combined with our financial and tools packages, offers our customers the premier DB2 product line available,'' said Jim Henderson, executive vice president of marketing and technology for D&B Software.

HR DB2 was completely redesigned to take full advantage of native DB2 capabilities, including set processing, concurrent processing and referential integrity.

Set processing allows users to process multiple records in a single transaction, with data automatically shared among functions, applications, departments and locations. Concurrent processing permits more than one user access to the system at a time, a significant savings of time and resources. Referential integrity ensures data accuracy across all fields and tables.

For example, with HR DB2, and HR professional can access critical data needed for an urgent report while simultaneously running payroll. VSAM products do not permit such access.

Available in December, HR DB2 runs on IBM 370 and 390 architecture machines and its Payroll/Personnel components are priced from $150,000.

D&B Software currently offers a DB2-based general ledger package and a complete tools set. The company is developing DB2-based integrated benefits management software as well as solutions for higher education and manufacturing.

Dun & Bradstreet Software, a division of The Dun & Bradstreet Corp., is the world's largest provider of financial, human resource, materials management, manufacturing and high education software solutions, tools and services. D&B Software was formed in 1990 by the merger of two software industry giants, Management Science America Inc. and McCormack & Dodge Corp. D&B Software

HOPKINGTON, MA (OCT. 22) BUSINESS WIRE - EMC Corp. (NYSE-EMC) Monday reported revenues of $41,080,000 for the third quarter of 1990, an increase of 23 percent over the $33,320,000 reported in the third quarter of 1989.

Earnings also improved dramatically, with profits of $2,511,000, or 10 cents per share reported vs. a loss of $3,631,000 a year ago.

For the nine months ended Sept. 29, 1990 revenues increased 35 percent to $124,253,000 from the $92,046,000 reported in the same period last year. Earnings for the nine months period were $5,551,000 or 22 cents per share compared to a loss of $11,041,000 in 1989.

EMC Corp. supplies innovative, high-performance storage products and related services for midrange and mainframe computers worldwide.

#90295b0764 10/22/1990 ~Business Wire

NEW YORK (OCT. 22) BUSINESS WIRE - Allegheny Power System Inc., Monday reported consolidated net income for the three, nine, and 12 months ended Sept. 1990 of $41.7 million, 79 cents per share, $144.4 million, $2.73 per share, and $190.5 million, $3.60 per share, respectively, compared ith $43.8 million, 83 cents per share, $148.8 million, $2.84 per share, and $200.1 million, $3.83 per share, for the corresponding 1989 periods.

Revenues from sales to regular customers exceeded those for the prior year for each of the three, nine, and twelve-month periods ended Sept. 30, reflecting higher kilowatthour sales and the elimination in early January of the previously reported temporary $20 million reduction in annual revenues in Pennsylvania.

The decrease in net income for each of the 1990 periods was due to higher expenses, other than in fuel and purchased power costs, and lower interest income on temporary investments, which more than offset the higher revenues from retail customers.

#90295b0769 10/22/1990 ~Business Wire

GREENSBORO, N.C. (OCT. 22) BUSINESS WIRE - Fieldcrest Cannon Inc. (NYSE: FLD) Monday announced sales and earnings for the third quarter of 1990.

A loss of $6.2 million, or 60 cents per share was incurred in the quarter. This compares to net income of $4.5 million, or 44 cents per share, for the third quarter of 1989. The third quarter of 1990 includes severance costs of $2.2 million which decreased net income $1.4 million, or 13 cents per share.

Sales for the third quarter of 1990 were $313.5 million compared to $342.3 million in the third quarter of 1989. Bed and bath division sales decreased 10 percent from the 1989 level. Carpet and rug division sales decreased 4 percent from the like period last year.

Bed and bath division operating results were significantly impacted by lower sales, reflecting a continued weak market environment. The lower sales levels and an inventory reduction program required curtailed mill operating schedules that resulted in substantial idle capacity costs.

Margins were also affected by the disposal of higher levels of off-good merchandise than during the like period last year. These lower margins were partially offset by cost savings initiated during the quarter.

The carpet and rug division recorded a small profit in the third quarter, compared to a loss last year. The market for carpets is also weak and price competition has not permitted margin improvement. The improved operating performance was the result of cost reductions.

For the first nine months of 1990, sales were $904.2 million compared to $985 million in the corresponding period a year ago. A loss of $11.9 million, or $1.15 per share, for the first nine months of 1990 compares to net income of $15.2 million, or $1.48 per share, for the first nine months of 1989.

Efforts to reduce operating costs and inventory levels are continuing. Cost containment measures include the inventory reduction program, staff reductions carpet operation consolidations and the towel modernization program.

The consolidation of tufted carpet operations at Georgia Rug Mill, Lyerly, Ga. has proceeded as scheduled resulting in improved efficiencies and increased carpet mill activity. The towel weaving modernization project at the Dumaine Plant, Fieldale, Va. is nearing completion. Significant cost savings are anticipated when the startup phase has past.

Fieldcrest Cannon Inc. manufactures and markets bed and bath products under the Fieldcrest, Cannon, St. Mary's, Royal Family, Monticello, and private brand labels. Carpet and rug division products include woven and and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brands labels.

#90295b0770 10/22/1990 ~Business Wire

CORAL GABLES, Fla. (OCT. 22) BUSINESS WIRE - Ramsay-HMO Inc. (OTC:RHMO), Monday announced that it has successfully restructured its loan agreement with Citibank N.A. for a total of $8.5 million, and that it has reached an agreemnet in principle to settle all claims and counterclaims in its lawsuit against the previous owner of the HMO, which was purchased by The Ramsay Group in 1988.

Under the terms of the new loan agreement, the payment schedule has been extended from Dec. 31, 1990 to Dec. 31, 1992, and the interest rate has been reduced by 2 percent to the lender's base rate plus 1 1/2 percent.

The new agreemenet also includes an additional advance of $2.5 million which was used to redeem an aggregate of 214,224 shares of Series A Preferred stock, owned by Ramsay Health Care Ltd. and Ramsay Hospital Corp. of Texas.

This redemption is in accordance with the strategy that the company has been pursuing since its initial public offering in December of 1989.

The lawsuit involved Ramsay-HMO's liability under the purchase agreement for a $3.8 million note payable to the former owner. Under the settlement agreement Ramsay-HMO will pay the principal amount of the note in full.

Terms of the agreement include a $1.7 million initial payment in cash, with the balance to be paid over a two and a half year period. Prior to resolving the dispute, the company carried the full value of this note as a current liability on its balance sheet.

Gregory H. Browne, chief executive officer of Ramsay-HMO stated, ''Both of these events have a positive effect on the company's balance sheet because they reduce current liabilities significantly. Furthermore, the redemption of the preferred shares is anti-dilutive. By restructuring the loan agreement and settling the lawsuit we have strengthened our current financial position.''

Ramsay-HMO Inc., owns and operates a South Florida-based health maintenance organization (''HMO'') serving the Miami Hispanic community and others in the Miami/Fort Lauderdale area. Approximately 75 percent of the company's HMO members receive primary medical care throught the company's 11 staff model ambulatory medical centers.

Approximately 25 percent of the company's membership is enrolled in its Medicare Plus plan. The company's HMO is the oldest in Florida and is one of the largest HMOs in the Miami area.

#90295b0772 10/22/1990 ~Business Wire

MANSFIELD, MA (OCT. 22) BUSINESS WIRE - Codex Corp. Monday announced its corporate data networking direction, emphasizing the use of frame relay as a standard high-speed access protocol.

Codex will implement frame relay interfaces worldwide across multiple elements of its product line. All Codex products containing frame relay interfaces will be managed by the Codex 9800 Series Network Management System. The 9800 is an OSI-based system that manages multiple elements of the wide area domain.

Codex announced today frame relay interfaces on two data networking systems products and introduced a new frame relay product. Codex announced frame relay interfaces on its 6290 Series T1 Multiplexer and its 6525 X.25 Packet Switch, and introduced the 6507 Multi-protocol Packet Assembler/ Disassembler (PAD), which also supports frame relay. Codex also announced international availability of the 6290 fast packet T1/E1 multiplexer.

Codex frame relay products will be standards based. The company chaired the ANSI T1S1.1 committee that developed frame relay service description and architecture, and today announced a long-term commitment to the ANSI-approved specifications.

Codex was a partner in developing the CEPT interface on the fast packet multiplexer with StrataCom Inc. While Codex will support the StrataCom/DEC/cisco/Northern Telecom preliminary specification with early releases, the company will focus long-term development efforts on standards agreed to by U.S. and international standards organizations.

Codex Corp. a subsidiary of Motorola Inc., is a leading supplier of network products and integrated network solutions. The company operates in 51 countries through its nine international subsidiaries and an established distributor organization. Offerings include network management systems, T1/E1 switches, X.25 networks, multiplexers, DSU/CSUs, modems, LAN internetworking devices, and professional services.

AUSTIN, TX (OCT. 22) BUSINESS WIRE - Dell Computer Corp. (NASDAQ:DELL) Monday significantly strengthened its European operations with the establishment of a European manufacturing center in Ireland and the launch of its sixth wholly owned international subsidiary in Italy.

Dell said its European manufacturing facility, located in Limerick, Ireland, will enable the company to more effectively serve its expanding European operations through improved product availability and strengthened product support. Currently, Dell's European subsidiaries receive product from the company's United States manufacturing facility in Austin, Texas.

By serving its European operations from the Ireland facility, the company also will realize tax and duty advantages and will be competitiv-Hr p/sitmoned to benefit from the unification of the European Common Market. Shipments from the facility are scheduled to begin in the company's first half of fiscal 1992 which begins Feb. 1, 1991.

With Monday's opening of Dell Italy, located in Milan, Dell becomes the first direct-marketing personal computer company to enter Europe's fourth largest market for PC systems.

The number of installed personal computers in Italy is expected to more than 1992, according to the independent market research firm Dataquest Inc. During the same period, more than 60 percent of new system sales are expected to be sales of systems based on Intel's 386 and i486 microprocessors. Dell currently has 10 386 and i486-based systems, which account for more than two-thirds of total worldwide revenues.

Dell Italy is headed by Enzo Urbani, a 17-year veteran of the computer

industry. Most recently, Urbani was area general manager for Olivetti, responsible for marketing subsidiaries in 11 European countries. He previously was responsible for worldwide post-sale service and support for Olivetti.

Dell Computer Corp. designs, develops, markets, services and supports a complete line of personal computers compatible with industry standards. The company is recognized in independent surveys as having the highest customer satisfaction level in the industry for its line of personal computers.

ATLANTA (OCT. 22) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software) announced Monday FrontLine ViewBuilder (FrontLine), a workstation development tool that allows customers to build stand-alone or cooperative processing applications.

FrontLine is part of D&B Software's ViewBuilder family of workstation development, link and reporting tools products. With FrontLine, customers have the flexibility to offload functionality to the workstation level to save processing resources and increase productivity.

FrontLine allows customers to develop applications that operate disconnected from the host computer, allowing them to fully exploit the power of the workstation. It also allows them to develop cooperative processing applications that are tightly integrated with their host-based systems. In this way, they can move specific functions, such as data entry, to the workstation level while retaining data integrity.

''The workstation products increase our customers' efficiency and productivity expand their ability to analyze their businesses, and provide a comprehensive base of integrated business applications while providing them with a path to the future,'' said D&B Software Executive Vice President Jim Henderson.

Available immediately, FrontLine runs on an IBM PS/2 or compatible and works with any host system utilizing the 3270 communications environment, including IBM 370, 390, 30XX, 43XX machines; and the DEC VAX. FrontLine is priced from $30,000.

Dun & Bradstreet Software, a division of The Dun & Bradsteet Corp. is the world's largest provider of financial, human resource, materials management, manufacturing and higher education software solutions, tools and services. D&B Software was formed in 1990 by the merger of two industry giants, McCormack & Dodge Corp. and Management Science America Inc. The company

serves more than 10,000 customers worldwide, including 75 percent of the Fortune 500.

COSTA MESA, CA (OCT. 22) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading supplier of computer backup products, Monday said that it has granted to Sankyo Seiki a patent royalty license under Archive's electronic and mechanical patents for DC 600 type cartridge tape drives.

At the same time, Sankyo cross-licensed to Archive patents covering tape-drive technology developed by Sankyo. Details of the license agreement are to be kept confidential.

Tag Merrick, vice president and general counsel for Archive, said that in addition to Archive patents, the license from Archive also includes patents obtained by Archive through its acquisition of Cipher Data Products earlier this year.

Founded in 1980, Archive today is a leading manufacturer and supplier of data-storage products to original equipment manufacturers and resellers. Archive and its companies offer a complete selection of drives and subsystems for economical computer-data storage for minicomputers, workstations, multi-user systems and personal computers.

LAKE MARY, FLA. (OCT. 22) BUSINESS WIRE - Maynard, an Archive company, announced its relocation to a new 96,000 square foot corporate headquarters building located in Lake Mary, Fla., just northeast of Orlando, Fla.

The company had formerly been located in Casselberry, Fla., also in the Orlando area.

''The new location will incorporate advances in every area of doing business '' stated George Rea, Maynard's executive vice president. ''From robotic material handling and transit, to the latest MIS technology, to training and network labs, to the quality of life for our employees, Maynard is employing

the standard of excellence that is our hallmark.''

The site of the new facility is 18 acres in Lake Mary, Fla., on the northeast side of the Orlando metroplex. An environmentally conscious community, Lake Mary combines a progressive attitude with a commitment to a high quality of life.

Maynard's master plan for the site includes 260,000 square feet of office space. The current 96,000 square foot building is Phase I. The planning and design of Phase II has been completed, but no implementation date has been set.

A soaring arched atrium and second floor terraces provide architectural distinction to the two-story brick building. Called a flex-space design, the building is arranged in four modules, accommodating the diverse functions of each area.

The building's 14 foot ceilings will accommodate both industrial and office functions by the use of dropped acoustical ceiling grids. A Faraday cage protects the building from lightning damage.

The working areas are a combination of closed offices and modular work areas. The work areas are equipped with the most advanced high-tech workstations, designed to provide a comfortable and efficient working environment.

All areas are wired for telecommunications and computer networking, linking Maynard not only to its parent company in California, but also to the company's offices in Asia and Europe.

Special consideration has also been given to the technical support area. In addition to the conveniences afforded the other work areas, technical support has several rooms dedicated to computer lab environments, providing controlled network settings for product testing, training, and customer assistance.

#90295b0794 10/22/1990 ~Business Wire

BLUE BELL, PA (OCT. 22) BUSINESS WIRE - Unisys Corp. Monday introduced the IR 9210 Courtesy Amount Reader (CAR) module, a high-speed, hand-print and machine-print recognition system for financial documents processed using Unisys InfoImage IIPS (Image Item Processing System) platform.

The optional IR 9210 CAR module, developed with Computer Gesellschaft Konstanz mbH, recognizes the hand-written or machine-printed numeric amount on checks, commonly known as the courtesy amount or convenience amount.

The IR 9210 CAR module capabilities will be demonstrated at the American Bankers Association's Annual Convention in Orlando, Fla. from October 22-24 and at the Bank Administration Institute's National Conference for Image Technology in Banking in Dallas from October 29-31.

CAR Module for Unisys IIPS Delivers Additional Benefits Users of Unisys IIPS realize significant returns on their investment with the basic configuration, which does not require CAR. Using IIPS, per-item processing costs are reduced. For Unisys IIPS users, implementation of the optional CAR module is an evolutionary step, which will bring additional savings to institutions that process large volumes of unencoded work. CAR Module Reduces Manual Keying of Document Amounts

The IR 9210 CAR module, together with the Image Check Processing System (ICPS) application, will reduce the need for human operators to manually key amounts from financial documents. The labor expense saved will be directly proportional to the percentage of items successfully read by CAR, and of equal importance, the application's use of CAR data.

Further expense will be saved during the balancing process when CAR data is used to detect operator keying errors. Unisys Offers CAR Module as an Option with IIPS

The optional IR 9210 CAR module joins the following IIPS platform components (see attachment):

--V Series application host, executing Unisys ICPS software --DP 1800 Document Processor, housing the IC 1800 Image Camera Module --IR 9000 Storage and Retrieval Module --IW 800 Image Workstation --Power Encoder Module --CP 2000 Communications Processor

The IR 9210 Courtesy Amount Reader module, using program data from the DP 1800 document processor and gray-level images from the image camera module, reads the courtesy amounts on checks and other payment documents. Unisys Worked with CGK in Developing IR 9210 CAR Module

For development of the CAR module, Unisys teamed with Computer Gesellschaft Konstanz mbH (CGK), a wholly owned subsidiary of Siemens. CGK, founded in 1974, is chartered by Siemens to develop innovative products and

custom-tailored solutions for the data entry and financial marketplace. CGK has more than 1,000 users of its automated character recognition systems.

Availability and Pricing

The optional IR 9210 Courtesy Amount Reader (CAR) module is available for new and existing users of Unisys IIPS in the third quarter of 1991. The module is priced at approximately $250,000.

ATLANTA (OCT. 22) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software) announced Monday FrontLine ViewBuilder (FrontLine), a workstation development tool that allows customers to build stand-alone or cooperative processing applications.

FrontLine is part of D&B Software's ViewBuilder family of workstation development, link and reporting tools products. With FrontLine, customers have the flexibility to offload functionality to the workstation level to save processing resources and increase productivity.

FrontLine allows customers to develop applications that operate disconnected from the host computer, allowing them to fully exploit the power of the workstation. It also allows them to develop cooperative processing applications that are tightly integrated with their host-based systems. In this way, they can move specific functions, such as data entry, to the workstation level while retaining data integrity.

''The workstation products increase our customers' efficiency and productivity expand their ability to analyze their businesses, and provide a comprehensive base of integrated business applications while providing them with a path to the future,'' said D&B Software Executive Vice President Jim Henderson.

Available immediately, FrontLine runs on an IBM PS/2 or compatible and works with any host system utilizing the 3270 communications environment, including IBM 370, 390, 30XX, 43XX machines; and the DEC VAX. FrontLine is priced from $30,000.

Dun & Bradstreet Software, a division of The Dun & Bradsteet Corp. is the world's largest provider of financial, human resource, materials management, manufacturing and higher education software solutions, tools and services.

#90295b0801 10/22/1990 ~Business Wire

FORT LAUDERDALE, FL (OCT. 22) BUSINESS WIRE - Encore Computer Corp. Monday announced that it has substantially enhanced its relationship with Ingres Corp. through a strategic account relationship agreement.

Under the terms of the agreement, Ingres will now sell and support its products on Encore's Multimax parallel multiprocessor computer systems worldwide. Additionally, Ingres will continuously tune, port, enhance and update its products for the Encore platforms that offer both symmetric multiprocessing and true parallel processing in one cabinet.

Ted White, vice president of Encore's Information Systems Business Unit said, ''We are pleased to have augmented our relationship with Ingres. With Ingres as a strategic Encore partner, we have captured important commercial business with the INGRES products and look forward to an even more productive relationship through our new agreement.''

To facilitate Ingres' support of the Encore systems and the agreement, Encore has shipped a Multimax system to Ingres' world headquarters in Alameda, Calif. and to their European headquarters in London. These systems will be routinely upgraded with Encore's latest technology enhancements to provide for up-to-date capability demonstrations and high-quality support for Ingres customers.

Chris Kenber, Ingres executive vice president of Operations, commented, ''We are pleased to have reached this agreement with Encore. The combination of Encore computers with Ingres relational database products greatly extends the ability of both companies to increase their market share.

''Customers using both products will have available to them better applications development tools and uniform response time that keeps pace with growth for unbeatable price/performance. We look forward to implementing the agreement with Encore.''

Encore also announced that Ingres has certified INGRES Release 6 on the Encore Multimax systems. This certification involved extensive testing to validate the proper operation of the INGRES software in the Encore systems. INGRES Release 6 is a result of a two-year effort by Ingres Corp. to redesign their product to give it increased viability through the nineties.

The rearchitected product takes advantaged of the symmetric multiprocessing architecture that Encore offers for dramatic increase in performance over previous versions of INGRES.

Ingres Corp. is a world leader in information integration products. The company's advanced relational database management system is installed on

11,000 manufacturing and commercial systems worldwide, and is available on more than 40 types of computers. Ingres was founded in 1980 as Relational Technology Inc.

Encore Computer Corp., an international company headquartered in Fort Lauderdale, Fla., provides cost-effective computer systems solutions for time-critical applications. Encore manufactures three families of parallel and distributed computer systems: Encore 90, CONCEPT/32, and Multimax, and has a $1 billion installed base of over 8,000 systems worldwide.

CANTON, MA (OCT. 22) BUSINESS WIRE - Corporate Software Monday announced that it has become an authorized IBM hardware reseller, and that it will also sell and support additional IBM communication software products.

The hardware authorization enables Corporate Software to extend its specialized support services to include IBM Token-Ring boards, 5250 products and 3270 products. These products are critical to micro-computer and IBM mainframe connectivity.

In addition, Corporate Software will sell and support IBM memory expansion boards and kits. This will be especially appealing for customers upgrading their system configurations and adding memory to run advanced applications.

Corporate Software previously sold and supported IBM network and application software products. The company will continue to sell these products, as well as software products and hardware add-ins for IBM, IBM-compatible and Apple Macintosh personal computers.

Corporate Software has also expanded its line of networking products to include IBM OS/2 LAN Server 1.2 and the IBM LAN Support Program. The combination of these IBM hardware and software products for LANs enhances connectivity to the IBM environment and enables users to gain access to crucial coporate data quickly and easily.

Corporate Software sells and supports more than 1,500 software products and hardware add-ins for IBM, IBM-compatible and Apple Macintosh personal computers. The company provides a comprehensive array of services to assist

large organizations in the evaluation, acquisition, support, and maintenance of personal computer products and in the management of end user computing resources. Founded in 1983, Corporate Software has operations in the United States, Canada, the United Kingdom, Germany, and France.

PHOENIX (OCT. 22) BUSINESS WIRE - Flying home and realize today is your daughter's birthday?

Sudden turbulence causes you to spill coffee on your white shirt just before the big board meeting? No problem thanks to an all new in-flight airplane catalog service.

SkyMall, Inc., based in Phoenix, Arizona Monday began the first in-flight catalog shopping service offering instant delivery of passengers' merchandise to their preferred destinations. SkyMall's catalog, comprised of merchandise from premier catalogers and merchants such as Spiegel, Hammacher Schlemmer and Chef's, allows passengers to recreate a shopping mall experience from their airplane's seatback pocket.

Using airplane telephones, or simply calling from a regular telephone when not in-flight, travelers can select catalog items, place orders toll-free on AT&T MEGACOM (R) 800 service, and pick up their purchases at a counter located in airport terminals.

Orders from in-flight passengers or those using ground-based phones will be processed by telemarketers in SkyMall's central processing center in Phoenix. The orders then will be transmitted automatically to the appropriate warehouse located near the passenger's destination airport.

At the warehouse, automated carousels will pick the order and warehousers will place it on a conveyer to be transported to a packing station. The orders then will be placed in a custom designed, sealed container for van transport to selected airport terminals.

Fully automated SkyMall warehouses can process an order within 7.5 minutes, facilitating a passenger's delivery within 30 minutes to 48 hours, depending upon his or her final destination. Passengers have traditionally experienced product delivery three to six weeks from the time an item is ordered.

Once in the terminal, SkyMall customer service representatives will unseal the container and prepare the goods and paperwork for the customer's approval. SkyMall products will feature an unconditional return policy whereby customers

may reject the merchandise at the time of pick-up with no questions asked.

SkyMall will utilize AT&T advanced 800 service and a state-of-the-art DEFINITY (R) communications system for this unique retail/catalog organization.

LAKE MARY, FL (OCT. 22) BUSINESS WIRE - Maynard, an Archive company, announces that it has increased the capacity of its MaynStream DAT drives to 2.0GB while reducing the size of the drive to a 3.5-inch half height form factor.

The extended capacity subsystems will begin shipping during the first quarter of 1991, at no increase in price.

MaynStream DAT drives are sold as complete data backup solutions, including controller cards and MaynStream 3.0 software. The extensive list of advanced software features includes unattended backup, remote network workstation data backup, tape cataloging, loadable device drivers, new memory management, password protection, built-in error correction, and foreign language support.

The system also provides flexible, DOS-like commands for the advanced user who utilizes batch files to execute commands. In addition, MaynStream software version 3.0 supports backup and restoration of Novell bindery files and is Novell 286 and 386 certified.

Maynard's DAT products are significantly different from consumer grade DAT backup devices, providing higher performance and greater reliability.

Based in Lake Mary, Fla., Maynard is the industry's leading supplier of tape backup systems and offers the most complete selection of 5 1/4-inch and 3 1/2-inch cartridge, cassett, 4mm, and 8mm tape drives available for the IBM-compatible PC and PS/2 computers, DEC VAX computers, and Apple Macintosh family of computers.

Maynard Electronics Inc. is a subsidiary of Archive Corp. of Costa Mesa, Calif. (NASDAQ:ACHV).

#90295b0813 10/22/1990 ~Business Wire

WAYNE, PA (OCT. 22) BUSINESS WIRE - Soft-Switch Inc., Monday announced that it has entered into a strategic relationship with Data General Corp. to develop a version of Soft-Switch Central for Data General's UNIX-based AViiON platform.

The resulting product will be owned, marketed and supported by Soft-Switch Inc. Soft-Switch Central is the leading electronic mail switching system, providing gateways to systems implementing the X.400 protocol, IBM's SNADS and PROFS protocols, the TCP/IP SMTP protocol and several other protocols. Additionally, Soft-Switch Central provides directory services and other mail network management sevices, and numerous administrative services.

Soft-Switch Central presently executes in IBM MVS and VM environments, and is installed in over 300 large enterprises in the U.S. and other countries.

''With support from DG, Soft-Switch will be in a position to rapidly expand its staff in the UNIX development area,'' stated Michael D. Zisman, Soft-Switch president. ''Our X.400 Gateway is based on UNIX, and this new effort is a natural evolution of the X.400 work which began in 1987. In fact, much of the basic technology for Soft-Switch Central on Unix is already embodied in our existing X.400 Gateway.''

While no specific product announcements are being made at this time, Soft-Switch indicated that products resulting from this effort will likely be available before the end of 1991. The UNIX based version of Soft-Switch Central will be configurable to act as a pure X.400 MTA, as a pure SNADS switch, or as a multi-protocol switching system.

''We are no longer in a 'one size fits all' marketplace,'' continued Zisman. ''Many large enterprises plan to continue using their IBM hosts as the basis for their enterprise mail networks, and for these customers we will invest heavily in our IBM-based products. Other enterprises require open platforms based on UNIX, and we intend to respond to these requirements aggressively. Based on our discussions with large accounts, many enterprises desire a combination of IBM-based switches on their SNA backbone and UNIX switches in other parts of their networks.''

''Data General recognizes that Soft-Switch is the leader in providing enterprise mail network solutions. There are significant opportunities for these solutions on a Data General platform to meet demands from large organizations with distributed computing environments as well as small and medium sized companies, '' said Ron Skates, CEO of Data General. ''With both companies' strong commitment to open systems and architectures, the

partnership makes perfect sense,'' he continued.

Soft Switch Inc. provides standards-based connectivity, electronic mail network management and mail-enabled applications that add value to customers' expanding electronic mail networks.

A privately held corporation, it is the acknowledged leader in supplying high-performance, open-architecture mail networks to large corporations. The company also licenses its technology to major office systems vendors and public electronic mail network vendors.

In addition to its Wayne, headquarters and its new European operation, Soft Switch has regional headquartes in Chicago, Los Angeles and Washington D.C., and sales and service offices in several other cities. The company also maintains a network of international distributors.

#90295b0817 10/22/1990 ~Business Wire

WAYNE, Pa. (OCT. 22) BUSINESS WIRE - Soft-Switch Inc., Monday announced that it has acquired substantially all of the assets of Sytems & Telecoms Ltd., a leading supplier of facsimile and telex gateways for IBM and UNIX computer systems.

Systems & Telecoms Ltd. is based in Reading, England, and has operating subsidiaries in Germany, Norway, and the United States. Over 1,000 customers worldwide are using the VM Messenger and S-Message products that were developed, marketed, and supported by Systems & Telecoms. These products enable users of electronic mail systems on IBM VM systems or a wide range of UNIX Systems to transparently send faxes and telexes to other parties. Financial details of the transaction were not disclosed.

''There were three distinct reasons why Soft-Switch pursued this opportunity '' stated Michael D. Zisman, Soft-Switch president. ''First, the products are of interest to us on a stand-alone basis as they presently exist, but more importantly they are a natural extension to the Soft-Switch product line. These products can be easily integrated into our enterprise mail network products, providing fax and telex capability to users connected to Soft-Switch networks. This will be complementary to the fax and telex capabilities of the public carriers accessed through the Soft-Switch X.400 Gateway.

''Second, we are rapidly accelerating our activities in Europe, and the Systems & Telecoms employees add significantly to our capabilities there. Third, the Systems & Telecoms UNIX product line and expertise is of obvious value to us as we expand our own UNIX offerings.''

The operations of Systems & Telecoms will be merged into the Soft-Switch organization; essentially all of the employees of Systems & Telecoms have joined Soft-Switch Inc. or its subsidiaries in the United Kingdom and Germany. The former Systems & Telecoms headquarters in Reading, England will become the headquarters of the Soft-Switch United Kingdom subsidiary, Soft-Switch, plc.

This organization will be responsible for sales and support of all Soft-Switch products in the U.K. and certain European countries. Also located in this facility will be the Soft-Switch Inc. European Support Center, which will act as a logical extension to the existing support center in Wayne.

Many Soft-Switch networks are now worldwide in scope, and a distributed support capability will enhance Soft-Switch's ability to support these networks. Sytems & Telecoms GmbH will be merged into Soft-Switch GmbH of Germany and will be responsible for sales and support of the entire Soft-Switch product line in Germany and Austria.

Soft-Switch will retain the product development facility in Reading and will expand this group over the next year. Besides continuing to support and enhance the existing Systems & Telecoms products, this group will assume responsibility for development of other components of the Soft-Switch product line.

Soft Switch Inc. provides standards-based connectivity, electronic mail network management and mail-enabled applications that add value to customers' expanding electronic mail networks.

A privately held corporation, it is the acknowledged leader in supplying high-performance, open-architecture mail networks to large corporations. The company also licenses its technology to major office systems vendors and public electronic mail network vendors.

In addition to its Wayne, headquarters and its new European operation, Soft Switch has regional headquartes in Chicago, Los Angeles and Washington D.C., and sales and service offices in several other cities. The company also maintains a network of international distributors.

#90295b0818 10/22/1990 ~Business Wire

LAKE MARY, FL (OCT. 22) BUSINESS WIRE - Maynard, an Archive company, announces an OS/2 version of its award-winning MaynStream backup software.

MaynStream for OS/2 version 1.0, available in January 1991, will support Maynard's entire line of high performance tape drives, providing comprehensive OS/2 solutions in capacities ranging from 60MB to 2.2GB, including the MaynStream DAT and helical scan drives. The new software supports both OS/2 1.1 and 1.2 Standard and Extended Editions.

MaynStream for OS/2 software supports the OS/2 High Performance File System (HPFS) as well as DOS's File Allocation Table (FAT) file system and accurately transfers files between the two systems. The MaynStream system also automatically restores and redirects files between HPFS and FAT file systems.

Using HPFS's Last Access Date and extended attributes, MaynStream's backup system provides the ability to set up scripts for migrating and grooming hard disk volumes, freeing on-line storage of unused, static files. Long pathnames (up to 260 characters) are also fully supported.

MaynStream for OS/2 software, which fully supports LAN Manager 1.0, provides full backup and restore capabilities for directory Access Control Lists (ACL), file permissions, and locked OS/2 network files, such as OS2.INI, OS2SYS.INI, LANMAN.INI, and NET.ACC.

The flexibility of the system allows unattended backup procedures to be scheduled during the network's quiescent hours. If the network is active during the procedures, the retry options for busy or open files and the ability to capture files that are in use ensure a complete backup of all network files.

Consideration has also been given to locating and restoring files easily and efficiently. MaynStream for OS/2 software employs a sophisticated cataloging capability. Maynard's proprietary Fast File Restore capability integrates MaynStream software's cataloging and high speed access capabilities of its high performance tape drives.

Maintaining a full catalog of all tapes, the system can execute an immediate search for any file, informing the user of the exact tape on which the file is stored. When the tape is mounted, the system can locate the file and begin restoring it in record time.

MaynStream for OS/2 software will support all MaynStream tape drives which are available in a comprehensive range of configurations and capacities, including 20MB to 150MB cassette drives (retail priced from $895 to $1,995); 60MB to 250MB cartridge drives (retail priced from $1,595 to $2,295); 1.3GB 4mm DAT drives (retail priced at $5,495 and $6,195); and the 2.2GB helical scan 8mm

drives (retail priced from $7,200 to $7,595).

MaynStream for OS/2, like all MaynStream software, will be available in several international languages, including English, French, Spanish, Italian, German and Dutch.

Maynard sells its products through a worldwide network for dealers, distributors and value-added resellers.

Based in Lake Mary, Fla., Maynard is the industry's leading supplier of tape backup systems and offers the most complete selection of 5 1/4-inch and 3 1/2-inch cartridge, cassette, 4mm and 8mm tape drives available for the IBM-compatible PC and PS/2 computers, DEC VAX computers, and Apple Macintosh family of computers.

#90295b0819 10/22/1990 ~Business Wire

WAYNE, Pa. (OCT. 22) BUSINESS WIRE - Soft-Switch Inc., Monday released a sweeping array of announcements that reinforces its leadership position in the electronic mail industry.

Announcements included:

-- The acquisition of Systems & Telecoms Ltd., which adds enterprise fax and telex capabilities to the extensive mail backbone and mail-enabled application offerings available from Soft-Switch.

-- The creation of a European Operation including development facilities in the U.K., and new direct sales/support offices in the U.K. and Europe that complement an existing worldwide distributor network.

-- A new UNIX initiative with Data General providing support for creation of the Soft-Switch Central enterprise mail backbone product to run on the AViiON family of UNIX-based systems; and

-- The Soft-Switch Network API (SNAPI) Partnership Program, which has already resulted in signed agreements with key vendors of mail gateway and information retrieval products.

Soft-Switch president and CEO, Michael D. Zisman commented, ''The acquisition of Systems & Telecoms and the series of strategic business relationships that we announced today represent new levels of growth opportunity for Soft-Switch.

We are building on the momentum that we established in the '80s to position ourselves solidly for growth into the next century.'' Zisman also noted, ''Each aspect of the set of announcements that we're making today fits into the framework of our long range plan to be a major contributor to the growth of the electronic mail industry in the next decade.''

Additional details on each of today's announcements is contained in a separate press release.

Soft Switch Inc. provides standards-based connectivity, electronic mail network management and mail-enabled applications that add value to customers' expanding electronic mail networks.

A privately held corporation, it is the acknowledged leader in supplying high-performance, open-architecture mail networks to large corporations. The company also licenses its technology to major office systems vendors and public electronic mail network vendors.

#90295b0820 10/22/1990 ~Business Wire

WAYNE, Pa. (OCT. 22) BUSINESS WIRE - Soft-Switch Inc., announced Monday that is has established a direct sales and support capability in certain European countries.

The company will continue to sell indirectly through distributors in other countries.

''Increasingly, we are seeing electronic mail used by global corporations as a tool for integrating their worldwide operations,'' said Soft-Switch president Michael D. Zisman, ''and the establishment of a major presence in Eurpoe will enable us to better support this rapidly expanding segment of our marketplace.''

Soft-Switch Inc. has established wholly owned subsidiaries in the United Kingdom, France and Germany to directly sell and support Soft-Switch products

in these countries as well as Austria and Switzerland. The European direct sales and support organization will be managed by Gerhard Romen, who joined Soft-Switch when it acquired Systems & Telecoms Ltd. George Lutz, Soft-Switch Vice President of International Operations, will continue to manage all distributor relationships. Both individuals will report to Zisman.

''Global companies are adopting electronic mail as their corporate nervous system,'' Zisman commented further. ''It is the practical method of communicating across time zones and of facilitating teamwork across national and functional lines.

''At the same time, establishing mail networks on a global basis represents a challenge to an enterprise due to the heterogeneous environment usually present across multiple countries and subsidiaries.
Soft Switch products provide a pragmatic solution and our increasing focus on the international aspects of the business reflect the very high value which our solutions offer in this setting.''

Soft Switch provides standards-based connectivity, electronic mail network management, and mail-enabled applications that add value to customers' expanding electronic mail networks. A privately held corporation, it is the acknowledged leader in supplying high-performance, open architecture mail networks to large corporations. The company also licenses its technology to major office systems vendors and public electronic mail network vendors.

In addition to its Wayne headquarters and its new European operation, Soft Switch has regional offices in Chicago, Los Angeles and Washington D.C. and sales and service offices in several other cities.

#90295b0822 10/22/1990 ~Business Wire
WAYNE, Pa. (OCT. 22) BUSINESS WIRE - Soft Switch Monday announced the kick-off of the SNAPI Partnership Program targeted at major systems and independent software vendors.

Agreements have already been signed with Lotus Development Corp., NCR, Comtex and SITKA to use Soft Switch's SNAPI technology to integrate applications with electronic mail.

''The integrations of applications software with customers' enterprise mail systems is one of the most important dynamics in the industry today,'' stated Stephen Layne, Soft Switch Vice President of Business Development and co-founder of X.400 APIA. ''Robust, open APIs are critical to this development. We feel that we have achieved this with SNAPI and we are actively working with a variety of vendors to integrate their applications

with electronic mail using SNAPI.''

The Soft Switch Network Applications Programming Interface (SNAPI) technology provides a programmatic interface to the advanced distribution and directory facilities of Soft Switch Central. It includes the services defined by the X.400 APIA Gateway API Service as well as the X.400 APIA Application API Service. Client applications interact with the SNAPI Server using a transport-independent RPC (remote procedure call) interface.

SNAPI Partnership Program consists of a suite of licensing and support arrangements to facilitiate the integrations of existing applications systems with electronic mail. The first products from this program will be available by the end of the year.

SNAPI can be used for integrating a variety of applications. These include electronic mail gateways, information refineries, end-user application tools, mail backbone value-added services, and horizontal and vertical applications systems.

Lotus, NCR and SITKA are using SNAPI for electronic mail gateways. Comtex is using SNAPI as a delivery vechicle for their information refineries. All of these applications will be integrated with customers' enterprise mail networks through Soft Switch Central.

Soft Switch Central is the multi-protocol enterprise MTA (Message Transfer Agent) from Soft Switch Inc. Soft Switch Central provides connectivity to more than 40 electronic mail systems today. In addition, it provides advanced eletronic mail network management facilities, such as X.500 architected directories and network security, as well as a suite of mail-enabled applications and APIs.

Soft Switch Inc., provides standards-based connectivity, electronic mail network management, and mail-enabled applications that add value to customers' expanding electronic mail networks. A privately held corporation, it is the acknowledged leader in supplying high-performance, open architecture enterprise mail networks to large corporations.

The company also licenses its technology to major office systems vendors and public electronic mail system vendors. In addition to its Wayne headquarters and its new European Operation, Soft Switch has regional headquarters in Chicago, Los Angeles and Washington D.C. The company also maintains a network of international distributors.

#90295b0831 10/22/1990 ~Business Wire
LAKE MARY, FL (OCT. 22) BUSINESS WIRE - Maynard, an Archive company, has announced that the company's two 1.3GB DAT offerings are now supported by the Santa Cruz Operation (SCO) UNIX operating system.

SCO UNIX 3.2 v 2 operating system's embedded device drivers support the Archive Python and the MaynStream 1300DAT drives when used with Adaptec AHA-154X and Western Digital SCSI 7000 controller cards.

''According to a recently published study, Archive brand tape drives are the preference of the UNIX market,'' stated Bernie Wu, Maynard's director of marketing. ''We are pleased that we are now able to provide these high-performance SCSI DAT drives to our UNIX-compatible product line.''

The Python DAT drives, which are sold by Maynard through industrial distributors to small OEMs and systems integrators, are designed to be device driver compatible with the Archive Viper SCSI series.

Maynard's 1.3GB high performance drives, called the ''uncontested victor'' in a recent product comparison conducted by ''Digital Review,'' rated fastest in every category: initialization, mount, backup and restore. They are available as internal or external units.

Maynard sells its MaynStream and Archive branded products through a worldwide network of dealers, distributors and value-added resellers.

Based in Lake Mary, Fla., Maynard is the industry's leading supplier of tape backup systems and offers the most complete selection of 5 1/4-inch and 3 1/2-inch cartridge, cassette, and 4mm and 8mm tape drives available for the IBM compatible PC and PS/2 computers, DEC VAX computers, and Apple Macintosh familly of computers.

BARTLESVILLE, OK (OCT. 22) BUSINESS WIRE - Phillips Petroleum Co. Monday reported third-quarter net income of $178 million, or 72 cents a share, compared with $87 million, or 36 cents a share, for the same period last year.

Total revenues were $3.4 billion, vs. $3.1 billion a year ago.

According to C.J. Silas, chairman and chief executive officer, higher crude oil and natural gas liquids prices, plus foreign currency gains, accounted for the increase. Downstream results, however, were generally lower.

Foreign currency gains were $20 million for the quarter, compared with losses of $16 million for the same period a year ago.

For the quarter, income for exploration and production was up as a result of higher crude oil prices and higher foreign currency gains versus foreign currency losses for the same period a year ago. The company's worldwide average crude oil price was up about $6 a barrel versus last year. These factors were partly offset by higher exploration expenses, primarily a result of domestic dry holes.

Gas and gas liquids profit was up significantly on higher natural gas liquids prices partly offset by lower residue gas sales prices and higher natural gas purchase prices.

Petroleum products earnings would have been down except for an $8 million after-tax LIFO inventory gain, as motor fuel margins deteriorated sharply in September. Chemicals earnings, which include income from business-interruption insurance, declined due to depressed ethylene markets and higher feedstock costs for aromatics.

For the nine months, Phillips' net income was $542 million, or $2.21 a share, compared with $474 million, or $1.95 a share for the same period in 1989.

Revenues were $9.5 billion, the same as a year ago.

Nine-month earnings benefited from the first-quarter adoption of a new income-tax accounting standard ($137 million), as well as from a settlement with Iran over the 1979 seizure of assets ($101 million). These items were partly offset by an after-tax loss of $90 million related to the sale of an insurance company, also in the first quarter.

Without these items, earnings would have been $394 million, down 17 percent from net income for the same period last year.

#90295b0846 10/22/1990 ~Business Wire

VELDHOVEN, THE NETHERLANDS (OCT. 22) BUSINESS WIRE - ASM Lithography BV Monday introduced the PAS 5000/70 deep UV wafer stepper, which provides the lens, alignment and light source features necessary to handle the overlay and resolution requirements associated with producing dense integrated circuits such as 64 megabyte DRAM memory chips.

The first two systems have already been delivered to customers in the United States and Europe. Advanced Micro Devices has installed a PAS 5000/70 at its new SDC high-tech fabrication line in Sunnyvale, Calif. The first European system was installed at IMEC, the Inter-University Micro Electronics Center located in Leuven, Belgium.

IMEC is a research center established by the government of Flanders to develop advanced resist processes for fabricating devices with resolutions from 0.5 microns down to 0.25 microns in size. The PAS 5000/70 incorporates a 248 nanometer excimer laser light source from Lambda Physik. It uses an all-quartz ASML/Zeiss 5X reduction lens, with a numerical aperture of 0.42 and it has a field size of 21.2 millimeters.

The new system solves many of the problems associated with other deep UV steppers that have already come to market, according to Willem Maris, ASML managing director.

In addition to the two units that have already been installed at AMD and IMEC, ASM Lithography has orders for additional PAS 5000/70 systems from Micron Technology, Leiti and NV Philips.

ASM Lithography's operations in the United States are based in Tempe, Ariz. The company employs more than 600 people worldwide.

PINEVILLE, LA (OCT. 22) BUSINESS WIRE - Citing the effect of warmer-than-normal weather, Central Louisiana Electric Co., Inc. (NYSE: CNL) reported higher operating results for the third quarter and nine months ended Sept. 30.

For the quarter, operating revenues were $100,415,000, compared with operating revenues of $92,854,000 recorded in the similar 1989 period.

Net income, after preferred dividends, totaled $17,620,000, or $1.57 per share vs. net income, after preferred dividends, of $15,975,000, or $1.42 per share reported for the third quarter of 1989.

Scott Brame, president and chief executive officer, said the increase was attributable to higher kilowatt-hour sales, which were up 9 percent from the third quarter 1989, primarily due to warmer-than-normal weather.

Revenues for the first nine months of 1990 were $257,281,000, compared with $240,506,000 for the first nine months of 1989. Net income, after preferred dividends, was $34,470,000, or $3.07 per share, against $33,197,000, or $2.95 per share, for the same 1989 period.

Central Louisiana Electric Co. Inc. operates solely in Louisiana as an electric utility serving 199,000 customers in 23 of the state's parishes.

NEW YORK (OCT. 22) BUSINESS WIRE - Loral Corp. announced Monday that it has signed memoranda of understanding with three major European companies -- Aerospatiale Societe Nationale Industrielle, Alcatel N.V., and Selenia Spazio S.p.A. -- to form one of the world's largest commercial communications and weather satellite businesses.

The minority partners will pay an aggregate of $182 million for 49 percent of Space Systems/Loral, which is part of the space business Loral Aerospace Holdings Inc. is acquiring as part of Ford Aerospace Corp. The price to be paid for the minority participation is based on a valuation of the business of $372 million. Loral Aerospace Holdings Inc. will own 51 percent of Space Systems/Loral and have management responsibility for the enterprise.

The signators have also agreed to cooperate with Space Systems/Loral on commercial communication satellite projects throughout the world.

Space Systems/Loral (formerly Space Systems Division) builds telecommunications and weather satellites for the world's civilian marketplaces. Ford Aerospace's other space-related businesses, whose primary customers are NASA and the U.S. Department of Defense, are not included in this transaction.

''By virtue of this partnership, Space Systems/Loral will have equity owners whose commercial space businesses generate $1.3 billion in aggregate annual revenues and employ more than 5,000 people,'' said Bernard L. Schwartz, chairman and chief executive officer. ''These resources in research and development, marketing, production, and manpower, make Space Systems/Loral a significant force in this burgeoning marketplace,'' he added.

Consummation of the transaction is subject to the preparation of mutually acceptable definitive agreements and appropriate government and corporate approvals, which are expected by year-end.

Loral Corp. is a high technology business that concentrates in defense electronics and space communications.

MADISON, GA (OCT. 22) BUSINESS WIRE - Wellington Leisure Products Inc. (NASDAQ/NMS:WLPI) announced that its board of directors has approved an additional stock repurchase program to acquire up to $1 million of the company's common shares to be used as treasury stock.

The timing of the repurchases and the exact number of shares to be purchased will be dependent upon market conditions. Wellington has completed its previously announced plan to acquire up to $1 million of the company's common stock by repurchasing 118,000 shares.

Commenting on the announcement, William R. O'Dell chairman and president, said: ''The board of directors continues to believe that repurchasing our own stock is a good investment that will enhance the value of the remaining shares outstanding.''

Wellington Leisure Products Inc. is a leading U.S. manufacturer of leisure activity products, water recreational products and cordage.

The company's products include Maxwell handicrafts; Plantation Works hammocks, lawn, garden and patio accessories; Tink's Safariland Hunting Scents, York Sports and Ol' Timer's hunting and fishing equipment; Taperflex, Cut 'N Jump, Ski-Master and America's Cup water ski, floatation jackets and related accessories; boating and swimming pool accessories; Wellington Puritan rope and twine for retail consumers; and Rhino Ropes cordage products for industrial and commercial users.

TULSA, OKLA. (OCT. 22) BUSINESS WIRE - Geodyne Resources Inc. (NASDAQ: GEOD) Monday announced it had entered into an agreement with Oryx Energy Company to purchase producing oil and natural gas properties and associated production facilities for $59 million, some of which are subject to preferential rights to purchase.

The agreement calls for an effective date of Oct. 1, 1990. Closing is scheduled for sometime in mid-December.

The properties include interests in 14 fields located in Texas, Florida, Alabama, Mississippi and Wyoming. Approximately 350 wells and related facilities are involved in the transaction. Geodyne estimates the properties have combined net reserves of 33.1 billion cubic feet of gas, 2.7 million barrels of oil and 3.5 million barrels of natural gas liquids.

Geodyne is acquiring the properties on behalf of partnerships it sponsors under the PaineWebber/Geodyne Energy Income Programs.

Dallas-based Oryx Energy Co. is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P. and is its managing general partner and 98-percent owner. Oryx Energy trades on the New York Stock Exchange with the symbol ''ORX'' and the partnership with the symbol ''SLP.''

Headquartered in Tulsa, Geodyne Resources Inc. manages the PaineWebber/Geodyne Energy Income Programs I, II and III and PaineWebber/Geodyne Institutional/Pension Energy Income Programs I and II and evaluates, acquires, manages and develops oil and gas reserves for its limited partnerships. The company also has offices in Houston and San Antonio.

CHICAGO (OCT. 22) BUSINESS WIRE - Rodman & Renshaw Inc. Monday announced that it has executed a previously announced agreement with Creditanstalt-Bankverein to establish the first jointly owned U.S.-European company to conduct financial and commodities futures brokerage services in Austria, the USSR and other major eastern and central European nations.

Creditanstalt-Bankverein is a commercial and investment banking corporation, headquartered in Vienna, Austria ranking among the world's 100 largest banking organizations.

The new company will be known as CA Global Futures Terminkontrakte AG, and will be 30 percent owned by Rodman and 70 percent owned by the bank. Jerome de Bontin, a managing director of Rodman's financial futures department, has been appointed as one of the two co-managing directors of the joint venture firm.

In a related transaction, Creditanstalt-Bankverein has invested $5 million in Rodman through the purchase of 4.99 percent of the outstanding common stock of Rodman & Renshaw Capital Group Inc. and the purchase of subordinated debentures, of Rodman & Renshaw Inc.

Kurt B. Karmin, chairman of the board and chief executive officer of Rodman & Renshaw, in Vienna for the signing of the definitive agreement and the closing of the transactions, said, ''We are proud that the management of Creditanstalt-Bankverein has selected Rodman & Renshaw for this exciting joint-venture project. With the network of the bank's offices throughout the area, CA Global futures AG will become a major factor in the eastern and central Europe financial markets.''

Rodman & Renshaw Inc. is a member of the New York Stock Exchange, the Chicago Board of Trade, the Chicago Mercantile Exchange and other national and regional securities and commodities exchanges.

The firm has commodities futures offices in Chicago, New York, Kansas City and London.

Rodman & Renshaw Inc. is a wholly-owned subsidiary of Rodman & Renshaw Capital Group, Inc. whose stock is listed on the New York Stock Exchange under the symbol RR.

ATLANTA (OCT. 22) BUSINESS WIRE - ''Spurred by strong summer demand for electricity, our financial performance has shown steady improvement in recent months.

The Southern Company (NYSE:SO) is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and.

The Southern Company's common stock is one of the 20 most widely held corporate stocks in America.

Addison announced that net income for the first nine months of this year was $736 million, or $2.33 per share -- down $6 million, or 2 cents per share, from the corresponding period last year.

For the 12 months ending Sept. 30, earnings totaled $841 million or $2.66 per share -- off $49 million, or 16 cents per share, from the comparable 12 months a year ago. Earnings for the 12 months ending Aug. 31, were $2.64 per share.

Reporting on system operations, Addison said that electricity sales to retail customers in the four-state area rose 4.8 percent during the first nine months of 1990. In-home electricity needs were up 7.2 percent to 26.2 billion kilowatthours. Electricity sales to commercial customers -- offices, stores, and other nonmanufacturing firms -- gained 5.1 percent to 22.8 billion kilowatthours. Industrial energy use rose 2.9 percent to 34.6 billion kilowatthours.

Energy sales under long-term contracts with neighboring utilities totaled 15.9 billion kilowatthours during the first nine months of this year -- an increase of 6.2 percent.

The energy needs of wholesale customers -- municipalities and cooperatives in the service area -- were down one-half of one percent.

Overall, sales of electricity to customers of The Southern Company were up 4.6 percent in the first nine months of 1990 compared with the same period in 1989.

ATLANTA (OCT. 22) BUSINESS WIRE - Patrick H. Thomas, chairman of the board, president and chief executive officer of First Financial Management Corp. (NYSE:FFM) Monday announced that net income for the third quarter of 1990 increased 20 percent to a record $18 million, up from $15 million earned in the third quarter of 1989.

Fully-diluted earnings per share were 61 cents, up 15 percent from 53 cents. Revenues for the third quarter were up 32 percent to $231.4 million compared with revenues of $175.1 million for the same period last year.

For the nine months ended Sept. 30 revenues increased 45 percent to $634.5 million compared with $438.1 million in the prior year. Net income for the period rose 26 percent to $46.1 million from $36.7 million in the first nine months of 1989.

Fully-diluted earnings per share were up 13 percent to $1.62 from $1.44. At Sept. 30, the company had total assets of $5.3 billion, equity capital of $577.3 million and cash on hand (excluding Georgia Federal) of $22.6 million.

Each of the operating business segments had favorable results in the quarter. Both Merchant Services and Data Services experienced good revenue growth of 62 percent and 15 percent, respectively, from the same period last year. Commercial Services margins were also up from the second quarter. Consumer

Services earnings were higher due to improved operating results at Georgia Federal.

Total operating revenues increased 33 percent and operating income was up 20 percent from the same period in 1989.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia and its subsidiary, First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

PHILADELPHIA (OCT. 22) BUSINESS WIRE - Joseph K. Gordon, former executive vice president and chief counsel of the Philadelphia National Bank and its parent, CoreStates Financial Corp., has joined the Philadelphia-based law firm of Montgomery, McCracken, Walker & Rhoads as counsel.

Gordon will head the firm's banking and finance section.

''Joe Gordon's arrival will consolidate and expand the activities of our banking and finance group, not only in our representation of banks, but also in our representation of corporate clients who regularly deal with banks,''

said Ralph W. Brenner, the firm's chairman. ''We are proud to be associated with a lawyer of Joe's stature.''

In his 31 years with the Philadelphia National Bank and CoreStates, Gordon witnessed the evolution of the Philadelphia banking industry from a close-knit community to an intensely competitive business besieged by takeovers and burgeoning regulations.

His qualifications provide him with a unique perspective in counseling financial institutions on regulatory matters, mergers and acquisitions, commercial lending, secured transactions, and a wide range of banking matters.

A Haverford resident, Gordon currently serves as chairman of the board of directors of Main Line Health Inc., and has served as chairman of the board of Lankenau Hospital. He is a founder and past chairman of the Philadelphia Bar Association's Section of Corporate Banking and Business Law.

Founded in 1912, Montgomery, McCracken, Walker & Rhoads is a full-service law firm of 150 attorneys located in center city Philadelphia, with branch offices in Cherry Hill, N.J.; Media, Pa.; and Washington, D.C.

The firm has represented numerous financial institutions, such as the Philadelphia National Bank, Wilmington Trust Co., Provident National Bank, Fidelity Bank, Meridian Bank, Midlantic Bank and Credit Lyonnais.

WOBURN, Mass. (OCT 22) BUSINESS WIRE - Easel Corp. (NASDAQ:EASL) Monday reported net income for the quarter ended Sept. 30, 1990 of $487,550, or $0.10 per share, before extraordinary item, compared with $521,609, or $0.12 per share, before extraordinary item, for the same quarter a year ago.

Revenues for the third quarter grew to $4,302,876 from $3,081,133 for the year-ago quarter.

For the nine months ended Sept. 30, 1990, net income was $1,362,327, or $0.30 per share, before extraordinary item, compared with $819,097, or $0.19 per share, before extraordinary item, for the nine months ended Sept. 30, 1989. Revenues for the first nine months of 1990 were $12,066,808 compared with $7,395,052 for the same period last year.

''We are pleased with 1990's third-quarter earnings performance which exceeded our expectations by about 10 percent,'' said R. Douglas Kahn, president and chief executive officer.

Kahn continued, ''In last year's third quarter, we began receiving royalty, license and maintenance payments as a result of our newly formed relationship with IBM. However, at that time, we had not yet incurred the costs associated with IBM-related maintenance and support activities. Therefore, income from operations for the third quarter of 1989 was unusally high.

''Easel's 1990 third-quarter performance more accurately reflects our expense structure, and the growing demand for Easel's graphical application software development tools,'' said Kahn. ''During the period, sales to existing and new customers expanded, as more Fortune 1,000 companies such as Ford Motor Company, Ralston Purina Company and British Telecom continued to realize productivity improvements associated with our products.

''We also strengthened our foothold in the European marketplace by adding distributors in France and the Netherlands,'' continued Kahn. ''While international sales represented only two percent of our revenues in 1989 and four percent for the nine-month period ended September 30, 1990, the relatively untapped European market is an important element of our company's future growth.

''We expect that sales and earnings will continue to grow, despite a slower U.S. economy, because of EASEL's increased market acceptance in the industry for graphical applications development software,'' concluded Kahn.

Easel Corp. is a leader in the fast-growing market for graphical application software development tools. The company's technology allows programmers to create personal workstation-based applications, which feature graphical user interfaces and integrate with new and existing host-computer systems.

#90295b0918 10/22/1990 ~Business Wire

BINGHAMTON, N.Y. (OCT. 22) BUSINESS WIRE - The board of directors of BSB Bancorp Inc. (NASDAQ:BSBN), holding company for Binghamton Savings Bank, has declared a 3 cents per share increase in the quarterly cash dividend to 18 cents per share.

The dividend is payable on Dec. 10, 1990, to shareholders of record at the close of business on Nov. 23, 1990.

William H. Rincker, president and chief executive officer of BSB Bancorp Inc., said, ''This increase in the quarterly cash dividend reflects the board of directors' confidence in BSB Bancorp's future financial performance.

The board of directors has also authorized the corporation to repurchase up to an additional 120,000 shares of its common stock, which represents approximately 4 percent of its currently issued and outstanding shares of common stock.

Shares will be repurchased from time to time during the next six months in open market and unsolicited, negotiated transactions. Repurchases will be subject to availability and prices which are acceptable to the corporation and which comply with all applicable law.

Rincker also announced that the stock repurchase program adopted by the corporation's board of directors on May 29, 1990, has been completed satisfactorily; pursuant to which 160,000 shares of BSB Bancorp common stock (approximately 5 percent) has been acquired within the specified time period established for that program.

Rincker stated, ''The board of directors adopted the new repurchase program because it continues to consider BSB Bancorp's stock to be an attractive investment.'' Rincker also noted that a principal effect of the repurchase program will be to increase the book value and earnings per share of those shares of BSB Bancorp stock that remain outstanding after the repurchases.

Assuming completion of this new stock repurchase program, the corporation will have acquired 280,000 shares, pursuant to stock repurchase programs. BSB Bancorp Inc., which currently has 2,973,462 shares of common stock outstanding is the holding company for Binghamton Savings Bank, a New York-chartered, FDIC-insured savings bank headquartered in Binghamton.

#90295b0923 10/22/1990 ~Business Wire

LAKE WORTH, Fla. (OCT. 22) BUSINESS WIRE - Suburban Bankshares Inc. reported net income of $149,000 or 12 cents per share for its third quarter of 1990, which represents a 24 percent increase over the $120,000, or 9 cents per share reported for the third quarter of 1989.

For the nine months ended Sept. 30, 1990, the company reported net income of $576,000 or 49 cents per share, an increase of 31 percent over the $438,000 or 36 cents per share reported for the nine months ended Sept. 30, 1989.

R.M. Brannan, president and chief executive officer of the company and its subsidiary, Suburban Bank, stated that the increase in net income in 1990 over the comparable periods in 1989 was due to growth of the company's assets and a significant reduction in the level of other real estate owned.

Other real estate owned amounted to $756,000 or .38 percent of the company's total assets. This compares to other real estate owned at Sept. 30, 1989, of $2,050,000, or 1.12 percent of the company's total assets at that date.

The company's earnings per share for the third quarter of 1990 declined from the earnings per share reported in the second quarter (20 cents) due to higher provisions for loan and real estate losses as non-performing loans at Sept. 30 1990, increased to $2,401,000, or 1.84 percent of total loans, from $1,376,000, or 1.15 percent of total loans, at Sept. 30, 1989.

Brannan indicated that the company performed well in the third quarter notwithstanding the increase in problem loans in view of the deterioration in the real estate markets in the companay's service areas.

He pointed out that a reduction of approximately 25 percent in the non-performing loan accounts occurred after the end of the Sept. 30 quarter as a $619,000 commercial real estate loan was brought current and restructured.

Brannan also pointed out that total non-performing assets, i.e., other real estate owned and non-performing loans, reduced by the subsequent $619,000 adjustment, totaled $2,538,000, or 1.27 percent of total assets, which is a ratio lower than current peer group levels.

Total loans and deposits at Sept. 30, 1990, were $129,540,000 and $170,316,000 respectively. These amounts represent increases of 9.51 percent and 10.34 percent, respectively, over their Sept. 30, 1989, levels.

WORCESTER, MASS. (OCT. 22) BUSINESS WIRE - Test results just received by Wyman-Gordon Co. clearly show that there is no radioactive contamination of the groundwater at or near the company's Grafton Plant.

Recent news articles had raised questions regarding the environmental impact of the burial, many years ago, of some waste material that contained naturally occurring low level radioactivity in a magnesium alloy processed by Wyman-Gordon for the Atomic Energy Commission (AEC).

Recent tests of samples of ground water taken down gradient from the buried waste site, as well as samples taken by the Massachusetts Department of Public Health (MPH) from the taps of private wells in the immediate area, prove that

these samples are all well within safe drinking water standards established by the Environmental Protection Agency (EPA) and MPH. Company officials earlier today turned over the test results received from Clean Harbors Analytical Services Inc. of Braintree, Mass., to Grafton Town Administrator, Daniel J. Morgado and Hazardous Waste Coordinator, Fred Haffty.

According to George L. Durfee, manager, manufacturing & industrial engineering at Wyman-Gordon and overseer of the tests, ''These test data show conclusively that there is no radioactive contamination of any water in this area as a result of magnesium -3% thorium waste material which was buried per Atomic Energy Commission guidelines at our Grafton Plant between 1958 and 1966.

''We fully anticipate similar test results from water samples currently being tested by other laboratories and we will also turn over these test results to the Town of Grafton.''

Wyman-Gordon commissioned the tests by Clean Harbors and by the MIT Nuclear Reactor Laboratory after a series of meetings had been held between company officials and Grafton Town officials including selectman Ray Mead, selectwoman Sheila Ide as well as Mssrs. Morgado and Haffty.

The Grafton town officials and their constituents, particularly residents with homes near the Wyman-Gordon Grafton plant, were concerned about a series of articles which appeared in the Worcester Telegram & Gazette, beginning on Sept. 23, 1990, which focused on questionable data obtained from water samples collected at Wyman-Gordon's North Grafton waste site in 1983. These test data were filed with the Department of Environmental Affairs (DEA).

NATCHEZ, MISS. (OCT. 22) BUSINESS WIRE - Callon Consolidated Partners L.P. (NASDAQ:CCLPZ) Monday announced that a quarterly cash distribution of $.075 per unit will be paid Nov. 30, 1990, to unitholders of record on Nov. 9, 1990.

This represents an annualized 16 percent return on investment based on the present price of CCP units.

The partnership's last distribution of 15 cents per unit was paid on Aug. 31, 1990. In September 1990 the partnership's unitholders approved an amendment providing for the reinvestment of a portion of partnership cash flow to replace production.

This payment represents the 15th consecutive quarterly distribution and will bring total cash distributions to $19.4 million since the formation of CCP.

The partnership produces oil and natural gas from domestic onshore properties located primarily in the Gulf Coast region. The partnership's 5.9 million

depositary receipts for units of limited partnership interest trade on the NASDAQ National Market System.

WALTHAM, MASS. (OCT. 22) BUSINESS WIRE - AICorp Inc. (NASDAQ:AICP) Monday reported revenues of $5,308,000 for its second quarter of fiscal 1991 ended Sept. 30, 1990, a 77 percent increase over $3,005,000 in revenues for the three-month period ended Sept. 30, 1989.

Net income was $1,158,000 or $.13 per share for the second quarter, compared with a loss of ($165,000) or ($.02) a share for the same period a year ago.

For the six months ended Sept. 30, 1990, AICorp Inc. reported revenues of $10,323,000, a 79 percent increase over $5,762,000 in revenues for the six-month period ended Sept. 30, 1989. Net income was $1,674,000 or $.20 per share for the six months ended Sept. 30, 1990, compared with a loss of ($779,000) or ($.11) a share for the same period a year ago.

The company completed its initial public offering at the beginning of the quarter when it received the proceeds of over $13 million from the sale of 1,500,000 shares of its common stock. ''The public offering has given us the capital required to invest in our products, maximize our sales opportunities and appropriately support our growing installed base of customers,'' Goldman stated.

Second quarter highlights include the first commercial shipments of the Digital Equipment VAX VMS version of KBMS, AICorp's flagship product; AICorp's designation as a Digital Equipment Corp. Complementary Software House (CSH); and the announcement of AICorp's planned participation in the Initiative for Managing Knowledge Assets (IMKA).

AICorp Inc., founded in 1975, is a leading developer of multi-platform, integrated knowledge base/CASE software for corporate computing environments including IBM mainframes, Digital Equipment VAX VMS and IBM PCs. Its product line includes KBMS, the Knowledge Base Management System and INTELLECT, the first natural language system for database access. In March 1990, AICorp acquired the 1st-CLASS Expert Systems Inc. product, 1st-CLASS, an end-user expert system development software tool.

AICorp has 128 employees at its Waltham, Mass. headquarters and regional offices in major cities throughout the United States and Canada. AICorp Europe, the company's European distributor, with 23 employees, has offices in Belgium, France, Germany, Holland, and the United Kingdom. Other

international distributors are based in Australia, Denmark, Italy, Japan, Norway, Sweden and Switzerland.

MEMPHIS, TN (OCT. 22) BUSINESS WIRE - Insituform of North America, Inc. (''INA'') (NASDAQ:INSUA) announced that William C. Willis, Jr. has been named its Chief Executive Officer, effective Monday.

Willis succeeds James D. Krugman, who has served as acting Chief Executive Officer since April and remains as Chairman of the Board. Jack Massar,

President and Chief Operating Officer, continues in those duties.

Most recently, the 38 year old Willis was President of The Paper Art Company, Inc., the Indianapolis-based subsidiary of The Mennen Company. During Willis' four year tenure, Paper Arts' sales quadrupled while producing a commensurate increase in profits. In his role as President, Mr. Willis was also responsible for identifying, analyzing and integrating acquisitions.

In 1982, Willis was employed by Jeno's Frozen Pizza Company, initially as Executive Vice President. At that time, Jeno's was unprofitable. Eight months later, he was promoted to President and within a year's time, Jeno's turned the corner to profitability on a 21% sales increase. At the time of the eventual sale of Jeno's in 1985, annual revenues had grown approximately 43% and profits approximated 12% of revenues. Upon completion of the sale, he joined R.W. Consultants, Inc., the merger and acquisition firm that had been retained by Jeno's.

Willis earned his B.A. and M.B.A. degrees from Columbia University. His first job was with PepsiCo, Inc.'s Frito-Lay subsidiary. He later held executive positions with International Playtex and Keyes Fibre Corporation.

Willis and his wife Donna are relocating to Memphis. He is a member of the Young Presidents Organization, the Columbia Alumni Advisory Board and a member and director of several business and civic organizations in Indianapolis.

In announcing Willis' appointment, Krugman stated, ''Will Willis is an outstanding businessman with drive, proven leadership skills and entrepreneurial instincts. He has built a track record of substantial accomplishments, both in turning around unprofitable businesses and in successfully growing profitable ones. All of us at INA welcome Will to the team.''

Insituform of North America, Inc. provides state-of-the-art techniques for the reconstruction of deteriorated pipelines utilizing the InsituformR Process. In addition, INA furnishes its present network of thirteen United States licensees with the InsitutubeR, resins and other related products used by them in the rehabilitation of pipeline systems throughout the country, and is a center of research and development for trenchless pipeline rehabilitation processes.

Through a wholly-owned subsidiary, NU-PIPE, Inc., INA plans to introduce the NuPipeR Process later this year.

INA serves the needs of America's infrastructure.

LEE, MA (OCT. 22) BUSINESS WIRE - Capfilm Inc., an over-the-counter traded company, announced Monday that its Nov. 2, 1990 Annual Meeting of shareholders has been adjourned to Dec. 14, 1990, 11:00 a.m., Greylock Street, Lee.

The company has established Nov. 19, 1990 as the record date for shareholders to be entitled to vote at the above mentioned meeting. The company is in the process of responding to comments to its proxy statement from the Securities and Exchange Commission and will forward formal notices to shareholders of record.

Capfilm is engaged in marketing and production of polycarbonate dielectric film utilized as insulating materials in high performance precision electronic capcitors.

Precision film capcitors are utilized in equipment manufactured for the medical, telecommunication, military, and aircraft instrumentation industries as a result of such capacitators low loss electrical properties, lightweight, small size and high temperature capabilities.

Presently the company believes that Bayer A.G., a Western German company, is the only producer of polycarbonate dielectric film other than the company.

#90295b0977 10/22/1990 ~Business Wire

DUNCAN, SC (OCT. 22) BUSINESS WIRE - One Price Clothing Stores Inc. (NASDAQ:

ONPR) reported that for the third quarter ended Sept. 29, 1990, sales increased 25 percent to $25,387,692 from $20,280,715 for the like quarter of last year.

Net income for the quarter however decreased to $154,085 from $491,981 last year.

Earnings per share were 2 cents per share for the third quarter of 1990 compared with 7 cents per share for the like quarter of 1989. Earnings per share decreased 71 percent.

For the nine months ended Sept. 29, 1990 sales were $81,240,529 compared with $59,421,167 for the comparable period of last year, and increase of 37 percent. Net income for the nine months increased 17 percent to $2,912,696 from $2,486,804. For the first three quarters of 1990, earnings per share were 44 cents per share vs. 37 cents per share a year earlier, an increase of 19 percent.

Same store sales decreased 7 percent for the third quarter 1990 compared with the like quarter last year. For the first nine months of 1990, comparable sales were down .2 percent over the like nine months of the prior year.

The company considers stores that are 18 months or older as comparable for this purpose. There were 163 comparable stores at the end of the quarter.

Management feels that sales during the third quarter were adversely impacted by the general downturn in the economy which resulted in a slowdown in consumer spending, particularly during the month of September.

Earnings per share for the third quarter reflects the negative impact of additional expanses which totaled 5 cents per share. The additional expenses relate to transition costs for the company's merchandise price change to $7 and one time charges, including severance expenses related to the company's former president.

A net of 15 new stores were opened during the third quarter of 1990. During the first nine months of 1990, a net of 53 new stores were opened. A net of 54 new stores were opened during the like period in 1989.

At Sept. 29, 1990, the company operated a total of 279 stores in 12 states, compared with 209 stores in operation at the end of third quarter last year. This represents a 33 percent increase in stores.

SYDNEY, AUSTRALIA (OCT. 22) BUSINESS WIRE - Westpac Banking Corp. (NYSE:WBK) Monday finalized the setting-up of the first joint banking venture between Australia and Indonesia.

Westpac's Managing Director, Stuart Fowler, said the Westpac Panin Bank with Pan Indonesia Bank Ltd. as a shareholder would open today with G. Jamieson Bryan as its president.

Westpac Panin will specialize in trade financing for Australian and Indonesian companies with business operations in both countries. It is likely to give a boost to the two-way trade between Australia and Indonesia, now running at more than $A1.6 billion a year.

The creation of Westpac Panin crowns more than 10 years of cooperation between the two banks in financing large corporations and export deals.

Fowler said Westpac Panin would provide new opportunities for involvement in Indonesia's transition to the status of newly-industrializing country (NIC). Each month, more Australian-Indonesian joint venture opportunities are being explored.

''The focus will be on trade-related financing, especially the export of Indonesian-made products or value-added goods and services,'' Fowler said.

Westpac's extensive international network would also give the new bank access to business in other countries, Fowler said. This would result in increased exports and overall economic improvement for Indonesia.

Westpac Banking Corp. is an international financial services group headquartered in Australia, with operations extending offshore to 29 countries. In its home markets of Australia, New Zealand, Papua New Guinea and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through Westpac offices in Asia, Europe and the United States.

#90295b0985 10/22/1990 ~Business Wire

CAMBRIDGE, Mass. (OCT 22) BUSINESS WIRE - Bolt Beranek and Newman Inc. (BBN) Monday reported net income of $5,193,000, or 28 cents per share, on sales of $62,585,000 for its first quarter ended Sept. 30, 1990.

This compared to a net loss of $3,143,000, or 17 cents per share, on sales of $64,149,000 for the same period a year ago. This year's first quarter results

include non-operating income of $5,096,000 relating to a previously announced sale of equipment to Delta Air Lines.

The company reported operating income of approximately $525,000 for the quarter ended Sept. 30, 1990. BBN Chairman and chief executive officer, Stephen R. Levy, said the company benefited from the cost reductions achieved during fiscal year 1990, and from substantially improved product margins when compared to the same period a year ago.

BBN also announced the signing of a contract with the U.S. Defense Communications Agency for network management operations, hardware and software maintenance, network installation, training, and network engineering services in support of the Defense Data Network (DDN). The contract is funded for $33 million in its first year and provides options for up to an additional four years of effort. The contract is in addition to an ''indefinite delivery, indefinite quantity'' (IDIQ) contract recently awarded BBN under which the company will also provide communications hardware for the DDN.

''We are extremely pleased that BBN will continue to serve the worldwide data communications needs of the Department of Defense under these two contracts. The Defense Data Network is one of the world's largest private data communications networks and is therefore one of the most important areas of activity for our Communications Division, which has been in the business of building global data network systems for government and industry for over 20 years.'' Levy said.

Levy also reported that BBN Advanced Computers' results were better than anticipated. During the quarter, it sold two of its TC2000 parallel computer systems to aerospace and defense companies for use in simulation applications on defense-related programs. ''The refocusing of BBN Advanced Computers business, the cost reductions made during fiscal 1990, and the high level of satisfaction of existing TC2000 customers, have had a favorable impact on the operating results for this subsidiary in the two most recent quarters.''

Headquartered in Cambridge, Mass., Bolt Beranek and Newman is a diversified high technology corporation. BBN undertakes contract research and development in computer, communications and acoustics technologies; builds medium-to-large-scale systems including data communication networks, distributed simulation and training systems, sensor and surveillance systems, and large-scale parallel processing computer systems; and develops and markets packaged data analysis software products. For its fiscal year ended June 30, 1990, BBN had sales of $262 million. T

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 2

GROUP LED BY PHOENIX PARTNERS OWNS 28,200 SHARES (13.15%) OF KANEB SERVICES INC (TICKER: KAB) OF RICHARDSON, TX.

ANNOUNCEMENT:

Effective on Sept. 21, 1990, Kaneb Services Inc. filed an amendment to its certificate of incorporation which effected a reclassification of the class A preferred stock and eliminated all dividends that had accrued on the class A preferred stock but that had not been paid through June 30, 1990. Consequently the right of the holders of the class A preferred stock to vote as a class for the election of two directors to the board has been eliminated since Kaneb Services Inc. will not be in arrears on the payment of the equivalent of six quarterly dividend payments on the shares.

PURPOSE:

Termination of class A filing obligations.

By KAREN TIMMONS

WASHINGTON (OCT. 22) UPI - Americans will spend $406 billion on insurance premiums this year, but few know exactly what they're getting for their money and many are spending too much or buying coverage they don't even need.

Customer ignorance about health, auto, life and home insurance is the hallmark of the industry, according to industry watchdog groups and consumer activist Ralph Nader, who has just co-authored a book on the subject.

It's a costly ignorance. According to the National Insurance Consumer Organization, 12 percent of the disposable income in the United States is spent on the direct and indirect costs of insurance..

Nader said consumers hold three big myths that typically cause them to make mistakes when buying insurance. The first myth, he said, is that insurance rates for the same coverage vary little.

''I don't think people are aware, because you never see comparative charts, that there are huge price differences between auto insurance companies, for example,'' Nader said. ''If people realized that, they could really shop around and find the cheaper one.''

Myth number two is that you can never have too much insurance.

''There's a lot of insurance that should never be bought under any

circumstances,'' Nader said. ''So you buy comprehensive health insurance. You don't then buy cancer insurance or other kinds of disease specific insurance which are very high-priced and not very well-written in terms of the coverage.''

J. Robert Hunter, president of the National Insurance Consumer Organization, agrees that ''buy comprehensively'' is a golden rule of insurance and adds that consumers should aim only for protection against ''catastrophic dollar losses.''

Hunter says many consumers ''tend to think backwards'' in purchasing insurance aiming for coverage of ''any little thing that goes wrong.''

''They should be thinking about what big thing can go wrong that I really need protection against,'' Hunter said. In part, that means smart consumers buy a policy that is as comprehensive as possible with the biggest deductible they can afford. Generally, the bigger the deductible, the smaller the premium.

Hunter says many Americans are purchasing ''coverages that shouldn't be bought'', such as rental car or, in some cases, life insurance, ''and even on the stuff that they should be buying they're overspending.''

Of the $406 billion Americans pay in annually in insurance premiums, Hunter said, ''somewhere on the order of $80 billion to $100 billion is excessive over-insurance or overpriced, inefficiently purchased insurance.''

Most people need only comprehensive health, life (but only if you have dependents), auto, homeowners, and disability insurance.

''The third myth'' about insurance held by many, according to Nader, ''is that there's not much that you can do if they (the insurance company) don't pay up. There's a lot that you can do.''

Nader, with lawyer turned consumer author Wesley Smith, wrote ''Winning the Insurance Game'' (Knightsbridge Publishing Co., $24.95), which includes not only tips on what to do if insurers don't pay, but a wealth of advice for buying insurance wisely and a heap of criticism against the insurance industry.

''This book is a kind of insurance policy for insurance customers against the insurance industry,'' said Nader, who currently heads the Center for the Study of Responsive Law, which researches consumer and environmental issues.

Nader points at auto and health insurance as the two ''biggest ripoffs in the industry,'' primarily because insurers have done little to keep costs down.

''The basic ideal is for the insurance industry to be the sentinel for health and safety in this country as the best way to keep down their claims by saving lives, injuries and preventing disease,'' Nader said. ''They should use their

political and economic muscle to lobby for safety. ... They can do this with a tiny portion of their financial resources.''

Nader said industry streamlining would also save consumers billions of dollars.

''The paperwork alone for health policies in our country, group and individual is $50 billion a year,'' Nader said. '' Ideally you would just have one policy that would cover the entire ball game.''

While knowledgable consumers can save both money and headaches under the current system, Nader and Smith say national health insurance and a major reform of the industry are the long-term solutions to both poor coverage and the escalating costs of insurance. With a total U.S. health care expenditure of $650 billion anticipated this year, Smith notes that 37 million Americans have no health insurance either because they can't afford it or are not healthy enough to qualify.

''Health insurance is a lot like (getting credit from) banks,'' Smith said. ''If you don't need health insurance you can get it. If you need it, you can't because they only want to insure the healthy people who won't make claims.''

Smith, who speaks on consumer issues around the country, said people increasingly view national health insurance as the answer to spiraling medical costs but are not yet motivated to push for that change.

''People are in despair,'' Smith said. ''They seem to feel impotent and powerless in the face of special interests and that's what has to change.''

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (OCT. 22) COMTEX - The Mortgage Bankers Association has released a report predicting Iraq's August invasion of Kuwait and subsequent jump in oil prices will push the U.S. into a "mild recession" beginning in the fourth quarter and continuing into early 1991.

The Gross National Product grew at a scant 0.4 percent annualized rate during the second quarter and preliminary third quarter GNP figures to be released later this month are also expected to show very slow growth.

Basing its forecast on a peaceful resolution of the Mideast crisis and a successful budget accord, the MBA says the recession will be "mild in both

depth and duration."

"The faster rate of growth of GNP with our trading partners relative to ourselves should boost our exports while the slowdown in consumer spending should keep imports at lower levels, resulting in a drop in the nation's trade deficit," explained MBA economist Robert Rosenblatt. "Plus the relationship between inventories and sales are much more in balance than they have been in past recessions."

"Our forecast is for third quarter GNP at 1/2 (percent) growth, fourth quarter and first quarter at negative 1 1/2 to 2 percent at an annual rate, then picking up to positive 2 percent for the second half of 1991," Rosenblatt said.

The MBA's outlook differs somewhat from the Bush administration's projections. While both expect an upturn in the second half of 1991, the administration is predicting the economy will avoid recession, posting sluggish gains through mid-1991.

"Our best estimate is the economy will grow weakly in the fourth quarter and first quarter of next year," Michael Boskin, chairman of the president's Council of Economic Advisers, said last week.

Boskin added the administration expects GNP will be "a little below 1 percent in 1990 and a little above 1 percent in 1991."

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 8

ANNOUNCEMENT:

On Oct. 19, 1990, ASK announced that the Delaware Chancery Court confirmed its prior decision not to block ASK's proposed stock sale to EDS and Hewlett Packard. Plaintiff's actions to appeal the decision have been denied.

-30- 423
#90295c0852 10/22/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 16

ANNOUNCEMENT:

On Oct. 19, 1990, the company issued a press release that included a letter it had sent to the chairman of KCPL in response to an earlier letter from the chairman. The letter refuted the claim that the company had "stonewalled" attempts of KCPL in attempting to meet with the company.

#90295c0857 10/22/1990 ~Comtex

WASHINGTON (OCT. 23) COMTEX - The 8-K report filed at the SEC shows on Sept 28, 1990, Victoria Financial Corp.(TICKER: VICF) completed a private placement pursuant to which it sold to two institutional investors an aggregate of $4.25 million principal amount of its 10% ten year convertible subordinated notes.

The notes are convertible into Victoria's common stock at any time at an option of the holder at a conversion price of $2.00 per share.

The proceeds of the private placement were used to reduce debt and private capital for Victoria's subsidiary, Victoria Fire & Casualty Co., to support its growth in the writing of nonstandard automobile insurance.

Victoria's executive office is located at 5915 Landerbrook Drive, Cleveland, Ohio 44124 and its telephone number is (216) 461-3461.

KHARTOUM (OCT 22) - Thirty-seven rebels of the Sudan People's Liberation Army were killed in a clash with paramilitary forces at Melut in Upper Nile, the Sudan News Agency Suna reported Monday.

A military source quoted by the agency said a rebel officer holding the rank of captain was captured in the clash Saturday. None of the paramilitary forces were injured, the report said.

HARARE (OCT. 22) - Six South African members of parliament, including a white member of the right-wing Conservative party, were hosted Monday by the Zimbabwe government in the first meeting of its kind.

''It was an historic meeting,'' said South African Trade Commissioner Nico Nel Ater. ''In the past, I don't think the atmosphere was conducive to a meeting at such a level.''

Zimbabwe, one of the fiercest African critics of apartheid, has maintained a policy that allows it to trade with its powerful southern neighbour, but refuses political contact.

Observers saw Monday's meeting as a major breakthrough in President Frederik de Klerk's attempt to normalise relations with Africa and the rest of the world.

Nel said the meeting had been approved by the cabinet of President Robert Mugabe.

The South African delegation met for two hours with 12 black Zimbabwean Mps. It also met deputy parliament speaker Welshman Mabhena and deputy minister of labour Florence Chitauro.

The group has also visited Mozambique, Malawi, Lesotho and Swaziland, all of which have extensive backgrounds of relations with South Africa.

#90295d0520 10/22/1990 ~French/German News Agency

PARIS (OCT 22) - United States Defense Secretary Dick Cheney Monday confirmed here Iraq had captured a ''certain number'' of U.S.-made Hawk anti-aircraft missiles when Iraqi troops invaded Kuwait on August 2.

He said following talks with President Francois Mitterrand that Washington did not know how many of these missiles had fallen into the hands of the Iraqis and whether they could operate them.

The daily Washington Post has reported that the Iraqis had captured about 150 Hawk missiles and radar equipment.

Each of the missiles is capable of striking a high-speed aircraft flying at low to medium altitude up to 40 kilometres away, it quoted officials and government analysts as saying.

Cheney, who was on the last day of a four-day visit to France, said on La Cinq television that there were no technical or political reasons for the United States to launch a military attack against Iraq in the next few months.

There was no timetable or artificial limits and Washington was relying on the United Nations-imposed embargo against Iraq, but there were other options, he said.

Talks with Baghdad would be possible once Iraq abides by U.N. Security Council resolutions calling for an Iraqi pullout from Kuwait, Cheney added.

The accent must remain on the ''agression of (Iraqi President) Sadam Hussein'' and he voiced his opposition to a Middle East peace conference dealing with all conflicts in the region.

JERUSALEM (OCT. 22) - A court here on Monday freed on bail the assistant mufti of Jerusalem, arrested last week following a confrontation near the Temple Mount in which Israeli security forces killed 21 Palestinians.

Sheikh Mohammad al-Jamal, an assistant to the Moslem spiritual leader of Jerusalem, was released on bail of 20,000 shekels (10,000 dollars) and on condition that he refrain from "subversive activities," court sources said.

Sheikh Mohammad is suspected by police of having played an active part in clashes that erupted October 8 after Palestinians began hurling stones at Jewish worshippers at the Wailing Wall.

Police responded with tear gas but later opened fire with live ammunition,

killing 21 Palestinians, wounding 150 and prompting the unanimous condemnation

of their actions by the United Nations Security Council.

The release of Sheikh Mohammad came on a day of extreme tension in Israel following the stabbing deaths of three Israelis by a 19-year-old Palestinian on Sunday.

The attack, which police said appeared to be in retaliation for the deaths of the 21 Palestinians, led Jerusalem authorities to bar Arabs from the Israeli-occupied West Bank and Gaza Strip from entering the city.

Police also mounted roadblocks to carry out searches and identity checks of Palestinians in Israel.

On the West Bank, Israeli troops shot and fatally wounded a 14-year-old Palestinian boy in a confrontation that erupted in the community of Jenin, army and Palestinian sources said.

Mahmoud Lakhlouch was the 739th Palestinian to die from Israeli gunfire in the occupied territories, according to an unofficial toll compiled by AFP, since the start of an Arab uprising in December 1987.

BUENOS AIRES (OCT. 22) - Argentine Vice President Eduardo Duhalde Monday charged that a former army colonel who led a military uprising in 1988 was waging a "destabilization campaign" against the government.

Mr. Duhalde made the accusation in response to a letter sent by retired colonel Mohammed Seineldin to President Carlos Menem Saturday, warning that conditions in the military were ripe for another revolt.

Mr. Seineldin also complained that his followers in the military were being persecuted. The letter arrived while Mr. Menem was on a tour of Europe.

The newspaper Clarin said the colonel's missive was meant to evoke a letter General Francisco Franco wrote to Spain's Ministry of War in 1936 shortly before he rose up in revolt against the Republican government, launching the Spanish civil war.

Mr. Duhalde threatened Mr. Seineldin with a military court martial unless he disavowed the letter, which he said was part of "a campaign to destabilize the democratic process."

"There is no more unrest in the armed forces than in other sectors of the state," the news agency Noticias Argentinas quoted the vice president as saying.

VALLETTA (OCT. 22) - German President Richard von Weizsaecker at the start of a three-day trip to Malta Monday thanked the Mediterranean island state for its contribution to both the German and the European unification.

Weizsaecker, speaking at a dinner given in his honour by Maltese President Vincent Tabone, said he hoped that ''the good atmosphere'' that marked last December's U.S.-Soviet summit off the island's coast would continue to prevail.

Weizsaecker, accompanied by his wife Marianne and German Minister without portfolio Lothar de Maiziere, said he was happy that Malta had asked to become a full member of the European Community.

Weizsaeckers earlier had separate talks with Tabone and Prime Minister Edward Fenech Adami.

JEDDAH (OCT 22) - Cairo President Hosny Mubarak told Egyptian troops in Saudi Arabia Monday he hoped the Gulf crisis would end without bloodshed, but he said Arab armies would have to confront Iraq if it attacked another Arab

country.

The Egyptian news agency Mena said Mubarak addressed the troops after a meeting behind closed doors with the commander of the Egyptian forces in Saudi Arabia, General Muhammad Ali Bilal, and Egyptian Defence Minister Yussif Sabri Abu Taleb.

Mena quoted Mubarak as saying he hoped that Iraq would think deeply, review its calculations and withdraw from Kuwait. ''If, God forbid, Iraq commits aggression against another Arab country and moves its armies against another country, then the Arabs must move their armies against Iraq,'' Mubarak said.

Asked about reports that Iraq had deployed missiles in Sudan, Mubarak said, ''I will strike whoever deploys missiles on my borders. This is no joking matter. This will not take 24 hours. We do not attack anyone but our dignity does not accept bargaining.''

Mubarak arrived for a surprise visit at the northeastern Saudi airport of Qaysumah earlier in the day.

Egypt has sent some 14,000 troops to join a multinational force deployed in the region to protect Saudi Arabia against a possible Iraqi attack.

Bangkok (OCT. 22) - Some of Burma's dissident monks, facing threats of arrest and imprisonment by the country's military-led regime, have agreed to end their boycott of religious services attended by military personnel, reports said Monday.

''The senior monks said that they accepted the appeal for an end to the boycott,'' said Radio Rangoon in a report on events in Mandalay City, the centre of religious opposition to the military government.

By Sunday afternoon some senior monks in Mandalay had ordered an end to the boycott. It ended all buddhist rites for members of the military and their families. Some monks in Rangoon also gave in to the military pressure, added the report.

Senior monks in Mandalay launched their ''religious boycott'' by refusing to minister military personnel and their families last month in protest at the alleged killing of monks and undemocractic trends in the country.

Burma, where almost 90 percent of the population is Buddhist, has been ruled under martial law by the State Law and Order Restoration Council (Slorc) since September, 1988, when a pro-democracy movement was silenced.

Last week, Slorc head, General Saw Maung gave the dissident monks until Saturday midnight to end their boycott and on Sunday the Slorc issued an order giving military officers the right to arrest monks taking part in political activities.

It was still unclear how many Burmese monks had refused to end the boycott, and what will happen to the offenders now that the deadline is passed.

SEOUL (OCT. 22) - South Korea's economy is set to grow by 8.8 percent this year - 2 percent more than in 1989, the central Bank of Korea announced here Monday.

The Gulf crisis combined with a dip in economic performance in the industrialised countries had prompted bankers to revise downard their original prediction of 9 percent, said a statement.

Meanwhile, South Korea was on course for a current account deficit of 1.7 billion U.S. dollars this year, said the central bank report.

Seoul was able to report current account surpluses from 1986 to 1989 - the surplus on goods and services last year amounted to 5.1 million dollars.

Inflation, likely to reach 10 percent in 1990, was the biggest headache, said the bank report.

It urged the government to curb spending in the last quarter in order not to further increase the quantity of money in circulation. Credits should also be given sparingly, added banking experts.

-30- 1117

#90295d6290 10/22/1990 ~French/German News Agency

SEOUL (OCT. 22) - Eight students demanding the ouster of President Roh Tae-Woo's government firebombed the South Korean intelligence agency here Monday, local press reports said.

The students, arriving by private car and taxi at the front gate of the National Security Planning Agency (NSPA) in central Seoul, hurled more than 20 fire bombs at a building, the national Yonhap News Agency said.

They then set fire to the car they had brought and scattered anti-government leaflets, before being arrested by 10 NSPA guards and four policemen who chased them firing blank shots, Yonhap said.

The NSPA building received little damage from the attack, other press reports

said.

The leaflet accused Mr. Roh's government of spying on civilians through the NSPA, formerly known as the Korean CIA, and the controversial Defense Security Command (DSC).

#90295d6470 10/22/1990 ~French/German News Agency

Manila (OCT. 22) - An aide to former President Ferdinand Marcos was sentenced here Monday to 60 years in jail for misusing public funds.

The court said Luis Tabuena, a former manager of Manila Airport, had misused millions of pesos in 1986 and was guilty on three counts of malversation.

Another ranking airport official, Adolfo Peralta, was also held guilty on one count and was sentenced to 20 years imprisonment.

Tabuena, a close associate of then President Marcos, claimed he had disbursed 55 million pesos in accordance with a ''lawful order'' by the president.

The court said his defence was not credible and ordered Tabuena and Peralta to pay fines equivalent to the amount of money misused.

#90295d6800 10/22/1990 ~French/German News Agency

KABUL (OCT. 22) - Afghan forces have gone on the offensive after resisting intensified guerrilla attacks aimed at capturing the capital Kabul and several key cities, officials said here.

Offensive operations are under way in Kalat, the capital of the southeastern province of Zabul, to recapture "one or two" security posts overrun by mujahedeen guerrillas, General Nabi Azimi said late Sunday.

Gen. Azimi, who is the first deputy defence minister and commander of the main Kabul garrison, told reporters there had been an upsurge of guerrilla activity in at least six provinces, including Kabul.

Troops moved from village to village in the neighbouring province of Logar, clearing them of militants who then tried to reach Kabul but were halted by artillery and aerial attacks, he said.

Government forces also broke guerrilla defences around the eastern city of Jalalabad and have expanded their area of control, the general said, denying mujahedeen claims of capturing security posts in the area.

Security forces successfully fended off attacks against the town of Kohsan,

near the Iranian border, and Baglan in northern Afghanistan and humbled a three-pronged mujahedeen advance about 40 kilometres (25 miles) outside of Kabul.

General Azimi put guerrilla losses in the month-long fighting at at least 1,000 killed, wounded or captured. He said 21 guerrilla field commanders and 16 "foreign military advisors" were among the guerrilla casualties.

He did not give the nationality of the foreign advisors, but repeated allegations that Pakistan's military intelligence was behind the stepped-up guerrilla attacks.

Gen. Azimi declined to give the government's own losses in the latest fighting. But officials admitted privately that security forces too suffered heavy casualties.

Asian diplomats here said the Kabul regime seems to have got over a difficult period and the ongoing fighting should die down with the onset of winter by mid-November.

#90295d6940 10/22/1990 ~French/German News Agency

LUXEMBOURG (OCT. 22) - The foreign ministers of the twelve European Community (E.C.) member-states gathered here Monday for a one-day meeting aimed at preparing next week's Community summit in Rome and discussing the controversial matter of a sharp reduction in agricultural subsidies.

The E.C. agriculture ministers have already met three times in a vain attempt to reach agreement on the E.C. Commission recommendation that the subsidies be cut by 30 per cent.

Should the foreign ministers also fail to solve the problem, the heads of state and government will have to take it up at the summit. The issue is threatening seriously to hamper the current negotiations within the General Agreement on Tariffs and Trade (Gatt).

The foreign ministers will also discuss plans for a European economic and monetary union, and steps towards political unification.

#90295d6970 10/22/1990 ~French/German News Agency

JERUSALEM (OCT. 22) - Israel and the Soviet Union have failed to reach agreement on a long-term contract for the purchase of Soviet crude oil, a senior Israeli official said here Monday.

Shimon Guilboa, who heads Israel's Petroleum Committee, told reporters on his

return from negotiations in Moscow that the Soviet Union wanted to sell crude oil to Israel along terms dictated by the free market rather than be limited by a long-term contract.

Israel, said Mr. Guilboa, was hoping to get Soviet crude oil in exchange for Israeli products but Moscow was not interested in such a deal.

"The Soviet Union wants foreign currency in exchange," the Israeli oil official said.

Israel's crude oil needs are currently met by purchases from Egypt, Mexico and Norway.

SYDNEY (OCT. 22) - Australia's largest bank, Westpac Banking Corp., Monday opened a joint banking venture with Pan Indonesia Bank (Panin), Australia's first such operation with its neighbour.

Westpac said in a statement that Westpac Panin Bank, which was 85 per cent owned by Westpac and 15 per cent owned by Panin, had opened its first office in Jakarta.

Westpac Panin intended to exploit the estimated 1.6 billion Australian dollar (1.2 billion U.S.) two-way trade between the two nations, it said.

It is expected to specialise in trade finance for both Australia and Indonesian companies, which would have access to Westpac's international network.

"The combination of Panin's extensive Indonesian network of 63 branches and Westpac's presence in 29 countries will enable Westpac Panin to expand its trade-related business in Indonesia and internationally," Westpac said.

MANILA (OCT. 22) - Mounting oil bills and weak exports pushed the Philippines' trade deficit to 2.56 billion dollars in August, a 50 percent jump from the level a year ago, the Central Bank (CB) said here Monday.

Imports reached 7.87 billion dollars at the end of August, with crude oil accounting for 885 million dollars, or 11 percent, a CB statement said.

The import bill from January to August 1989 totalled 6.84 billion dollars while the trade deficit reached 1.71 billion dollars in the same period.

Exports, topped by semiconductors and garments, reached 5.31 billion dollars in August 1990, an annual increase of only 3.4 percent over the 5.13 billion dollars recorded in January to August 1989.

The mounting trade deficit is putting further pressure on the Philippine peso, which has shed 15 percent of its value since the year began and is now officially trading at 25.75 to the dollar.

Philippine banks have stopped giving letters of credit for non-essential imports to ease the drain on dwindling international reserves.

#90295d7030 10/22/1990 ~French/German News Agency

SINGAPORE (OCT. 22) - An Asian consortium has bought Australia's Webforge steel manufacturing group for 45 million Singapore dollars (26.3 million U.S.) press reports said Monday.

The Business Times said the takeover of Webforge, Australia's largest and Southeast Asia's only steel grating manufacturer, was led by K.K. Kuah, a Singapore businessman previously involved in shipbuilding.

The consortium included Prudential Asia, the local investment arm of the American Prudential Insurance Co, and the Singapore branch of the Hong Kong Bank.

Neither Mr. Kuah, who is now the Executive Chairman of Webforge, nor Prudential sources were available for comment.

Mr. Kuah was quoted as saying the 15-year old Webforge, which had previously focussed mainly on the Australian home market, would now extend its Asian operations significantly.

Webforge has three factories in Australia, one each in New Zealand and Singapore, and a 50-50 joint venture in Guangzhou, southern China. It was a division of Metro Industries group in Australia until 1987 when the latter was acquired by another Australian company, Parbury Henty Holdings.

#90295d7140 10/22/1990 ~French/German News Agency

TOKYO (OCT. 22) - Japanese big businesses are cool toward employing the handicapped, with 81.2 percent of companies with over 1,000 employees failing to meet a government-set ratio of handicapped to able-bodied workers, a Labor Ministry survey report said Monday.

The report said the number of handicapped workers totaled 203,634 as of June 1 this year, accounting for 1.32 percent of the total employees in Japanese

businesses.

It said 47.8 percent of all companies failed to meet the government-set requirement that the handicapped should represent at least 1.6 percent of the total workforce, and 81.2 percent of firms employing more than 1,000 people.

Companies with more than 300 employees have to pay 40,000 yen (320 dollars) per person a month for failing to meet the requirements, it said.

But the report said all 148 government and public corporations cleared their own target of 1.96 percent for desk workers and 2.16 percent for workers on sites.

-30- 1177

#90295d7200 10/22/1990 ~French/German News Agency

MANILA (OCT. 22) - A Philippine court Monday sentenced a former aide of Ferdinand Marcos to 20 years in prison for embezzling over two million dollars in public funds shortly before the late ruler was overthrown in 1986.

Luis Tabuena, a former manager of the Manila international airport, was also barred from ever holding public office again by a special anti-graft court, presiding justice Francis Garchitorena said in a radio broadcast.

Mr. Tabuena and his airport assistant Adolfo Peralta, sentenced to 20 years in prison and also banned from government service, were found to have illegally withdrawn 55 million pesos (2.14 million dollars) in airport funds weeks before Mr. Marcos was overthrown in a February 1986 revolt.

Mr. Tabuena was sentenced to a maximum of 20 years in jail on three counts, but under the law he will serve all terms simultaneously.

-30- 1067

#90295d7370 10/22/1990 ~French/German News Agency

NAIROBI (OCT. 22) - The World Food Program (WFP) said Monday that it has positioned 19,000 tonnes of wheat at Port Sudan for rapid delivery to help people in areas hit by drought.

The food will be used by 800,000 residents in the Red Sea province of Eastern Sudan, in northern Kordofan and in the Darfur and El Butana regions of western and central Sudan.

This is part of a "preliminary emergency allocation" of 25,000 metric tons that will be supplied for immediate drought relief. The total food aid needs for the coming year is still unknown as full crop assessment will not be completed until the end of November, the WPF said in a press statement.

However, the Sudanese government has requested urgent delivery from abroad of 75,000 metric tons of cereals for relief distribution to some 2.4 million drought-affected people in northern Sudan.

In 1989, rains failed in many parts of Sudan and the U.N. programme supplied food to about one million drought-affected people in the country.

The continuing drought is causing early migration of farmers and herders from their lands in search of water, food, grazing areas and employment.

#90295d7440 10/22/1990 ~French/German News Agency

LONDON (OCT. 22) - The dry cargo market was boosted by further improvements in rates on the main grain, coal and ore routes over the past week, traders said.

The BIFFEX (Baltic International Freight Futures Exchange) index closed up 57 points on the week at 1,274 points.

The purchase of 350,000 tons of U.S. corn and 100,000 tons of sugar by the Soviet Union caused optimism on the market, with the USSR expected to buy an extra sizeable amount of sugar on the world market.

China's purchase of nearly 300,000 tons of U.S. wheat also boosted the tone.

Brokers raised their nominal rate on the U.S. Gulf to Japan grain route to 23.1 dollarston from 22.125 dollars at the end of the previous week. This followed the fixture on the physical market of a 52,000 ton vessel at 22.25 dollarston against 21 dollars the previous week, and unconfirmed rumours that another vessel had received a rate of 23.5 dollars.

The nominal rate on the U.S. North Pacific to Japan route rose to 12.5 dollarston from 10.667 dollars, after a 52,000 tonr received 12 dollarston against 10.5 the previous week on that route and after unconfirmed rumours said that a rate of 12.5 dollars had also been paid.

In the coal sector, the nominal rate for the U.S. East coast to Japan, via South Africa, rose to 14.25 dollarston from 14 dollars. Brokers also raised the nominal rate on the West Africa to Europe ore route, from 5.317 to 5.37 dollarston.

The timecharter sector also fared well, with the nominal rate for a transatlantic round voyage between Europe and the United States rising to 8,350 dollars per day from 7,741.667 dollars at the end of the previous week.

#90295d7570 10/22/1990 ~French/German News Agency

VICTORIA (OCT. 22) - Five African nations have appealed to the United Nations sanctions committee to allow delivery of 120,000 tons of Kuwaiti oil blocked in Yemen under the U.N. embargo against Iraq, press reports in the Seychelles' capital said Monday.

The request was filed by the Seychelles, Mauritius, Comoros, Zimbabwe and Zambia, according to the reports which said the consignment was destined for all five countries.

The oil contract was negotiated before the U.N. Security Council resolution imposing the sanctions came into effect, the reports said .

The letter, made public Monday, also called on the United Nations to ensure that petroleum products were delivered at pre-crisis prices.

The government of Yemen had indicated it would be prepared to release the consignment provided the sanctions committee gave its approval, the reports said.

The United Nations embargo was voted against Iraq to protest its August 2 invasion and subsequent annexation of Kuwait.

#90295d7580 10/22/1990 ~French/German News Agency

Manila (OCT. 22) - The Philippines and the United States have narrowed down their differences, meaning talks for possible basing rights for American forces could be concluded by January, Foreign Affairs Secretary Raul Manglapus said Monday.

Manglapus, chief Philippine negotiator for the bases, said agreement has been reached on issues that have to do with the U.S. facilities, including environment, trade, veterans, science and technology and health.

''We hope that by the time the second round is held, we will narrow the areas of disagreement,'' Manglapus said. ''We are in the process of putting together technical level talks on the various issues involved in it,'' he added.

U.S. Ambassador Nicholas Platt said over the weekend that talks between Filipino and American negotiators would resume in Manila sometime in November to decide the fate of U.S. military bases.

Manila has served notice it wants full control of Clark Air Force Base and four other smaller installations after the current bases pact expires next September. Continued U.S. access to Subic Naval Base may be allowed, pending the outcome of the talks.

LONDON (OCT. 22) - A traffic court on Monday suspended Princess Anne's driver's license for one month and sentenced her to pay a 150-pound (300-dollar) fine after she was stopped for speeding in August, judicial sources said.

The princess, the daughter of Queen Elizabeth, was stopped by police in August near Oxford after being clocked at 77 miles per hour (120 kilometers per hour) and again at 90 mph (140 kph) in a 60 mph (96 kph) zone.

Princess Anne, who was represented by her lawyer, was previously sentenced in 1977 on similar charges.

The members of the royal family do not benefit from any special exemption from traffic offenses.

Viscount Linley, the son of Princess Margaret and an amateur racing driver, has had his license suspended three times over the last several years, and other members of the royal family have been sentenced on numerous occasions for speeding.

BONN (OCT. 22) - U.S. and Soviet presidents George Bush and Mikhail Gorbachev will visit Germany in November, government sources said Monday.

Gorbachev is to arrive for a two-day stay beginning November 4, during which he will sign a treaty on good relations, partnership and cooperation with German Chancellor Helmut Kohl. He will also be Kohl's guest at the latter's home in Oggersheim.

Bush plans to pay a private visit just prior to a session of the Conference on Security and Co-operation in Europe, scheduled for November 19-21 in Paris.

The sources said that Polish Prime Minister Tadeusz Mazowiecki will travel to Germany on November 8 for talks with Kohl on a comprehensive friendship treaty. The pact, which is to finalise the current Polish-German border, is expected to be signed and ratified early next year.

The dates of the three visits have not yet been confirmed by the German government.

LONDON (OCT. 22) - Imperial Chemical Industries on Monday announced that it had bought the 50 percent of Tioxide paint pigments which it did not already own for 160 million pounds (312 million dollars).

Tioxide is the world's second biggest manufacturer of pigments for paint and one of the leading manufacturers of titanium dioxide which is used in plastics, paper fibre, ink, beauty products and paint.

The group, which employs 5,000 people, owns factories in Europe, Canada, Australia and South Africa.

ICI bought the stake from the Cookson group to which it will also pay a half-time dividend of 11 million pounds.

Cookson said on Monday that it would use the proceeds to reduce its debt which totalled 575 million pounds last year following several ambitious takeovers.

Cookson said that it would concentrate in future on core activities of ceramics, plastics and metals.

Cookson shares had fallen from 300p in January to 70p on Friday, and on the news lost another five pence to 65p.

ICI shares rose two pence to 825p.

In 1989 Tioxide made a profit of 200 million pounds on sales of 709 million pounds.

The deal must be approved by Cookson shareholders and by the the merger and takeover office of the European Economic Community (EEC).

#90295d7730 10/22/1990 ~French/German News Agency
CAIRO (OCT. 22) - Egyptian Premier Atef Sidki welcomed in a newspaper interview published Monday that steps are being taken by the U.S. administration towards forgiving Egypt's 7.1 billion dollar debt for military supplies from the United States.

This would allow foreign exchange to be used for investment projects, he told the Cairo daily Al Akhbar, encouraging the development of the Egyptian economy and the creation of new jobs.

U.S. President George Bush had stated in early September that he wanted to cut Egypt's military debt in recognition of its commitment in the Gulf crisis.

Only the U.S. Senate has so far endorsed Bush's initiative while the House of Representatives has yet to approve it.

Sidki also welcomed moves by other members of the international community to write off Egyptian debts, saying this could total about 30 per cent of its total foreign debt of 50 billion dollars.

BANGKOK (OCT. 22) - The Khmer Rouge has urged the United Nations to put pressure on Phnom Penh to accept Prince Norodom Sihanouk as chairman of the newly formed Supreme National Council (SNC) for Cambodia, Khmer Rouge radio said on Monday.

In a broadcast monitored here the radio quoted Khmer Rouge leader Khieu Samphan, in a personal letter to U.N. secretary general Javier Perez de Cuellar, accusing the Vietnam-backed Hun Sen government of trying to destroy the SNC.

He claimed that Vietnam and Hun Sen had done everything possible to undermine the agreement to end the 12-year war in Cambodia proposed by the five permanent members of the United Nations security council -- Britain, France, United States, Soviet Union and China.

He also alleged that Vietnam had sent 8,000 additional troops into Cambodia to support Phnom Penh soldiers who were stepping up their offensive against the Khmer Rouge and the two other factions.

The Khmer Rouge and other guerrilla forces fighting Phnom Penh have repeatedly disputed Vietnam's announcement that its troops had completely withdrawn from Cambodia in September last year.

Mr. Khieu Samphan warned that until Phnom Penh altered its stance it would be impossible to implement the United Nations-backed peace plan establishing the SNC.

The release of details of the letter, dated October 16, comes only two days after Prince Sihanouk launched an attack against the Phnom Penh government from his home in Beijing.

The prince, the head of one of two non-communist groups allied to the Marxist Khmer Rouge in a guerrilla coalition, accused Phnom Penh of attempting to sabotage the peace process.

Phnom Penh insists that if the prince is to become chairman of the SNC then Hun Sen must be appointed vice-chairman.

Under the U.N. peace plan the SNC would embody Cambodia's sovereignty during a U.N.-administered transition period leading to elections.

PHNOM PENH (OCT. 22) - Cambodia's national ballet troupe returned here Monday from a U.S. tour minus five of its dancers, including star Yim Devi, all of whom defected during the tour, a foreign ministry official said.

The month-long tour started with 36 members and was the first cultural exchange between the United States and Cambodia since 1975. The two countries do not have diplomatic relations.

"We have encouraged travelling by the national ballet, but we regret that some American elements of Khmer origin had encouraged the defections," said Uch Kim An, director of the foreign ministry's political department.

Some of the dancers said Saturday during a stopover in Bangkok that they had been hounded coast-to-coast by Cambodian-Americans they suspected were supporters of guerrilla factions fighting the pro-Vietnam government here.

Four of the dancers decided to stay behind during a stop in Minnesota, while star Yim Devi said she would remain in hopes of furthering her studies.

The United States has a Cambodian refugee population of some 200,000.

Traditional Khmer dance disappeared under the radical Marxist regime of the Khmer Rouge between 1975 and 1979. Its return since then has been welcomed in Cambodia as a sign of a return to normalcy.

MOSCOW (OCT. 22) - Soviet oil outpit will continue to fall in 1991, vice president of the Soviet Gosplan state planning committee Artem Troitski told the Communist party paper Pravda on Monday.

Soviet Vice Prime Minister Leonid Abalkin had said in September that the Soviet Union had produced about 610 million tonnes of crude oil last year, representing a reduction of 15 million tons on the figure for 1988.

Soviet economists, quoted by Moscow News, said that output in 1990 would be 585 million tons. In 1989 the Soviet Union exported 127 million tons, and in 1990 exports were expected to total only 100 million tons.

The experts said that exports in 1991 were likely to fall to between 20 million and 25 million tons.

They noted that the Soviet Union was due to receive about 10 million tons of oil from Iraq this year in payment of debts owed by Iraq. Part of this oil would have been supplied to countries in eastern Europe.

Mr. Troitski, who did not give any figures, said that "the situation continues to offer little comfort" for countries in eastern Europe. Moscow News said that they would not receive 70 million tons of oil as had been expected, but between 15 million and 20 million tons less.

Mr. Troitski said that output was falling because heavy investment was needed to boost extraction.

The oil field at Tenguiz in Kazakhstan had not yet been put into operation, and other fields had yielded less oil than expected, he said.

#90295d7940 10/22/1990 ~French/German News Agency
WARSAW (OCT. 22) - Argentine President Carlos Menem arrived here Monday for the first ever official visit to Poland by a Latin American head of state, the official news agency Pap said.

Mr. Menem was greeted at the airport by President Wojciech Jaruzelski and Foreign Minister Krzysztof Skubiszewski. He was to hold talks later with General Jaruzelski and Prime Minister Tadeusz Mazowiecki.

On Tuesday, the Argentine president is to meet Solidarity leader Lech Walesa, a candidate in Polish presidential elections next month.

Mr. Menem's two-day visit, part of a tour of European capitals, is aimed at developing ties with Poland, with which Argentina has had diplomatic relations for 68 years. He is travelling with a delegation of about 30 businessmen.

Poland especially wants to buy ferries from Argentina and win fishing rights in the southern Atlantic, according to the government newspaper Rzeczpospolita.

Agreements on protection of investments and scrapping visa requirements between the two countries are to be drawn up before Mr. Menem leaves for Moscow Wednesday, sources here said .

#90295d8120 10/22/1990 ~French/German News Agency
KATHMANDU (OCT. 22) - Prime Minister Krishna Prasad Bhattarai has threatened to resign if the constitutional crisis in Nepal is not resolved soon, a highly placed source here said Monday.

Mr. Bhattarai's warning came in response to ammendments made by the royal palace to the country's new draft constitution and sent to the Council of Ministers -- the interim government led by Mr. Bhattarai -- for approval.

After receiving the latest draft, which would allow the king to retain "sovereign authority and emergency powers," Mr. Bhattarai sent a message to King Birendra saying he could not guarantee its approval by the council, the source said.

Mr. Bhattarai told the king's principal secretary Sunday that he would prefer to be relieved of his office than compromise his 50 years in politics by accepting the undemocratic constitution, the source said.

Mr. Bhattarai will not make any final decision until after a meeting Monday of the Council of Ministers to discuss the constitutional crisis, the source said.

The latest draft prepared by the royal palace attempts to retain all executive legislative and judicial power for the monarchy, as well certain emergency powers.

Under the original draft prepared by the Constitution Recommendation Commission (CRC), the king was made only the head of state to reign but not to rule. In every respect the king would have to follow the advice of the Council of Ministers.

The United Left Front (ULF), an important partner of the present coalition government, has criticised Mr. Bhattarai's threat, saying he could not resign as he was the representative of those who sacrificed their lives in the violent pro-democracy demonstrations between February and April.

#90295d8290 10/22/1990 ~French/German News Agency
MONROVIA (OCT. 22) - Armed groups who turned the Liberian capital Monrovia into a battlefield over the summer engaged in a common endeavour, witnesses say. Between them they looted the place bare.

The worst of the looters have been the government armed forces. With the advantage of being there first they were able to snap up the choicest items, chiefly video and stereo sets.

A second "advantage" for the army was the numerous professional thieves it has in its ranks, many released from prison in the spring by the government, which was seeking to reinforce an army purged of soldiers not belonging to then president Samuel Doe's Krahn tribe.

They frequently burned down houses they ransacked.

Later they were chased out of most of the capital by rebels of Charles Taylor's National Patriotic Front of Liberia (NPFL), who had to make do with their leavings, nevertheless finding attractive pickings in a few luxury villas.

Here they were able to liberate items of kitchen equipment and materials along with some radios overlooked by the soldiers.

NPFL rebels were mainly drawn to the capital's cars which they looted from parking lots and service stations. Having crossed the country on foot, they wanted to be driven to the presidential palace.

The NPFL fighters, many teenagers, took just a few weeks to wreck almost all the capital's cars and trucks which now litter the side of the roads, decoratedwith camouflage paint, windscreens broken, tyres burst and naturally

without their radios.

The NPFL has justified the looting as "contributions to the war effort" or "goods recovered from the enemy." The leadership made no effort to put a stop to the incidents and some have even set an example, as witnessed by Agence France-Presse journalists.

#90295d8410 10/22/1990 ~French/German News Agency

COLOMBO (OCT. 22) - Indian Minister of External Affairs Inder Kumar Gujral is to make a three-day visit to Sri Lanka next month, officials said here Monday.

A foreign ministry statement said that Mr. Gujral would visit Colombo from November 11 to November 13th at the invitation of his Sri Lankan counterpart Harold Herat.

It said Mr. Gujral, who will be the first minister of the new Indian government of Prime Minister Vishwanath Pratap Singh to visit Colombo, will have wide ranging discussions "on all aspects of Indo-Sri Lanka relations."

The Indian minister will also call on President Ranasinghe Premadasa during the visit, the brief statement added.

The conflict in the Tamil-majority northeast between government troops and the Liberation Tigers of Tamil Eelam (LTTE) is expected to be at the centre of his talks here.

#90295d8420 10/22/1990 ~French/German News Agency

VICTORIA (OCT. 22) - Seychelles President France Albert Rene has lashed out at the church after an Anglican priest accused top government officials of embezzlement and called for a multi-party system in the Indian Ocean archipelago.

The president on Sunday challenged Reverend Wavel Ramkalawan to provide evidence after he had alleged in a sermon broadcast over the radio that top government officials were stuffing bank accounts abroad.

Mr. Ramkalawan also declared that there was no democracy in the Seychelles and urged the introduction of multi-party politics.

President Rene questioned the Rev. Ramkalawan's motives, wondering whether he spoke "in the name of God, former President James Mancham or a political party".

President Rene declared: "The day we feel that the people, through the

branches and opinions they express want a multi-party system, we'll have a referendum where the people themselves will decide".

The Roman Catholic and Anglican churches take turns to broadcast their Sunday mass on the national radio and during the past few months, priests of both churches have been critical of the government.

Recent issues of the Roman Catholic monthly magazine, L'Echo des Iles, have run unsigned letters from people complaining about government policies.

#90295d8550 10/22/1990 ~French/German News Agency

PHNOM PENH (OCT. 22) - Bangkok Airways will open a direct air-link between Bangkok and Phnom Penh this week, a company spokesman said Monday.

The privately owned company will operate flights twice a week on Mondays and Thursdays, using a Dash 8 aircraft with a capacity of 36 passengers.

Bangkok Airways has made several trial flights on the route over the past few months and has now decided to open it as a commercial service to compete with European airlines, industry experts said.

A Belgian charter company, Air Belgium, will begin bi-monthly flights Thursday between Brussels and Phnom Penh using a Boeing 757, the firm Air Kampuchea said.

And French charter firm Air Liberte, a subsidiary of the national flag carrier Air France, will begin weekly flights from Paris to Phnom Penh on October 30 using an Airbus 300600R.

ATHENS (OCT. 22) - More than 150 prisoners began protests in two Greek penitentiaries over the weekend, in solidarity with convicts in four other prisons who continued to demonstrate against poor living conditions, according to judiciary sources.

Justice Ministry Secretary General Filippos Spyropoulos was to meet Monday with a delegation of prisoners to attempt to find a solution to the problem, according to sources at the ministry.

Convicts at Halkis prison on the island of Euboea and Larissa prison in central Greece began their demonstrations over the weekend in support of prisoners who have been protesting since Thursday in the prisons of Korydallos Alikarnassos, Aghios Stephanos and Komotini.

No serious incidents were reported.

The prisoners' demands included improved food and the liberation and transfer to psychiatric hospitals of drug addicts.

BEIJING (OCT. 22) - Twelve common law criminals were executed in Urumqi, the capital of China's northwest Xinjiang region, following a mass trial on October 13, the Xinjiang Daily reported.

Three others were handed life terms during the public court proceedings and four were sentenced to terms ranging from three to 15 years, the newspaper said in its October 16 issue received here Monday.

Three of the 12 executed were convicted of robbing a home and injuring four of its residents with stolen guns and daggers, while a fourth, already in jail, beat to death a fellow inmate, the daily said.

The executions came amid a nationwide crackdown on crime that was launched 15 months ago and has resulted in at least 1,000 executions.

#90295d8590 10/22/1990 ~French/German News Agency

DHAHRAN, SAUDI ARABIA (OCT. 22) - General Maurice Schmitt, chief of staff of the French armed forces, visited French troops in Saudi Arabia on Monday after holding talks with Saudi and U.S. military officials, French military sources said.

Gen. Schmitt was to tour an air base in north-eastern Saudi Arabia where French warplanes are based and then visit French troops deployed several dozen kilometers (miles) south of the Saudi border with Kuwait, the sources said.

The head of the French armed forces was in Saudi Arabia to assess the "morale and the physical state" of the French soldiers and their equipment, one source said, describing them as "excellent."

The sources said that Gen. Schmitt had held talks in Riyadh on Sunday with General Michel Roquejeoffre, the head of France's Rapid Action Force, and Saudi and U.S. military officials.

The sources declined to say who exactly Gen. Schmitt had met with but one source said "it would be normal to have contacts at the highest levels."

Among the subjects discussed was an "eventual realignment" of French ground forces by the Saudis, the sources said. No decision had been made on shifting the French troops from their current positions and that the move was still only under consideration.

According to French military sources in Paris, French troops could be moved back several kilometers from their present positions.

France has contributed nearly 5,000 troops to the U.S.-led multi-national force assembled in Saudi Arabia after the August 2 Iraqi invasion of Kuwait.

Among French troops positioned alongside Saudi and Arab forces in the area around the north-east city of Hafr-al-Batin are more than 1,200 members of the Foreign Legion.

The French force includes some 50 Gazelle combat and Puma transport helicopters, some 210 armored personnel carriers and nearly 50 AMX-10RC tanks.

France has sent more than 500 air force personnel to the country and about 30 warplanes, including Mirage 2000s, Mirage F1-CRs and Jaguar fighter-bombers.

More than a half a dozen French warships have joined the international flotilla crusing the waters around the Arabian Peninsula to enforce the U.N.-imposed economic sanctions against Iraq.

Gen. Schmitt, who arrived on Saturday, is scheduled to leave directly for Paris after visiting French troops in the field, according to the French military sources. He is scheduled to hold talks with his U.S. counterpart, General Colin Powell, in Paris later this week.

#90295d8610 10/22/1990 ~French/German News Agency

FRANKFURT (OCT. 22) - The money supply in the area previously known as West Germany, by the M3 measure, rose by five percent in September at an annual rate corrected for seasonal variations, compared with 3.8 percent in August,

provisional figures published by the central Bundesbank on Monday showed.

The figure is within the range of four percent to six percent set by the Bundesbank in 1989 as the monetary target for this year.

But the figure does not take account of developments in the area that was formerly East Germany.

-30- 710

#90295d8620 10/22/1990 ~French/German News Agency

LONDON (OCT. 22) - The British Lucas Industries manufacturer of electrical parts for the aero and auto industries on Monday reported that 1990 profits were 2.2 percent up on the figure for 1989 at 191.2 million pounds (about 362 million dollars) compared with 187.1 million pounds.

Sales rose by 6.8 percent to 2.33 billion pounds from 2.18 billion pounds.

The final dividend was set at 4.9 pence making a total for the year of seven pence against 6.25 pence last time.

The results were in line with the figures forecast by analysts and Lucas shares gained three pence to 117p.

-30- 768

#90295d8640 10/22/1990 ~French/German News Agency

LONDON (OCT. 22) - Britain registered a balance of payments deficit of 845 million pounds (about 1.6 billion dollars) in September, down from 1.13 billion pounds in August, provisional seasonally-adjusted figures showed on Monday.

Analysts here had forecast a September deficit of 1.3 billion pounds.

It was the first time this year that the deficit had been less than one billion pounds.

A treasury official said that the figures showed that "domestic demand pressure is easing in response to tight policy".

He expressed satisfaction that the deficit for the three months to September was 3.8 billion pounds, down from 6.2 billion pounds for the same quarter of last year.

But a spokesman for the opposition Labour Party said that "Britain's trade figures, at 13.6 billion pounds for the first nine months of the year, remain the worst in Europe".

The figures showed that the level of imports fell for the sixth successive month to 9.618 billion pounds from 9.774 billion pounds on a revised basis in August.

Exports rose to 8.773 billion pounds from 8.575 billion pounds in August.

#90295d8720 10/22/1990 ~French/German News Agency

Monte Carlo (OCT. 22) - Mercedes-Benz, the German automaker, announced here Monday it would be investing six billion marks (four billion dollars) in expanding its share of world truck sales.

Helmut Werner, deputy chairman of Mercedes-Benz, said the company, part of the biggest industrial conglomerate in Germany, had raised European sales of trucks over six tons' capacity by eight per cent this year, defying a weak market.

Werner, who is in charge of the Mercedes truck division, was addressing a conference of 300 truck operating companies here.

He said the European transport industry had major growth in prospect, especially because of the liberalisation of eastern Europe. Users would also be demanding greater efficiency, for example in the form of ''just-in-time'' deliveries to factories.

COPENHAGEN (OCT. 22) - Unibank Denmark will take control of the Hong Kong branch and subsidiary of Den Norske Bank in spring 1991 for an undisclosed sum Unibank said Monday.

Unibank, Denmark's second largest bank, will take control of the Norwegian bank once approval for the deal has been given by Hong Kong, Norwegian and Finnish authorities.

Unibank Denmark is a partner of Scandinavian Banking Partners, a cooperative organization which also includes the Union Bank of Finland and the Swedish S-E Banken as well as Den Norske Bank, Norway's largest.

The Union Bank of Finland uses the Den Norske Bank services in Hong Kong and must endorse the deal. S-E Banken has its own activities in Hong Kong, Unibank said.

"Den Norske Bank's activities in Hong Kong have developed rapidly and profits have reached acceptable levels since the mid 1980s," Unibank said, adding that the bank's balance in September reached 358 million U.S. dollars.

Unibank Denmark will pursue and widen the Norwegian bank's activities in financial trade, stock exchange transactions and Nordic affairs, the communique said.

#90295d8800 10/22/1990 ~French/German News Agency

NAIROBI (OCT. 22) - The Kenyan government broke off diplomatic relations with Norway Monday in apparent reaction to Norwegian criticism of the human-rights situation in Kenya.

Kenyan Radio said Foreign Minister Wilson Ndolo Ayah announced diplomatic relations had been severed with immediate effect.

It was unclear how Monday's breaking of diplomatic ties might affect Norwegian aid to Kenya, which totaled 25 million dollars last year. Moi abruptly cancelled a tour of Scandinavia in 1989 over criticism of human rights in his country.

Ayah summoned the Norwegian ambassador to the Foreign Ministry Monday and told him to close his country's embassy in Nairobi and leave the country within seven days, Kenyan radio reported.

''The minister said it was regrettable that for some time now the government of Norway had adopted a hostile attitude towards Kenya. He said the Kenyan government had been alarmed to note the readiness with which Norway had given sanctuary to Kenyan criminal fugitives,'' the radio station reported.

''Ayah said recent events had demonstrated beyond any reasonable doubt that the government of Norway has been an accessory to illegal activities by those Kenyan fugitives bent on undermining the stability of the country and its constitutionally-elected government,'' it reported.

The move came after Norwegian protests against human-rights violations in the East African country.

DAMASCUS (OCT. 22) - Syrian President Hafez al-Assad on Monday had talks with Lebanese Prime Minister Selim al-Hoss, following a two-day summit meeting with his Lebanese counterpart Elias Hrawi.

Official Damascus Radio said Mr. Hoss also met Foreign Minister Farouk al-Shara to review the "situation in Lebanon after the ouster (of Christian military leader General Michel Aoun) and future measures to reinforce the process of national unity and establish peace and security in Lebanon."

Mr. Hoss arrived in Damascus earlier in the day.

A spokesman at his Beirut office declined to comment on the reasons for the visit.

But sources in Beirut last week said Mr. Hrawi and Mr. Hoss would be visiting Syria to discuss the dissolution of Lebanese militias and the establishment of a national unity government.

Mr. Hrawi, who Saturday and Sunday had 10 hours of private talks with Mr. Assad, has thanked the Syrian leader for his assistance in ending the 11-month-old rebellion of General Aoun.

The general surrendered on October 13 after a joint Syrian-Lebanese offensive forced him out of his headquarters.

He fled to the nearby French embassy and was granted political asylum in France. But his departure has been delayed by Lebanese government demands that he first be tried here for his mutiny.

#90295d8860 10/22/1990 ~French/German News Agency
JOHANNESBURG (OCT. 22) - South African Jews Monday slammed a weekend decision by the synod of the Anglican Diocese of Cape Town to support the Palestinians in their right to resist Israeli aggression.

The synod has been accused of taking a "one-sided" decision without "referring to the reality of the situation", South African Zionist Federation chairman Solly Sacks told Agence France-Presse.

South Africa's Chief Rabbi, Cyril Harris, could not be reached for comment,

but was likely to take issue with the synod over the matter, Mr. Sacks said.

Resolutions adopted by the synod Saturday also called on all Anglicans in the Province of the Church of Southern Africa not to go on or organise tours to Palestine before seeking guidance from the Middle East Council of Churches.

Proposer of the motion, the Reverend Terence Lester of Claremont, in the Cape, denied it was a "Jewish-bashing motion" saying it was "an expression of support for the people of Palestine".

Before the synod voted, Archbishop Desmond Tutu read to it a statement by an International Anglican Communion standing committee, which includes the Archbishop of Canterbury, condemning the recent shooting of Palestinians at Temple Mount and calling on Israel to restrain its security forces.

He also called for a moment of silence and said "there are a remarkable number of Jewish people who are in agony about what is happening to the Palestinian people".

PARIS (OCT. 22) - French Prime Minister Michel Rocard Monday called for cooperation between France and Britain on nuclear defense.

In a speech at the government defense institute, the Institut des Hautes Etudes de Defense Nationale, Mr. Rocard said: "Cooperation should be born in the nuclear field between France and Britain. The birth of such a link between our two countries would have a considerable impact."

He added that it would be "risky to allow a feeling to set in in Europe that nuclear arms are to be kept in the corner."

Mr. Rocard's statement came as Britain is on the point of deciding whether to contribute to a French project for a long-range air-to-surface missile which would update France's nuclear defenses, as opposed to a U.S cooperation project.

The missile, known as the ASLP (air-sol longue portee, or air-to-ground long range), would have a range of some 1,500 kilometres (937 miles) and would be carried by the new Rafale fighter-bomber, due to come into service in 1998.

French President Francois Mitterrand on Friday asked Defense Minister Jean-Pierre Chevenement to come up with concrete proposals by the end of the year on updating France's independent nuclear strike force, which Mr. Rocard stressed was "not being called into question".

Mr. Rocard noted that France had already begun modernising its submarine fleet

and expressed his preference for "the most flexible systems", such as long-range weapons "capable of striking the aggressor directly, rather than neighbours or allies".

France's short-range ground-to-ground Pluton missiles, to be replaced by new Hades weapons, have been criticised both here and in Germany as their range means that they could virtually only be used against France's eastern neighbour.

MAPUTO (OCT. 22) - The Mozambican parliament, the people's assembly, on Monday voted a constitutional ban on capital punishment.

A total of 172 deputies voted in favour. Only one deputy did not take part in the vote but there were no votes against or formal abstentions.

The same article in the new constitution also outlaws torture and "cruel or inhuman treatment".

One deputy attempted to amend the article so that it would include a constitutional ban on abortion. But she withdrew the proposal after Jorge Rebelo, head of the ruling Frelimo party's ideology department, argued that abortion should be regulated through normal legislation and not through the constitution.

The Roman Catholic church has been pressing throughout the debate on the draft constitution for a ban on abortion. Under the Portuguese penal code that Mozambique inherited abortion is illegal, but the medical profession has been pressing for the law to be changed.

The death penalty was introduced in Mozambique in 1979 as a punishment for security offences. Those executed under security legislation were mainly members of the rebel Mozambique National Resistance (RENAMO).

However, the death penalty had fallen into disuse, and the last execution took place in 1986.

DOHA (OCT. 22) - Qatar and Romania on Monday established diplomatic relations at ambassadorial level, the Qatari News Agency reported.

A communique from the foreign ministry here expressed the hope that "this decision will contribute to the development of international cooperation, world peace and the principles of non-alignment."

Qatar earlier this month established diplomatic ties with two other former East bloc countries, Bulgaria and Czechoslovakia.

LUXEMBOURG (OCT. 22) - The foreign ministers of the European Economic Community (EEC) resolved on Monday to lift diplomatic sanctions against China and Iran, but will maintain them against Syria, French Foreign Minister Roland Dumas announced.

The decision authorizes EEC countries to renew high-level contacts with China and Iran.

The EEC also resolved to undertake "improved diplomatic and economic relations" with Vietnam, with which the Community currently has no ties, according to Mr. Dumas.

However, the body will maintain its sanctions against Syria, which provide for an embargo on arms sales to Damascus and surveillance of Syrian diplomats.

KUWAIT CITY (OCT. 22) - Iraqi authorities, anxious to counter Western reports of chaos in Kuwait, have taken a group of Baghdad-based correspondents on a tour of two hospitals in the emirate.

Accompanied by Dr. Abdel Abbas, health director for the Iraqi "province of Kuwait," journalists on Saturday visited a 500-bed maternity hospital where 12 of the facility's 80 incubators were occupied.

An Iraqi physician, Dr. Qais Abdel Satar, said his staff carries out 40 to 50 deliveries a day.

The exiled Kuwaiti government, overthrown by Iraqi troops August 2, has accused Iraqi forces of "systematically looting" Kuwait.

U.S. President George Bush a week ago said he had been informed of Iraqi abuses by Kuwaiti emir Sheikh Jaber al-Ahmad al-Sabah -- including instances in which newborns were removed from their incubators and the devices shipped to Baghdad.

Dr. Abdel Abbas insisted that Kuwait's 14 hospitals and 35 clinics had not been affected by the mass exodus of Kuwaiti and foreign medical personnel following the invasion and that no equipment had been sent to Iraq.

The Iraqi government had in fact assigned 1,000 doctors and nurses to Kuwait but plans to withdraw them gradually as the number of patients declines, he added.

At the 295-bed Al Razi orthopedic hospital, only 26 people were treated over the weekend, most of them victims of road accidents.

Dr. Ali Abdel Rahman al-Hawil, one of the few Kuwaiti doctors encountered by correspondents, said he had decided to remain in Kuwait "to help those in need of medical care on the spot."

He said he had noticed "no shortage of medicines at the Al Razi hospital despite the international economic embargo against Iraq."

KHARTOUM (OCT. 22) - Sudanese leader Omar Beshir and his Libyan counterpart Moamer Gaddafi met here Monday to discuss cooperation and eventual integration of their countries.

A senior member of the Sudanese government, Salah Eddin Karrar, told the Sudan News Agency (Suna) that both Beshir and Gaddafi called on Sudanese and Libyans to ignore minor differences and go ahead with the steps leading to unity.

According to Karrar there is disagreement on some legislative issues. Another meeting to review the integration progress is scheduled for December in Tripoli.

BAGHDAD (OCT. 22) - Iraqi President Saddam Hussein is to allow several elderly and sick American male hostages to leave the country along with a number of Britons, official Iraqi sources said Monday.

In another development, the U.S. frigate Reasoner and the Australian frigate Adelaide stopped the Iraqi freighter al-Bahar al-Arabi in the Gulf of Oman, the same freighter which was halted by another U.S. warship in the Persian Gulf the day before.

A u.S. navy spokesman in Dahran, Saudi Arabia, said without elaborating that U.S. Navy personnel boarded the ship Monday. Observers suggested the freighter would be forced to return to Iraq.

On Sunday, the U.S. destroyer O'Brien fired warning shots across the bow of the freighter when it ignored a radio order to stop. The ship halted, was searched and found to be carrying steel pipes and wood.

The U.S. navy declared the freighter was contravening the United Nations-ordered boycott of Iraq.

Its captain promised to return to his home port, but continued his journey towards Yemen and was followed during the night by warships who stopped the ship in the Gulf of Oman. Radio Baghdad Monday described the searching of the freighter as a provocation.

Egypt's President Hosny Mubarak met King Fahd of Saudi Arabia Monday in Jeddah. Earlier Mubarak landed at the Saudi airport of Qaysumah in the northeastern part of the country Monday and inspected Egyptian troops on duty nearby.

PRAGUE (OCT 22) - The chairman of Czechoslovakia's much-reduced Communist Party Monday lost his post as a speaker of the nation's parliament after suggesting communists should go on the offensive.

Vasil Mohorita was dismissed from the federal parliamentary praesidium, a panel that chairs parliamentary debates, by a vote of 86 to 31 in a secret ballot by the people's assembly.

Mohorita had earlier said the ''time of national reconciliation'' was over and communist cells should be set up in factories.

MOSCOW (OCT 22) - Anarchy and organized crime are on the rise in the Soviet Union and the situation could get worse during the transition period to a market economy, senior Soviet officials warned Monday.

Vladimir Kryuchkov, head of the KGB -- state security -- Vadim Bakatin, minister of the interior, Veniamin Yakovlev, minister of justice, and Alexei Vassiliev, Soviet deputy prosecutor-general, said at a press conference that as Soviet society became more liberal and capitalism emerged faster than the laws could be changed, organized crime was prospering.

"The groups have huge funds, have crossed the borders of the Soviet Union and work hand-in-hand with organized crime in other countries," the KGB head said. "It's not yet a state within a state like the Mafia, but we must make a serious effort to improve the professionalism of our agents to fight this type of crime, whose cruelty and violence surprise us," he said.

The KGB was not adequately prepared to fight organized crime and its agents lacked "professionalism" Mr. Kryuchkov said.

The officials said courts were unable to defend violations of citizens' rights in some republics, notably in the area of unfair dismissals. "Individuals should have access to local courts, then to federal appeal courts, but we do not yet have a two-stage legal system," Mr. Yakovlev said.

Mr. Yakovlev said municipal assemblies in some republics had unfairly dismissed Communist teachers and other civil servants. Mr. Vassiliev said that under the current Soviet legal system these people could not challenge their dismissals or be compensated. He said the prosecutor general could only "signal" the cases to the Soviet Supreme (parliament) in Moscow.

Mr. Kryuchkov said that in some regions of the Ukraine, notably the cities of Ternopol and Lvov "attempts are currently being made to overthrow the regime." He admitted the situation was largely beyond the control of security forces.

Buenos Aires (OCT. 22) EFE - A bomb exploded outside a British-run hospital in the Argentine capital Monday causing heavy damage but no victims, police said.

They said the bomb was planted on the sidewalk outside the morgue of the Hospital Britanico, and the early morning blast damaged the building, adjacent homes and cars parked nearby.

No group immediately claimed responsibility for the attack on the hospital, located less than two km from the parliament building in the central Constitucion neighborhood.

The attack was the latest in a series bombings which began Wednesday with six explosions across the country.

Last week's attacks on two branches of the U.S.-based Citibank, a conservative labor union and a multinational company, were claimed by a group calling itself +Eva Peron+, which opposes the controversial privatization program launched by President Carlos Menem.

The bombs caused extensive damage but no injuries.

XINING (OCT. 22) XINHUA - CHINA HAS DOUBLED ITS ALUMINUM PRODUCTION, THANKS TO THE SETTING UP OF NEW ALUMINUM BASES IN NORTHWEST CHINA.

THE QINGHAI ALUMINUM WORKS, A KEY CONSTRUCTION PROJECT DURING THE PERIOD OF THE "SEVENTH FIVE-YEAR PLAN FROM 1986 TO 1990", IS NOW CAPABLE OF PRODUCING 100,000 TONS OF ALUMINUM PER YEAR. WHEN EXPANSION WORK IS COMPLETED, THE FACTORY IS EXPECTED TO DOUBLE ITS CAPACITY.

OTHER LARGE-SCALE SMELTERIES SUCH AS THE QINGTONGXIA ALUMINUM WORKS, THE GANSU ALUMINUM WORKS AND THE BAOTOU ALUMINUM WORKS HAVE BEEN SET UP IN GANSU AND INNER MONGOLIA,ON THE UPPER REACHES OF THE YELLOW RIVER.

THE TRADITIONAL ALUMINUM INDUSTRIAL BASES ARE SCATTERED IN NORTHEAST AND THE CENTRAL CHINA. HOWEVER, THE WEST'S RICH HYDROPOWER RESOURCES MAKE IT ECONOMICAL FOR THE INDUSTRY TO DEVELOP THERE.

CANBERRA (OCT. 22) XINHUA - THE AUSTRALIAN STOCK EXCHANGE PROPOSES TO TIGHTEN ITS LISTING RULES BY REQUIRING THE PROVISION OF ADDITIONAL INFORMATION, INCLUDING A CONDENSED BALANCE SHEET, AS PART OF LISTED COMPANIES' HALF-YEARLY FINANCIAL REPORTING.

IT ALSO PROPOSES THAT THE HALF-YEARLY REPORT SHOULD BE SUBJECT TO A LIMITED AUDIT AND THE INTRODUCTION OF CASH FLOW STATEMENTS IN THE HALF-YEARLY AND PRELIMINARY FINAL STATEMENTS, ACCORDING TO A STATEMENT BY THE AUSTRALIAN OVERSEAS INFORMATION BUREAU TODAY.

IN ADDITION, IT HAS INVITED COMMENTS ON THE SUGGESTION THAT A REQUIREMENT FOR QUARTERLY REPORTS BE INTRODUCED. QUARTERLY REPORTS HAVE BEEN REQUIRED BY THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION SINCE THE EARLY 1970S.

THE STOCK EXCHANGE HAS RELEASED TWO DISCUSSION PAPERS FOR PUBLIC COMMENT BEFORE 3 DECEMBER 1990. THE FIRST, ENTITLED "THE ROLE OF THE AUSTRALIAN STOCK EXCHANGE AND ITS LISTING RULES," RAISES THE QUESTION OF WHAT SHOULD BE THE APPROPRIATE REGULATORY ROLE OF THE EXCHANGE, WHETHER IT SHOULD BE PRIMARILY CONCERNED WITH PROMOTING AN INFORMED MARKET OR WHETHER IT SHOULD HAVE THE WIDER ROLE OF PROVIDING PROTECTION FOR SHAREHOLDERS.

THE SECOND PAPER, ENTITLED "IMPROVED REPORTING BY LISTED COMPANIES," CONSIDERS THE CONTENT, FREQUENCY AND TIMELINESS OF REPORTING BY LISTED ENTITIES AND MAKES NUMEROUS PROPOSALS FOR CHANGE.

FOLLOWING A REVIEW OF THE COMMENTS ON THE PAPERS, DRAFT LISTING RULES INCORPORATING THE PROPOSED CHANGES WILL BE DRAWN UP AND CIRCULATED FOR FURTHER COMMENT WITH THE GOAL OF HAVING THEM SETTLED AND IN FORCE BY SEPTEMBER 199L, THE OVERSEAS INFORMATION BUREAU SAID.

LAGOS (OCT. 22) XINHUA - THE NIGERIAN TELECOMMUNICATIONS LIMITED (NITEL) PLANS TO INSTALL 510,000 NEW TELEPHONE LINES PRIOR TO NOVEMBER NEXT YEAR AS PART OF ITS EXPANSION PROGRAM TO BOOST THE TELECOMMUNICATIONS IN THE COUNTRY.

THE NEW TELEPHONE EXPANSION PROJECT WOULD BRING THIS COUNTRY'S TOTAL SUBSCRIBED TELEPHONE CAPACITY TO 895,000 LINES, NIGERIAN MINISTER OF COMMUNICATIONS OLAWALE IGE ANNOUNCED HERE FRIDAY.

UNDER THE PLAN, LAGOS ZONE WILL GET 210,000 NEW LINES, WITH NORTHWEST ZONE 60,000, NORTHEAST ZONE 65,000, SOUTHEAST ZONE 100,000 AND SOUTHWEST 75,000 NEW LINES, THE MINISTER SAID.

HE SAID THAT APART FROM THE PROPOSED NEW 510,000 LINES, NITEL IS ALSO PREPARING SPECIFICATIONS AND CONSIDERING BIDS FOR FOUR OTHER TELECOMMUNICATIONS PROJECTS.

IN ORDER TO SPEED UP THE EXPANSION AND IMPROVE THE FACILITIES FOR INTERNATIONAL TELECOMMUNICATIONS IN NIGERIA, THE MINISTRY AND NITEL HAVE ALSO PLANNED TO INSTALL TWO FULLY DIGITALIZED A-STANDARD EARTH STATIONS AND EQUIPMENT FOR THE PROVISION OF 60 DIRECT ACCESS INCOMING CIRCUITS FROM LONDON.

THE NIGERIAN GOVERNMENT HAS GAINED A FRESH 225 MILLION U.S. DOLLARS LOAN FROM THE WORLD BANK TO FINANCE THE EXPANSION PROJECTS.

BESIDES, NIGERIA, WHICH HAS WON FINANCIAL COMMITMENT FROM SOUTH KOREA, IS ALMOST CONCLUDING AGREEMENTS WITH TURKEY, JAPAN, BRAZIL AND GERMANY ON THE JOINT VENTURES AND LOAN AIDS TO ACCELERATE THE EXPANSION PROJECTS. ENDITEM

ISTANBUL (OCT. 22) XINHUA - TURKEY'S FIRST SATELLITE IS EXPECTED TO ENTER THE EARTH'S ORBIT IN 1993, THE "DAILY NEWS" REPORTED TODAY.

A CONTRACT FOR BUILDING TURKEY'S FIRST TWO COMMUNICATIONS SATELLITES WILL BE SIGNED BY THE STATE-OWNED POST, TELEGRAPH AND TELEPHONE COMPANY AND AEROSPATIALE OF FRANCE ON TUESDAY.

THE CONTRACT, WORTH 310 MILLION U.S. DOLLARS, WILL COVER THE MANUFACTURING AND LAUNCHING OF TWO COMMUNICATIONS SATELLITES, AND CONSTRUCTION OF LAND-BASED SYSTEMS FOR SATELLITE COMMUNICATIONS, SAID THE PAPER.

BUT THE PAPER DID NOT SAY WHEN THE SECOND SATELLITE WILL BE SENT IN TO THE SPACE.

THE FIRST SATELLITE, REGARDED AS ONE OF THE MOST IMPORTANT TELECOMMUNICATION PROJECTS IN TURKEY, WILL BE USED TO BEAM TURKISH TELEVISION PROGRAMS ACROSS THE COUNTRY.

THE PROJECT WILL PROVIDE 16 CHANNELS FOR TELEVISION, RADIO AND DATA TRANSMISSION, TELEX, FAX, TELEPHONE AND OTHER COMMUNICATION AND BROADCASTING OPPORTUNITIES, SAID THE PAPER.

IT WILL IMPROVE COMMUNICATIONS IN EASTERN AND SOUTHEASTERN REGIONS OF THE COUNTRY, WHERE THE TERRAIN IS ROUGH.

THE PAPER ALSO SAID THAT BESIDES THE AEROSPATIALE, THE CONSORTIUM TO BUILD THE SATELLITE INCLUDES MBB OF GERMANY, ALCATEL ESPACE AND EXECORP OF FRANCE AND TURKEY'S TELETAS COMPANIES.

THE CONSORTIUM WILL SET UP A LAND COMMUNICATIONS CENTER FOR THE SATELLITE AS WELL AS MANUFACTURE THE SPACE VEHICLE.

THE SATELLITE WILL BE LAUNCHED BY THE EUROPEAN ARIANE ROCKET FROM A LAUNCHING PAD IN THE PACIFIC OCEAN, SAID THE PAPER.

BANGKOK (OCT. 22) KYODO - MORE THAN 200 SCHOLARS AND LAWYERS ARE OPPOSING A PRESS BILL THEY SAY WOULD INFRINGE ON THE PUBLIC'S RIGHT TO KNOW.

SOME 120 LECTURERS AND PROFESSORS OF JOURNALISM AND 112 LAWYERS SIGNED AN OPEN LETTER OPPOSING THE BILL PUBLISHED MONDAY, ADDING MOMENTUM TO A LONG CAMPAIGN BY THE REPORTERS ASSOCIATION OF THAILAND FOR FREEDOM OF THE PRESS.

THE CAMPAIGN WON A MAJOR VICTORY LAST WEEK WHEN THE GOVERNMENT REVOKED DECREE 42, GIVING THE GOVERNMENT THE AUTHORITY TO CLOSE NEWSPAPERS WITHOUT TRIAL, WHICH HAD BEEN IN FORCE SINCE 1976.

HOWEVER, THE NEW BILL CONTAINS A SIMILAR PROVISION. THE OPEN LETTER, PUBLISHED

IN SEVERAL DAILY NEWSPAPERS, IS ADDRESSED TO PRIME MINISTER CHATICHAI CHOONHAVAN, ALL CABINET MEMBERS, THE PARLIAMENTARY SPEAKER AND DEPUTY, AND OTHER CONCERNED PARLIAMENTARIANS.

THE LETTER SAID THE BILL SHOULD BE REVISED TO ALLOW NEWSPAPERS TO PUBLISH FREELY WITHOUT LICENSES, TO GIVE THE COURTS, RATHER THAN GOVERNMENT OFFICIALS, THE POWER TO CLOSE DOWN NEWSPAPERS, AND TO STRIP GOVERNMENT OFFICIALS OF THE POWER TO ORDER NEWSPAPERS TO ''CORRECT'' ARTICLES ABOUT GOVERNMENT AFFAIRS. IT ALSO SAID THE SECTION OF THE BILL GIVING OFFICIALS THE AUTHORITY TO BAN FOREIGN PUBLICATIONS IS AMBIGUOUS AND GIVES THE OFFICIALS TOO MUCH POWER.

CHATICHAI HAS PROMISED TO WITHDRAW THE NEW PRESS BILL WHEN PARLIAMENT GOES BACK INTO SESSION BUT SEVERAL CABINET MEMBERS HAVE EXPRESSED RESERVATIONS ABOUT ALLOWING FULL FREEDOM OF THE PRESS.

#90295k0020 10/22/1990 ~Japanese News Agency

HONG KONG (OCT. 22) KYODO - A GROUP OF ABOUT 30 CHINESE RESIDENTS OF HONG KONG STAGED A DEMONSTRATION MONDAY PROTESTING JAPANESE CLAIMS TO DISPUTED ISLANDS IN THE EAST CHINA SEA.

THEY LATER MARCHED TO THE JAPANESE CONSULATE GENERAL WHERE THEY HANDED OVER A LETTER CALLING FOR THE REMOVAL OF THE JAPANESE FLAG FROM THE ISLANDS.

THE PROTEST FOLLOWED AN INCIDENT SUNDAY WHEN JAPANESE PATROL BOATS PREVENTED TWO TAIWANESE FISHING BOATS FROM APPROACHING THE ISLANDS.

THE UNINHABITED GROUP OF FIVE ISLETS AND THREE REEFS, KNOWN IN JAPAN AS THE SENKAKU ISLANDS AND IN CHINA AS THE DIAOYUTAI ISLANDS, ARE CLAIMED BY JAPAN, TAIWAN, AND CHINA.

THE HONG KONG DEMONSTRATORS BEGAN MONDAY'S PROTEST WITH A SIT-IN AT A PARK IN THE TERRITORY'S BUSY CENTRAL DISTRICT, A BUSINESS AND FINANCIAL CENTER.

THEY HELD BANNERS CRITICIZING WHAT THEY SEE AS JAPANESE AGGRESSION AND REFERRING TO THE 1937 NANJING MASSACRE, WHICH OCCURRED DURING THE JAPANESE INVASION OF CHINA.

ON SUNDAY, THE SAME GROUP PASTED ANTI-JAPANESE POSTERS OUTSIDE JAPANESE DEPARTMENT STORES IN THE TERRITORY'S CAUSEWAY BAY AREA.

THEY ARE ASSOCIATED WITH 15 CIVIC GROUPS, INCLUDING EDUCATIONAL, RELIGIOUS, AND TRADE UNION ORGANIZATIONS, WHICH ISSUED A JOINT STATEMENT SUNDAY CONDEMNING THE JAPANESE ACTION AGAINST THE TAIWANESE FISHING BOATS.

REPORTS REACHING HONG KONG FROM TAIPEI ON SUNDAY SAID A GROUP OF TAIWANESE REPORTERS AND OFFICIALS ON ONE OF THE FISHING BOATS TRIED TO LAND ON ONE OF

THE ISLANDS, UOTSURISHIMA WHERE THEY INTENDED TO PLACE A TORCH TO SYMBOLIZE TAIWAN'S CLAIM TO SOVEREIGNTY.

A JAPANESE RIGHT-WING GROUP BUILT A BEACON ON UOTSURISHIMA IN 1978 AND JAPAN'S MARITIME SAFETY AGENCY IS STUDYING AUTHORIZING IT AS A NAVIGATION AID FOR SHIPPING.

TOKYO (OCT. 22) KYODO - THE MINISTRY OF FINANCE IS CONSIDERING PERMITTING

THREE U.S. SECURITIES COMPANIES TO DO BANKING BUSINESS IN JAPAN AS EARLY AS NOVEMBER, MINISTRY OFFICIALS SAID MONDAY.

THE THREE FIRMS ARE SALOMON BROTHERS, GOLDMAN SACHS, AND MORGAN STANLEY, THE OFFICIALS SAID.

THEY HAVE ALREADY APPLIED TO THE MINISTRY FOR APPROVAL OF THEIR PLANS TO UPGRADE THE TOKYO REPRESENTATIVE OFFICES OF THEIR EUROPEAN BANKING SUBSIDIARIES TO BRANCHES.

AFTER OBTAINING APPROVAL, THEY PLAN TO ENGAGE INITIALLY IN FOREIGN EXCHANGE BUSINESS AS EARLY AS NEXT SPRING.

A DOMESTIC LAW CONCERNING FOREIGN SECURITIES COMPANIES REQUIRES THEM TO LIMIT THEIR CAPITAL PARTICIPATION IN SUBSIDIARIES TO 50 PERCENT OR LESS IN ESTABLISHING BANKING AND SECURITIES BRANCHES IN JAPAN.

HENCE, THE THREE U.S. SECURITIES GIANTS ARE CONSIDERING REDUCING THEIR STAKES IN THEIR EUROPEAN UNITS TO 50 PERCENT OR LESS BY SEEKING CAPITAL PARTICIPATION FROM AMERICAN BUSINESS CORPORATIONS.

IN ADDITION TO THE THREE, MERRILL LYNCH IS MAKING PREPARATIONS TO APPLY FOR MOF APPROVAL TO SET UP A BANKING BRANCH IN TOKYO.

INDICATIONS ARE THAT THE FOUR MAJOR U.S. BROKERAGES WILL LAUNCH BANKING BUSINESS IN JAPAN NEXT SPRING, ACCORDING TO INDUSTRY SOURCES.

MANILA (OCT. 22) KYODO - JAPAN AND THE PHILIPPINES SIGNED ON MONDAY AN AGREEMENT RESCHEDULING MANILA'S 781 MILLION DOLLARS IN LOANS DUE BETWEEN SEPTEMBER 1988 AND JUNE 30, 1991, PAVING THE WAY FOR THE COMPLETION OF A RESTRUCTURING AGREEMENT WITH ALL 14 OF THE PHILIPPINES' OFFICIAL CREDITOR COUNTRIES.

THE AMOUNT COVERED IN MONDAY'S AGREEMENT COMES TO 49.5 PERCENT OF TOTAL PHILIPPINE DEBTS TO OFFICIAL CREDITOR COUNTRIES, ALSO KNOWN AS THE PARIS CLUB. THE NEGOTIATIONS WITH THE PARIS CLUB STARTED IN SEPTEMBER 1988.

JAPANESE EMBASSY MINISTER NOBUYASU ABE AND PHILIPPINE FINANCE SECRETARY JESUS ESTANISLAO SIGNED THE BILATERAL RESCHEDULING PACT.

JAPAN, THE COUNTRY'S BIGGEST OFFICIAL CREDITOR, AGREED TO RESTRUCTURE LOANS FROM THE OVERSEAS ECONOMIC COOPERATION FUND (OECF) AT 3.2 PERCENT. RESTRUCTURED OECF DEBT AMOUNTED TO 49.675 BILLION YEN.

THE JAPAN EXPORT-IMPORT BANK LOANS TO THE PHILIPPINE GOVERNMENT NOW CARRY 5.125 PERCENT YIELDS WHILE ITS LOANS TO THE DEVELOPMENT BANK OF THE PHILIPPINES AND THE NATIONAL POWER CORP. HAVE RATES OF 8 PERCENT. TOTAL RESTRUCTURED EX-IM BANK LOANS AMOUNT TO 20.791 BILLION YEN.

THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY OF JAPAN HAS RESTRUCTURED ITS EXPOSURE TO THE COUNTRY AT 7.7 PERCENT YIELDS.

MANILA'S OTHER OFFICIAL CREDITOR COUNTRIES ARE THE UNITED STATES, GERMANY, FRANCE, CANADA, BRITAIN, ITALY, SWITZERLAND, THE NETHERLANDS, DENMARK, FINLAND AUSTRIA, BELGIUM, AND SPAIN.

THE PHILIPPINE MULTIYEAR RESTRUCTURING AGREEMENT WITH THE PARIS CLUB STIPULATES THAT 100 PERCENT OF THE PRINCIPAL AND 75 PERCENT OF INTEREST WILL HAVE A REPAYMENT PERIOD OF 10 YEARS, INCLUDING 6.5 YEARS OF GRACE.

TEN PERCENT OF THE REMAINING 25 PERCENT OF THE LOAN INTEREST SHALL BE DUE ON JUNE 30, 1991, WITH THE REST PAYABLE JUNE 30, 1992.

OF THE 1.576 BILLION DOLLARS THE PARIS CLUB RESTRUCTURED, 422.65 MILLION DOLLARS REPRESENTS ARREARS WHILE 1.15 BILLION DOLLARS REPRESENTS CONSOLIDATED PRINCIPAL AND INTEREST PAYMENTS.

SYDNEY (OCT. 22) KYODO - MORE THAN 10 AUSTRALIAN "GREENPEACE" ENVIRONMENTALISTS ON MONDAY DISTRIBUTED HANDBILLS CRITICIZING JAPAN FOR ITS INVESTMENT IN AUSTRALIAN REAL ESTATE, WHICH HAS GROWN RAPIDLY IN RECENT YEARS.

THE OCCASION WAS A JOINT MEETING OF THE JAPAN-AUSTRALIA AND AUSTRALIA-JAPAN BUSINESS COOPERATION COMMITTEES, WHICH GOT UNDER WAY IN ADELAIDE, THE CAPITAL OF SOUTH AUSTRALIA, THE SAME DAY.

THE ACTIVISTS CONTENDED THAT THE ACCEPTANCE OF JAPANESE INVESTMENTS AMOUNTS TO A BETRAYAL OF THEIR NATION. THEY VOICED STRONG OBJECTION TO THE MULTI FUNCTION POLIS, A SCHEME TO CONSTRUCT A FUTURISTIC CITY IN ADELAIDE AS A JOINT VENTURE BETWEEN THE TWO NATIONS.

THE PRIVATE-LEVEL MEETING OF BUSINESS LEADERS WILL RUN UNTIL TUESDAY, WITH EISHIRO SAITO, CHAIRMAN OF THE FEDERATION OF ECONOMIC ORGANIZATIONS (KEIDANREN), AND 330 OTHER BUSINESSMEN TAKING PART FROM JAPAN.

TOKYO (OCT. 22) KYODO - THE GOVERNMENT, FACED WITH A LINGERING SLUMP IN NIPPON TELEGRAPH AND TELEPHONE CORP.'S STOCK, IS NOW STRUGGLING TO FIND WAYS TO SELL NTT SHARES WITHOUT CAUSING A TURMOIL IN THE STOCK MARKET.

THE ISSUE REVOLVES AROUND THE FINANCE AND POSTS AND TELECOMMUNICATIONS MINISTRIES AND NTT ITSELF, WHICH REMAIN WIDELY APART ON HOW TO SELL GOVERNMENT-HELD SHARES IN NTT.

THE FINANCE MINISTRY HAS SOLD NTT SHARES THREE TIMES TO DATE UNDER THE GOVERNMENT'S PRIVATIZATION PROGRAM, OFFERING 1.95 MILLION SHARES IN BOTH FEBRUARY AND NOVEMBER 1987 AND 1.5 MILLION SHARES IN OCTOBER 1988.

BUT THE SAGGING STOCK PRICE FORCED THE MINISTRY TO SKIP ITS FOURTH SALE OF NTT SHARES IN FISCAL 1989 AND 1990, PROCEEDS FROM WHICH WERE TO BE SET ASIDE FOR PUBLIC WORKS AND REDEMPTIONS OF GOVERNMENT BONDS.

THE FINANCE MINISTRY, NOW DRAFTING A FISCAL 1991 BUDGET, WANTS TO SELL NTT SHARES AS SOON AS POSSIBLE TO HELP FINANCE THE NEXT FISCAL YEAR'S BUDGET. AT PRESENT, IT OWNS FIVE MILLION NTT SHARES.

AMONG MEASURES BEING DISCUSSED IN THE MINISTRY ARE THE MAPPING OUT OF A FORMULA UNDER WHICH IT CAN SELL NTT SHARES REGARDLESS OF MARKET CONDITIONS AND THE REVIEWING OF A BAN ON FOREIGN OWNERSHIP OF NTT SHARES.

NTT SUPPORTS FOREIGN OWNERSHIP, BUT THE POSTS AND TELECOMMUNICATIONS MINISTRY STRONGLY OPPOSES ALLOWING FOREIGN INVESTORS TO HOLD NTT SHARES, ARGUING THAT

IT WOULD ALLOW FOREIGN CONTROL OF THE FORMER GOVERNMENT COMMUNICATIONS MONOPOLY.

THE POSTS AND TELECOMMUNICATIONS MINISTRY, INSTEAD, HAS PRESSED ITS PLANS TO PERMIT NTT TO PURCHASE GOVERNMENT-HELD SHARES AT THE FACE VALUE OF 50,000 YEN PER SHARE SO THAT NTT CAN WRITE THEM OF AND REDUCE ITS CAPITAL.

BUT THE PLANS HAVE COME UNDER FIRE FROM THE FINANCE MINISTRY, WHICH HAS INSISTED THAT SUCH A FACE-VALUE SALE WILL REPRESENT A BARGAIN OF NATIONAL ASSETS.

THE MINISTRY SOLD NTT SHARES AT 1.19 MILLION YEN PER SHARE IN ITS FIRST OFFERING, AT 2.55 MILLION YEN IN ITS SECOND TRANCHE AND 1.9 MILLION YEN IN THE THIRD OFFERING.

WITH THE FINANCE MINISTRY IN THE PROCESS OF BUDGET-DRAFTING WORK, TO BE FINISHED BY EARLY DECEMBER, GOVERNMENT AND NTT OFFICIALS MUST REACH SOME CONCLUSION BY THE END OF NOVEMBER. BUT MINISTRY OFFICIALS SAY NEGOTIATIONS WILL BE ROUGH GOING.

#90295k0076 10/22/1990 ~Japanese News Agency

TOKYO (OCT. 22) KYODO - A JAPANESE GOVERNMENT RESEARCH TEAM HAS DEVELOPED AN ELECTRON MICROSCOPE WITH THE WORLD'S HIGHEST RESOLVING POWER, THE SCIENCE AND TECHNOLOGY AGENCY ANNOUNCED MONDAY.

A NATIONAL INSTITUTE FOR RESEARCH IN INORGANIC MATERIALS RESEARCH TEAM HAS SUCCEEDED IN OBTAINING IMAGES OF OXYGEN AND ZIRCONIUM ATOMS CONTAINED IN THIN CRYSTALS OF ZIRCONIA POWDER USING THE MICROSCOPE.

SENIOR RESEARCHERS SAID THAT CONVENTIONAL ELECTRON MICROSCOPES HAVE BEEN UNABLE TO PRODUCE AN IMAGE OF VERY LIGHT ATOMS LIKE THOSE OF OXYGEN.

THE NEWLY DEVELOPED MICROSCOPE HAS 1.5 MILLION (DIRECT NEGATIVE FILM) MAGNIFICATIONS AND AN ACCELERATING VOLTAGE OF 1,300 KILOVOLTS (AN IMPORTANT FACTOR THAT DETERMINES THE VELOCITY OF ELECTRON BEAMS), COMPARED WITH UP TO ABOUT ONE MILLION MAGNIFICATIONS AND 1,000 KILOVOLTS IN THE EXISTING HIGHEST RESOLUTION ELECTRON MICROSCOPES, DEVELOPED SEPARATELY IN THE EARLY 1980S BY TOKYO INSTITUTE OF TECHNOLOGY (TIT) AND UNIVERSITY OF CALIFORNIA RESEARCH TEAMS.

THE RESEARCHERS SAID THERE WAS A DISTANCE OF 1.7 ANGSTROMS (ONE ANGSTROM BEING A 100-MILLIONTH OF A CENTIMETER) BETWEEN THE ZIRCONIUM AND OXYGEN ATOMS, WHOSE IMAGES WERE OBTAINED IN A RECENT OBSERVATION WITH THE NEW MICROSCOPE.

HE SAID IT WAS CONFIRMED BY COMPUTER ANALYSIS OF THE IMAGES THAT THE NEWLY DEVELOPED MICROSCOPE HAS A RESOLUTION OF ABOUT 1 ANGSTROM, COMPARED WITH A

RESOLUTION OF ABOUT 1.6 ANGSTROMS OF THE TIT AND UC MICROSCOPES.

THE RESEARCHERS SAID THEIR TEAM WOULD LIKE TO TRY TO TRACE THE HITHERTO UNKNOWN STRUCTURE OF SUPERCONDUCTORS, OF WHICH OXYGEN IS AN IMPORTANT CONSTITUENT, USING THE NEW MICROSCOPE.

#90295k0077 10/22/1990 ~Japanese News Agency

TOKYO (OCT. 22) KYODO - FOUR JAPANESE AND 45 FOREIGN AIRLINES APPLIED MONDAY FOR A 7 PERCENT ACROSS-THE-BOARD INCREASE IN AIR FARES AND CARGO RATES FROM JAPAN EFFECTIVE DECEMBER 1, INDUSTRY SOURCES SAID.

JAPAN AIRLINES AND ALL NIPPON AIRWAYS WERE AMONG THE COMPANIES FILING APPLICATIONS WITH THE TRANSPORT MINISTRY.

THE MINISTRY IS EXPECTED TO HOLD THE INCREASE TO 2-4 PERCENT IN NEGOTIATIONS WITH THE AIRLINES, AND WILL ENCOURAGE THEM TO EXPAND DISCOUNTS FOR LARGE-LOT CUSTOMERS, THE SOURCES SAID.

THIS WOULD BE THE FIRST FARE INCREASE IN JAPAN SINCE AUGUST 1982, WHEN FARES AND RATES WERE RAISED BY 5 PERCENT FOR FLIGHTS TO ASIA AND EUROPE AND BY 9 PERCENT ON PACIFIC OCEAN ROUTES.

MONDAY'S INCREASE REQUEST WAS DECIDED UPON FOLLOWING AN AGREEMENT BY THE INTERNATIONAL AIR TRANSPORT ASSOCIATION (IATA) EARLIER THIS MONTH IN GENEVA.

IN THE WAKE OF SHARP RISES IN FUEL COSTS DUE TO THE PERSIAN GULF CRISIS, IATA AGREED TO RAISE INTERNATIONAL AIRFARES AROUND THE WORLD BY 5-8 PERCENT. FARES IN SOME AREAS ROSE OCTOBER 1.

FARES FROM JAPAN HAVE NOT INCREASED SO FAR, AS JAPANESE AIRLINES WANTED TO WATCH THE MOVEMENT OF OIL PRICES BEFORE MAKING A DECISION.

THE INCREASE REQUEST WAS DECIDED UPON UNDER STRONG PRESSURE FROM THE FOREIGN AIRLINES AS WELL AS ON THE EXPECTATION THAT THE CRISIS WILL NOT BE SOLVED SOON ACCORDING TO THE SOURCES.

MEANWHILE, IATA HAS SLATED ANOTHER MEETING LATER THIS MONTH TO DISCUSS ANOTHER RAISE IN FARES, SAYING THAT RISING FUEL COSTS ARE STILL A HEAVY BURDEN ON AIRLINES, THE SOURCES ADDED.

TOKYO (OCT. 22) KYODO - JAPAN'S SAISON GROUP, A MAJOR BUSINESS GROUP CENTERED ON DEPARTMENT AND SUPERMARKET ENTERPRISES, MONDAY ENTERED INTO A BUSINESS TIE-UP WITH BRITAIN'S THOMAS COOK GROUP, SAISON ANNOUNCED MONDAY.

THE ANNOUNCEMENT SAID THE SAISON GROUP'S TRAVEL ARM, VIVRE INTERNATIONAL INC., SIGNED A BASIC COOPERATION AGREEMENT WITH THE LARGEST BRITISH TRAVEL COMPANY IN LONDON THE SAME DAY.

UNDER THE AGREEMENT, THOMAS COOK WILL ACQUIRE 10 PERCENT OF VIVRE'S TOTAL ISSUED SHARES AND SET UP A JOINT VENTURE WITH VIVRE.

VIVRE WILL BECOME A MEMBER OF THOMAS COOK'S WORLDWIDE MEMBERSHIP NETWORK AND WILL BE ABLE TO UTILIZE THOMAS COOK'S UNITS AND SYSTEMS, ACCORDING TO SAISON.

FORMAL COOPERATION CONTRACTS WILL BE SIGNED EARLY IN 1991. ''WHILE THIS ALLIANCE WILL BE A GREAT STEP FOR SAISON IN FORMING A TOTAL TRAVEL INDUSTRY CONCEPT, IT WILL ALLOW THOMAS COOK TO REALIZE ONE OF ITS WISHES -- TO BUILD A STRONG BASIS FOR ITS BUSINESS ACTIVITIES IN EAST ASIA, ESPECIALLY JAPAN,'' SAISON SAID.

#90295k0085 10/22/1990 ~Japanese News Agency

KOBE (OCT. 22) KYODO - ABOUT 430 KOREAN RESIDENTS IN JAPAN HELD A RALLY ABOARD A FERRY EN ROUTE FROM KOBE TO PUSAN, SOUTH KOREA, ON MONDAY, CALLING FOR BETTER GUARANTEES OF THEIR LEGAL STATUS.

THE RALLY WAS HELD TO PRESS THEIR DEMANDS TO THE JAPANESE AND SOUTH KOREAN GOVERNMENTS BEFORE AN AGREEMENT ON THE LEGAL STATUS OF KOREAN RESIDENTS IN JAPAN IS REVIEWED NEXT JANUARY.

JAPAN AGREED WITH SOUTH KOREA IN APRIL TO GRANT PERMANENT RESIDENCE TO AND ABOLISH FINGERPRINTING FOR SO-CALLED "THIRD-GENERATION" KOREANS, THE CHILDREN OF SECOND-GENERATION KOREANS WHO THEMSELVES WERE BORN IN JAPAN ON JANUARY 17, 1971 OR LATER.

HOWEVER, THE AGREEMENT DOES NOT COVER FIRST AND SECOND-GENERATION KOREAN RESIDENTS IN JAPAN.

THE RALLY CALLED FOR THE RIGHT TO VOTE IN LOCAL ELECTIONS AND FOR FIRST AND SECOND-GENERATION KOREANS TO ALSO BE EXEMPTED FROM FINGERPRINTING, AMONG OTHER DEMANDS.

AFTER ARRIVING IN PUSAN, THEY WILL MEET THE PRESS AND PARLIAMENTARIANS TO PUT THEIR DEMANDS, THEY SAID.

#90295k0093 10/22/1990 ~Japanese News Agency

BEIJING (OCT. 22) KYODO - A CHINESE FOREIGN MINISTRY SPOKESMAN ON MONDAY DEMANDED JAPAN STOP VIOLATING BEIJING'S SOVEREIGNTY OVER THE DISPUTED SENKAKU

ISLANDS IN THE EAST CHINA SEA, ACCUSING TOKYO OF TRANSGRESSING CHINESE AUTHORITY WHEN JAPANESE PATROL BOATS FORCED AWAY TWO TAIWANESE FISHING BOATS ATTEMPTING TO LAND ON THE ISLANDS ON SUNDAY.

THE TAIWANESE BOATS, REPORTEDLY CARRYING A HOST OF TAIWANESE ATHLETES, OFFICIALS AND REPORTERS, TRIED TO LAND ON UOTSURISHIMA, ONE OF FIVE ISLANDS LOCATED 150 KILOMETERS NORTHEAST OF TAIWAN, AND PLANT AN OLYMPIC TORCH AS A SYMBOL OF TAIPEI'S SOVEREIGNTY OVER THE ISLANDS. THE ISLANDS ARE UNINHABITED, BUT ARE CLAIMED BY BOTH CHINA AND TAIWAN, AS WELL AS JAPAN.

THE SPOKESMAN CLAIMED "UNDISPUTED" TERRITORIAL RIGHTS OVER THE ISLAND, SAYING THAT THE ISLAND IS THE INHERENT TERRITORY OF CHINA.

THE SPOKESMAN THEN SAID THERE IS NO REASON FOR JAPAN TO DISPATCH PATROL BOATS AND PLANES TO THE SEA AROUND THE ISLAND TO PREVENT TAIWANESE FISHERMEN'S LANDING ATTEMPTS.

THE CHINESE SPOKESMAN SAID THAT THE CHINESE GOVERNMENT STRONGLY DEMANDS THE JAPANESE GOVERNMENT TO IMMEDIATELY STOP ALL ACTIONS VIOLATING CHINA'S SOVEREIGNTY OVER UOTSURISHIMA AND THE SEA AROUND THE ISLAND.

JAPAN CONTROLS THE GROUP OF FIVE ISLETS AND THREE REEFS KNOWN IN CHINA AS DAIOYUTAI. A JAPANESE RIGHTIST GROUP BUILT A BEACON IN 1978 ON UOTSURISHIMA AND FILED AN APPLICATION WITH THE MARITIME SAFETY AGENCY FOR APPROVAL TO USE THE BEACON AS AN OFFICIAL LIGHTHOUSE LAST SUMMER.

THE CHINESE SPOKESMAN ISSUED A STATEMENT TO REMOVE THE BEACON LAST THURSDAY AS THE MARITIME SAFETY AGENCY INDICATED IT WOULD APPROVE THE APPLICATION.

CHIEF CABINET SECRETARY MISOJI SAKAMOTO SAID MONDAY IT WAS "REGRETTABLE" THAT THE TWO TAIWANESE FISHING BOATS HAD TO BE FORCED AWAY BY THE JAPANESE PATROL BOATS.

#90295m0001 10/22/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 22) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

Crude oil is sharply lower this morning with North Sea Brent off $3.25 to $28.00. ... The Nikkei is up 589 points. ... The FTSE is up marginally at midday. ... U.S. stocks in London are lower this morning -- the EXMI off a strong four points. ... GENERAL ELECTRIC is indicated down two points in overseas trading after a negative article in "Barron's." ... Bonds start to rally with the long yield dropping to 8.72% ... The dollar is mixed.

CHASE MANHATTAN is negotiating for SALOMON BROTHERS to buy up to $100 million

of one of its biggest loans as part of a plan to seek help with its $4.6 billion portfolio of leveraged-company loans. ... PATHE COMMUNICATIONS says it has agreed to sell to TURNER BROADCASTING exclusive rights to show some of Hollywood's most popular films. ... BANK OF NEW ENGLAND reports a third-quarter loss of $123.2 million, or $1.78 a share. ... TEXAS INSTRUMENTS says it lost 19 cents a share in the third quarter. ... PUBLIC CITIZEN admits it made a mistake in putting the ITT HARTFORD INSURANCE group on a list of five property and casualty insurers it said could fail.

WHAT'S AHEAD:

FED CHAIRMAN ALAN GREENSPAN addresses the AMERICAN BANKERS ASSOCIATION in Orlando, Fla., today. ... PRESIDENT BUSH makes a one-day political trip to New England tomorrow. ... The COMMERCE DEPARTMENT issues its durable goods report on Wednesday. ... USAIR is buying MIDWAY AIRLINES' Philadelphia facilities for $68 million if the JUSTICE DEPARTMENT approves.

FROM THE BULLS:

"I think there's been far too much pessimism in this market -- too much attention to the deficit, to the situation in the Middle East and to oil," says GENE SEAGLE, technical analyst at GRUNTAL & CO. "The market has gotten into a psychological position where these things were measured in here." He says that outside of a shooting war, the Dow could reach about 2650 to 2700 by sometime in November. (CNC "Market Wrap-Up", 10/19)

"My view all along has been that this is simply a bull market correction," says WILLIAM LeFEVRE of THE ADVEST GROUP. He believes the Dow will go no lower than 2350 en route to new highs. This is a ripe time to make long-term stock buys, he says. ("USA Today", 10/22)

"I don't think the rally stops here but will get considerably better," says CHRISTINE CALLIES of COWEN & CO. of Boston. "I am looking for the Dow to get to 2650 to 2680 in about eight weeks. ... Although the stock market had been in the dumps, it has now achieved the technical preparation for a tradeable move." ("Investor's Daily", 10/22)

FROM THE BEARS:

ABBY COHEN says this morning that it is very tempting to say it's time to buy stocks again. "I'm afraid, though, when I look at the economic fundamentals, I can't reach that conclusion yet. "I think it's a real bear market." Consensus expectations are calling for a 15% increase in profits next year. "I don't see how," says Cohen, now a market strategist with GOLDMAN SACHS. (CNN "Business Day", 10/22)

"This is just a rally in a bear market," says MICHAEL HARRIS, chief investment officer at WILLOUGHBY HOLIN & RENTER of Plantation, Fla., "The problems are

still with us." ("Investor's Daily", 10/22)

"The market still seems vulnerable," says CARMINE GRIGOLI at FIRST BOSTON CORP. CHARLES CLOUGH at MERRILL LYNCH says the rally could "go a bit farther " but adds that "for a major bear market bottom you need clear signs that the Federal Reserve Bank is adding [significant] reserves to the banking system. Although bank liquidity is improving slightly, that isn't happening yet." JOHN BROOKS of DAVIS MENDEL REGENSTEIN in Atlanta says trying to time a bear market rally is "like trying to catch a falling knife." (WSJ, 10/22)

Don't underestimate the downside risk, the bear market could be less than one-half over, says JAMES STACK of "Investech." "Expectations of lower interest rates far exceed reality," says Stack. "Underlying inflation pressures remain intact." Stack is advising his clients to use rallies to increase their cash reserves. (CNBC "World Business", 10/22)

STOCK MARKET:

LEON COOPERMAN, market strategist at GOLDMAN SACHS and portfolio manager at GS CAPITAL GROWTH FUND, says it's probably too late to get bearish, but too early to be bullish. "We are likely to have stability for a while, and probably a rally, possibly an explosive one since everybody is learning how to short the market these days," he says. "But I don't think the final lows are at hand. And the Persian Gulf remains a dangerous wild card, capable of precipitating an extreme outcome" in either direction." ("Barron's", 10/22)

"I think the market is at last sensing some positive moves," says NEWTON ZINDER of SHEARSON LEHMAN BROTHERS. "Some of the negatives are lifting here." ("The Washington Post", 10/20)

JACK SOLOMON, technical analyst at BEAR STEARNS, sees the current rally as "simply a release from too much selling pressure." He says it is strictly a technical bounce that could carry the Dow to the 2600s, but will end in another slide to deeper lows. EUGENE PERONI of MONTGOMERY SCOTT sees the move as a chance to sell stocks before an expected drop to new lows next month. ("USA Today", 10/22)

"I'm generally suspicious of activity on an options expiration date because of the shufflings of arbitrage positions and a few other strategies," says technical analyst PHILLIP RETTEW of MERRILL LYNCH. "They tend to move some of the bigger stocks in ways that might not normally be expected." (CNC "Market Wrap-Up", 10/19)

"By the time the real bottom is reached, your average investors are going to be so battered and bruised that the last thing they will want to talk about is the stock market," says DAN SULLIVAN, editor of the "Chartist." "A whole generation of investors will walk away, vowing never to return." (WSJ, 10/22)

For the first time this year, Tokyo stocks have posted six straight up sessions. One reason is that oil prices have stopped rising, says NICHOLAS REITENBACH, global portfolio strategist for YAMAICHI INTERNATIONAL. "Another factor, which may be more important, is that Japanese interest rates aren't going up anymore," says Reitenbach, who believes Japanese rates will fall. "The runup in interest rates was not justified, considering what the underlying rate of inflation is." Reitenbach says the U.S. and Japanese markets do not lead or follow each other, but are simply responding to the same set of worldwide developments. (CNBC "World Business", 10/22)

STOCK TIPS:

"Unless you can outswim Jaws ... enjoy the view, not the swim," says a bearish PETER GRANDICH in "The Grandich Letter." For speculative investors, he recommends NORSAT INTERNATIONAL which he describes as "undervalued strictly due to its present unknown condition." (CNBC "World Business" 10/22)

GENERAL ELECTRIC is the subject of a major article in "Barron's" this week, written by DAVID TICE, publisher of "Behind the Numbers" research service. He cautions that while GE stock has held up well, the huge company is to a large degree a financial services company, with 24% of its total net income coming from GE FINANCIAL. And, he writes, "GE Financial, on close inspection, seems by no means immune to the woes that have befallen so many of its counterparts in banking and insurance." ("Barron's", 10/22)

"We dumped what little cash we had into the market last Wednesday and Thursday " says BILL BEGER, manager of the BERGER 100 and BERGER 101 funds in Denver. Among the issues his funds bought were BLOCKBUSTER ENTERTAINMENT, MEDCO CONTAINMENT SERVICES, AUTODESK, BMC SOFTWARE and CADENCE DESIGN SYSTEMS. ("Investor's Daily", 10/22)

"Absent the Mideast problem, the auto industry was poised for a recovery in sales," says DAVID HEALY, director of BARCLAY'S de ZOETE WEDD. "I think there is a likelihood of a recovery beginning in car sales in 1991 ... and that could strengthen in 1992. That's still a possibility if the Mideast situation is resolved. So, I'm actually more optimistic about the auto stocks now than I was a year ago. ... I think you really have to look beyond the economy for the next six months if you're going to get interested in buying auto stocks. The stocks are off 30 percent from where they were a year ago ... and a lot of the bad news ... are already in the prices of the stocks. So we have an opportunity to make some money in auto stocks looking beyond the Mideast situation." He particularly likes GENERAL MOTORS and would avoid FORD for now. "I would actually buy CHRYSLER as a speculation. The stock is selling for near bankruptcy prices. ... It's not for the faint of heart, but it's an interesting speculation." Among foreign companies, he has "buy ratings" on TOYOTA and VOLVO. ("Wall Street Week", 10/19)

#90295m0002 10/22/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (OCT. 22) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"This [currency trading] is volatile stuff and all indications are that this is going to continue for some time," says LLOYD ATKINSON, chief economist for the BANK OF MONTREAL. "Forex players remain skeptical of the dollar's upside potential at this point," says MICHAEL FAUST, currency analyst with MONEY MARKET SERVICES in Chicago. "We've had comments all week from Japanese, U.S. and German officials that they're either happy with the dollar right now or they welcome further gains in the yen or the mark at the expense of the dollar." ("Investor's Daily", 10/22)

"We can't quantify it, but we know that dollar-based capital continues to move offshore," says DAVID HALE, chief economist at KEMPER FINANCIAL SERVICES. "People have been aware that Treasury would be permissive of a fall in the dollar, but I think they are surprised by the extent of it. Given the banking crisis, there is no constituency in Washington to support the dollar through a rise in interest rates." (NYT, 10/22)

"The recent rally in the bond market seems to have priced in a lot of good news, both current and anticipated," says RICHARD BERNER of SALOMON BROTHERS. "The market's celebration seems hasty and a 9% Treasury

bond yield may reemerge before rates eventually drift lower." ("Investor's Daily", 10/22)

"People generally have to be beaten over the head before they believe that a recession" is in the making, says ROBERTA OLSON at BANC ONE ASSET MANAGEMENT CORP. She is bullish on bonds, believing rates will fall and that recession is a sure bet. But she says most money managers won't jump into the bond market "until they get definite evidence that a recession has begun." (WSJ, 10/22)

"The tenacity of the long bond rally, despite seemingly adverse economic reports and a declining dollar, underscores the market's recognition that there is no inflation threat," says PHILIP BRAVERMAN at DKB SECURITIES. "Portfolio buyers are shifting funds into Treasuries from equities and from debt instruments vulnerable to deep recession, suggesting that they see through the spurious strength of recent inflation reports." ("Investor's Daily", 10/22)

THE ECONOMY:

"The news on inflation is at the good end of the range," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "Supplies of most commodities continue to be abundant and we've had a relatively large drop in inflation. I relate that basically to the falls in interest rates that have happened in Europe and Japan and I think it may well be that, world-wide, interest rates have peaked. ... I'm not saying it's going to save the United States from a recession, but it sure makes life a lot easier for the Federal Reserve and does tend to make me less scared of a severe recession. ... I think this may [have been] the best week since Aug. 3 which is when Saddam [Hussein] invaded Kuwait." (CNC "Market Wrap-Up", 10/19)

"We see the economy turning around by the end of the year and accelerating into 1992," says MARK MILES, senior economist at H.C. WAINWRIGHT ECONOMICS in Boston. "We could have 3% growth next year and perhaps even 4% in 1992." (NYT, 10/21)

"The [oil] market correctly perceives this to be a spike in prices," says ARTHUR SMITH, of JOHN S. HEROLD INC. "Expectations of oil prices 12 months from now are about $25 a barrel. ... Until we get a resolution to the Kuwait situation, oil prices will bounce in the high numbers, but eventually resolution should bring prices down to the mid 20s." ("Wall Street Week", 10/19)

"This [oil] market has overvalued the war premium and people are beginning to consider that and understanding that there is a lot of oil out there," says THOMAS BLAKESLEE of PEGASUS ECONOMETRICS GROUP. "As long as there's not something to precipitate the war fears over the weekend, we believe this market will continue to move lower." TOM BENTZ, trading director at UNITED ENERGY TRADING, says: "We're in a bit of a free fall. There's a good chance this thing could go to $31" a barrel. ("The Washington Post", 10/20)

IN WASHINGTON:

"The deficit reduction package now working its tortuous way through Congress doesn't even begin to address the fiscal problems facing this nation," says MARK MELCHER, director of Washington research for PRUDENTIAL-BACHE. "The tilt toward excise taxes and user fees, without meaningful cuts in fiscal spending, does create an inflationary bias to this particular package," says EDWARD McKELVEY, senior economist at GOLDMAN SACHS. "All the routes that avoid stagflation lead to recession. There is no significant upside here. What you'd really like to do is live in the O.M.B.'s post- 1991 world, where inflation is low and growth is strong and you just melt the budget [deficit] out of existence." Unfortunately, he doesn't think that is a realistic world. (NYT, 10/21)

Senate backers of a bill to regulate cable TV prices say the compromise measure is dead for the year. On another issue, SEN. ALAN DIXON of Illinois is withholding his support for compromise legislation on stock-index futures

regulation, clouding prospects for a floor vote before Congress recesses this year. ("Investor's Daily", 10/22)

#90295p7572 10/22/1990 ~PR Newswire

OREM, UTAH. (OCT. 22) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT) announced today record earnings and revenue for its second quarter and six months ended Sept. 30, 1990. Robert W. Mendenhall, president and chief executive officer, announced net income for the quarter was $1.6 million, or $0.08 per share, on revenues of $15.2 million. Net income for the same period last year was $1.4 million, or $.07 per share, on revenues of $13.3 million. The company's cash position increased to over $8.4 million.

Revenues of learning improvement products were up almost 30 percent for the first six months, with gross margins improving to 64 percent from 55 percent last year. Sales to schools increased sharply; growing over 60 percent in the first half. Hardware sales to industry and government decreased as the company continued to move toward standard platform solutions. The company announced during the quarter a new courseware development tool called Sage(tm) , which is MS-DOS compatible and runs under Microsoft Windows(tm) 3.0 Services revenue was also down slightly due to delays and cost overruns in custom courseware development for industry, which is also negatively impacted services gross margins.

The company continued its emphasis on growing market share by adding over $2.1 million in sales and marketing expense in the first half.

Sales recorded during the second quarter included a $6.2 million order from DeKalb County Schools, a $780,000 order from Muscogee County Schools, and two courseware development contracts with aircraft engine manufacturers Pratt & Whitney and CFM International. In addition, the company announced plans to open a sales office in Singapore to better serve customers along the Pacific Rim. The office is scheduled to open in February of 1991.

Wicat Systems Inc. is a world leader in technology-based training education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry, and government.

#90295p7573 10/22/1990 ~PR Newswire

NEWPORT BEACH, CALIF. (OCT. 22) PR NEWSWIRE - Pacific Scientific Company (NYSE: PSX), a manufacturer of products for industry and aerospace, today reported its quarterly revenue and profit for the third quarter ended Sept. 28 1990. The company reported third-quarter revenue of $46.2 million with net

income of $1.2 million or $0.20 per share, compared to last year's third-quarter revenue of $41.2 million with net income of $1.1 million or $0.18 per share.

For the nine months, revenue was $137.9 million with net income of $3.9 million or $0.65 per share, compared to last year's nine-month revenue of $125.5 million with net income of $2.8 million or $0.47 per share. The previous year's nine-month profit included an extraordinary gain of $989,000 or $0.18 per share from the repurchase, at a discount, of the company's outstanding convertible subordinated debentures.

Commenting on the earnings, Chairman, President and CEO Edgar S. Brower said that it is important to note that Pacific Scientific's pretax income for the quarter increased by 34 percent. Pretax income for the nine months increased by 164 percent.

During the third quarter, the company discontinued operations at its two subsidiaries in Puerto Rico. The expense of closing and moving these facilities was offset by the sale of assets and a refund based on price adjustment from a 1987 acquisition. The outdoor lighting control product line was moved from Puerto Rico to the Fisher Pierce plant in Massachusetts and start-up expense and initially lower manufacturing efficiency of this product line resulted in additional expense estimated to equal $0.05 per share during the just completed quarter.

Third-quarter orders totaled $43 million, resulting in a $95 million backlog. For the nine months, orders were relatively evenly split between industrial products ($65 million) and commercial/military aerospace ($70 million). Niche products with order increases included brushless motors and products for electric utilities. Niche products that recorded declines in orders included motors for data processing and consumer products. According to the company, current order rates and existing backlog strongly suggest excellent fourth-quarter sales.

Pacific Scientific's core business is designing, manufacturing and marketing technology based proprietary products for niche markets. The principal industrial products include electric motors and controls, and measurement and control instrumentation. Aerospace products include fire detection and suppression systems, aircraft equipment, and electric generators and alternators.

#90295p7592 10/22/1990 ~PR Newswire

HOUSTON (OCT. 22) PR NEWSWIRE - MAXXAM Inc. (AMEX: MXM) today reported net

income of $128.9 million or $13.54 per share for the nine months ended Sept. 30, 1990, compared to net income of $71.6 million or $8.11 per share for the same period of 1989. The nine-month 1990 figure for net income includes $11.2 million or $1.18 per share of after-tax extraordinary gain on the repurchase of debt.

For the three months ended Sept. 30, 1990, MAXXAM reported net income of $34.8 million or $3.65 per share, compared to net income of $37.9 million or $3.98 per share in the third quarter of 1989. The third quarter 1990 figure includes $4.5 million or 47 cents per share of after-tax extraordinary gain on the repurchase of debt.

Sales for the nine months ended Sept. 30 were $1,783.5 million, compared to $1,796.4 million for the same period in 1989. Sales for the three months ended Sept. 30 were $601.2 million, compared to $647.7 million for the third quarter of 1989.

MAXXAM operates in three industry segments: aluminum operations, forest products operations and real estate management and development. It does so in aluminum through Kaiser Aluminum & Chemical Corp., a fully integrated aluminum producer; in forest products through MAXXAM's wholly owned subsidiary, The Pacific Lumber Co.; and in real estate management and development through several wholly owned subsidiaries.

On a consolidated basis, MAXXAM results reflect a decrease in investment, interest and other income during the nine and three months ended Sept. 30 from the comparable 1989 periods primarily as a result of lower realized gains on sales of marketable securities, an increase in unrealized losses on marketable securities, and a decrease in interest income resulting from lower cash balances. Consolidated interest expense declined in both the nine months and three months ended Sept. 30 compared to the year earlier periods primarily as a result of a reduction in debt.

MAXXAM's common stock is traded on the American, Pacific, and Philadelphia Stock Exchanges under the ticker symbol MXM.

#90295p7596 10/22/1990 ~PR Newswire

WEST KINGSTON, RI (OCT. 22) PR NEWSWIRE - American Power Conversion Corporation (NASDAQ: APCC) today announced record sales and earnings for the third quarter ended Sept. 30, 1990.

Net sales for the third quarter of 1990 were $16.7 million, up 53 percent from $10.9 million for the third quarter of 1989. Earnings for the third quarter of 1990 were $2.7 million (25 cents per share), up 55 percent from $1.7

million, (17 cents per share) in the third quarter of 1989.

The company effected a 3 for 1 stock split in the form of a stock dividend during the third quarter, and earnings-per-share results have been adjusted accordingly.

For the nine month period ended Sept. 30, 1990, net sales were $42.5 million, an increase of 73 percent over the $24.5 million in sales from the corresponding nine month period in 1989. Earnings for the period were $6.1 million (55 cents per share), up 67 percent from $3.6 million (35 cents per share) in 1989.

Rodger B. Dowdell, Jr., president and chief executive officer, noted that the company "appears to be gaining share, although the market remains quite competitive."

In August, the company reduced prices on three of its products. "We saw an opportunity to gain more market share, and although the quarter's results reflect the short term impact of the price reduction, the long term effect should be favorable to our goal of increased market share," said Dowdell.

During the third quarter, the company introduced PowerDoctor, "Our customers are very solutions driven, and we believe PowerDoctor gives significant added value to our products," said Dowdell.

Dowdell credited lower manufacturing costs for keeping the company's margins consistent, and noted that the company continues to emphasize growth into international markets.

"Many computer manufacturers are reporting sluggish sales," said Dowdell. "Fortunately, our products are not tied directly to new computer shipments, with the majority of sales sold as retofits to an immense installed base. Analysts who follow the company often call us recession-proof, because despite changes in the economy, corporations will still look to Local Area Networks (LANs) as a way to increase productivity and cut costs. LANs continue to be our largest served market."

American Power Conversion is a leading manufacturer of uninterruptible power sources (UPS) which protect computers and similar power-sensitive electronic equipment from sags, spikes, blackouts and other power anormalies.

HOUSTON (OCT. 22) PR NEWSWIRE - American Exploration Company (AMEX: AX) today

announced the signing of a definitive merger agreement under which American Exploration will acquire Conquest Exploration Company (AMEX: CQX). The terms of the agreement call for American to pay $1.90 per share in cash for approximately 12 percent of Conquest's common stock and to exchange 0.44 shares of American Exploration's common stock for each remaining share of Conquest's common stock. Currently, Conquest has 44,468,814 shares outstanding.

In addition, American Exploration has agreed to purchase 5,000,000 shares of Conquest's voting preferred stock, held by the Dyson-Kissner- Moran Corporation (DKM), for $21 million. The Conquest preferred was issued in 1986 and has a liquidation preference of $23.75 million. DKM has also agreed to vote its approximately 10,317,400 shares of Conquest common stock, and its preferred stock, in favor of the acquisition. DKM's interests represent approximately 30 percent of Conquest's outstanding voting stock. As part of the transaction, American Exploration will also assume approximately $55 million of Conquest's debt.

Based on American Exploration's closing stock price of $4.25 per share on Friday, Oct. 19, 1990, the transaction has a value of approximately $160 million. The acquisition is subject to approval by the shareholders of both companies. The shareholder meetings will occur promptly after definitive proxy materials have been approved by the SEC. The transaction is also subject to certain regulatory approvals and the satisfaction of other customary conditions.

Mark Andrews, chairman and CEO of American Exploration, said, "The acquisition of Conquest will significantly increase our cash flow over the next few years and balance the very long life reserves added by our acquisition of Hershey Oil Corporation earlier this year. In addition, the Conquest acquisition will increase our proved reserves by over 60 percent and our market capitalization by some 45 percent to well over $200 million."

At year-end 1989, Conquest Exploration reported 6.4 million barrels of crude oil and 112 BCF of natural gas or approximately 151 BCF equivalents. Conquest also had 222,300 net undeveloped acres in North America and an aggregate of 3,666,000 net undeveloped acres in three international concessions.

American Exploration is an independent oil and gas company engaged in the acquisition and further development of oil and gas properties and in the production of oil and gas. When combined with the recent Hershey Oil acquisition, American Exploration's proved reserves at year-end 1989 were 9.9 million barrels of crude oil and 184 BCF of natural gas or approximately 244 BCF equivalents. In addition, American Exploration had 84,700 net undeveloped acres in North America.

#90295p7602 10/22/1990 ~PR Newswire
PRINCETON, NJ (OCT. 22) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) has announced the issuance of a U.S. patent on anthracycline based compounds useful for cancer therapy.

The patent -- U.S. Patent No. 4,950,738 -- entitled "Amine Derivatives of Anthracycline Antibiotics and Antibody Conjugates Thereof" covers derivatives of anthracycline antibiotics which are particularly useful for preparing soluble therapeutic antibody conjugates for the treatment of cancer and other diseases.

Anthracyclines have shown therapeutic efficacy against a variety of solid tumors and acute leukemias. Adriamycin(TM), developed by Farmitalia Carlo Erba, S.r.l. and marketed in the United States by Adria Laboratories, is the best known anthracycline agent. As with other chemotherapeutic agents of this kind, treatment with anthracyclines has a number of toxic side-effects, including bone marrow depression, alopecia (hair loss) and congestive heart failure. Consequently, derivatives of anthracycline compounds which maintain therapeutic efficacy against abnormal cell growth, but diminish or eliminate toxicity of normal cells, are of significant interest.

Scientists at Cytogen Corp. use the derivatives to prepare site- specific antibody conjugates by the company's previously patented techniques. In pre-clinical studies, these antibody conjugates have demonstrated both the ability to target tumor sites and to exert a therapeutic effect when administered "in vivo." The patented antibody conjugates may prove to be useful for cancer therapy by delivering the cytotoxic anthracycline to a desired tumor target site, while alleviating toxic side-effects currently observed when these compounds are administered systemically. Cytogen is developing such antibody- targeted anthracyclines in conjugation with Farmitalia Carlo Erba.

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

CAMBRIDGE, MA (OCT. 22) PR NEWSWIRE - ImmunoGen, Inc. (NASDAQ: IMGN), announced today that it has entered into a cooperative drug development

program for Oncolysin(R) B (Anti-B4-bR) with the Division of Cancer Treatment of the National Cancer Institute (NCI) of the National Institutes of Health. Oncolysin B was reviewed at a recent meeting of the Decision Network Committee of the NCI. The committee and ImmunoGen have agreed to begin clinical trials, sponsored by NCI, in centers throughout the country in patients with various types of B-cell lymphomas and leukemias.

The NCI's decision to sponsor trials was based on the initial high response rate and low toxicity, which has been seen with Oncolysin B in Phase I clinical studies at the Dana-Farber Cancer Institute. Unlike current approaches to the therapy of lymphomas and leukemias, Immunogen's Oncolysin B does not suppress the bone marrow and thereby expose patients to potentially serious infections. The involvement of NCI will accelerate evaluation of this agent.

ImmunoGen, Inc., is a Cambridge-based biotechnology company specializing in the treatment of cancer. The company has developed proprietary toxins, drugs and biologicals conjugated to highly specific monoclonal antibodies that search out and destroy cancer cells.

MENLO PARK, CA (OCT. 22) PR NEWSWIRE - Consolidated Freightways Inc. (NYSE: CNF) today reported that net income for common shareholders in the third quarter was $8.2 million, or 23 cents per share compared with the year earlier $7.4 million, or 22 cents per share. Fully diluted earnings per share were 21 cents, compared with 22 cents, a year ago.

Record revenues were achieved in the quarter and totaled $1.08 billion, a 7.2 percent increase over the $1.01 billion in the third quarter of 1989.

The CF companies had operating income in the quarter of $27.4 million compared with $25.2 million a year ago.

For the first nine months of the year, the company reported a net loss of $35.7 million, or $1.02 per share, after preferred dividends. In the comparative period a year ago, net income for common shareholders totaled $47.6 million, or $1.27 per share. On a fully diluted basis, the nine month loss per share was $1.02 compared to earnings of $1.24 the year earlier. Net income for the first nine months of 1989 was restated for adoption of Financial Accounting Standards Statement No. 96, Accounting for Income Taxes.

Revenues in the first nine months of 1990 increased to $3.12 billion from $2.77 billion a year ago.

#90295p7609 10/22/1990 ~PR Newswire

WAYNE, PA (OCT. 22) PR NEWSWIRE - SunGard Data Systems Inc. (NASDAQ-NMS: SNDT) announced today that net income for the quarter ended Sept. 30, 1990, was $4.8 million, compared to net income of $4.7 million for the third quarter of 1989.

Earnings per share for the quarter was $.33, the same as for the third quarter last year and somewhat below analyst expectations.

For the first nine months of 1990, net income totalled $14.5 million, an increase of 13 percent over 1989 nine-month net income of $12.9 million. Earnings per share for the nine-month period grew 10 percent to $1.01 in 1990 from $.92 in 1989.

Revenues for the third quarter of 1990 were $62.7 million, up 20 percent over 1989 third quarter revenues of $52.1 million. For the nine months ended Sept. 30, 1990, revenues totalled $182.2 million, an increase of 23 percent over nine-month revenues of $147.9 million last year.

James L. Mann, SunGard's president, chairman and chief executive officer, said: "Our disaster recovery business continued growing in the third quarter, despite an uncertain economy and continuing competition from IBM. In our investment support systems business, processing revenues were up due to our February 1990 acquisition of Warrington Financial Systems. Software license sales, however, declined during the quarter. One reason for this is that sales of our derivative instrument systems, while they continued to penetrate new markets, did not reach the unusually high levels we achieved during the last half of 1989 preceding the opening of the new German options exchange in early 1990. Furthermore, our investment support systems revenues may have been affected by financial institutions and other investment managers evaluating software expenditures at greater length in light of their own financial situations and concerns about a possible recession. Although these factors may continue to affect our financial results, our solid and diversified customer base should continue to produce recurring revenues, reasonable profits and strong cash flows."

SunGard Data Systems Inc. is the pioneer and a leading provider of comprehensive computer disaster recovery services and is the only large specialized provider of proprietary investment support systems to the financial services industry. The company's common stock is reported on the NASDAQ National Market System under the symbol SNDT.

#90295p7613 10/22/1990 ~PR Newswire
NEW YORK (OCT. 22) PR NEWSWIRE - Time Warner Inc.'s (NYSE: TWX) operating divisions posted third-quarter earnings before interest, taxes, depreciation and amortization (EBITDA) of $546 million, on the strength of record results from the company's filmed entertainment, recorded music, cable TV and HBO programming units. EBITDA for the first nine months of 1990 was $1.618 billion.

Due primarily to interest expense and the accounting treatment associated with the amortization of the purchase cost related to the acquisition of Warner Communications Inc. (WCI), Time Warner reported a third-quarter net loss of $91 million on revenues of $2.9 billion. For the nine months ended Sept. 30, 1990, the company reported a net loss of $193 million on revenues of $8.226 billion.

In the financial results issued today, Time Warner presented comparative 1989 figures on a historical and a pro-forma basis. The following presentation assumes the pro-forma purchase of 100 percent of WCI as of Jan. 1, 1989.

Time Warner reported a loss of $4.05 per share after preferred dividends in the 1990 third quarter compared with a loss of $4.62 per share in the same quarter last year. For the nine months, the company's loss per common share after preferred dividends was $10.59 compared with $11.75 per share for the same period last year.

For the third quarter of 1990, total EBITDA from the company's business segments was $546 million compared with $525 million in the year-earlier period; however, in 1989, third quarter results included operating profits of $57 million from Scott, Foresman, a textbook publisher sold by Time Warner in December 1989. Absent Scott, Foresman's 1989 results, total Time Warner EBITDA for the 1990 third quarter was up 17 percent to $546 million from $468 million for the same period a year ago.

For the first nine months of 1990, total EBITDA was $1.618 billion compared with $1.505 billion a year ago. Excluding Scott, Foresman's 1989 results, total EBITDA for the first three quarters of 1990 rose 12 percent to $1.618 billion from $1.440 billion a year earlier.

TROY, MICH. (OCT. 22) PR NEWSWIRE - A subsidiary of Ameritech Publishing, Inc. today announced its acquisition of a German industrial directory

publisher.

Ameritech Industrial Yellow Pages, Inc. (AIYP) is the first known American firm to acquire an existing, independent company in Hamburg, Germany with its purchase of "Wer Liefert Was?"

AIYP is the publisher of the Ameritech Industrial Purchasing Guide, 14 regional directories targeted for American purchasers and suppliers.

"Wer Liefert Was?" was the family-owned and operated publisher of the European industrial directory, "Wer Liefert Was?" Freely translated, Wer Liefert Was? means "Who supplies what?" "Wer Liefert Was?" is the German market leader, with German and Austrian editions. Additionally, "Wer Liefert Was?" plans to introduce a directory in Switzerland.

"The relationship formed between AIYP and 'Wer Liefert Was?' is one based on respect and the understanding that together we can provide an outstanding product to our customers," said Tom Kaeding, president of AIYP. "By entering into this agreement, we have created a strong and experienced team prepared to address the needs of the international industrial marketplace."

Ameritech Industrial Yellow Pages, Inc., is a subsidiary of Ameritech Publishing, Inc., provider of Ameritech PagesPlus(R) directories in Illinois, Indiana, Michigan, Ohio and Wisconsin, and directories in Tokyo and Osaka, Japan.

ASHLAND, KY (OCT. 22) PR NEWSWIRE - Ashland Oil Inc. (NYSE: ASH) said today it had net income of $59 million, or $1.06 a share, for its fiscal fourth quarter ended Sept. 30.

In the quarter last year, Ashland had a net loss of $39 million, or 71 cents a share, including the adverse impact of $78 million, or $1.40 a share, in unusual items.

Sales and operating revenues were $2.5 billion for the quarter just ended and $2.3 billion in last year's quarter.

For the year ended Sept. 30, Ashland had net income of $182 million, equal to $3.27 a share. This compares to net income of $86 million, or $1.55 a share, for fiscal 1989, which was hurt by $72 million, or $1.31 a share in unusual items.

Sales and operating revenues were $9 billion in 1990 and $8.5 billion in 1989. Operating income was $331 million, compared to $181 million last year. Operating income for all periods has been restated to include general corporate expenses.

"Fiscal 1990 was one of our best years. Operating income was the second best ever and was exceeded only by that of 1986," said Ashland Chairman and Chief Executive Officer John R. Hall.

Ashland Petroleum recorded $206 million in operating income in 1990, a 45 percent improvement, despite upheaval in crude oil and petroleum product markets throughout much of fiscal 1990. APAC's operating income of $53 million increased 32 percent, reflecting improvements in the Arizona market and better weather conditions in many operating areas.

Ashland Exploration's $40 million in operating income was nearly double its 1989 total and was due to increased production and higher prices of natural gas and crude oil. Combined equity income from Arch Mineral and Ashland Coal totaled $42 million for the year, a 31 percent increase from 1989. Higher coal sales volumes by both companies were the primary contributors to the increase.

During the quarter, Ashland sold all of its shares in Riley Consolidated Inc., an engineering unit, to a subsidiary of Deutsche Babcock Aktiengesellschaft of Germany. At the same time, Ashland took a $15 million pre-tax charge as an addition to existing reserves to correct performance problems with certain Riley-built boilers for which Ashland will have continuing obligations.

PITTSBURGH (OCT. 22) PR NEWSWIRE - James D. Roy, president of the Federal Home Loan Bank of Pittsburgh, announced today that Bryn Mawr Trust Co., Bryn Mawr, Pa., has become a member/stockholder of the Federal Home Loan Bank of Pittsburgh.

Prior to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), Federal Home Loan Bank System membership was limited to traditional home finance lenders -- thrift institutions, as well as certain types of insurance companies. In FIRREA, membership eligibility was expanded to include commercial banks and credit unions that have a significant commitment to home mortgage finance.

To gain entry into the Federal Home Loan banks, qualifying financial institutions must have at least 10 percent of total assets in residential mortgage loans, satisfy safety-and-soundness criteria, and demonstrate management and lending policies consistent with economical home financing.

Bryn Mawr commenced operation as a state-chartered commercial bank in 1989. As of Sept. 30, 1990, total assets were $278 million, with real estate loans amounting to $75 million, 27 percent of total assets. Total deposits were $252 million, and net income was $1,763,805 for the nine months.

Bryn Mawr's lending programs include residential, construction, commercial and consumer loans. Deposits are insured by FDIC. In addition to its main office in Bryn Mawr, Pa., a suburb of Philadelphia, Bryn Mawr operates four full-service branch offices in suburban Philadelphia.

Bryn Mawr joins nearly 200 other financial institutions that are stockholders of the Federal Home Loan Bank of Pittsburgh in the states of Delaware, Pennsylvania and West Virginia. Also among the commercial banks to join the Pittsburgh bank since the passage of FIRREA are First National Bank of Keystone, Keystone, W.Va., and Iron and Glass Bank of Pittsburgh.

The Federal Home Loan Bank of Pittsburgh, on Sept. 30, 1990, had assets of $6.3 billion. The bank's economical funding and operating services are available to all financial institutions engaged in residential mortgage financing, including thrifts, banks, credit unions and insurance companies. Owned by its financial institutions, the bank is one of 12 regional banks, which together with the Federal Housing Finance Board, compose the Federal Home Loan Bank System.

NEW YORK (OCT. 22) PR NEWSWIRE - PLY GEM Industries, Inc. (AMEX: PGI) today announced results for the third quarter and nine months ended Sept. 30, 1990. Revenues for the third quarter increased 9 percent to $154,334,000 from $141,295,000 a year ago. Earnings were $3,412,000 or $.32 per share fully diluted compared to $3,366,000 or $.29 per share fully diluted in the 1989 third quarter.

For the nine months of 1990, sales advanced to $428,294,000 from $399,486,000 for the comparable 1989 period on a pro forma basis had SNE Enterprises been acquired on Jan. 1, 1989. Net income for the nine months of 1990 was $5,217,000 or $.50 per share fully diluted compared to last year's pro forma net income of $5,367,000 or $.47 per share fully diluted.

"While the overall performance of our industry has suffered a drastic decline during 1990, PLY GEM has increased revenues and maintained profitability due to our dominant strength in the remodeling segment of the market. In fact, the $100-plus-billion home improvement market has now surpassed new construction spending and is expected to double in size during the 1990s," said Jeffrey S. Silverman, chairman.

During 1990, PLY GEM's board of directors authorized the repurchase of up to 500,000 shares of common stock. As of Sept. 30, 1990, PLY GEM had repurchased 196,000 shares of its common stock, of which 93,000 shares have been reserved for its employee retirement plans and 103,000 shares have been added to treasury stock.

"With our stock price currently at its lowest level in six years, we believe that buying back our stock is an excellent investment decision and demonstrates our commitment to improving stockholder value and our confidence in PLY GEM's future," said Silverman.

#90295p7628 10/22/1990 ~PR Newswire

MEMPHIS, TENN. (OCT. 22) PR NEWSWIRE - Swipe your MOST card through an Exxon gas pump, enter your Personal Identification Number (PIN), pump the amount of gas you need, and away you go. That's how easy and convenient the agreement between Internet, Inc., Sovran Bank and Exxon Co., U.S.A. has made gas purchases in Memphis.

One of the most extensive point-of-sale debit programs available in the nation this agreement allows MOST cardholders from Delaware to Tennessee to use their MOST ATM cards at the point-of-sale (POS) to pay for gasoline and other services at more than 700 Exxon stations.

In Memphis, Exxon is conducting a market test of self service pumps with card readers built into the pump at 50 of its service stations. These Customer Activated Terminals (CATs) offer the ultimate in convenience by allowing gasoline purchases to be completed without the customer ever leaving the pump. Consumers need only swipe their MOST card through the reader, enter their familiar PIN, authorize the purchase amount of the gas pumped and get their receipt -- all without ever dealing with a station attendant.

The agreement with Exxon is the latest expansion of the MOST POS electronic purchase system offered to retail establishments by the more than 430 member financial institutions that belong to the Internet MOST network.

In Memphis, Internet member financial institutions include Sovran Bank, Union Planters National Bank, National Bank of Commerce, First Tennessee Bank, First American National Bank, Richards Employee Credit Union, Memphis Defense Federal Credit Union, FAA Credit Union and Federal Express Credit Association. ATM cards issued by these financial institutions and many other financial institutions throughout the region are also MOST cards and can be used at any MOST ATM or MOST POS location.

In the rest of Tennessee and in Delaware, Maryland, Virginia, West Virginia and the District of Columbia, Exxon customers will use the more standard approach of taking their MOST card to the station attendant to complete their purchase. In this case, the cardholder presents the MOST card to the sales clerk or station attendant who swipes the card through a terminal. The cardholder then enters his or her PIN or security code. Once the purchase amount in authorized through the MOST network, the payment is transferred from the cardholders's account to Exxon.

Internet(R) owns and operates the MOST electronic banking network, the fourth largest regional network in the U.S. Internet has 434 financial institution members representing more than 14.5 million cardholders and over 5,200 MOST ATM and POS locations throughout the Mid-Atlantic and Mid-South regions.

#90295p7635 10/22/1990 ~PR Newswire

MALVERN, PA (OCT. 22) PR NEWSWIRE - Systems & Computer Technology Corp. (SCT) (NASDAQ: SCTC), today announced its unaudited financial results for the fourth

quarter of fiscal 1990, which ended Sept. 30, 1990.

The quarterly results include the operations of the Moore Companies, which SCT acquired on July 3.

Revenue for the quarter increased 24 percent to $14,161,000, compared with $11,424,000 for the fourth quarter of fiscal 1989. Net income forthe quarter decreased to $308,000, or $.03 per share, from $770,000 -- $.06 per share -- for the same period last year.

For all of fiscal 1990, revenue grew 9.9 percent to $48,869,000, vs. $44,480,000 for fiscal 1989. Excluding a one-time gain of $1.9 million in the first quarter of fiscal 1989 from the settlement of litigation, revenue increased 14.7 percent in 1990. Net income for 1990 was $848,000, or $.07 per share, compared with $3,009,000 (excluding the one-time gain), or $.24 per share, in 1989.

During the quarter, SCT signed more than $7 million in new business and contract renewals. Revenue from software licenses, commissions and installations nearly doubled in the fourth quarter to $5.8 million, compared with $3.1 million during the same period in 1989, because of increased business levels, the release of the financial aid system and the Moore acquisition. The company's backlog of business under contract decreased to $86 million at Sept. 30, from $92 million at June 30.

"SCT's fourth quarter results were adversely affected by our previously announced $700,000 write-down for delinquent accounts," said Michael J. Emmi, chairman and chief executive officer. "Without that write-down, it would have been a very satisfying quarter. In fact, our software sales reached a new record during the period, even without the addition of Moore.

"While we experienced a sales slowdown in software early in the year, we are pleased by the significant increase in software revenue in the second half of 1990," Emmi said. "It demonstrates the growing popularity of SCT's BANNER products, as well as the positive impact of the Moore acquisition. With the investments we have made in sales support, marketing and product development, plus our intensified efforts to develop our OnSite services business, we expect to continue this momentum in 1991."

SCT is a leading provider of computing management services and applications software for educational institutions and government jurisdictions nationwide. The company is headquartered at 4 Country View Road, Malvern.

#90295p7638 10/22/1990 ~PR Newswire

RICHMOND, VA. (OCT. 22) PR NEWSWIRE - Dominion Resources, Inc. (NYSE: D) today announced consolidated earnings of $1.57 per share of common stock for the third quarter ended September 30, 1990, up 11 cents, or 7.5 percent, from the same period in 1989.

Virginia Power, DRI's largest subsidiary, in the third quarter of 1990 earned $1.46 per share, an increase of 7 cents, or 5 percent, over the same period last year.

For the nine months ended September 30, 1990, DRI's consolidated earnings totaled $3.68 per share, an increase of 74 cents, or 25 percent, over the same period in 1989. Virginia Power's earnings per share for the first nine months of 1990 were $3.20, an improvement of 49 cents, or 18 percent, over unusually low earnings for the same period of 1989.

Virginia Power's earnings for the first nine months of 1990 increased primarily because of higher base rates in effect subject to regulatory approval and as a result of major reductions in costs. However, earnings were held down by an absence of growth in the amount of electricity sold because of milder than normal weather and a weakening economy in the utility's service area. Virginia Power's earnings for the first nine months of 1989 had been severely depreseed by rate decisions in 1988 and the costs of maintenance and improvements at the Surry nuclear power station.

For the 12-month period ended September 30, 1990, Dominion Resources earned $4.88 per share, compared to $3.86 for the same period in 1989, a 26 percent increase. Earnings for the 12 months were strengthened by high revenues from the exceptionally cold December of 1989.

STAMFORD, Conn. (OCT. 22) PR NEWSWIRE - General Signal Corporation (NYSE: GSX) has reached and agreement principle with Knorr-Bremse A.G. of Munich, Germany for the sale of its Watertown, N.Y.-based New York Air Brake unit, and with SASIB S.p.A. of Bologna, Italy for the sale of its Rochester, N.Y.-based General Railway Signal unit, according to an announcement made today. While terms of the pending sales were not disclosed, proceeds will be used to repay debt.

General Railway Signal with 1989 sales of approximately $80 million is a leading manufacturer of sophisticated signaling equipment and safety systems to the mainline railroad and mass traffic markets.

New York Air Brake, with 1989 sales of approximately $100 million is a leading manufacturer of braking systems and related hardware for freight cars and rail transit cars.

General Signal Corporation, with 1989 sales of $1.74 billion, is a leading

manufacturer of equipment and systems for the process control, electrical, semiconductor, telecommunications, and transportation industries.

BASKING RIDGE, NJ (OCT. 22) PR NEWSWIRE - NYCOR, Inc. (NASDAQ: NYCO) today announced that the board of directors unanimously has adopted a proposal, subject to stockholder approval, to create a new class of stock that should further enhance the company's ability to make acquisitions.

NYCOR's principal objective is acquiring and operating one or more businesses. It is expected that the use of the new class of stock will facilitate larger acquisitions than are currently possible, given the company's current ownership structure. The new class of stock also will provide equity for financings and employee benefits, while preserving the current relative voting power of the holders of the company's common and Class B stock.

Upon approval by the stockholders, the proposal will create a new class of stock, Class A stock, which will have rights, including dividend rights, substantially identical to the common stock, except that the Class A stock will not be entitled to vote except to the extent provided under Delaware law. The Class A stock will automatically be converted into common stock whenever all of NYCOR Class B stock converts into common stock.

The proposal authorizes 100 million shares of Class A stock. The company expects the Class A stock will be eligible to trade in the NASDAQ National Market System.

NYCOR stockholders of record on Nov. 2, 1990 will be entitled to vote on the proposal at a special meeting that is expected to be held on Dec. 14, 1990. It is intended that proxy solicitation materials regarding the proposals will be mailed to stockholders on or about Nov. 9, 1990.

WHEAT RIDGE, CO (OCT. 22) PR NEWSWIRE - Mesa Medical Inc. (NASDAQ: MSMD) today reported an increase of more than 200 percent in net income for the six months ended Sept. 30, 1990.

For the first six months of fiscal 1991, net sales rose 39 percent to $1,591,000 from $1,141,000 for the like period last year. Net income for the first six months rose to $290,000 or seven cents per share from $94,000 or two

cents per share in the like period last year.

In the fiscal second quarter, net sales rose four percent to $758,000 from $729,000 for the like quarter last year. Net income for the fiscal second quarter rose to $145,000 or three cents per share from $78,000 or two cents per share in the prior year quarter.

Luke Schmieder, president, reported that customer testing of two new prototypes of the DataTrace(R) Micropack Tracer proceeded satisfactorily during the second quarter and is expected to carry on into the third quarter. If successful, orders for the new instruments are expected by the end of the fiscal year.

Schmieder also announced that effective Oct. 16, 1990, the common stock of Mesa Medical will appear in the Additional NASDAQ Quotes (Additional List), which appears daily in such publications as The Wall Street Journal and Investor's Daily.

Mesa Medical develops, acquires, manufactures, and markets medical products used in kidney dialysis and sensor products for industrial and transportation applications.

SAN MATEO, CA (OCT. 22) PR NEWSWIRE - Electronic Arts (NASDAQ: ERTS) today announced its second quarter fiscal year 1991 operating results. Revenues for the quarter ended Sept. 30, 1990, were $24,313,000 compared to $17,305,000 in the second quarter of fiscal 1990, an increase of 40 percent. Revenues for the six months ended Sept. 30, 1990, were $41,342,000 compared to $30,957,000 in the same period last year.

Net income for the quarter ended Sept. 30, 1990, was $1,705,000, up 55 percent from the $1,097,000 earned in the second quarter of fiscal 1990. Net income for the six months ended Sept. 30, 1990, was $2,891,000 compared to $1,922,000 in the first six months of fiscal 1990, an increase of 50 percent. Earnings per share for the second quarter were 17 cents compared to 13 cents in the same quarter of the prior year, an increase of 30 percent. Earnings per share for the six months ended Sept. 30, 1990, were 29 cents compared to 24 cents in the same period in fiscal 1990.

Growth in the September quarter was primarily due to the first full quarter of shipments of two Sega(R) Genesis(R) products introduced in June, and the shipments in September of a third Genesis title, Zany Golf(TM), and the first title for the Nintendo Entertainment System(R), Skate or Die(R) 2. EA's core computer software business showed year over year growth on the strength of new

16-bit titles and the bundling of PGA Tour(R) Golf(TM) on selected models of the IBM PS/2(R).

Trip Hawkins, president and CEO of Electronic Arts, said, "We are pleased with the strong initial results of Sega Genesis products and our first full quarter as a participant in the videogame market. These results, combined with renewed growth in the demand for recreation software on 16-bit computers, confirm our belief in our strategy to lead the 16-bit entertainment software market."

#90295p7657 10/22/1990 ~PR Newswire

HIGH POINT, NC (OCT. 22) PR NEWSWIRE - LADD Furniture, Inc. (NASDAQ-NMS: LADF) today reported net sales of $123.0 million for the three months ended September 29, 1990, down from $132.2 million in the year-earlier third quarter. Net earnings for the quarter declined to $1.0 million, or $.06 per share, from $2.9 million, or $.15 per share, in the same period of fiscal 1989.

For the nine months ended September 29, 1990, net sales rose to $398.1 million from $322.4 million a year earlier. The nine-month sales increase reflected LADD's acquisition of the former Maytag Furniture Group on July 7, 1989. Net earnings for the first nine months totaled $7.1 million, or $.38 per share, down from $15.6 million, or $.83 per share, in the comparable year-earlier period.

LADD chairman and chief executive officer Don A. Hunziker attributed the lower third quarter results to a continuing decline in furniture industry order rates, combined with increased promotional activity and aggressive inventory reduction efforts by the various LADD operating companies. "Given the very cautious outlook apparently shared by a majority of American consumers and substantial current uncertainties with regard to the U.S. budget deficit and Middle East situations," Hunziker said, "we anticipate a continuation of very competitive industry conditions and reduced order rates during the final quarter of 1990 and into the first part of 1991. In this kind of environment " he added, "LADD management will continue to focus heavily on cost cutting and inventory reduction and on capital projects aimed at improving manufacturing efficiency."

Vice chairman Richard R. Allen said third quarter profit margins were pressured by sluggish sales. "Intense competitive price discounting and promotion reduced both net sales and operating margins during the quarter, as

the various LADD operating companies responded to prevailing industry conditions," he said. "As a result, earnings before interest and taxes (EBIT) represented 4.3 percent of this year's third quarter net sales and 5.8 percent of nine-month net sales, down from year-earlier levels of 6.7 percent and 9.2 percent, respectively."

Vice chairman O. William Fenn, Jr. said LADD's operating companies reduced inventories by almost $6 million during the third quarter, bringing total inventories down to $92.2 million at the end of the period from $97.9 million at mid-year. "Until such time as basic business conditions begin to show signs of improvement," he said, "we will continue to work on bringing inventories into line with current sales volumes and order rates." Fenn added that LADD has been aggressively consolidating its manufacturing operations during 1990 and should accordingly benefit from strong operating leverage during the industry's next upward cycle. "However," he said, "these efforts have so far been masked by declining sales volumes and continuing margin pressure."

LADD chief financial officer Frederick L. Schuermann said the corporation's total debt was reduced by $8.2 million during the third quarter as a result of operating cash flows, the sale of an idle manufacturing plant and inventory reductions. Commenting on the debt reduction, Schuermann said, "As of September 29, 1990, LADD's long-term debt of $131.5 million represented 48.2 percent of total capitalization -- down from $205.0 million, or 59.9 percent of total capitalization, at the end of 1989's third quarter." Schuermann added that this debt reduction will result in further decline interest expense in the final quarter of 1990.

Headquartered in High Point, N.C., LADD is one of the largest U.S. residential furniture manufacturers, marketing its broad range of wood, upholstered and metal furniture to both residential and contract customers under the major brand names American Drew, American of Martinsville, Barclay, Brown Jordan, Clayton-Marcus, Daystrom, Design Horizons, Lea Industries and Pennsylvania House. LADD also owns and operates two support companies, Lea Lumber & Plywood and LADD Transportation and its stock is traded on the over-the-counter National Market System under the NASDAQ symbol LADF.

#90295p7667 10/22/1990 ~PR Newswire

KANSAS CITY, MO (OCT. 22) PR NEWSWIRE - Unitog Company (NASDAQ: UTOG) announced today that based on new information received by the company in the third quarter from its workers' compensation insurance carrier, Liberty Mutual Fire Insurance Company, it has revised its estimates of workers' compensation expense, This change in estimates will result in a pre-tax charge to earnings of approximately $1.6 million in the third quarter ending Oct. 28, 1990.

The charge represents the amount by which current estimates of workers' compensation expenses for injuries sustained in fiscal 1989 and 1990 and the first two quarters of fiscal 1991 exceed the amounts expensed for such periods. Of the total charge, approximately $300,000 relates to fiscal 1989 injuries, $625,000 relates to fiscal 1990 injuries and $675,000 relates to injuries sustained in the first two quarters of the current fiscal year. The charge to be made in the third quarter and the accruals expected to be made for the third and fourth quarters will reduce third and fourth quarter earnings and will increase the company's reserves to the maximum amount currently payable under the company's workers' compensation policies for fiscal 1990 and 1991.

The company also said it expects its third quarter results to be adversely

affected by reductions in margins related to the recent softness in the economy and associated cost increases. A mid-October price increase was implemented in the rental division.

As a result of the charge and reduction in margins, the company said it expected to show a small loss for the third quarter. Actual results for the quarter will be released in the middle of November.

THe company said that it expected fourth quarter earnings for fiscal 1991 to exceed fourth quarter earnings in fiscal 1990.

Unitog also announced that it has recently completed the acquisition of Sexton Industrial Uniforms, located near Huntsville, Ala. This operation serves the northern portion of Alabama and is expected to generate annual revenues of approximately $2.5 million.

Unitog Company, based in Kansas City, provides uniforms and other rental services to a variety of industries and sells custom-designed uniforms. The company manufactures substantially all the uniforms it rents or sells.

This change in estimates will result in a pre-tax charge to earnings of approximately $1.6 million in the third quarter ending Oct. 28, 1990.

The charge represents the amount by which current estimates of workers' compensation expenses for injuries sustained in fiscal 1989 and 1990 and the first two quarters of fiscal 1991 exceed the amounts expensed for such periods.

Of the total charge, approximately $300,000 relates to fiscal 1989 injuries, $625,000 relates to fiscal 1990 injuries and $675,000 relates to injuries sustained in the first two quarters of the current fiscal year.

The charge to be made in the third quarter and the accruals expected to be made for the third and fourth quarters will reduce third and fourth quarter earnings and will increase the company's reserves to the maximum amount currently payable under the company's workers' compensation policies for fiscal 1990 and 1991.

The company also said it expects its third quarter results to be adversely affected by reductions in margins related to the recent softness in the

economy and associated cost increases. A mid-October price increase was implemented in the rental division.

As a result of the charge and reduction in margins, the company said it expected to show a small loss for the third quarter. Actual results for the quarter will be released in the middle of November. The company said that it expected fourth quarter earnings for fiscal 1991 to exceed fourth quarter earnings in fiscal 1990.

Unitog also announced that it has recently completed the acquisition of Sexton Industrial Uniforms, located near Huntsville, Ala. This operation serves the northern portion of Alabama and is expected to generate annual revenues of approximately $2.5 million.

Unitog Company, based in Kansas City, provides uniforms and other rental services to a variety of industries and sells custom-designed uniforms. The company manufactures substantially all the uniforms it rents or sells.

LOS ANGELES (OCT. 22) PR NEWSWIRE - Early indications show the Mercury Tracer is on its way to becoming an outstanding success in both quality and sales, said a top Lincoln-Mercury executive.

"Tracer is more than holding its own against the competition in what is recognized as the most competitive segment in the automobile business today," said Ross Roberts, Ford vice president and general manager of Lincoln-Mercury Division.

"Our share of the subcompact car segment jumped 35 percent in September, which is a tremendous accomplishment considering sales in that segment were down 21 percent compared with 1989. And, we accomplished this despite the fact that production of the new Tracer was not up to full speed yet."

And although a swing toward smaller cars because of rising gasoline prices is not evident yet, Tracer sales and production figures indicate Lincoln-Mercury is perfectly positioned to meet consumer needs if demand does shift, Roberts told news media representatives here today.

In September, Lincoln-Mercury sold more Tracers than it did in the same period last year, the first time the all-new 1991 Tracer has surpassed the previous year's monthly sales mark since its June 1990 introduction. Coincidentally, last month's mark was the highest monthly showing for Tracer since September 1989.

In the Los Angeles area, Tracer sales in September were up 13 percent over heavily rebated, year-ago sales, Roberts noted. The Tracer registered its best retail sales month of 1990 in the Los Angeles area in September, he said.

Production is finally accelerating to the point where dealer inventory is sufficient to meet customer needs, he said.

"From all indications, October will be even better," Roberts said. "Our daily selling rate in September was nearly triple the rate in June."

Although a comprehensive study of Tracer quality will not be available until November, initial telephone surveys show the satisfaction levels among early buyers of the 1991 Tracer are equal to the preceding model, which had the highest quality of any Ford product built in North America, Roberts said.

Recently, Ford's Hermosillo (Mexico) Stamping and Assembly Plant, exclusive producer of the Tracer as well as some Ford Escort models, was accorded kudos by a team of professors from the Massachusetts Institute of Technology.

In the book "The Machine That Changed the World," a recently published five-year study of 80 automobile plants worldwide, Ford's Hermosillo plant was rated the best in quality.

"That's a high honor," Roberts said. "And when the quality results come in November, I'm confident Tracer will retain its high quality status, which is on a par with the best the world has to offer."

FOUNTAIN VALLEY, CA (OCT. 22) PR NEWSWIRE - Newport Corp. (NASDAQ-NMS: NEWP) today announced that earnings in the first quarter ended Oct. 31, 1990, will be below analysts' expectations and the level of the prior year's first three month performance.

Tom Galantowicz, Newport's president, said: "Uncertainties over the 1991 federal budget are resulting in customers delaying R&D- related equipment purchases until budget questions are resolved. Another factor influencing first quarter earnings is the sharp drop in equities markets which negatively impacts our marketable securities portfolio.

"We believe budget uncertainties will be resolved soon," Galantowicz concluded "with subsequent improvement in our domestic order rate. European sales in the first quarter are running at a strong pace over the comparable period of last year, helping make up for what we see as a temporary domestic market downturn."

Newport Corp. is the leading worldwide manufacturer and marketer of a comprehensive line of precision instruments, components and accessories for the laser and electro-optical and biomedical markets. Customers include Fortune 500 corporations, national research laboratories, government and educational institutions.

#90295p7677 10/22/1990 ~PR Newswire

ST. PAUL, MN (OCT. 22) PR NEWSWIRE - 3M (NYSE: MMM) today reported record sales and earnings for the third quarter and first nine months of 1990.

Net income for the three months ended Sept. 30 increased 9.4 percent to $336 million, or $1.52 a share. That compared with $307 million, or $1.37 a share, in the same quarter last year. Per-share earnings rose 10.9 percent. Sales for the quarter rose 11.6 percent to $3.343 billion.

For the first nine months, net income increased 6.4 percent to $1.013 billion, or $4.57 a share, up from $952 million, or $4.29 a share, in the same period last year. Sales rose 7.8 percent to $9.741 billion.

Allen F. Jacobson, chairman and chief executive officer, said results for the quarter benefited from continued strong international growth, weakening of the U.S. dollar and a lower effective tax rate.

3M's international unit volume rose 13 percent from the same quarter last year. This marked the company's 11th consecutive quarter of double-digit volume gains abroad. International markets accounted for 48 percent of 3M sales during the quarter.

The company estimates that currency effects increased third-quarter earnings by about $13 million, or 6 cents a share. This offset negative currency effects of essentially the same amount in the first half of this year. A lower tax rate also contributed about 6 cents a share to third-quarter earnings.

Domestically, 3M's unit volume increased three percent, faster than the growth of the U.S. economy. Growth was led by the company's Electro Products, TelComm Products, Pharmaceutical, and Dental Products, and Traffic and Personal Safety Products groups. 3M said it expects higher full-year sales and profits, but indicated that fourth-quarter results will be influenced by the sluggish U.S. economy.

"Our U.S. business began to feel the effects of the slowing U.S. economy in September," Jacobson said. "Our international volume growth remains good, but probably won't match the third quarter's 13 percent gain." He noted that, in

the fourth quarter of last year, 3M's international unit volume rose 16 percent, so comparisons are difficult.

On the other hand, fourth-quarter results will benefit from continued weakness of the U.S. dollar, a slightly lower tax rate and ongoing productivity-improvement efforts, he said.

The company's finances remain strong. As of Sept. 30, total debt was 27 percent of stockholders' equity, well below the average for U.S. companies. 3M's debt is rated triple-A, the highest rating.

MIAMI LAKES, FL (OCT. 22) PR NEWSWIRE - Culminating a year-long relationship which included a joint venture agreement, Oak Tree Construction Computers, Inc. (NASDAQ: AOAK) today announced the signing of a letter of intent to acquire 100 percent of the stock of First Security Funding, Inc., Fort Worth, Texas, a major national processor/funder of medical insurance receivables, in a stock and note transaction which places the principals of First Security in a control position, according to a joint statement by Irwin B. Stack, chairman of Oak Tree and D.R. Smith, president of First Security Funding. The acquisition is subject to a definitive contract which is scheduled to be signed within three weeks.

"Current annual processing contracts in hand exceed $200,000,000 in medical receivables," stated Smith, "however, we anticipate substantially increasing that volume within the first quarter of 1991 which should reflect in a significant return to profitability by the new Oak Tree," he concluded.

"Both firms bring to the table a variety of business, finance and computer talents that are specifically required for the growth of this business," stated Stack. In addition, several of the more productive dealer representatives of Oak Tree have already been assimilated into the First Security network, presenting a most formidable front line rapport with the medical community," he concluded.

Oak Tree, founded in Nashua, N.H., originally marketed its own line of computer hardware and software to the construction industry, primarily in New England. The severe decline of that industry led the company to abandon that direction and seek new business avenues.

#90295p7686 10/22/1990 ~PR Newswire

MIAMI (OCT. 22) PR NEWSWIRE - In celebration of 35 years of service to the United States, Lufthansa has organized a six-month U.S.A. Tour for the "oldest" member of its fleet. The German flag carrier will provide a glimpse of what passenger air travel was like 50 years ago on board Luftansa's vintage Junkers Ju52 (Registration: D-AQUI), nicknamed "Iron Annie" while it was based in Florida before Lufthansa bought it. The Ju52 has embarked on a six-month, 27-city tour which began in July 1990 and ends in January 1991.

The 1936 vintage aircraft crossed the Atlantic onboard the Soviet cargo plane Antonov and arrived in Montreal, Quebec on June 25. It was reassembled, checked and test flown before crossing the border for participation and display at the 38th Annual International Convention and Sport Aviation Exhibition at Oshkosh, Wis. from July 27 to Aug. 2.

After her American debut at Oshkosh, the Ju52 continues her journey visiting all of Lufthansa's 12 U.S.A. gateways where she will be available for public viewing.

At 62 feet in length, a wing span of 96 feet, and a height of 20 feet, the first models of the three-engine Junkers Ju52 were built in 1932. The plane type was one of the most popular European aircraft of its time, comparable to the American DC3. Because of a reputation for durability and reliability, the Ju went on to form the backbone of Lufthansa's fleet, and by 1940, Lufthansa owned over 80 Ju52s.

Put into service by the old Luft Hansa on April 10, 1936, the Ju52 D-AQUI has endured a number of lifestyles -- from commercial and military service in Norway, to passenger and freight transport in the jungles of South America, where it was badly mistreated, poorly maintained and abandoned in 1962 at the edge of Quito airport in Ecuador.

In late 1984, Lufthansa purchased the Ju52, which was then called "Iron Annie " from an American aviation enthusiast in Florida who had acquired her in 1975. After a 16-day, 10,000 mile North Atlantic crossing in winter, without benefit of cabin heating or de-icing equipment, the Ju52 was meticulously restored at the airline's maintenance base in Hamburg, West Germany. The restoration work, completed in 1986, took 18 months, and on April 6, 1986, the Ju52 made its second maiden-voyage -- this time under the official name "Berlin-Tempelhof."

Celebration of Lufthansa's 60th Anniversary in 1986, led the airline to establish a foundation whose mandate calls for the maintenance and up-keep of this special aircraft, which represents an exceptional period in the history of aviation. The Junkers Ju52 U.S.A. Tour is an example of Lufthansa's commitment to keep aviation history alive, and serves to commemorate 35 years of service to the United States which began June 5, 1955.

No visit to the United States would be complete without a visit to the state of Florida -- the Ju52's home for many years. Lufthansa's Ju52 will spend three weeks in Florida, where it can be seen at airports in Jacksonville, Orlando, Palm Beach, Boca Raton, Fort Lauderdale, Opa Locka, Miami, Tamiami, Marco Island, Tampa and Tallahassee. The Ju52 will be on static display for the general public and will also be made available as a community relations tool, by offering seats for short scenic flights to non-profit, cultural or community groups for fundraising purposes.

Lufthansa's 16-seater Ju52, one of only a handful remaining today of the 5,000 built, has logged 1,100 hours of flight time in four years of new life as "the oldest" airplane in the fleet. In contrast, Lufthansa's modern fleet of over 150 aircraft, averages under seven years of age.

#90295p7689 10/22/1990 ~PR Newswire

NEW YORK (OCT. 22) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP) expects revenues in 1990 to be more than $300 million, compared to 1989 revenues of $192 million, security analysts were told today.

Included in the 1990 projection is about $50 million additional revenue in the fourth quarter, which will result from Telesphere's recent acquisition of National Telephone Services (NTS).

Net income for the year is expected to be significantly above the $800,000 earned in 1989.

Harry Thompson, Telesphere's chairman, told analysts that the effects of the

NTS acquisition are already being felt. For example, NTS's long-distance traffic has been flowing over Telesphere's network for several months, which will significantly reduce costs. In addition, Telesphere has begun utilizing NTS's well-established operator centers, thus reducing the cost of operator-assisted calls. Both Telesphere and NTS have large shares of the operator services offered to the hospitality industry. Combined, they are expected to be the second- largest firm in this segment. Moreover, the combined companies should achieve increased profitability as corporate overhead is reduced.

"The company's continued growth in revenue and earnings over the last two years is a clear reflection of our strategy to sharply focus on three specific market segments," Thompson told analysts at a meeting held at the American Stock Exchange. "Telesphere is the market leader in providing programs through its interactive/900 system, is one of the two largest providers of long-distance services to the hospitality industry and has a growing share of the long-distance business for small companies."

About 48 percent of Telesphere's revenue comes from its interactive/900 services; 40 percent from serving the hospitality industry and about 12 percent from its network services.

Telesphere Communications Inc. operates a nationwide, state-of-the- art digital fiber optic network over which it provides long-distance, operator, interactive/900 and other enhanced telecommunications services.

CLEVELAND (OCT. 22) PR NEWSWIRE - Charter One Financial, Inc. (NASDAQ/NMS: COFI), holding company for The First Federal Savings Bank, today reported record net income for the third quarter of $5.43 million (77 cents per share), a 17 percent per share increase over last year, and a record $13.95 million ($1.96 per share) for the year-to-date.

Charles John Koch, president and chief executive officer, attributed the all-time high results to substantially improved core earnings that reflect the acquisition of Broadview Federal Savings Bank in the second quarter.

Earnings, net of gain on sales of securities, amounted to $0.67 per share for the quarter versus $0.39 per share a year ago, a 72 percent increase. In addition, after-tax gains on sale of securities decreased 60 percent and contributed $0.10 per share for the 1990 quarter compared with $0.27 per share in the comparable 1989 period.

Financial Highlights:
- 72 percent increase in core earnings over the 1989 quarter.
- 22 percent increase in net income to $5.4 million over the 1989 quarter.
- 55 percent increase in net interest income over the 1989 quarter.
- 58 percent increase in other income over the 1989 comparable period, including loan service, tax-deferred annuities and checking account fees.
- Seven percent increase in net yield on interest-earning assets to 2.67 percent from 2.50 percent in the second quarter of 1990.
- 15 percent increase in dividends in the last year.

"The consolidation of Broadview into The First Federal Savings Bank is essentially complete and we are pleased with the progress," Koch said. "With a full quarter behind us, we find that the high quality loan portfolio we acquired has yielded even better results than we originally expected."

He continued, "Although operating expenses are higher this year than in the 1989 third quarter, most of the increase is due to the acquisition of Broadview. The effects of consolidation should moderate operating expenses in the fourth quarter with further improvement appearing in the new year. Additionally, there were approximately $625,000 in nonrecurring costs in the third quarter associated with the acquisition." He added that First Federal's capital position exceeds all fully-phased in 1993 capital requirements.

Koch said, "Our loan portfolio remains strong, with over 80 percent of the total secured by residential mortgages. Unlike other geographic regions, consumer demand for loans in Ohio has not deteriorated.

The Ohio housing market continues to show steady appreciation because it is still valued at levels significantly below other regions." He added that assets classified as non-performing remained essentially unchanged during the third quarter, at a low 1.16 percent of the total.

NEW YORK (OCT. 22) PR NEWSWIRE - Restaurant Associates Corp., a major restaurant and foodservice company, is promoting three key executives, according to Max Pine, president and CEO.

Nick Valenti advances to executive vice president of Restaurant Associates Corp. and continues in his role as president of the RA Restaurant Group, consisting of 45 restaurants, and as a member of the executive committee.

Valenti will maintain his current management duties and will assume additional responsibility for Charlie Brown's and The Office restaurant chains. With 28 units, Charlie Brown's is New Jersey's dominant restaurant chain. Plans are also under way for the expansion of both Charlie Brown's and The Office, which currently has five units. Sales for the combined RA Restaurant Group and The Office and Charlie Brown's division will be in excess of $175 million.

Additionally, Pine announced that Phillip Ratner, president and CEO of RA's chain of Acapulco restaurants becomes executive vice president of Restaurant Associates Corp. and remains a member of the executive committee. Acapulco operates 50 Mexican dinner houses in California, including the recently acquired 10-unit El Paso Cantina chain which is being converted to the Acapulco concept. Sales for the two chains are approximately $85 million.

At the Restaurant Associates corporate office, the financial and accounting staff will report to Rich Stockinger, vice president-finance. Stockinger will assume additional responsibility for EDP and risk management and will become a member of the executive committee.

In other corporate developments, Jim Beltrame, executive vice president and chief financial officer of Restaurant Associates Corp., and Dan Andrus, president of Charlie Brown's and The Office, have resigned from the company to pursue other interests.

In accepting the resignations of Beltrame and Andrus, Pine noted the many contributions of both executives. Under Andrus' leadership since 1980, the Charlie Brown's chain grew from nine to 28 units. Beltrame had been the CFO for the past six years, playing a vital role in the growth of the company and its recent acquisition by Kyotaru Ltd.

"It has been my great pleasure to work with Jim and Dan over many years," said Pine. "Each has made an enormous contribution to Restaurant Associates and our future growth will reflect their achievements.

"Restaurant Associates presently operates 120 restaurants with nearly 40,000 seats in several key markets concentrated on the East and West coasts, with approximately $260 million in annual sales. In New York City, the company operates such prestigious and popular restaurants as The SeaGrill, American Festival Cafe, Mamma Leone's, Tropica, Trattoria and the round-the-clock Brasserie.

Through its Restaurant Services division, the company provides restaurant-quality dining in cultural institutions such as The American Museum of Natural History, The Metropolitan Museum of Art and Lincoln Center as well as for clients including the Chemical Bank World Headquarters, The United Nations and U.S. Trust.

LONDON (OCT. 22) PR NEWSWIRE - The Thomas Cook Group Limited and Vivre Travel Limited, a member company of The Saison Group of Japan, have signed an agreement in principle to operate a joint venture travel business in Japan covering both corporate and leisure travel. Vivre Travel is a major retailer of travel products with sales in excess of U.S.$350 million.

Saison Thomas Cook, the new joint venture company, is expected to begin operating next April after the signing of a definitive agreement scheduled for early 1991.

The Saison Group, established in 1940, has annual sales of more than U.S.$28 billion. Apart from travel, its diverse interests range from the retail industry -- including the Seibu department stores -- to real estate, credit, insurance, manufacturing, air transport and restaurants. The Group is the joint owner of the Inter-Continental Hotel chain with Scandinavian Airlines System (SAS), and the owner of Seiyo Continental Hotels.

The Thomas Cook Group, founded in 1841, is a global travel and financial services company based in the United Kingdom. A wholly owned subsidiary of Midland Bank plc, the Thomas Cook Group operates in 120 countries specializing in business and leisure travel, travelers cheques and foreign exchange. Annual sales exceed U.S.$20 billion.

#90295p7700 10/22/1990 ~PR Newswire

VALLEY FORGE, PA (OCT. 22) PR NEWSWIRE - NovaCare, Inc. (NASDAQ: NVCR) today announced results for the first quarter ended Sept. 30, 1990. Net revenues aggregated $31,557,000, an increase of 46 percent over net revenues for the same period a year ago. Gross profit for the quarter ended Sept. 30, 1990 increased by 41 percent to $11,747,000 or a 37 percent gross profit margin. Income from operations for the first quarter of fiscal 1991 totaled $6,122,000 a 58 percent increase over income from operations for the same period a year ago. As a percent of net revenues, income from operations increased from 18 percent to 19 percent. Net income for the three months ended Sept. 30, 1990 was a record $.28 per share compared with $.17 per share for the three months ended Sept. 30, 1989.

C. Arnold Renschler, president and chief operating officer stated that,

"Revenue growth and improved operating margins resulted from therapist recruiting performance and turnover reductions which continue to surpass company expectations, coupled with administrative cost controls. As expected, gross profit margins declined by 1 percent on a year-to-year basis because of somewhat lower productivity stemming from a very high influx of new hires." He further stated, "With the passing of our peak hiring period, productivity is returning to higher levels."

John H. Foster, chairman and CEO stated that, "The company is extremely well positioned for both the near and long-term. Proposed reductions in Medicare expenditures are expected to have minimal if any impact on our operations. After retiring our commercial debt, the company will have a very strong balance sheet with more than $35 million in cash items. The general economic slowdown is having a favorable impact on our ability to hire and retain therapists. And finally, demand for therapy services continues to grow as evidenced by increases in the number of open positions for which the company is seeking therapists."

NovaCare, Inc. is the largest provider of contract rehabilitation therapy services to the healthcare industry and the only provider of such services on a national basis.

SAN FRANCISCO (OCT. 22) PR NEWSWIRE - The U.S. Environmental Protection

Agency (EPA) has issued civil complaints with assessed penalties totaling $566,000 against eight facilities in Arizona and California for alleged violations of the reporting requirements of the Emergency Planning and Community Right-to-Know Act (EPCRA).

The complaints allege failure to report on 1987 and 1988 emissions of a variety of toxic chemicals, and assess penalties ranging from $210,000 to $34,000.

"Companies should not confuse the requirement to report total chemical emissions with other provisions of EPCRA that focus on emergency planning," said David P. Howekamp, director of the air and toxics division of EPA's western regional office.

"Companies that violate the law will be severely penalized and must suffer the financial consequences. The proposed penalties have been assessed against these eight facilities because they failed to estimate and report releases of toxics to the air, land and water," Howekamp added.

Following are the facilities cited, the products they manufacture, the penalty proposed and the chemicals they failed to report:

VLSI Technology Inc., San Jose, Calif., which manufactures semiconductors; proposed penalty of $210,000, for not reporting emissions of acetone, ethylene glycol, hydrogen fluoride, nitric acid, phosphoric acid, sodium hydroxide, sodium sulfate, sulfuric acid, and glycol ethers.

Sun Land Beef Co., Tolleson, Ariz., which manufactures meat products; proposed penalty of $84,000, for not reporting emissions of ammonia and sodium hydroxide.

Novacap Inc., Burbank, Calif., which manufactures ceramic chips; proposed penalty, $68,000 for not reporting emissions of 1,1,1-trichloro-ethane and trichloroethylene.

Steris Laboratories, Glendale, Ariz., which manufactures pharmaceuticals; proposed penalty of $68,000 for not reporting emissions of sodium hydroxide and hydrochloric acid.

Steris Laboratories, Phoenix, Ariz., which manufactures pharmaceuticals; proposed penalty $34,000, for not reporting emissions of sodium hydroxide.
Silicon General, Garden Grove, Calif., which manufactures silicon wafers; proposed penalty of $34,000, for not reporting emissions of xylene.

Carnation Co., Phoenix, Ariz., which manufactures ice cream and juices; proposed penalty of $34,000, for not reporting emissions of ammonia.
Sundstrand Corp., Phoenix, Ariz., which manufactures aerospace and electronics equipment; proposed penalty of $34,000, for not reporting emissions of

1,1,2-trichloro-1,2,2-tri-fluoro-ethane.

#90295p7704 10/22/1990 ~PR Newswire

GREENVILLE, SC (OCT. 22) PR NEWSWIRE - First Federal Savings and Loan Association of South Carolina (The First) (NASDAQ-NMS: FTSC) today reported record first quarter earnings since becoming a public financial institution in 1983.

Net earnings for the first quarter were $1.7 million or $.36 per share, compared to a net loss of $356,000, or $.07 per share for the same period last year.

"Improved net interest income and lower general and administrative expenses were the primary factors which contributed to improved earnings," stated H. Ray Davis, Chairman of the Board and Chief Executive Officer.

The interest rate spread increased from 2.32 percent at September 30, 1989 to 2.83 percent at September 30, 1990, which resulted in interest income of $13.9 million for the quarter, up from $10.8 million one year ago.

A generally soft economy and concerns over the Mid-East crisis are having a major impact on mortgage lending volume while consumer and commercial activity remains fairly constant. Combined consumer, commercial and mortgage loan origination volume amounted to $214.8 million for the current period, compared to $200.8 million last year.

"Asset quality continues to be one of our major priorities," stated Davis. "Our non-performing assets decreased slightly from $48.6 million at September 30, 1989 to $48.2 million at September 30, 1990, or 2.10 percent of total assets with a goal of one percent," Davis further added.

During the quarter, the Mt. Pleasant office was relocated to a new facility with full retail banking and mortgage loan services plus four drive-up banking lanes and the Association's first drive-up 24-hour (ATM) Automatic Teller Machine. In addition, there is 1,500 square feet of lease space available in the new classic Williamsburg style building.

At quarter end, assets were $2.291 billion with stockholders' equity of $97.2 million or $20.59 book value per share and tangible net worth (less goodwill) of $65.2 million or $13.80 book value per share. With an increase in stockholders' equity of $6.2 million since September 30, 1989, The First continues to meet the new capital requirements.

#90295p7705 10/22/1990 ~PR Newswire
LUMBERTON, NC (OCT. 22) PR NEWSWIRE - Southern National Corporation's (NASDAQ-NMS: SNAT) long and storied history added a new chapter today with the naming of L. Glenn Orr, Jr. to the company's top post. Orr, 50, becomes the second chairman in the corporation's history,
replacing Hector MacLean, who is stepping down after 35 years as the company's leading executive.

The board of directors approved Orr's nomination during its regular October meeting. Orr will assume MacLean's titles of chairman, president and chief executive officer of the corporation and will continue to operate as chairman and chief executive officer of the company's chief subsidiary, Southern National Bank of North Carolina. MacLean was named chairman emeritus of the corporation.

"I firmly believe the future for Southern National is bright and its potential unlimited," Orr said. "This company realized significant growth and earnings during the 1980s and I wouldn't expect anything less during the next decade."

The Lumberton, N.C.-based company has grown six-fold since 1980 when assets were $550 million. Today, with $3.4 billion in assets, Southern National is the sixth largest bank holding company in North Carolina and the fifth largest bank holding company in South Carolina.

Established in 1897 as the Bank of Lumberton, Southern National was co-founded by Hector MacLean's father Angus McLean, a former North Carolina governor. Hector MacLean took the helm in 1955 when he was named chairman of Southern National Bank of North Carolina. He was named chairman of Southern National Corporation when it was formed as a bank holding company in 1969.

Orr joined Southern National in 1982 through the merger of The Forsyth Bank and Trust Company in Winston-Salem, a bank he had served as president and chief executive officer since its beginning in 1973. Three years later, Orr was promoted to the top post at Southern National Bank of North Carolina, becoming the seventh chief executive officer in the bank's history.

"We knew when we bought Forsyth Bank that Southern National was getting one of the top bankers in this area of the country," MacLean said. "I have complete faith that Glenn is the right person to lead this company into the next century."

Orr, a former president of the North Carolina Bankers Association, is a graduate of Wofford College in Spartanburg, S.C., his native town. He holds a

Master of Business Administration degree from the University of South Carolina at Columbia.

With 25 years banking experience, Orr started his career with Wachovia Bank & Trust Company in Winston-Salem in 1965 and worked his way to vice president before leaving in 1972 to become president of Community Bank in Greenville, S.C. In 1973, Orr moved back to Winston-Salem, this time as president of Forsyth Bank and Trust Company.

Currently, Orr is a member of the Government Relations Council of the American Bankers Association and serves as chairman of the Legislative Affairs Committee for the North Carolina Bankers Association. He is a board member of the Lineberger Cancer Research Center at the University of North Carolina at Chapel Hill and sits on the Board of Trustees of Wake Forest University in Winston-Salem. He is actively involved as a member of the executive board of the Cape Fear Council of the Boy Scouts of America.

Orr is married to the former Ruthlee Phillips of Charlotte. They have three children: Mollie, Laney III and Jenny. Orr is the son of Mildred R. Orr of Spartanburg and the late Laney G. Orr.

#90295p7706 10/22/1990 ~PR Newswire

SEATTLE (OCT. 22) PR NEWSWIRE - Airborne Freight Corp. (NYSE: ABF), which operates under the trade name Airborne Express, today said earnings and revenues increased substantially for the third quarter ending Sept. 30, 1990.

Revenues rose 27 percent to $302,248,000 from $237,501,000 in the same quarter in 1989. Net earnings available to common shareholders increased 87 percent to $9,917,000, or 54 cents per share, compared to $5,291,000, or 37 cents per share, for the same period last year.

For the nine-month period, earnings available to common shareholders were $25,804,000, or $1.51 per share, a 109 percent gain from the $12,326,000, or 87 cents, reported for the first nine months of 1989. Nine-month revenues increased 26 percent to $864,902,000, compared to $687,878,000 for the same period last year.

"The gains in revenue and earnings are attributable to a continuation of the strong domestic growth we have experienced, improving international margins, and productivity gains," said Roy Liljebeck, chief financial officer.

Domestic shipments for the quarter increased 35 percent to 22,164,000, and for

the nine months domestic shipments reflected a 37 percent gain to 63,225,000. Domestic revenue growth for the quarter and nine months increased 32 percent in both periods.

On the international side, shipments for the quarter increased 17 percent to 580,000, with the small package Express component increasing 22 percent.

While international revenue grew at a more modest rate of seven percent to $48,189,000, the gross margin on international traffic increased 18 percent as a result of the stronger growth rate in the higher yielding Express area. Liljebeck noted, however, that the company's performance is being impacted by escalating fuel prices resulting from the Persian Gulf crisis.

"We're facing the same problems that all carriers have experienced. The average price paid for jet fuel in the third quarter was 14-1/2 cents higher than in the same quarter of 1989, and had the effect of lowering this year's quarterly net earnings by eight cents per share. Further, the jet fuel price as we begin the fourth quarter is approximately 60 percent higher than the average for the third quarter," he said.

As a result, Airborne has announced that, beginning Nov. 1, it will assess all customers a fuel surcharge of four percent on domestic traffic and five percent on international express shipments.

#90295p7719 10/22/1990 ~PR Newswire

CHICAGO (OCT. 22) PR NEWSWIRE - Tribune Company (NYSE: TRB) net income for the third quarter was down 39 percent to $38.2 million from $62.7 million. The decline primarily reflected operating losses at Quebec and Ontario Paper Company and the New York Daily News. Primary net income per share was $.52, down 36 percent from $.81 in the same period last year.

For the first three quarters, net income was down 27 percent to $127.9 million from $174.8 million. On a per share basis, primary net income for the first three quarters was $1.73, a 24 percent decline from $2.27 last year.

Revenues were essentially unchanged for the quarter at $588 million and were up two percent for the first three quarters to $1.8 billion. Operating profit was down 33 percent for the quarter and 25 percent for the year to date to $72.7 million and $236.7 million, respectively.

Newspaper Publishing

Newspaper publishing operating profit declined 15 percent for the quarter to $48.4 million from $56.7 million, primarily due to increased operating losses at the Daily News. The News' losses resulted from declining revenues due to

weak economic conditions in the New York market and from the burdensome cost structure that is the subject of continuing labor negotiations. Operating profit for the remainder of the newspaper group was down slightly for the quarter.

Third quarter newspaper revenues were unchanged at $376 million. Advertising revenues were down two percent to $275 million. Retail and classified advertising revenues declined two percent and six percent, respectively, while general advertising revenues rose six percent. Circulation and other revenues were up six percent.

Broadcasting and Entertainment
Operating profit for the broadcasting and entertainment group declined nine percent for the quarter to $37.9 million from $41.6 million. A slight improvement in both television and radio did not offset lower entertainment results.

Broadcasting and entertainment revenues for the quarter rose six percent to $172 million. Television revenues were up 11 percent, radio up one percent and entertainment down three percent.

Newsprint Operations
For the third quarter, Q&O reported an operating loss of $8.3 million versus an operating profit of $15.2 million last year. The loss primarily was due to strikes at the company's two newsprint mills. During the quarter, strikes by the Canadian Paperworkers Union shut down the Quebec newsprint mill for 31 days and the Ontario mill for 47 days. On Sept. 11, Q&O reached contract agreements with unions at the Quebec newsprint mill. The strike continues at the Ontario mill.

Third quarter revenues for the newsprint group were down 45 percent to $59 million on a 46 percent decline in newsprint tons shipped.

Dividends on the preferred stock net of related tax benefits were $4.3 million for the quarter. After deducting these preferred dividends, net income attributable to common shares was $33.9 million, down 42 percent from last year.

Tribune Company is a diversified media company engaged in newspaper publishing broadcasting and entertainment production and newsprint manufacturing.

HOUSTON (OCT. 22) PR NEWSWIRE - Conquest Exploration Company (AMEX: CQX)

today announced the signing of a definitive merger agreement under which Conquest Exploration will be acquired by American Exploration Company (AMEX: AX). The terms of the agreement call for American to pay $1.90 per share in cash for approximately 12 percent of Conquest's common stock and to exchange 0.44 shares of American Exploration's common stock for each remaining share of Conquest's common stock. Currently Conquest has 44,468,814 shares of common stock outstanding.

In addition, American Exploration has entered into an agreement with The Dyson-Kissner-Moran Corporation (DKM) pursuant to which American Exploration will purchase five million shares of Conquest's voting preferred stock held by DKM for $21 million. The Conquest preferred held by DKM, which was issued in 1986, has a liquidation preference of $23.75 million and constitutes all of the outstanding preferred stock of Conquest. DKM has also agreed to vote its approximately 10,317,400 shares of Conquest common stock, and its preferred stock, in favor of the acquisition. DKM's interest represent approximately 30 percent of Conquest's outstanding voting stock. As part of the transaction, American Exploration will also assume approximately $55 million of Conquest's debt.

Based on American Exploration's closing stock price of $4.25 per share on Friday, Oct. 19, the transaction has a value of approximately $160 million. The acquisition is subject to approval by the shareholders of both companies. The meetings will occur promptly after definitive proxy materials have been approved by the SEC. The transaction is also subject to certain regulatory approvals and the satisfaction of other customary conditions.

American Exploration is an independent oil and gas company engaged in the acquisition and further development of oil and gas properties and in the production of oil and gas. When combined with the recent Hershey Oil acquisition, American Exploration's proved reserves at year-end 1989 were 9.9 million barrels of crude oil and 184 Bcf of natural gas or approximately 244 Bcf equivalents. In addition, American Exploration has 84,700 net undeveloped acres in North America.

At year-end 1989, Conquest Exploration reported proved reserves of 6.4 million barrels of crude oil and 112.2 Bcf of natural gas or approximately 151 Bcf equivalents. Conquest also had approximately 222,300 net undeveloped acres in North America and an aggregate of approximately 3,666,000 net undeveloped acres in three international concessions.

ATLANTA (OCT. 22) PR NEWSWIRE - Representatives of the U.S. Environmental Protection Agency, the Florida Department of Environmental Regulation (FDER)

and the U.S. Navy will sign federal facility agreements Oct. 23 in Tallahassee Fla. which establish procedures for the investigation and remediation of past hazardous waste disposal sites at Cecil Field Naval Air Station in Jacksonville, Jacksonville Naval Air Station and the Naval Air Station in Pensacola.

The Navy will spend more than $100 million for studies and cleanup at the facilities.

Federal facility agreements are three-party agreements negotiated under Section 120 of the Comprehensive Environmental Response, Compensation and Liability Act (Superfund) for investigation and remediation of hazardous substances at federal facilities.

Signing the agreements leading to cleanup of contaminated sites at the three facilities will be Jacqueline E. Schafer, assistant secretary of the Navy (Installations and Environment), Greer C. Tidwell, EPA regional administrator, and Dale Twachtmann, secretary of the FDER.

Naval aircraft and engines are maintained and repaired at the air stations. Site contaminants include waste oil, solvents, paints and spilled fuel.

#90295p7724 10/22/1990 ~PR Newswire

FREMONT, MICH. (OCT. 22) PR NEWSWIRE - Gerber Products Company (NYSE: GEB) today announced (unaudited) record sales and earnings for the second fiscal quarter and six months ended Sept. 30, 1990. Earnings from continuing operations for the quarter increased 16.9 percent to $31,720,000, or $.84 per share, from the $27,128,000 or $.72 per share for the second quarter of the prior year.

Sales for the quarter rose 1.0 percent to $293,580,000 from $290,651,000 for the comparable quarter last year.

For the six months, earnings from continuing operations increased 17.1 percent to $62,987,000, or $1.67 per share, from $53,787,000, or $1.42 per share. Sales for the six months rose 6.3 percent to $589,486,000 compared with $554,538,000 reported for the first six months of the prior fiscal year.

In the second quarter, Gerber Products Division operating profits increased by 9.3 percent on slightly higher sales. The operating profit improvement resulted from enhanced margins and ongoing cost control programs, offset in

part by lower food volume.

Apparel Group sales and operating income declined slightly as strong sales and earnings reported by Gerber Childrenswear and Buster Brown were more than offset by lower sales and operating losses from the company's outerwear operation. Steps taken during the past year to help Weather Tamer regain its position as a leading provider of children's outerwear have achieved only limited success to date, due in part to an extremely weak retail outerwear market.

In the company's remaining operations, significant earnings advancement was reported by Gerber Life, while International's operating income was comparable to last year.

Al Piergallini, chairman, president, and chief executive officer, said, "Our continuing efforts to improve margins and control expenses has enabled the Gerber Products Company to achieve record earnings in spite of a 6-percent volume decline in baby foods during the second quarter. Continued productivity improvements and expense containment, along with anticipated increases in baby food volume in the second half of the year, are expected to contribute to another record year for our company."

SANFORD, N.C. (OCT. 22) PR NEWSWIRE - TRION, INC. (NASDAQ-NMS: TRON) announced third quarter and nine months results as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	1990	1989	1990	1989
Sales	$6,573,000	$9,183,000	$27,279,000	$31,158,000
Net Income (Loss)	$ (844,000)	$ 101,000	$(1,250,000)	$ 1,345,000
Net Income (Loss) Per Share	$ (.14)	$ .02	$ (.20)	$ .22

Hugh E. Carr, President, said "The low shipment volume caused by deteriorating economic conditions, quality problems with appliance models made in the People's Republic of China and new product start-up expenses were the principal causes of the net losses. Although we cannot predict when economic conditions will improve, warranty returns are slowing and major new product investments are behind us."

Trion specializes in the design, manufacture and sale of indoor air cleaning equipment.

#90295p7726 10/22/1990 ~PR Newswire

LOS ANGELES (OCT. 22) PR NEWSWIRE - ARCO (NYSE: ARC) today reported 1990 third quarter net income of $462 million, or $2.79 per share, compared with $379 million, or $2.19 per share, for the third quarter of 1989.

The 1990 third quarter results include approximately $80 million in net after-tax gains resulting from a settlement with SONAT related to an offshore accident and the sale of ARCO's Norwegian assets, partially offset by charges for future environmental expenditures, the settlement with the State of Alaska over major royalty issues, and other charges. Excluding these special gains and charges, ARCO's earnings would have been $382 million, essentially flat compared with last year.

For the first nine months of 1990, ARCO's net income was $1.45 billion, or $8.70 per share. In the first nine months of 1989, ARCO had net income of $1.55 billion, or $8.87 per share.

Return of ARCO stockholders' equity for the past 12 months was 27.1 percent.

Lodwrick M. Cook, ARCO chairman and chief executive officer, said: "The third quarter reflects the impacts of the rise in crude oil prices resulting from Iraq's invasion of Kuwait and the subsequent loss of a significant amount of crude oil and refined product supply from world markets.

"In light of this uncertainty, ARCO made every effort to moderate prices to our dealers. In response to President Bush's appeal, we froze gasoline prices for two weeks and promised not to increase the wholesale price of gasoline beyond increases that occur in our refineries' crude oil costs. ARCO continues to be the low price leader.

"We are hopeful that the Middle East crisis will end soon, and peacefully, and that crude oil markets can return to normal."

ARCO's worldwide oil and gas exploration and production operations earned $396 million after tax in the 1990 third quarter, up from $188 million in the 1989 third quarter.

The average price for ARCO's domestic crude oil in the quarter was $16.89 per barrel, compared with $12.97 per barrel in last year's third quarter. Average domestic natural gas prices were $1.44 per thousand cubic feet versus $1.52 per thousand cubic feet in the 1989 period.

ARCO's worldwide production of crude oil and natural gas liquids averaged 684,800 barrels per day in the 1990 third quarter, down from 713,700 barrels

per day in 1989's third quarter. The decline was caused primarily by reduced production in Alaska as a result of the production payback associated with equity redetermination for the Kuparuk River field, scheduled field and pipeline maintenance, and natural field decline. In response to the president's request for increased domestic oil production, ARCO has announced it is expediting its well stimulation program to accelerate oil production from the Prudhoe Bay Field in Alaska.

#90295p7727 10/22/1990 ~PR Newswire

MELVILLE, N.Y. (OCT. 22) PR NEWSWIRE - For the quarter ended Sept. 30, 1990, the Allen Group Inc. (NYSE: ALN) reported earnings of 35 cents per common share -- a record for earnings in any third quarter. This is compared to 15 cents per common share for the same period last year.

Philip Wm. Colburn, chairman and chief executive officer of Allen, said, "All but one of our divisions recorded increases in both sales and earnings as compared to the third quarter of last year. The company also completed three small transactions during the quarter which broaden our participation in three of our existing business areas."

The results of the 50 percent partnership with Handy & Harman in the automotive aftermarket heat transfer business (GO/DAN Industries) are being accounted for on the equity basis of accounting. Therefore, GO/DAN's sales are not included in Allen's reported sales. As a result, sales for the quarter were 15 percent lower than in the third quarter of last year, wile net income rose to 5.3 percent of sales from 2.5 percent.

Earnings from continuing operations for the first nine months of 1990 were $1.22 per common share, more than double the earnings of $.59 per common share from continuing operations for the same period in 1989.

The Allen Group is a manufacturer and marketer of automotive products, including automotive test equipment, automated manufacturing equipment, truck components, and mobile communications antennas and accessories.

(A) -- In 1989 the company sold its specialty rubber products business resulting in this gain.

(B) -- The Federal District Court in San Francisco issued a final judgment on Jan. 19, 1990, that certain heavy duty truck radiators manufactured by the G&O Manufacturing Company division of the company willfully infringed a patent held by Modine Manufacturing Company and awarded Modine approximately $17.2 million in damages including prejudgment interest. The company has appealed this judgment to the Federal Circuit Court in Washington, but no decision on the appeal has been rendered. The company has determined that it is not possible, at this time, to estimate the amount of damages, if any, that may ultimately be incurred; accordingly, no provision has been made in its consolidated financial statements with respect to this contingent liability.

SUGAR LAND, TX (OCT. 22) PR NEWSWIRE - BMC Software, Inc. (NASDAQ: BMCS) today reported revenues of $31,503,000 for the second quarter of its 1991 fiscal year ending March 31, 1991, a 50 percent increase over revenues of $21,049,000 for the same period in fiscal 1990. Net income increased 55

percent to $6,953,000 ($.28 per share) compared to $4,484,000 ($.18 per share) for the same quarter in fiscal 1990.

For the six months ended Sept. 30, 1990, revenues increased 50 percent to $58,505,000 from $39,084,000 for the same period last year. Net income for the six months ended Sept. 30, 1990, rose 54 percent to $12,902,000 ($.52 per share) compared to $8,351,000 ($.34 per share) for the comparable period last year.

"Worldwide demand for both our IMS and DB2 data base products continues to be strong," said Max Watson, president and chief executive officer. "Customers realize that they need a vendor with products that can span multiple strategic mainframe data base systems. BMC is unique in the position of supporting all of IBM's strategic data bases."

North American license revenues for the second quarter increased to $11,181,000, up 44 percent over $7,777,000 for the second quarter of fiscal 1990. International license revenues were $9,508,000 for the second quarter, a 44 percent increase from the fiscal 1990 second quarter. During the second quarter, BMC announced the general availability of Recovery Plus and introduced a new version of 3270 SuperOptimizer(R)/VM.

BMC Software, Inc., an international company headquartered in the Houston suburb of Sugar Land, develops, markets and supports systems software products to enhance IBM's data base management and data communication systems, principally IMS, DB2 and CICS.

BMC currently markets a total of 42 products to customers in 42 markets. The firm's international subsidiaries are located in Melbourne, Australia; Copenhagen, Denmark; Camberley, England; Paris, France; Milan, Italy; Tokyo, Japan; Madrid, Spain, and Frankfurt, Germany. BMC is represented by independent agents in Brazil, South Korea, and Yugoslavia.

NOTE: IBM is a registered trademark of International Business Machines Corp. DB2 is a trademark of IBM Corp.

#90295p7739 10/22/1990 ~PR Newswire

LIVINGSTON, NJ (OCT. 22) PR NEWSWIRE - The Howard Savings Bank (NASDAQ: HWRD) today reported a loss of $109 million, or $7.59 per share, for the third quarter of this year, compared to 1989 third quarter earnings of $6 million, or $.42 per share.

For the first nine months of 1990, the Howard posted a net loss of $142.2 million, or $9.90 per share, compared to net income of $19.2 million, or $1.33 per share for the same period in 1989.

William P. Tuggle III, who joined the Howard as chairman and chief executive officer August 13 of this year, attributed the third quarter loss primarily to a $100 million addition to the bank's allowance for loan and lease losses in the quarter. He said that this provision was a "prudent response to deteriorating real estate markets" and "reflects an added allowance for previously identified problem loans."

Other factors which adversely affected the bank's third quarter results were a decline in net interest income as a consequence of a higher level of non-performing loans, an increase in other expenses largely relating to real estate workouts, and losses on real estate development properties.

Non-performing assets were $653.3 million, or 13.6 percent of total assets, at Sept. 30, 1990, an increase of $109.8 million since June 30 of this year. The bank's allowance for loan losses was $193.9 million at the end of the third quarter of 1990, compared with $122.6 million at June 30 of this year and $84.9 million at year-end 1989.

"Our main goal is to restore the bank's non-earning assets to performing status," Tuggle said. "In addition, we are concentrating on the reduction of expenses and increased productivity," he added.

Since Jan. 1 of this year the bank has reduced its work force by 14.6 percent through early retirement, job elimination and attrition, Tuggle said. He noted that this, together with other expense cuts and productivity gains that have been instituted, will result in an estimated annual savings of approximately $10 million.

In May, the bank reported that it had entered into a memorandum of understanding with its regulators. Consistent with that memorandum of understanding, the bank has submitted a capital plan for regulatory approval. The capital plan provides for the bank to meet capital ratios targeted in the memorandum of understanding by downsizing the bank, reducing expenses and resolving problem assets.

Tuggle said that a strategy is being developed which includes selling branches and cutting costs to meet the provisions of the capital plan. That strategy contemplates building on the Howard's traditional, historic strengths as a financial institution directed toward consumer banking.

At the end of the third quarter, the bank's primary capital ratio was 6.49 percent which exceeds the regulatory minimum. The memorandum of understanding also provides that the Howard will take steps so that its primary capital ratio will be at least 7.0 percent at Dec. 31, 1990 and at least 7.5 percent after Dec. 31, 1991.

Shareholders' equity was approximately $144.1 million, or $10.03 per share, at the end of the third quarter. The bank's total assets were $4.8 billion at Sept. 30, 1990, down 5 percent from a year ago. Deposits were $4.5 billion at both Sept. 30, 1990 and Sept. 30, 1989.

GREENWICH, CT (OCT. 22) PR NEWSWIRE - The Pittston Company (NYSE: PCO) today reported third quarter net income of $26.4 million or 71 cents per share, significantly greater than the strike-impacted third quarter 1989 net income of $3.1 million or 8 cents per share. Earnings for the year-to-date totalled $35.6 miilion compared with $22.6 million for the first nine months of 1989. For the two calendar quarters of operations this year since the end of the coal strike, net income totalled $45.7 million or $1.23 per share, as improving efficiencies and competitive positioning at each of Pittston's businesses reinforced the movement to higher corporate earnings that commenced in March.

Paul W. Douglas, chairman and chief executive officer, said he was pleased with the operating performance of each of the company's four business units, all of which improved further on the good results achieved in the previous quarter. Douglas made the following additional comments concerning third quarter operations:

A. Coal Coal operating earnings amounted to $14.4 million in the third quarter compared with $13.3 million in the second quarter. Third quarter

earnings were adversely impacted by about $1.8 million as a result of a short-term downward pricing adjustment, which ended Oct. 1, under the provisions of a long-term utility contract.

The Pyxis Coal Group achieved excellent operating results, while the Pittston Coal Group continued to benefit from the strong relationship that has developed with both the leadership of the UMWA and the company's UMWA employees as the provisions of the new labor agreement are being progressively implemented.

While the long-term fundamentals of coal markets both here and abroad continue to improve, with expanded opportunities arising from the higher price of oil and the assumed implementation of proposed acid rain legislation, near term pricing is weak reflecting higher than desired utility stockpiles. Coal sales in the third quarter amounted to 4.5 million tons including 2.0 million tons of metallurgical coal sold in the overseas market. Coal production for the quarter totalled 4.0 million tons.

B. Air Freight

Third quarter operating profits at Burlington Air Express totalled $9.7 million reflecting modest real improvement compared with third quarter 1989 earnings of $9.2 million, and planned seasonal growth compared to second quarter 1990 earnings of $5.6 million, all despite extraordinary increases in jet fuel costs following the Persian Gulf crisis. Burlington applied a fuel surcharge to its North American air freight pricing in late August and has recovered most, but not all, of the increases in jet fuel costs to date.

Burlington's earnings improvement primarily reflects the benefits of service and productivity enhancements and tight cost controls. Load factors on Burlington's controlled air lift were at record levels in the third quarter and benefitted from density gains and oeprating improvements at the company's hub in Fort Wayne, Ind.

Burlington's international growth continued with the establishment of operations in Kuala Lumpur and Penang, Malaysia, and with the completion of a joint venture in Taiwan. Revenues from international transactions increased 20 percent compared to the third quarter of 1989. Revenues from normal air freight activities in the United States also increased, although special air charter activities were substantially below year-earlier levels, and Burlington's ocean freight business was divested at the beginning of 1990.

CHERRY HILL, NJ (OCT. 22) PR NEWSWIRE - SAI Group Inc. (OTC) today announced the postponement of its special meeting of shareholders scheduled to be held

on Thursday, Oct. 25.

The company said the postponement was caused by continuing delays in processing the proxy materials to be furnished to shareholders for the special meeting at which the shareholders will consider the proposed merger of the company into Proteq International Marketing B.V. Because of the postponement of the special meeting, a new record date for the determination of shareholders entitled to notice of, and to vote at, the special meeting must also be set.

The company said it hopes the special meeting can be rescheduled in November and it will announce the date of the meeting and the record date as soon as it is in a position to mail proxy materials to its shareholders.

FAIRFIELD, N.J. (OCT. 22) PR NEWSWIRE - A Texas subsidiary of Ogden Environmental Services, Inc. (OES), a wholly owned subsidiary of Ogden Projects, Inc. (OPI) (NYSE: OPI), has entered into an agreement and plan of merger with American Envirotech, Inc. (AEI), a Houston, Texas-based corporation which is developing a project in Houston to destroy hazardous waste through high-temperature incineration. Financial details of the agreement have not been disclosed.

AEI has been issued an initial draft RCRA (Resource Conservation and Recovery Act) Part B permit by the Texas Water Commission to build and operate a hazardous waste disposal facility on property owned by AEI on the Houston Ship Channel. OES management and environmental specialists will assist AEI management in the final permitting process for the proposed facility.

OES will bring its expertise in the safe handling and management of hazardous and industrial wastes to bear on the construction and operations of the facility, which will utilize proven rotary kiln technology with advanced pollution control equipment to destroy RCRA liquid, solid and sludge wastes from industrial generators.

According to Brian Delle Donne, president of OES, the facility will be built at an estimated construction cost of $60 million, and could be operational by 1993, depending on the timing for issuance of final state and local permits. "This facility will add approximately 155,000 tons per year of badly needed hazardous waste disposal capacity to serve Harris county and the Texas market " said Delle Donne.

Headquartered in San Diego, Calif., OES is a leading provider of hazardous waste services to government and industry in the remediation of contaminated

sites utilizing highly advanced thermal treatment technology. OPI, through its subsidiary, Ogden Martin Systems, Inc., is the nation's leading builder and operator of solid waste-to-energy facilities serving counties and municipalities nationwide. OPI is 85.6 percent owned by Ogden Corporation.

Headquartered in New York, Ogden Corporation (NYSE: OG) is a diversified services company which also has major subsidiaries engaged in the provision of energy and environmental consulting and provides a wide range of services to the federal government. In other service activities, Ogden Entertainment Services is a leader in the management of sports and entertainment centers and the promotion of live entertainment events, and Ogden's Aviation Services division is a leading international provider of support services to the airline industry.

MONTVALE, NJ (OCT. 22) PR NEWSWIRE - Datascope Corp. (NASDAQ: DSCP) today announced receipt of FDA approval for its MICROSSR over-the-wire catheter for coronary angioplasty (PTCA). The company also announced that it has filed a Pre-Market Approval (PMA) supplement with the FDA to seek approval for its MICROSS-SLTM, a new state-of-the- art, over-the-wire catheter.

The company also said that the PMA application for its INTEGRATM catheter is scheduled to be presented to an FDA Panel meeting on Monday, Oct. 29, 1990. Assuming a favorable panel recommendation and no extraordinary delay in receiving FDA approval, the company would expect to begin marketing the INTEGRA in the United States in early calendar 1991.

The company noted that the INTEGRA offers functional advantages of both types of currently available catheters, having the ultra low profile of the fixed-wire catheter and the freely rotatable guidewire of the over-the-wire catheter. As such, the company believes the INTEGRA gives Datascope a natural market entry opportunity in the treatment of more demanding clinical problems in PTCA, an estimated $60 million market segment presently served by fixed-wire catheters.

Since PMA supplement approval generally takes less than six months, the company expects its MICROSS-SL to be on the market not long after the INTEGRA. The combination of the MICROSS-SL and INTEGRA catheters will give Datascope access to the entire estimated $400 million PTCA market.

Datascope Corp. is a manufacturer of proprietary products for clinical health care markets in interventional cardiology, anesthesiology, and cardiovascular and vascular surgery.

#90295p7767 10/22/1990 ~PR Newswire

GREENSBORO, N.C. (OCT. 22) PR NEWSWIRE - Fieldcrest Cannon, Inc. (NYSE: FLD) today announced sales and earnings for the third quarter of 1990. A loss of $6.2 million, or 60 cents per share, was incurred in the quarter. This compares to net income of $4.5 million, or 44 cents per share, for the third quarter of 1989. The third quarter of 1990 includes severance costs of $2.2 million which decreased net income $1.4 million or $.13 per share.

Sales for the third quarter of 1990 were $313.5 million compared to $342.3

million in the third quarter of 1989. Bed and bath division sales increased 10 percent from the 1989 level. Carpet and rug division sales decreased four percent from the same period last year.

Bed and bath division operating results were significantly impacted by lower sales, reflecting a continued weak market environment. The lower sales levels and an inventory reduction program required curtailed mill operating schedules that resulted in substantial idle capacity costs. Margins were also affected by the disposal of higher levels of off-good merchandise than during the same period last year. These lower margins were partially offset by cost savings initiated during the quarter.

The carpet and rug division recorded a small profit in the third quarter, compared to a loss last year. The market for carpets is also weak and price competition has not permitted margin improvement. The improved operating performance was the result of cost reductions.

For the first nine months of 1990, sales were $904.2 million compared to $985 million in the corresponding period a year ago. A loss of $11.9 million, or $1.15 per share, for the first nine months of 1990 compares to net income of $15.2 million, or $1.48 per share, for the first nine months of 1989.

Efforts to reduce operating costs and inventory levels are continuing. Cost containment measures include the inventory reduction program, staff reductions carpet operation consolidations and the towel modernization program.

The consolidation of tufted carpet operations at Georgia Rug Mill, Lyerly, Ga. has proceeded as scheduled resulting in improved efficiencies and increased carpet mill activity. The towel weaving modernization project at the Dumaine Plant, Fieldale, Va., is nearing completion. Significant cost savings are anticipated when the startup phase has past.

Fieldcrest Cannon, Inc., manufactures and markets bed and bath products under the Fieldcrest, St. Marys, Royal Family, Monticello, and private brand labels. Carpet and rug division products include woven and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brand labels.

ANDOVER, MA (OCT. 22) PR NEWSWIRE - Vicor Corporation (NASDAQ: VICR) today announced its financial results for the quarter ended Sept. 30, 1990. Pretax income for the quarter increased 227 percent to $2,335,000 compared with $714,000 for the corresponding period a year ago. Earnings per share for the quarter were 15 cents compared with 6 cents last year. Revenues for the quarter increased 46 percent to $9,737,000 compared with $6,662,000 for the

same period last year.

For the nine months ended Sept. 30, 1990, pretax earnings increased by 92 percent to $5,220,000 compared to $2,719,000 in the 1989 period. Earnings per share were 35 cents compared to 20 cents per share for the same period in 1989. Revenues increased by 18 percent to $25,820,000, compared to 1989 revenues of $21,806,000.

The increase in income in the current quarter resulted primarily from improved margins on increased revenues. Higher gross margins offset spending increases associated with ongoing expansion in sales and marketing, and expenses incurred in preparation for the ceased public offering of the company's common stock.

Vicor Corporation designs, manufactures and markets modular power system components and complete power systems. Headquartered in Andover, Mass., Vicor sells its products primarily to the telecommunications, EDP, industrial control and military electronics markets.

#90295p7772 10/22/1990 ~PR Newswire

ATLANTA (OCT. 22) PR NEWSWIRE - Haverty Furniture Companies Inc. (NASDAQ-NMS: HAVT HAVTA) today reported sales and earnings for the third quarter ended Sept. 30.

Net sales for the quarter totaled $62.4 million, up 7.5 percent from $58.0 million in the year-earlier period. Net income for the quarter was $1.4 million, or $.25 per share, compared with $1.7 million, or $.30 per share, a year ago.

For the nine months, net sales totaled $180.2 million, up 6.9 percent from $168.5 million in the year-earlier period. Net income for the first nine months amounted to $3.8 million, or $.67 per share, vs. $4.0 million, or $.70 per share, a year ago.

Frank S. McGaughey Jr., president and chief executive officer, said: "The current retail environment for home furnishings remains very challenging. Although we achieved higher sales for the third quarter, our profitability was affected by promotional expenses and pre-opening costs related to new showrooms. Our recent store-development activities included the opening of our 13th showroom in Atlanta, the relocating of a showroom in Dallas and the opening of a showroom in Lubbock, Texas, the first in that market.

"We continue to emphasize expense control; at the same time, we believe opportunities exist to improve our competitive position. During the remainder of the fourth quarter, we plan to open three new showrooms and close two smaller, less-profitable locations. By the close of 1990, we will also begin shipping from our new regional distribution center located in Jackson, Mississippi. This will be our second distribution center and should significantly improve the merchandising capabilities and financial results of our showrooms in the mid-south region."

Haverty's currently operates 86 retail furniture showrooms in 10 states throughout the Southeast and Southwest. The company's two classes of common shares are traded on the NASDAQ National Market System under the symbols HAVT and HAVTA.

#90295p7774 10/22/1990 ~PR Newswire

SALT LAKE CITY (OCT. 22) PR NEWSWIRE - First Federal Savings Bank (NASDAQ: FFUT) reported today unaudited net income for its first quarter ended Sept. 30 1990 of $503,754 or 44 cents per share. This compares to a net income of $108,182 or 9 cents per share for the like quarter a year ago.

Gerald R. Christensen, president and chairman of the board attributed the gain in income to an increase in net interest income. Net interest income was $1,918,000 up from $1,031,000 an increase of $887,000 from the like quarter a year ago.

Operating expenses increased $204,000 for the quarter compared to the like quarter last year, this was primarily due to an increase in personnel and administrative expenses.

Mortgage loan volume for the quarter totalled 161 loans for $21 million compared to 158 loans for $15.2 million for the like time last year.

Deposits increased $56.9 million to $228.4 million from the like quarter last year. The increase in deposits was attributed to the acquisition of approximately $58 million of CrossLand Savings Bank's Utah deposits on Sept. 28, 1990. Christensen said the acquisition increased the Bank's number of deposit accounts by 9,600 to approximately 25,500 accounts.

First Federal's capital exceeds all regulatory requirements. Shareholder equity is $14.4 million or 12.53 per share.

NEW YORK (OCT. 22) PR NEWSWIRE - Samuel M. Miller, senior vice president-finance of Liz Claiborne, Inc., (NASDAQ: LIZC) today announced record sales and earnings for the three and nine months ended Sept. 29, 1990.

Net sales for the third quarter increased 21.7 percent to $499,554,000 from $410,372,000 for the same quarter last year. Earnings of $62,562,000 reflect a 22.5 percent increase from $51,066,000 in the same prior year period. Earnings of $0.72 per share reflect a 24.1 percent increase over last year's third quarter of $0.58 per share. Net sales for the nine months of $1,260,660,000 increased 21.8 percent over last year's nine months' results of $1,034,819,000. Earnings of $150,109,000 increased 20.9 percent from $124,156,000 for the prior year's same period. Earnings of $1.72 per share reflect a 22.0 percent increase over last year's nine months' $1.41 per share earnings.

Miller commented, "Management is extremely gratified that the company was able to achieve record sales and earnings, notwithstanding a difficult retail environment."

The company also announced that the board of directors had declared a regular cash dividend on the company's common stock at the rate of $0.0625 per share to be paid on Dec. 3, 1990 to shareholders of record at the close of business on Nov. 7, 1990. The declaration of any future dividends will be subject to the company's earnings, financial position, capital requirements and other relevant factors.

With respect to the previously announced stock repurchase programs, Miller noted that through Oct. 19, 1990, of the total of $100 million authorized, the company has purchased approximately 3.6 million shares of common stock at an aggregate purchase price of approximately $90 million.

DEDHAM, Mass. (OCT. 22) PR NEWSWIRE - Bird Corporation (NASDAQ: BIRD) reported net earnings increase from continuing operations of $3,062,000 on sales of $38,599,000 for the third quarter ending Sept. 30, 1990. After provision for preferred and preference dividends, primary earnings per common share amounted to 74 cents.

In the prior year's quarter, Bird earned $2,507,000 from continuing operations which, after consideration of preferred and preference dividends, resulted in earnings per common share of 58 cents. Sales from continuing operations were approximately 7 percent higher and net earnings 22 percent higher than in the prior year.

For the first nine months, Bird has earned $6,017,000, which, after provision for preferred and preference dividends, results in net earnings of $1.35 per common share from continuing operations. In the prior year's period, the company earned 39 cents per common share from continuing operations. Last year Bird additionally recorded a $2.17 per share one-time gain from the sale of their capital equipment subsidiary.

In September, Bird Corporation announced the payment of a 20 cents per share dividend to common stockholders, the first such dividend paid by the company since 1982.

Chairman George J. Haufler stated, "We are pleased with our continuing strong improvement in operating profits during a difficult recession in the housing and construction markets. This continues to demonstrate our cost and quality leadership, and the benefits of focussing on the less cyclical remodeling sector. It was especially gratifying to announce a 20 cent dividend on our common stock as tangible evidence of recovery and confidence in our future following years of investment and restructuring."

Bird Corporation is a U.S.-based manufacturer and distributor of quality building material products and a growing provider of environmental services.

The unaudited results for the third quarter and the first nine months of 1990 as compared to the same periods in 1989 are presented below.

NEW YORK (OCT. 22) PR NEWSWIRE - The board of directors of Merrill Lynch & Co., Inc., at its meeting today, declared a regular quarterly dividend of 25 cents per common share, payable Nov. 21, 1990 to shareholders of record Nov. 2.

Separately, the company also announced that its board of directors has increased, by 5 million shares, the company's authority to purchase shares of its common stock. This authority is in addition to the approximately 2.7 million shares remaining under previous authority. The authority may be exercised over the next several years, as market conditions warrant and subject to regulatory considerations. Purchases, if any, are primarily intended to satisfy the requirements of various stock-based employee benefit plans and for general corporate purposes.

WATERTOWN, MA (OCT. 22) PR NEWSWIRE - Ionics, Incorporated (AMEX: ION) today announced that it had acquired the assets of Walben Industries, Inc. of Springfield, Mass. for an undisclosed amount. Walben is a regional distributor of household bleach and related products.

Commenting on the transaction, Arthur L. Goldstein, Ionics' chairman and chief executive officer, noted that, "We look forward to a long and prosperous association with Walter J. Benoit, Jr., Walben's president, and his associates as Walben becomes a member of Ionics' Chemical Supply group joining Elite Chemicals, Ionics' subsidiary in Brisbane, Australia.

"Ionics adds value to chemical distribution businesses such as Walben and Elite through the use of its membrane-based Cloromat(R) electrochemical cell technology for the local, on-site generation of sodium hypochlorite bleach and related products.

"As part of an environmentally proven system, the Cloromat reduces product and transportation costs and lowers the safety and handling risks associated with alternative methods for producing sodium hypochlorite bleach."

Two five ton per day Cloromat plants are currently operating at Elite Chemicals. A Cloromat is planned to begin operation at Walben in the Spring of 1991.

Ionics is a separations technology company involved worldwide in the manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and in the sale of bottled water and home water purifiers.

MINNEAPOLIS (OCT. 22) PR NEWSWIRE - Biomedical Dynamics Corporation (NASDAQ: BMDC) announced today net sales for the third quarter ended Sept. 30, 1990 were $1,695,659 compared to $1,094,785 in the prior year's third quarter, an increase of 55 percent. Net income for the third quarter of 1990 was $206,978 or $.04 per share compared with net income of $163,911 or $.03 per share, during the prior year's third quarter.

For the nine months ended Sept. 30, 1990, the company had net sales of $4,721,449 compared with net sales of $3,274,445 in the prior year's nine months, an increase of 44 percent. Net income for the nine months ended Sept. 30, 1990 was $448,734 or $.09 per share compared with net income of $446,752 or $.09 per share during the prior year's nine months.

The company had income tax expense in the third quarter and nine months of 1990 of $116,900 and $254,250, respectively, and had no income tax expense in the comparable periods of 1989 as the company was utilizing its tax loss carryforwards.

Joseph A. Marino, president of Biomedical Dynamics stated that "the increase in sales over 1989 was due to continued expansion of our Infusable(R) product line and sales of our recently introduced CUFF-ABLE(TM) product line." Marino went on to say that "sales of our Infusable products continue to expand and add to our market share. Our CUFF-ABLE blood pressure cuff product line showed significant growth during the quarter and I expect that growth to continue into future quarters. Overall, I'm very pleased with the results for the quarter."

Biomedical Dynamics Corporation, located in Minneapolis, is engaged in the development, manufacture and sale of disposable products for the critical care medical market. The company currently sells products used principally in pressure monitoring.

The company's common stock is traded on the national over the counter market and is quoted on the NASDAQ system under the symbol BMDC.

SOUTH PLAINFIELD, NJ (OCT. 22) PR NEWSWIRE - Thermo National Industries, Inc. (OTC: THER), a New Jersey corporation, today announced it would shortly commence an offer to all shareholders to repurchase any and all shares of

common stock at a price of $10 net per share.

The offer would remain outstanding through the close of business on Friday, Jan. 18, 1991, subject to extension, and shareholders would receive payment for shares tendered approximately two weeks after such expiration date.

The company's transfer agent, Jersey Transfer & Trust Company, Verona, N.J., has been designated to act as the company's agent in connection with the offer. Officers and directors of the company have indicated their intention to tender approximately 142,000 out of approximately 186,000 shares collectively owned by them.

Richard Klein, vice president and treasurer, stated that, after examining other possible alternatives, management decided that this was the best use of the funds derived from the previous sale of the company's Newark, N.J.-based heat treating assets. The company will continue in business with its metal plating operations.

#90295p7801 10/22/1990 ~PR Newswire

CHICAGO (OCT. 22) PR NEWSWIRE - Boulevard Bancorp Inc. (NASDAQ-NMS: BLVD) today reported a net loss for the third quarter of 1990 of $6.8 million, or $1.02 per share, reflecting an increase in its third quarter provision for loan losses to $16.8 million from $1.3 million in the same period a year ago.

"The increased provision is in line with management's belief that a conservative approach in reviewing the loan portfolio, while detrimental to short-term results, is appropriate in a weakening economy," Richard T. Schroeder, chairman, president and chief executive officer, said.

The company also reported that it has suspended its fourth quarter cash dividend of 12 cents per share. "While the capital position of the holding company remains very strong, it is prudent to conserve capital at this time," Schroeder said.

Results of Operations For the quarter ended Sept. 30, 1990, the company had a net loss of $6.8 million, or $1.02 per share, compared to net income of $3.0 million, or 41 cents per share, a year earlier. Net interest income declined 5.2 percent to $15.1 million, from $15.9 million in the third quarter of last year. The provision for loan losses was $16.8 million compared with $1.3 million in last year's third quarter, reflecting a higher level of charge-offs and non-performing loans. Non-interest income was down 7.0 percent to $3.5 million from $3.8 million a year earlier. Non-interest expense declined 2.6 percent to $13.6 million from $14.0 million.

Schroeder said he was encouraged with the trend in operating costs, noting numerous efforts to reduce expenses had pushed the third quarter expense level well below amounts in the first and second quarters of 1990.

For the first nine months of 1990, the company had a net loss of $8.7 million, or $1.18 per share, versus net income of $9.3 million, or $1.25 per share, for the comparable period in 1989. Net interest income declined 3.1 percent to $46.4 million, from $47.9 million in the first nine months of last year. The provision for loan losses was $30.6 million compared with $3.8 million. Non-interest income was up 4.9 percent to $11.0 million from $10.5 million a year earlier. Non-interest expense increased 3.8 percent to $43.1 million from $41.5 million.

Loan Quality Net charge-offs for the nine-month period were $19.0 million compared with $2.7 million a year ago and in the third quarter of 1990, net charge-offs were $6.1 million compared to $1.1 million in the same period last year. Non-performing loans increased to $55.9 million at Sept. 30, 1990 from $23.6 million at the end of the second quarter and were 40 percent higher than a year earlier. Schroeder said much of the increase in non-performing loans related to the commercial real estate portfolio.

As a percent of total loans, non-performing loans at Sept. 30, 1990 were 4.80 percent compared with 3.34 percent a year ago.

Balance Sheet Analysis Total assets increased 2.8 percent to $1.63 billion from $1.59 billion at Sept. 30, 1989, while net loans decreased 3.6 percent to $1.14 billion from $1.18 billion. Shareholders' equity decreased 10.8 percent to $104.4 million, or $14.46 per share, from $117.1 million, or $15.96 per share, a year earlier.

Boulevard Bancorp Inc. is Chicago's sixth largest bank holding company with assets of $1.6 billion. Its principal subsidiaries include Boulevard Bank National Association, First National Bank of Des Plaines, Citizens National Bank of Downers Grove, National Security Bank and Boulevard Technical Services.

#90295p7803 10/22/1990 ~PR Newswire

GREENWICH, CT (OCT. 22) PR NEWSWIRE - The Pittston Company (NYSE: PCO) today reported third quarter net income of $26.4 million or 71 cents per share, significantly greater than the strike-impacted third quarter 1989 net income of $3.1 million or eight cents per share.

Earnings for the year-to-date totalled $35.6 miilion compared with $22.6

million for the first nine months of 1989. For the two calendar quarters of operations this year since the end of the coal strike, net income totalled $45.7 million or $1.23 per share, as improving efficiencies and competitive positioning at each of Pittston's businesses reinforced the movement to higher corporate earnings that commenced in March.

Paul W. Douglas, chairman and chief executive officer, said he was pleased with the operating performance of each of the company's four business units, all of which improved further on the good results achieved in the previous quarter. Douglas made the following additional comments concerning third quarter operations:

Coal operating earnings amounted to $14.4 million in the third quarter compared with $13.3 million in the second quarter. Third quarter earnings were adversely impacted by about $1.8 million as a result of a short-term downward pricing adjustment, which ended Oct. 1, under the provisions of a long-term utility contract.

The Pyxis Coal Group achieved excellent operating results, while the Pittston Coal Group continued to benefit from the strong relationship that has developed with both the leadership of the UMWA and the company's UMWA employees as the provisions of the new labor agreement are being progressively implemented.

While the long-term fundamentals of coal markets both here and abroad continue to improve, with expanded opportunities arising from the higher price of oil and the assumed implementation of proposed acid rain legislation, near term pricing is weak reflecting higher than desired utility stockpiles.

Coal sales in the third quarter amounted to 4.5 million tons including 2.0 million tons of metallurgical coal sold in the overseas market. Coal production for the quarter totalled 4.0 million tons.

With the third quarter purchase of an additional 7-1/2 percent interest in Dominion Terminal Associates (DTA), a major coal export terminal located in Newport News, Va., Pittston raised its ownership in DTA to 32.5 percent, thus becoming the largest equity owner in DTA.

The expansion of DTA's annual throughput capacity to 17.5 million tons and the increase in its ground storage space by nearly 50 percent will be completed about Dec. 1 under budget and ahead of schedule.

The intrinsic values of the DTA terminal, a very low cost and efficient facility, are expected to increase as world and coastal coal shipments grow, particularly since the construction of new terminals will be limited by ever-growing cost and environmental considerations.

CONTACT: William J. Byrne of Pittston, (203) 863-1274.

MORRISTOWN, NJ (OCT. 22) PR NEWSWIRE - Sixteen companies have joined a group called the C++ Reseller Alliance, formed by AT&T's (NYSE: T) UNIX System Laboratories, Inc., to promote products based on AT&T's C++ programming language and libraries and to share information on the use of C++ in large software development projects.

The C++ Reseller Alliance, in addition to developing and coordinating joint marketing programs, will also advise USL on strategies for increasing acceptance of AT&T's C++ language system as the "industrial strength" implementation of the language for professional programmers.

The C++ Reseller Alliance will share with its members information about coming enhancements to the C++ language and libraries from USL, information that individual members obtain relating to the growing use of the C++ programming language in commercial development environments, and "C++ Do's and Don'ts" culled from the many software developers and researchers who as C++ Reseller Alliance member customers, have been using the AT&T C++ language and libraries for several years.

Included among sources for such information will be AT&T Bell Laboratories, where the C++ Language was invented, and where the language is increasingly being used in large-scale software development projects.

Initial members of the AT&T C++ Reseller Alliance include: Apple Computer, Inc., AT&T Computer Systems, Comeau Computing, Glockenspiel, Ltd., Imagesoft, Inc., Microtec Research, Inc., NCR Corporation, Object Design, Inc., Ontologic Inc., ParcPlace Systems, Pyramid, Saber Software, Inc., Santa Cruz Operation, Inc., Sequent Computer Systems, Inc., Solbourne Computer, and Sun Microsystems Inc.

Membership in the C++ Reseller Alliance is open to any hardware or software vendor who licenses and distributes the AT&T USL C++ Language System. No membership fees are required.

The group will meet two or three times a year, coincident with significant C++ industry events. The first formal meeting of the group will be held in April 1991 in Washington, coincident with the USENIX C++ Conference.

For further information about the C++ Reseller Alliance, vendors should contact Paul Fillinich, C++ product manager, UNIX System Laboratories, Inc., at (201) 580-4363.

CONTACT: Dick Muldoon (201) 829-7212, or at home, (201) 635-6699, or Joe Kerrigan, (201) 522-6230, or at home, (201) 283-2463, both for AT&T.

LISBON, PORTUGAL (OCT. 22) PR NEWSWIRE - Banco Comercial Portugues, Portugal's leading private commercial bank and the country's largest quoted company, today announced financial results for the first nine months of 1990.

BCP's pre-tax profits for nine months ending Sept. 30, 1990 rose 103 percent to Esc. 13.2 billion ($94.7 million) and cash-flow increased 93 percent to Esc. 17.1 billion ($122.9 million). Earnings per share, adjusted for a bonus issue which took place in March 1990, increased 38 percent from Esc. 144.3 in the first three quarters of 1989 to Esc. 199.4.

Since the end of June, BCP has opened 21 branches. Having received authorization to open 57 more branches, the bank expects to have nearly 170 operating in December.

BCP has recently launched a public offer for 43.49 percent of CISF, Portugal's second largest merchant banking group, in a move designed to increase its stake to 51.1 percent. It is offering Esc. 2350 in cash per share, a 19.9 percent premium over CISF's last quotation and 108.5 percent above its book-value. Through this acquisition, BCP expects to have a major share in corporate finance and privatisation businesses. The offers are being handled up to Nov. 5 and the bidding session will take place on Nov. 8.

NEW BRIGHTON, PA. (OCT. 22) PR NEWSWIRE - Tuscarora Plastics Inc. (NASDAQ: TUSC) today reported record results for its fiscal year ended Aug. 31, 1990.

Net sales totaled $85.5 million, an increase of 10.1 percent over net sales of $77.6 million for the year earlier. Net income for the current year was $4.9 million, an 8.8 percent increase over net income of $4.5 million for fiscal year 1989. Earnings per share for the year were $1.62, an increase of 8.7 percent over the $1.49 earned for the year earlier.

For the fourth quarter ended Aug. 31, 1990, net sales were $20.7 million, a decrease of 3.6 percent from net sales of $21.5 million for the fourth quarter of fiscal year 1989. Net income was $1.2 million, approximately the same as the year earlier quarter and earnings per share were $0.39, a decrease of 4.9 percent compared with $0.41 for the prior fourth quarter.

John P. O'Leary Jr., president and chief executive officer, attributed the fourth quarter decreases to an exceptionally strong year-earlier fourth quarter as well as to the current overall softness in the national economy, particularly in the manufacturing sector. O'Leary said that lower levels of sales and earnings are expected to continue at least through the first quarter of fiscal year 1991.

Tuscarora is the country's largest manufacturer of custom molded foam plastic products made from expanded polystyrene, polypropylene, polyethylene and related co-polymer foams. The company's products are sold to a wide variety of customers for use as packaging and handling material for both consumer and industrial goods. The company also custom molds and fabricates materials for use as thermal insulation and component parts.

Tuscarora Plastics, founded in 1962 in New Brighton, Pa., currently operates 22 manufacturing facilities throughout the United States.

#90295p7831 10/22/1990 ~PR Newswire

BALTIMORE (OCT. 22) PR NEWSWIRE - In an effort to lessen future dependence on imported oil and the impact of gasoline-powered vehicles on the environment, Baltimore Gas & Electric Co. (NYSE: BGE) and the State of Maryland have teamed up to pursue natural gas vehicle technology. This joint effort is focusing on three fronts: passenger cars, buses, and engineering design.

In the first program, BG&E is working with the Maryland Department of the Environment (DOE) to convert six Chevrolet Celebrities from gasoline to

liquefied natural gas (LNG). BG&E will absorb the labor costs associated with the installation and maintenance of the natural gas fueling system, as well as labor costs for in-house testing.

The performance of these vehicles will be compared to three gasoline-powered Chevrolet Celebrities specially purchased for this one-year test program. At the end of the test period, analysis of both engines will be done, including emissions measurements, engine oil tests and even the disassembling and examination of the engines.

"This test program should yield valuable research data that we hope to apply to present-day situations," said Ed Skoglin, manager of Marketing & Energy Services for BG&E.

"There are provisions in current and pending clean air legislation impacting motor vehicles, and many corporations and government agencies with vehicle fleets are very interested in pursuing natural gas technology. The lessons learned here will be shared with private and public sector fleets."

The second joint effort between the State of Maryland and BG&E on the natural gas front involves buses. Between six to ten Maryland Mass Transit Administration buses powered by LNG are scheduled to begin going into service next April for a 12-month field test. BG&E has contributed a $200,000 grant to this $3 million program.

On the design front, BG&E is working with the University of Maryland in a national student engineering design competition. Maryland is one of 20 schools selected to participate in this project, and each school has a one-ton General Motors pickup truck to convert to natural gas. BG&E has contributed $5,000 to Maryland's effort, and will be supplying the LNG fuel, technical support, and testing and evaluation as required or necessary.

Besides its joint efforts with the state, BG&E didn't need a wake-up call from the Persian Gulf to begin its own research on natural gas vehicles. Several months ago, the utility formulated plans for a fleet test program that began operation this month.

#90295p7833 10/22/1990 ~PR Newswire

TORONTO (OCT. 22) PR NEWSWIRE - American Barrick Resources Corporation (NYSE: ABX) today announced record production, revenue and earnings for the third quarter and nine months ended Sept. 30, 1990.

Net income increased to US$43.1 million, or US33 cents per share fully diluted for the nine months ended Sept. 30, 1990 compared with US$23.7 million, US20 cents per share fully diluted, for the same period of 1989.

Gold production was 437,562 ounces in the nine months, up from 331,377 ounces in the comparable period of 1989, resulting from a near doubling of production from the Goldstrike Mine and a solid performance at the Mercur Mine. Contributing to Goldstrike's outstanding performance in the first nine months of this year was an average ore grade 20 percent higher than the reserve model.

The company realized an average price of US$441 per ounce for its gold sales during the first nine months, compared with the Comex average gold price of US$384. (Included in the company's average price realized for the nine months is US$11 per ounce from the expiry of its gold purchase warrants.) Accordingly revenues were US$179.7 million for the nine months compared with US$142.3 million in the same period of 1989. Barrick's income from operations increased 44 percent to US$79.0 million in the same period, compared with US$54.8 million a year earlier, reflecting higher production and lower costs.

Cash flow before working capital adjustments was strong at US$82.7 million in the nine months, compared with US$59.5 million in the comparable period of 1989.

"With the company's rapidly increasing gold production and the benefits of our gold hedging program, we are confident of meeting our 1990 production and earnings targets," said Robert M. Smith, president and chief operating officer.

A strong and liquid balance sheet is the basis for Barrick's future confidence. Cash and short-term deposits were US$342.0 million as at Sept. 30, 1990 including the net proceeds of US$105 million from the company's common share issue completed during the third quarter.

Net income for the third quarter ended Sept. 30, 1990 was US$15.6 million, or US12 cents per share fully diluted, compared with US$11.9 million, or US10 cents per share fully diluted, in the year earlier period. The company's income from operations for the quarter was US$31.3 million, compared with US$20.3 million a year earlier. Cash flow from operations before working capital adjustments for the quarter was US$31.9 million, compared with US$23.0 million in the same period of 1989.

American Barrick Resources Corporation has interests in six producing mines located in Nevada, Utah, Ontario and Quebec. The company's shares are traded on the Toronto, Montreal and New York Stock Exchanges (ABX), the Paris Bourse, and the Swiss Stock Exchanges (ABR).

NEW YORK (OCT. 22) PR NEWSWIRE - Bankers Trust Company today announced that ten professionals had joined its Corporate Trust and Agency Group from Security Pacific National Bank. Among those joining Bankers Trust were Daniel Rudgers and William Thomas, who had developed Security Pacific's business as trustee for private mortgage backed securities, and eight members of their unit.

All will continue working in the mortgage backed securities trust business for Bankers Trust and will remain based in California. "We view the asset backed and mortgage backed securities business as an important growth area for Corporate Trust and believe that establishing a West Coast presence will provide major competitive advantages going forward," said B. J. Kingdon, senior vice president and head of Corporate Trust for Bankers Trust.

Rudgers and Thomas, both vice presidents, will report to Paula C. Gabriele, chief operating officer of Corporate Trust. According to Ms. Gabriele, "Bankers Trust is committed to being a major player in structured transaction corporate trust work, and we believe that adding this group of professionals to our team underscores this commitment."

Bankers Trust's Corporate Trust and Agency Group is a leader in its field, a position earned by its ability to respond innovatively to the requirements of the marketplace.

CHARLOTTE, N.C. (OCT. 22) PR NEWSWIRE - The Board of Directors of United Dominion Industries Limited (TSE,NYSE: UDI) today declared a fourth-quarter cash dividend of 5 cents (U.S.) per share of common stock. The Board also declared a stock dividend equivalent to U.S. 43 cents, in order to maintain the company's eligibility for investment by certain financial institutions in Canada. The actual number of common shares to be distributed will be based on the U.S. dollar equivalent to the weighted average closing price of United Dominion common shares on the Toronto Stock Exchange in the five trading days ending Oct. 26. Both dividends are payable Dec. 31 to shareholders of record Dec. 7.

In addition, the Board declared a dividend of 59.375 cents in Canadian funds per share on the company's Series 2 preferred shares, payable Dec. 31 to holders of record Dec. 7.

#90295p7837 10/22/1990 ~PR Newswire

CHARLOTTE, NC (OCT. 22) PR NEWSWIRE - United Dominion Industries Limited (TSE NYSE: UDI) today reported third quarter net income of $5 million compared with $35.4 million a year ago, which included $26.4 million in earnings related to the divested industrial automation segment. Revenues were $372.1 million in the latest quarter versus $362.7 million in 1989.

After payment of preferred dividends of approximately $5 million in the latest quarter compared with $6 million last year, the company reported no earnings applicable to common shares in the current period versus $1.08 a share in 1989 which included 98 cents related to the divested segment.

William R. Holland, chairman and chief executive officer, said that, excluding the effect of divesting the industrial automation segment, United Dominion's latest results declined from a year ago primarily due to volume and margin pressures caused by today's economic and market conditions.

"The rapid deterioration of the general economy in recent months and trends toward economic recessions in Canada and the United States have adversely affected all of our primary markets except energy, where the outlook is much improved," Mr. Holland said.

"While all of our operating segments remain fundamentally sound and cost containment programs are being implemented across the company," Mr. Holland said, "we do not believe we will realize an improvement in 1990 over 1989 earnings, as originally anticipated.

For the nine months ended Sept. 30, the company reported net income of $25.4 million on revenues of $1,069.5 million, compared with $61.6 million on

revenues of $1,030.2 million in 1989. Per share earnings amounted to 37 cents versus $1.59 in the 1989 period. Year ago results included $37.8 million, or $1.40 a share, realized from the divested industrial automation segment.

United Dominion -- formerly AMCA International -- is a manufacturing, construction and engineering company serving non-residential construction, energy and industrial equipment markets worldwide. The company operates 35 plants and employs approximately 10,500 people.

#90295p7839 10/22/1990 ~PR Newswire

ALLENTOWN, PA (OCT. 22) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) today reported record results in the fourth quarter, ended Sept. 30, 1990.

Sales increased 22 percent to $816.3 million, compared to $668.6 million in last year's fourth quarter. Net income in the current quarter increased 24 percent to $63.1 million, or $1.14 per share, vs. $51 million, or $.92 per share, in the year-ago quarter.

This strong operating performance reflected higher profits in all businesses, and an after-tax gain of $6 million, or $.11 per share, from the sale of a 50-percent equity interest in the company's second cogeneration project.

Reviewing the fourth quarter results, Air Products Chairman Dexter F. Baker said, "This record performance was achieved based on strong results across our entire business portfolio. Industrial gases and chemicals, our largest businesses, produced strong volume and profit gains. We also earned substantially higher profits in our environmental and energy, and process equipment businesses. These results capped another year of sales and profit growth at Air Products."

For fiscal 1990, Air Products' sales were $2.9 billion, up 10 percent over 1989. Net income was $229.9 million, or $4.15 per share, compared to $222.1 million, or $4.04 per share, in 1989.

In the fourth quarter, industrial gas revenues and operating income rose 12 percent and 7 percent respectively, compared to the year-ago quarter. Growth in worldwide merchant and on-site volumes continued and prices for liquid oxygen and nitrogen in Europe and the United States increased.

In chemicals, fourth quarter revenues were 5 percent lower compared to last year due to the divestiture of the polyvinyl chloride (PCV) business at the start of the quarter. Operating income, however, increased 5 percent as broad-based gains continued during the quarter, reflecting the underlying strength and quality of our chemicals business.

Fourth quarter results in the environmental and energy business improved largely due to the sale of a partial equity interest in a cogeneration project under construction in western Pennsylvania, and the recognition of profits associated with the related plant sale. The results also reflect continued strong operations at the Hempstead, Long Island, waste-to-energy and Stockton, Calif., cogeneration facilities.

The Equipment and Technology segment reported substantially higher operating profits in the fourth quarter from higher process equipment sales.

NORTHFIELD, MN (OCT. 22) PR NEWSWIRE - Sheldahl, Inc. (NASDAQ: SHEL) announced today record 1990 sales from continuing operations of $97,103,000, 12 percent higher than last year. Current backlogs are at levels sufficient to achieve similar growth in fiscal 1991.

1990 net earnings excluding restructuring expenses were $1,942,000 or $.41 per share compared with a net loss of $1,653,000 or a negative $.35 per share last year.

Record net sales for the fourth quarter were $25,049,000, 11 percent higher than net sales of $22,517,000 in the same quarter last year, and ten percent higher than net sales of $22,698,000 in the third quarter of fiscal 1990. Operations resulted in net income of $872,000 or $.18 per share compared with a net loss from continuing operations of $287,000 or $.06 per share one year ago and represents the fifth consecutive quarter of operating improvement.

Sheldahl, Inc. develops, manufactures and sells materials, special fabrications and flexible interconnects for electronic markets. Its focus is

to serve the needs of its customers in the automotive, aerospace/defense, data communications, consumer and materials markets. The company's common stock is traded on the National Over-The-Counter market under the NASDAQ symbol: SHEL.

#90295p7853 10/22/1990 ~PR Newswire

ANAHEIM, CA (OCT. 22) PR NEWSWIRE - In the face of Middle East oil price jitters, combined with the threat by lawmakers in Washington to raise gasoline taxes, sales of high-mileage Ford (NYSE: F) Escorts and Mercury Tracers in Southern California continued a late August upturn through September -- and into October.

According to Ford Division's Los Angeles District sales manager J.C. Collins, Escort sales for September were up nearly 20 percent over the year-ago period -- and registered the second best sales month for Escort for the year.

"Even more important," said Collins, "September Escort sales were up nearly 50 percent over August sales, demonstrating that the first full month of availability of the full line of new Escorts is meeting great customer acceptance -- and also that Escort sales momentum is really gathering steam."

He noted that Ford sells more Escorts in Southern California than anywhere in the country. The most fuel-efficient Escort gets 31 mpg in the city and 41 mpg on the open highway.

Similarly, September sales of Mercury Tracer in the Los Angeles area were up 13 percent over the heavily rebated (and therefore, inflated) year-ago sales, according to Roger G. Jolicoeur, the Lincoln-Mercury Division's district sales manager. He reported that retail sales in September were the best of the year. Tracer EPA mileage figures are 29 city, 36 highway.

Reflecting building momentum for Tracer, he said that sales during the first 10 days of October outstripped the same period a year ago by 66 percent.

Jolicoeur also noted that September sales of the fuel-efficient Mercury Capri were up 107 percent over August sales. And during the first 10 days of October, Capri sales were up 41 percent versus the month-earlier period. "This reflects the growing availability of the Capri and its wide popularity." He noted that there was a very tight 21-day supply of Capris at dealers -- compared to the 60-day supply which is considered normal.

Paradoxically, sales of the Lincoln Town Car continue to outpace trends in face of a generally slow market. September retail sales of the Town Car in Southern California were up a hefty 76 percent compared to sales in September of last year.

Momentum continued into October, with retail Town Car sales up 82 percent during the first 10-day period -- compared to the same period a year ago. Jolicoeur pointed out that the fuel-efficiency of the Town Car (17 city, 23 highway) is about double that of its 1970s predecessors.

At the same time, sales of the all-new Ford Explorer compact utility vehicle, offering two- and four-door, with two- and four- wheel drive options, were up a very strong 107 percent in September over year-ago sales, with a very slim 26-day supply in Southern California. Collins noted that Explorer sales in the first 10 days of October were up a whopping 200 percent -- compared to the year-ago sales.

"Dealers are telling us that they are selling Explorers 'as fast as they roll in,'" he reported. The most fuel-efficient Explorer gets 18 mpg in the city and 23 mpg on the highway.

LONDON (OCT. 22) PR NEWSWIRE - Robert Collier, a 23-year veteran of the hotel industry, has been named senior vice president of strategic marketing for the London-based Inter-Continental Hotels Group Ltd. The appointment, effective Nov. 1, was announced today by John van Praag, chief executive officer of the hotel group and J.T. Kuhlman, president of Inter-Continental Hotels.

Collier, 50, will be responsible for the creation and implementation of marketing strategies for the more than 100-property hotel group.

He joins Inter-Continental Hotels Group from ITT Sheraton Corp., where he served as senior vice president and director of marketing for five years. Previously, he was vice president sales and marketing (1975-81), Europe, Africa and the Middle East (1972-75) for ITT Sheraton, headquartered in London. He also has held marketing management positions with Trusthouse Forte in London from 1967 to 1972 and 1981-1985.

A graduate of Cambridge University's St. Catharine's College, Collier will be based in Inter-Continental's worldwide headquarters in London.

HOUSTON (OCT. 22) PR NEWSWIRE - Anadarko (NYSE: APC) today announced the successful conversion of 77 percent of the company's outstanding $100 million principal amount 5-3/4 percent convertible subordinated debentures due 2012, which were called for redemption on Oct. 18, 1990.

Debentures in the principal amount of $77 million were converted into 2.4 million shares of Anadarko common stock pursuant to the indenture. With these newly issued shares, the total issued and outstanding shares of the company are about 55 million. In addition, remaining debentures in the principal amount of $23 million were redeemed for a total payment to debenture holders by the company of $24 million in principal, premium and interest as provided by the indenture. The cash portion of the redemption was financed through existing credit facilities.

The conversion of the debentures significantly improves Anadarko's balance sheet; total debt is reduced to 41 percent of the company's total capitalization. On an annualized basis, the conversion would have a slight positive effect on earnings per share.

#90295p7861 10/22/1990 ~PR Newswire

PHILADELPHIA (OCT. 22) PR NEWSWIRE - Directors of Philadelphia Electric Co. (NYSE: PE) today declared a dividend of 30 cents per share on the common stock for the fourth quarter of 1990, payable on Dec. 21, to shareholders of record Nov. 14, 1990.

For the three months ended Sept. 30, 1990, the company reported a loss of $8 million, equivalent to 4 cents per share.

J.F. Paquette, PE chairman and CEO said, "The loss in the third quarter was expected and is due to a one-time charge of approximately $249 million or 70 cents a share associated with the company's previously announced Special Early Retirement Program. Without this charge, third quarter earnings would have been 66 cents per share or a decrease of 21 cents per share compared to the earnings of the corresponding period last year. The lower third quarter earnings also reflect the effects of the Pennsylvania Public Utility Commission's (PaPUC) reduction early this year of the company's requested rate increase for Limerick Unit No. 2."

The early retirement program, which was accepted by 1,909 employees of 2,608 eligible, is expected to save the company about $75 million annually in salaries and benefits by 1993.

Electric service territory sales and total gas delivered for the quarter were essentially unchanged from the corresponding period last year.

Earnings for the 12 months ended Sept. 30, 1990, were 53 cents per share, $1.68 under the earnings of the previous 12-month period. The decrease in earnings was due primarily to a one-time charge against income in the first quarter of 1990 of almost $250 million or $1.18 per share associated with various disallowances made by the PaPUC in the Limerick Unit No. 2 Rate Order and the third quarter write-off resulting from the company's Special Early Retirement Program. This decrease in earnings was partially offset by the elimination of costs associated with the Peach Bottom shutdown which impacted the previous 12 months.

WASHINGTON (OCT. 22) PR NEWSWIRE - A national picket of Dayton Hudson stores has been scheduled for Friday, Nov. 23, the day after Thanksgiving, which is traditionally the biggest shopping day of the year. The picket, called by the Christian Action Council (CAC), is in response to Dayton Hudson's announcement that it will continue to support Planned Parenthood, the world's leading advocate of legal abortion.

"Corporations may support any groups they desire, but they will not necessarily be doing so with the money of pro-life advocates," said Douglas R. Scott, director of public policy for the CAC and founder of the project designed to end corporate support for Planned Parenthood. "Dayton Hudson has come down squarely on the side of Planned Parenthood and its agenda. This represents a capitulation to the abortion provider and to the threats of many

groups supportive of legal abortion. The company has essentially been told by groups that support legal abortion, 'Give us money or we'll break your economic legs,'" Scott said.

The CAC is asking all pro-life groups to support the picket. "It's our hope that many of Dayton Hudson's stores will be picketed on November 23, but this is only the beginning of our effort," Scott said.

Scott accuses Dayton Hudson, which owns Dayton's, Hudson's, Target, Marshall Field's and Mervyn's, of choosing to be vocal in their support of Planned Parenthood in an attempt to get other corporations to support the group. To date, 15 major corporations have agreed to end support for planned parenthood.

#90295p7867 10/22/1990 ~PR Newswire

CLEVELAND (OCT. 22) PR NEWSWIRE - M.A. Hanna Company (NYSE/MSE: MAH) today reported net income in the quarter ended Sept. 30, 1990, was $17.2 million ($.61 per share, fully diluted), compared with net income of $21.7 million ($.77 per share, fully diluted) in the corresponding period of 1989. Due to the exhaustion of tax loss carryforwards, the company's tax rate increased from 13.3 percent in the 1989 period to 25 percent in the 1990 period.

For the nine months ended Sept. 30, 1990, net income was $38.8 million ($1.37 per share, fully diluted), which included an $8.6 million ($.30 per share, fully diluted) nonrecurring charge for the write-off of receivables due from a bankrupt customer of Hanna's coal affiliate. In the 1989 nine months, net income was $71.3 million ($2.53 per share, fully diluted), which included a one-time gain of $15.0 million ($.53 per share, fully diluted) from the sale of assets.

Third-quarter net sales and operating revenues were $290.3 million in 1990 and $290.2 million in 1989. Nine-month net sales and operating revenues were $847.6 million in 1990 and $838.1 million in 1989. In 1989 the company had discontinued sales from iron ore brokerage activities of $6.7 million in the third quarter and $22.4 million in the nine months.

"Polymer processing and distribution, our core strategic businesses, are performing well, despite the softening economy," said Chairman and Chief Executive Officer Martin D. Walker. "Soft volumes and competitive pricing impacted our manufactured product results, and the natural resources segment continues to be impacted by substantially lower earnings from our coal affiliate due to the first-quarter bankruptcy filing of its largest customer."

Hanna benefitted in both 1989 and 1990 from the utilization of tax- loss

carryforwards accumulated in the early and mid-1980s. Third- quarter results included tax credits of $2.6 million in 1990 and $5.1 million in 1989; nine-month results included tax credits of $6.0 million in 1990 and $17.6 million in 1989. On a fully taxed basis, Hanna's third quarter net income from operations, excluding one-time gains and losses, was $.51 per share, fully diluted, in the third quarter of 1990 and $.59 per share, fully diluted, in the third quarter of 1989. For the nine months, fully taxed net income from operations was $1.42 per share, fully diluted, in 1990 and $1.50 per share, fully diluted, in 1989.

Hanna's formulated polymers segment recorded operating income of $63.1 million in the nine months of 1990, compared with $68.1 million in the nine months of 1989.

The natural resources segment recorded nine month operating and equity income, excluding one-time gains and losses, of $17.5 million in 1990, compared with $25.4 million in 1989.

M.A. Hanna company is a leading formulated polymers company and also has natural resources interests.

SHOREVIEW, MN (OCT. 22) PR NEWSWIRE - TSI Incorporated (NASDAQ: TSII), Shoreview, Minn., today reported increased sales and earnings for the second quarter and six month periods ended Sept. 30, 1990.

The following table shows the results compared to last year:

	Second Quarter Ended		Six Months Ended	
	9/30/90	9/30/89	9/30/90	9/30/89
Sales	$9,307,000	$8,577,000	$18,515,000	$16,725,000
Earnings from continuing operations	555,000	511,000	978,000	932,000
Loss from discontinued operations	--	(82,000)	--	(131,000)
Net earnings	555,000	429,000	978,000	801,000
Per share earnings:				
Continuing operations	$.22	$.20	$.39	$.37
Net earnings	$.22	$.17	$.39	$.32

Dr. Leroy M. Fingerson, president, stated that he was pleased with both the second quarter and six month results because they are new highs for TSI and exceeded what was, for TSI, a very strong second quarter and six month period last year. He also indicated that order bookings for the six months were 15 percent ahead of last year and backlog as of Sept. 30 was 25 percent above

last year's level.

TSI is a recognized worldwide leader in providing measuring instruments for environmental monitoring and control, industrial process control and research applications emphasizing non-contact technology.

ENGLEWOOD, CO (OCT. 22) PR NEWSWIRE - U S WEST International Holdings, the Leningrad City Telephone Network Production Association (LCNA) and the Leningrad Station of Technical Radio Control (LSTC) today signed a joint venture agreement to build a cellular telephone network in Leningrad. It will be the first commercial cellular system in the Soviet Union.

At signing ceremonies today in Leningrad, U S WEST Chairman Jack MacAllister said the joint venture agreement involves an initial $6 million investment in cellular equipment by U S WEST International Holdings, a subsidiary of U S WEST Inc. (NYSE: USW). Substantial additional investment may be made in the future based on market demand and when additional spectrum is made available to the joint venture.

LCNA will own 55 percent of the joint venture, U S WEST 40 percent and LSTC 5 percent.

"This agreement is a significant step forward for the development of communications in the Soviet Union and is another example of U S WEST's growing role in the global telecommunications marketplace," MacAllister said. "With the monumental changes occurring in the Soviet Union, communications will play a vital part in the country's future success. This cellular system will provide quick access to additional lines for local and international services which are so important to economic growth."

Construction of the cellular telephone system will begin this year with the first service available in mid-1991 to about 3,000 customers. The proposed system will have the capacity to eventually serve 50,000 customers. When additional spectrum is made available, the joint venture will use it to expand service and capabilities.

In London, U S WEST International President Steven Andrews said: "The signing of this joint venture is the result of the good relationships U S WEST has established throughout the Soviet Union. U S WEST has made a long-term commitment to helping the Soviets improve their telecommunications environment.

"We are especially pleased to be working with the local Leningrad telephone company in providing the service since it plays such a vital role in meeting

the total communications needs of the community."

Victor Sorokin, director general of the Leningrad City Telephone Network Production Association, signed the joint venture on behalf of the Soviets and said: "We are pleased to join with U S WEST in providing improved communications services to the people of Leningrad. During the Goodwill Games in Seattle this past summer, we had the opportunity to experience first-hand the capabilities and technology of U S WEST. This was very important in our decision to select U S WEST as a partner."

Besides the financial investment, U S WEST will provide technical and operational expertise for the project. The Soviet partners will provide interconnection to the local network, local technical talent, land, buildings and labor.

NEW YORK (OCT. 22) PR NEWSWIRE - Mizlou Communications Company, Inc. (NASDAQ: MZLU) announced today that it has moved its Sports News Network (SNN) news bureau and production center to a new 25,000 square- foot, multi-million dollar facility in Edison, N.J. SNN went on line from Edison on Oct. 1, it was announced by Victor L. Piano, president of Mizlou Communications Company, Inc., the parent company of SNN.

Since its launch on Feb. 1, SNN's news bureau and production facilities have been housed at the Gannett Television Studios in Arlington, Va.

Mark Wenzel, Mizlou's chief financial officer, stated, "A substantial portion of the proceeds from our recent private placements went into the construction of this state-of-the-art facility. Our new studio was designed to operate more cost efficiently, and it is currently saving Mizlou over $200,000 in monthly operating costs."

The SNN facility in New Jersey is located in the Raritan Center Business Park in Edison, 27 miles from the Lincoln Tunnel. The state- of-the-art facility, also serves as the satellite uplink/downlink/ center for Sports News Network. According to Piano, the downlink facilities can provide for up to 30 feeds.

"We are very excited about the new SNN home," said Piano. "It is undoubtedly one of the most advanced television news facilities in the country and greatly enhances our newsgathering capabilities."

Sports News Network is the nation's first and only 24-hour sports cable news network. On the air since Feb. 1, 1990, Mizlou has signed affiliation

agreements in 15 of the top television markets, and has advertising agreements with over 35 major sponsors.

DETROIT (OCT. 22) PR NEWSWIRE - UAW President Owen Bieber and Vice President Ernest Lofton, who directs the union's Ford Department, said they were pleased by the overwhelming support given to the pattern- implementing new UAW-Ford agreement by UAW members at Ford facilities throughout the United States.

Bieber and Lofton announced that UAW-Ford members approved the agreement by a margin of 82 percent of those voting.

"The strong margin of ratification confirms that the union hit the center of the target on meeting Ford workers' needs for a pattern agreement that provides unprecedented levels of job and income security, major pension gains for current and future retirees, wage and income gains, and many other key improvements," said Bieber and Lofton.

"Ford workers recognized the extensive and productive work of the UAW-Ford National Negotiating Committee in tailoring the pattern that UAW first won at General Motors into an agreement meeting the specific needs and goals of Ford workers," they added.

Bieber and Lofton praised the leadership and membership of UAW-Ford local union "for maintaining a high level of solidarity and support for the bargaining team throughout the negotiations." They also credited the "constructive and realistic approach taken by Ford Motor Co. negotiators and top company officers toward reaching an equitable pattern agreement."

Lofton said that the formal signing of the new agreement, which covers approximately 106,000 UAW members, is scheduled for 3:30 p.m., Friday, Oct. 26 at Ford World Headquarters in Dearborn, Mich.

MINNEAPOLIS (OCT. 22) PR NEWSWIRE - Bemis Company (NYSE: BMS) today reported that third quarter earnings per share increased 4 percent over the same period a year ago, with income of $12.4 million or 48 cents per share, compared to $12.1 million or 46 cents per share for the same period a year ago. Net sales for the three-month period were $271.7 million, compared to $262.2 million in 1989.

For the nine months, Bemis reported an earnings per share increase of 11 percent over the same period a year ago. Nine-month income was $35.5 million or $1.38 per share, compared to $32.4 million or $1.24 per share in 1989. Net sales for the nine months were $824.9 million, compared to $807.7 million in 1989.

John Roe, president and chief executive officer, said, "The company's earnings per share improved in the third quarter in spite of sizable startup costs related to the expansion of our pressure-sensitive materials business, as well as the heavy capital program underway throughout the company. While many of these costs will continue in the fourth quarter, this program should provide excellent profit potential as this new capacity becomes more fully utilized."

Bemis is a major supplier of flexible packaging and specialty coated and graphics products.

HERNDON, VA. (OCT. 22) PR NEWSWIRE - Philip D. Green, president of Neuromedical Technologies, Inc. (NMTI), announced that NMTI is once again on the NASDAQ system and will again be traded under the symbol NMTI.

He also announced that a clinical trial undertaken under the direction of Dr. Donald R. Jasinski at Francis Scott Key Medical Center (Johns Hopkins University) entitled "A Study to Determine the Safety and Efficacy of Transcranial Electrostimulation Therapy as an Aid to Smoking Cessation" has now been completed and that the results of this clinical study will be available in the very near future. "Dr. Jasinski has assured NMTI that the results of this clinical trial are being compiled at this time and a report will be available shortly," Green stated.

NMTI has, in addition, applied for a Small Business Innovative Research Grant to the National Institute on Drug Abuse (NIDA). This grant is for the development of appropriate protocols for the studies to assess the efficacy of the company's patent technology in the alleviation of opiate withdrawal syndrome. Green stated that he had received an initial letter from the Department of Health and Human Services indicating that the grant had been reviewed and was recommended for approval by the Initial Review Group and that final funding decisions will be made in early November.

#90295p7895 10/22/1990 ~PR Newswire

DETROIT (OCT. 22) PR NEWSWIRE - The Detroit Edison Company (NYSE: DTE) today announced earnings for common stock for the three months ended Sept. 30 of $140.4 million, or 96 cents per share, up 7.7 percent from the $130.3 million, or 89 cents per share, for the same period a year ago.

For the nine months ended Sept. 30, earnings for common stock were $376.9 million, or $2.57 per share, up 21.4 percent from the $310.5 million, or $2.11 per share, for the same period a year ago.

The earnings increases were due to higher operating revenues and to continuing reductions in fuel and other power supply expenses. The increases in revenues resulted from rate increases in accordance with the company's 1988 rate case settlement and higher energy transmission services.

For the 12 months ended Sept. 30, earnings for common stock were $455.3 million, or $3.10 per share, compared with a loss of $162 million, or $1.10 per share, for the same period a year ago. The loss for the previous 12-month period resulted from a December 1988 write-off of certain plant costs disallowed by the Michigan Public Service Commission.

Sales records were set in the commercial and industrial classes for the three months ended Sept. 30. Total kilowatt-hour sales were up 0.4 percent from the same period a year ago, with industrial sales up 1.7 percent, commercial sales up 1.5 percent and residential sales down 1.8 percent.

For the nine months ended Sept. 30, total kilowatt-hour sales were virtually the same as a year ago, with industrial sales down 0.6 percent, commercial sales up 1.9 percent and residential sales up 0.3 percent.

For the 12 months ended Sept. 30, total kilowatt-hour sales were down 0.3 percent from the same period a year ago, with industrial sales down 1.7 percent, commercial sales up 2 percent and residential sales up 0.5 percent.

The increases in commercial sales for the three-, nine- and 12-month periods were due primarily to continuing growth in the number of customers in the

company's southeastern Michigan service area.

The industrial sales increase in the third quarter resulted primarily from higher sales to large non-automotive customers. However, these increases were not enough to offset declining sales to the automotive and steel industries for the nine- and 12-month periods.

Residential sales were boosted during the year by the addition of new customers. However, for the third quarter this growth was not enough to offset the reduced use of air conditioning during the summer months.

CONTACT: Martin L. Bufalini II, (313) 237-8808, or Lorie N. Kessler, (313) 237-8807, both of Detroit Edison.

#90295p7898 10/22/1990 ~PR Newswire

RED WING, MN (OCT. 22) PR NEWSWIRE - Citizens Security Group Inc. (NASDAQ: CSGI) today reported operating results for the third quarter and nine months ended Sept. 30, 1990.

Third quarter premiums earned were $5,410,978 compared to $4,068,599 for the same period in 1989. Realized gains on investments were $6,812 in the third quarter of 1990 compared to $37,953 in 1989. Third quarter revenues totaled $5,957,942 compared to $4,473,298 reported in the same period a year ago. Net income was $24,931 compared to a net loss of $1,746 in last year's third quarter.

Premiums earned were $15,697,334 for the nine months of 1990 as compared to $11,769,074 for the same period in 1989. Realized losses on investments were $20,785 in 1990 compared to realized gains of $202,435 in 1989.

Nine month revenues totaled $17,293,696 in 1990 compared to $13,016,581 reported in the same period a year ago. Net income was $273,253 or $.11 per share for the nine months of 1990. This compares with net income of $527,506 or $.21 in last year's nine months.

"We are pleased to have a 33 percent increase in our premiums earned due to increased premiums written and to our acquisition of Insurance Company of Ohio. However, our third quarter produced a substantial number of claims primarily from storm damage.

"Our 1990 third quarter net income was positively impacted by approximately $242,000 as a result of our annual inventory and reassessment of reported loss reserves. In prior years, this adjustment was reflected in our fourth quarter operating results," said Spencer A. Broughton, chairman, president and CEO. "Our book value per share is $4.43 at Sept. 30, 1990."

Citizens Security Group Inc., which is a holding company engaged in the preferred risk property and casualty business, is part of an insurance group which also includes Citizens Security Mutual Insurance Company, Citizens Fund Insurance Company and Insurance Company of Ohio. Citizens Security Group Inc. common stock trades on the national over-the-counter market under the NASDAQ symbol CSGI.

OYSTER BAY, NY (OCT. 22) PR NEWSWIRE - Retail giant Wal-Mart Stores, Inc. has selected Acclaim Entertainment, Inc. (NASDAQ: AKLM) as "Vendor/Partner of the Quarter," representing the first time a video game publisher has been recognized in the history of the Wal-Mart vendor awards. Acclaim was selected by Wal-Mart executives based on its notable contribution to Wal-Mart's second-quarter growth, outstanding vendor communication, attentiveness and responsiveness to sales needs, and ongoing efforts to maximize its partnership with Wal-Mart.

"Acclaim is extremely proud to receive such recognition from Wal- Mart, one of the country's premier retailers," said Robert Holmes, president of Acclaim. "It is a pleasure working with this organization of professionals and we look forward to continuing to provide the company and its customers with the best service and products possible in the video game arena."

#90295p7908 10/22/1990 ~PR Newswire

MIAMI (OCT. 22) PR NEWSWIRE - American Savings and Loan Association of Florida (NASDAQ: ASLA) today reported net income of $942,000 for the third quarter ended Sept. 30, 1990 and a loss of $4.4 million for the nine months year to date. Pretax profits from continuing operations were $3.4 million for the quarter ended Sept. 30, 1990 and $837,000 for the nine month period.

According to Harris C. Friedman, chairman and chief executive officer of American Savings, "The third quarter of 1990 showed continued improvement, including an increase in net interest income to $19.2 million, while continuing to bolster loan loss reserves.

"The most important goal facing American Savings, our stockholders and depositors is that we continue to meet and exceed all current and future regulatory capital requirements imposed on the banking industry. Our challenge as a management team is to maintain the proper strategic balance between short term earnings and long term stockholder value in order to achieve this goal."

American Savings continues to meet all current regulatory capital requirements. As of Sept. 30, 1990, American Savings had total assets of $4.87 billion, making it the largest Florida based savings and loan association.

American Savings currently operates a network of five mortgage offices and 55 retail banking offices in Dade, Broward, Palm Beach, Pinellas, Hernando, Pasco and Hillsborough counties. American Savings is a member of the Federal Home Loan Bank System and its deposits are federally insured. American Savings' common shares are traded on NASDAQ under the symbol ASLA.

NEW YORK (OCT. 22) PR NEWSWIRE - Polaris Industries Partners L.P. (AMEX: SNO) announced today the results of operations for the third quarter of 1990. For the quarter ended Sept. 30, 1990, the partnership had sales of $121,524,000 and net income of $21,660,000 or $2.25 per unit. Sales for the third quarter represent an approximate 25 percent gain over the sales of $97,133,000 recorded in the third quarter of 1989. Net income and net income per unit for the third quarter of 1990 advanced 30 percent and 9 percent, respectively, over net income of $16,638,000 or $2.06 per unit for the comparable 1989 quarter. As has been previously reported, net income per unit is affected by the financial reporting income allocations to the general partner.

For the nine months ended Sept. 30, 1990, Polaris recorded sales of $222,442,000 and net income of $28,767,000 or $2.94 per unit. Sales for the nine months of 1990 rose 31 percent over sales of $170,395,000 for the first nine months of 1989, while net income and earnings per unit advanced 53 percent and 27 percent, respectively, over the $18,778,000 or $2.32 per unit recorded for the nine months ended Sept. 30, 1989. Net income for the first nine months of 1990 of $28,767,000 exceeded the net income of $26,190,000 recorded for the full year 1989.

Commenting on the results, Victor K. Atkins, Jr., general partner stated: "We are very pleased with these results. They were in line with plans and reflect continued strength in snowmobile shipments and to a lesser extent, ATV shipments in the quarter. We remain optimistic about the remainder of 1990 and continue to anticipate that results for the full year will show improvement over the strong performance achieved in 1989. Polaris continues to be the industry leader in snowmobiles, with its commitment to quality products, safety and environmental concerns."

Atkins also said, "the financial condition of the partnership remains strong. At Sept. 30, 1990 the partnership had no borrowings and had cash and cash equivalents of approximately $15.7 million. This compares to cash and cash equivalents of approximately $10.3 million at Sept. 30, 1989."

Polaris Industries Partners L.P. is a limited partnership which through a subsidiary partnership is engaged in the design, manufacture and marketing of snowmobiles, all-terrain vehicles and related parts and equipment. Polaris Industries Partners L.P. trades on the American Stock Exchange and the Pacific Stock Exchange under the symbol SNO.

MINNEAPOLIS (OCT. 22) PR NEWSWIRE - Apogee Enterprises, Inc. (NASDAQ: APOG) directors have authorized the company to repurchase up to 500,000 shares of Apogee common stock. The repurchase of shares will be accomplished from time to time through the open market or in private transactions. The company has approximately 13.6 million shares outstanding.

"In view of Apogee's strong financial position and the current price level of our stock, we believe that repurchase of our own shares represents an attractive investment opportunity that will benefit the company and our shareholders," said Donald W. Goldfus, chairman and chief executive officer. The repurchased shares will be used for general corporate purposes, including employee stock compensation plans, he added.

Apogee is an industry leader in the fabrication, installation and distribution

of glass and aluminum.

Its products and services include glass, windows and curtainwall for commercial and institutional construction and remodeling markets; curtainwall installation at major high-rise construction sites; metal and glass coating services; fabrication, sale and installation of automotive glass and accessories; and such consumer-oriented products as venetian blinds, shutters and anti-reflection picture frame glass.

Headquartered in Minneapolis, the company's stock is traded on NASDAQ's National Market System under the symbol APOG.

CONTACT: Donald W. Goldfus or William G. Gardner, of Apogee, (612) 835-1874; Michael Rosenbaum or Janet Denefe, of The Financial Relations Board, (312) 266-7800, for Apogee.

#90295p7911 10/22/1990 ~PR Newswire

OAK BROOK, IL (OCT. 22) PR NEWSWIRE - Chemical Waste Management, Inc. (CWM) (NYSE: CHW) announced today that Thomas E. Noel has been named president and chief operating officer of its Chem-Nuclear Systems, Inc. subsidiary and that Dr. Rodger Henson was selected as vice president of its Southern region to succeed Noel.

Noel has served since November 1984 as CWM's Southern region vice president, based in Houston. In his new position Noel will have total management responsibility for Chem-Nuclear's radioactive waste disposal and remediation services. He will be based at Chem-Nuclear's headquarters in Columbia, S.C.

Henson served from 1982 until 1989 as general manager of the company's Emelle, Ala., facility which is the largest of the company's 16 treatment and disposal facilities around the country. Most recently he had been regional operations vice president for CWM's Southern region, based in Marietta, Ga.

Noel joined CWM after serving as president of EMPAK, Inc., an environmental services company in Houston. Prior to that he had served by presidential appointment as chief executive of the Strategic Petroleum Reserve Program.

Prior to joining CWM in 1978, Henson had worked for more than nine years as a research chemist with the U.S. Department of Agriculture.

Noel was named to his new position succeeding Victor J. Barnhart, who was elected president and chief operating officer of The Brand Companies, Inc., the nation's largest asbestos abatement contractor, in which CWM owns a 48 percent equity position and in which CWM has announced its intention to increase the ownership to 52.5 percent pending the expiration or termination of the applicable regulatory waiting period.

Chemical Waste Management is the nation's largest environmental services company specializing in the reduction, recycling, treatment and disposal of hazardous and radioactive wastes and in environmental restoration projects.

#90295p7914 10/22/1990 ~PR Newswire

MINNEAPOLIS (OCT. 22) PR NEWSWIRE - Apogee Enterprises, Inc. (NASDAQ: APOG) directors have adopted a shareholder rights plan designed to obtain fair and equal treatment for all Apogee shareholders, and to guard against coercive tactics in the event of a proposed takeover.

"Apogee has been studying the adoption of a rights plan for more than a year," said Donald W. Goldfus, chairman and chief executive officer, "and we feel it is appropriate to join the many public companies that have adopted such plans.

"This shareholder rights plan, like other protective measures adopted in prior years, is intended to preserve the long-term value of Apogee for all of its shareholders," Goldfus said. "It does not prevent a takeover, but it gives the board of directors added leverage to guard against coercive tactics that could be used to gain control of Apogee without paying all shareholders a fair price."

Under the plan, rights to purchase shares of a new series of preferred stock will be distributed as a dividend at the rate of one right for each share of common stock held by shareholders of record on Nov. 6, 1990. The rights, which will expire ten years later on Nov. 6, 2000, will automatically accompany current shares outstanding and will trade with them. The rights distribution is not taxable to shareholders.

Each right will entitle the holder to buy one one-hundredth of a share of a new series of junior preferred stock at an exercise price of $70. The rights will be exercisable only if a person or a group (with certain limited exceptions) acquires or makes a tender offer for ten percent or more of Apogee's outstanding common stock.

Certificates representing the rights will be sent to shareholders only if they become exercisable. The Apogee board may redeem the rights at one cent per right at any time prior to the 20th day following the acquisition of a ten percent position.

If an acquiror purchases ten percent of Apogee's common stock without the board redeeming the rights, each right will entitle its holder to purchase, at the right's then-current exercise price, shares of Apogee common stock having a market value of twice the right's exercise price.

The rights will also be exercisable for discounted Apogee common stock in the event that an acquiror merges into Apogee and leaves Apogee's stock outstanding and unchanged.

If Apogee is acquired in a merger or sells 50 percent or more of its assets or earning power, each right will entitle its holder to purchase a number of shares of the acquiring company's common stock having a market value of twice the right's exercise price.

CONTACT: Donald W. Goldfus or William G. Gardner, of Apogee, (612) 835-1874; Michael Rosenbaum or Janet Denefe, of The Financial Relations Board, (312) 266-7800, for Apogee.

#90295p7919 10/22/1990 ~PR Newswire

ST. PAUL, Minn. (OCT. 22) PR NEWSWIRE - Bioplasty, Inc. (NASDAQ: BIOP) announced record sales and profits for its year ended 1990. Net revenues for fiscal 1990 were $7,872,441 or a 65 percent increase compared to net revenues for fiscal 1989. Net income for fiscal 1990 was $445,791 compared to net income for fiscal 1989 of $286,398. Net income per common share for fiscal 1990 was $.15 compared to net income per common share for fiscal 1989 of $10. The company attributes the increase in net income for fiscal 1990 to increased sales of its MISTI(TM) Silicone Gel Breast Implants.

In December of 1989 Bioplastique(TM) Micro-Textured Implants were introduced into the western European market. This product is an injectable implant used to correct facial contour defects. Its major advantage over other injectable materials currently in use is that Bioplastique is not biodegradable and will result in a permanent correction of a defect. The company believes that the

same advantages which make Bioplastique useful in cosmetic surgery will allow the material to be effective for implanting in the tissue surrounding the base of the bladder and could restore control to the millions of women who experience urinary stress incontinence. Bioplasty is currently seeking a joint venture partner to exploit this new product potential in the urology market.

On Aug. 30, 1990, Bioplasty introduced MISTI GOLD(TM) Bio-Oncotic(TM) Gel Breast Implant, a technological breakthrough in breast implants. The MISTI GOLD has received market clearance in the United States and several European countries. The MISTI GOLD ushers in a new generation of biomaterials technology. Traditional silicone and saline filled mammary implants have been found to block x-rays creating problems in locating cancerous tissues on mammograms. Bio-Oncotic gel is a gold-colored implant filler which has been found to be more transparent to x-rays than either silicone gel or saline solution filler.

The company will hold its annual shareholders meeting at 4 p.m. on Dec. 18, 1990, at the Omni North Star Hotel in Minneapolis.

Bioplasty, Inc. has more than 18 years experience in the development and marketing of plastic surgery products worldwide. Bioplasty stock is currently traded on NASDAQ national market system under the symbol "BIOP."

HOUSTON (OCT. 22) PR NEWSWIRE - Baroid Corporation (NYSE: BRC) today announced that its board of directors has established a record date of Oct. 29 1990, for the spin-off of its petroleum services business approved by the board in August.

The spin-off will be effective on that date and old Baroid Corporation will change its name to Tremont Corporation and the spun-off petroleum services entity will adopt the name Baroid Corporation

Stockholders of record on the record date will be sent an information statement and a form for use in transmitting their old Baroid stock certificates to the transfer agent.

Upon delivery of the old stock certificates, stockholders will receive one share of new Baroid Corporation common stock for each old share held in the company. In addition, the old Baroid stock certificates will be reissued bearing the new name, Tremont Corporation.

The company also stated that the New York Stock Exchange has advised the

company that the last trading day for old Baroid Corporation common stock will be Oct. 29, 1990. Trading in both new Baroid Corporation (NYSE: BRC) and Tremont Corporation (NYSE: TRE) will begin on Oct. 30 on a "when-issued" basis.

#90295p7921 10/22/1990 ~PR Newswire

ATLANTA (OCT. 22) PR NEWSWIRE - Georgia Power Co.'s net income after preferred stock dividends was $376 million for the first nine months of 1990, $16 million less than earnings for the same period last year.

Company earnings for the 12 months ending Sept. 30 were $433 million, compared with $478 million in earnings for the same period in 1989.

The earnings decreases were attributed to higher operational costs and insufficient rate recoveries from Plant Vogtle and Plant Scherer.

Georgia Power has asked the Georgia Supreme Court to review a state Public Service Commission ruling disallowing a portion of the utility's investment in Plant Vogtle Unit 1. If the disallowance is upheld, the utility will have to charge an additional $190 million against earnings.

The company has also agreed in principle to sell Plant Scherer Unit 4. "We experienced a steady increase in sales this summer while our customers set five new records for electricity consumption," said Bill Dahlberg, Georgia Power's president and chief executive officer. "But even though our sales were better than expected, higher costs continued to reduce our earnings."

Retail sales were 4.6 percent higher for the first nine months of 1990 than for the same period in 1989, increasing from 39,615,898 to 41,457,519 megawatt hours.

Also, Georgia Power reported the addition of more than 27,000 new customers during the year ending Sept. 30.

#90295p7925 10/22/1990 ~PR Newswire

CINCINNATI (OCT. 22) PR NEWSWIRE - Du Pont (AMEX: DPU) and Stolle Research and Development Corporation have formed a partnership to tap the rapid growth expected in the absorbable medical products market.

The new company, Medisorb Technologies International L.P. (MTI), will partner with pharmaceutical, biotechnology, and medical device companies to

incorporate absorbable technology in new and existing products.

The company will develop drug delivery systems and implants, with services ranging from concept and raw materials to testing and manufacturing. MTI combines Du Pont's experience in polymers and material science with Stolle's expertise in biomaterials and controlled-release technology.

The innovative technology allows drugs encapsulated in absorbable polymer to be injected or implanted into humans or animals. As the polymer is absorbed, the drug is released at a controlled rate. The polymer breaks down into lactic acid, which occurs naturally in the body.

The company currently is working on more than 50 applications for the human and animal health markets. Anticipated growth in bioabsorbable polymer systems for the human health market will increase from $3 million this year to more than $200 million by 1994. Growth in the animal health market is expected to be even higher.

"MTI can do more than just meet the immediate needs of this expanding market. The combination of Stolle and Du Pont will help turn biomedical applications that were just a vision five years ago into reality," said Dr. Lee Beck, executive vice prsident of Stolle Medical Products, a subsidiary of Stolle Research and Development Corporation.

"Rarely do you see synergy between two companies result in significant advances in both medicine and biotechnology. This is an immediate opportunity with exciting implications for our customers in both fields," said John C. Breckenridge, director of industrial chemicals for Du Pont.

"We believe the potential for absorbable polymers in the biomedical field is limitless," said Dr. Danny H. Lewis, president of MTI and a world-renowned expert in the technology.

"For instance, many of the new genetically engineered drugs to treat cancer will require some form of time-release approach to make them practical for human use."

He also cited vaccines and steroids for hormone replacement as two applications in which sustained, predictable dosages over an extended time period will minimize side effects and improve the effectiveness of treatment.

#90295p7926 10/22/1990 ~PR Newswire

MINNEAPOLIS (OCT. 22) PR NEWSWIRE - AT&T today announced an innovative

consumer program that will enable Minnesota customers to purchase AT&T products at considerable discounts.

Called "AT&T Quality Connections," the program enables AT&T long-distance customers to buy AT&T products and pay for them in 12 monthly installments. There is no finance charge. In addition, the products will be discounted up to 25 percent based on customers' monthly AT&T long-distance charges. New and current subscribers to the AT&T Reach Out(R) America long-distance calling plan can earn discounts of up to 50 percent.

"This plan makes AT&T an even better value for our Minnesota customers," said Jim Shannon, manger of the AT&T Quality Connections program. "The beauty of the plan is that it gives consumers one-stop shopping convenience, and installment plan and price savings - all wrapped up into one neat offer."

The AT&T 5325 Cordless Phone, priced at $179.88, and the AT&T 1125 Answering System, priced at $129.96, are offered through the Quality Connections program. Monthly payments on the answering system, for example which are $10.83 (plus shipping and handling), will be reduced by ten percent of each month's AT&T long-distance charges, with a maximum discount of $2.71 per month.

To participate in the Quality Connections program, customers can call 1-800-242-1003, Monday through Friday between 9 a.m. and 9:30 p.m. (Eastern time) and Saturday and Sunday between 9 a.m. and 5:30 p.m. (Eastern time), or write to: AT&T Quality Connections Program, P.O. Box 2502, Cedar Grove, N.J. 07009-9822.

AT&T will deliver the product directly to customers' homes at a charge of $7.90 per product, where it can be trialed free for 30 days. AT&T plans to expand the product line offered through the Quality Connections program in 1991.

CONTACT: Mike Pruyn, (612) 334-2170 (office), (612) 431-4160 (home), or Jack Matosian, (612) 334-2172 (office), (612) 559-5112 (home), both of AT&T.

NEW YORK (OCT. 22) PR NEWSWIRE - National Football League Properties, Inc., the marketing arm of the National Football League, has signed a new three-year agreement with The Coca-Cola Company (NYSE: KO) for exclusive worldwide marketing and promotional rights in the soft drink category through March 1993.

NFL Commissioner Paul Tagliabue and M. Douglas Ivester, president, Coca-Cola USA, today jointly announced the agreement which gives Coca-Cola the exclusive rights to use the name, symbols, emblems, designs and colors of the NFL and its individual member clubs in the soft drink arena. This agreement includes rights to the Super Bowl and AFC-NFC Pro Bowl.

Coca-Cola has been the official soft drink beverage sponsor of the National Football League since 1984. The contract also gives Coca-Cola rights to market its association with the NFL internationally. The company has been designated an official sponsor of the American Bowl, a series of games played outside of the U.S. In addition, Aquarius, a Coca-Cola product in Japan, now is the official sports drink of the NFL in Japan.

"As the National Football League continues to gain momentum outside the U.S., it is only natural for us to expand our partnership with Coca-Cola and its international network," said Mr. Tagliabue. "The tremendous presence and leadership of Coca-Cola will enhance our efforts."

Under separate contracts, The Coca-Cola Company and its bottlers also have promotional arrangements with many teams and players, as well as product availability in 27 of 28 NFL stadiums.

CONTACT: Maureen Rosen of NFL Properties Inc., (212) 836-0660, or Bob Bertini of Coca-Cola USA, (404) 676-5173.

#90295p7930 10/22/1990 ~PR Newswire

HOUSTON (OCT. 22) PR NEWSWIRE - ConVest Energy Partners, Ltd. (AMEX: CEP) announced today that definitive proxy materials were mailed to unitholders of record on Sept. 28, 1990, notifying them of a Dec. 7, 1990 meeting at which unitholders will vote on a proposal to combine CEP with two entities affiliated with ConVest Energy Corporation (CEC), the general partner of CEP.

The proposed business combination involves CEP, ConVest Subco, Inc. (Subco), a subsidiary of CEC and Sanderling Oil Company, L.P. (Sanderling), a Delaware limited partnership affiliated with CEC. The definitive merger agreement provides for a newly organized Texas corporation (Newco) to succeed to all of the assets, liabilities and operations of CEP, Subco and Sanderling pursuant to a series of tax-free transactions (the Combination).

If the combination is approved, unitholders will receive one share of Newco Common Stock for every two units of CEP that they currently hold. Upon consummation of the combination, Newco will change its name to Convest Energy Corporation and its common stock will be listed on the AMEX.

Consummation of the combination requires that CEP unitholders holding more than 50 percent of the units outstanding, vote in favor of the combination. It is also required that more than 50 percent of the unitholders voting at the meeting, other than CEC, vote in favor of the combination. The Dec. 7, 1990 meeting will be held at 10 a.m., CST, at the Westin Oaks Hotel, 5011 Westheimer, Houston.

ConVest Energy Partners, Ltd. is a publicly traded master limited partnership whose principal business activities include the development and operation of oil and gas properties and the acquisition of additional producing properties. ConVest Energy Corporation serves as general partner of CEP and currently owns approximately 14 percent of the partnership interests.

#90295p7934 10/22/1990 ~PR Newswire

RICHMOND, VA (OCT. 22) PR NEWSWIRE - RF&P Corporation (NASDAQ: RFPC) reported today that consolidated net earnings for the third quarter of 1990 were $10.0 million, or $0.57 per share, up fifteen percent when compared with the $8.8 million, or $0.50 per share, earned in the third quarter of 1989.

The Company reported that total operating revenues in the third quarter were $26.3 million, up fifteen percent over 1989. Rail transportation revenues were down three percent due to a decline in freight traffic volume, partially offset by a higher level of pricing. Real estate revenues increased forty percent due to higher cash flows from the Crystal City real estate projects, partially offset by lower gain on sale of land and lower partnership income.

Total operating expenses increased $2.1 million due primarily to an increase in the reserve for estimated cleanup costs in connection with a creosote contaminated site in Spotsylvania County.

For the first nine months of 1990, net earnings were $20.4 million, or $1.16 per share, down seventeen percent when compared to the $24.6 million, or $1.39 per share, earned during the same period last year.

Total operating revenues were $60.7 million, up $2.1 million, or four percent. The increase was attributable to higher cash flows from the Crystal City real estate projects, partially offset by lower partnership income and a reduction in freight traffic volume.

Total operating expenses increased a modest one percent. The increase in the reserve for estimated environmental cleanup costs and higher real estate operating costs were nearly offset by the decrease in rail operating expenses. The decrease in rail expenses was attributable to the recognition of income, that had been previously deferred, as a result of the arbitration settlements in connection with the Norfolk Southern/Conrail diversion at Potomac Yard and

lower rail operating expenses.

Investment income declined $5.1 million as a result of the $6.8 million gain from the 1989 sale of a portion of the Company's investment in Trailer Train Company stock. Partically offsetting the 1989 stock gain was higher interest income.

Also affecting 1990 earnings was the $3.9 million write-off of expenses incurred in connection with the 1989-90 consolidation discussions with CSX Corporation. Such discussions ultimately led to a merger agreement which was terminated on March 23, 1990.

ATLANTA (OCT. 22) PR NEWSWIRE - The Nuclear Regulatory Commission staff has proposed a $40,000 civil penalty against Georgia Power Co. for alleged violation of NRC requirements at the Vogtle nuclear power plant, operated by Georgia Power Co. near Waynesboro, Ga.

The NRC has notified Georgia Power Co. that the fine is being proposed because of the company's failure to make offsite notifications of emergency conditions at the plant on March 20, in a timely manner as required by regulations.

The NRC said the plant experienced a loss of all vital offsite power to Unit 1 on March 20 when a truck in the low voltage switchyard backed into a support column for an offsite power line. An emergency diesel power generator failed to operate properly for 36 minutes, resulting in declaration of a Site Area Emergency. Plant personnel failed to make initial emergency notification to the Burke County (Ga.) Emergency Operations Center and the Georgia Emergency Management Agency Operations Center within the required 15 minutes.

Actual notification took approximately one hour, the NRC said, due to the failure of the plant's Emergency Notification Network in the plant control room because of the loss of offsite power and the design of the backup network which could not reach the Georgia emergency agencies.

The NRC said plant personnel failed to use an emergency notification system located nearby in the plant's Technical Support Center, a failure compounded by training and procedural deficiencies which contributed to delay of the notification process.

The plant did notify the NRC within the prescribed time and notified South Carolina within 17 minutes. However, the NRC said the agency was particularly concerned with the Georgia failure because Burke County is the location of most of the residents in the emergency planning zone around the plant.

The NRC said the base civil penalty for this violation was $80,000 but that it was reduced in this case by 50 percent due to the company's "prompt and extensive corrective actions to prevent recurrence." These actions include a significant modification to the primary emergency notification system to

include an uninterruptable power supply, modification of the backup system to enable contact with all outside agencies, installation of simultaneous facsimile transmission capability, enhanced training of emergency personnel, and procedural changes giving emergency notification of Georgia agencies increased priority.

The company has 30 days from receipt of the notice of the proposed civil penalty to either pay the fine or to protest it, in whole or in part.

SPRINGFIELD, MASS. (OCT. 22) PR NEWSWIRE - Massachusetts Mutual Life Insurance Company and management of Oppenheimer Management Corporation (OMC) today announced the completion of their acquisition of Oppenheimer Management Corporation, one of the largest mutual fund management companies in the United States.

MassMutual, the nation's 11th largest life insurance company, and approximately 60 members of OMC's management acquired the firm from British & Commonwealth Holdings PLC.

OMC is one of the country's leading investment management companies, with over $14 billion of mutual fund assets under management. The purchase price is approximately $150 million, subject to adjustments.

Earlier this month, shareholders of the funds managed by Oppenheimer approved new investment advisory agreements between OMC and the funds. These agreements had been approved by the mutual funds' independent directors in July and August.

Following the acquisition, Oppenheimer Management Corporation will continue to operate independently and will retain its key management. The change of ownership will not affect shareholders' investments in Oppenheimer mutual funds.

MassMutual President and Chief Executive Officer, Thomas B. Wheeler, said, "MassMutual's ownership interest in OMC, consistently one of the best known names in the mutual fund industry, demonstrates our desire to be a major player in this industry."

OMC President and Chief Executive Officer, Jon S. Fossel, stated: "The combination of our present management team with one of the highest quality life insurance companies in the U.S. will make Oppenheimer Management Corporation stronger than ever."

A $25 billion company, MassMutual is a leading provider of individual life products, employee life, health and pension benefits and investment management services, including its own family of nine mutual funds. As a mutual life insurer, MassMutual has no stockholders, but shares its financial gains in the form of dividends to policyholders.

Oppenheimer Management Corporation manages 45 mutual funds with assets in excess of $14 billion in more than 1.2 million shareholder accounts.

OAK BROOK, IL (OCT. 22) PR NEWSWIRE - Champion Parts, Inc. (NASDAQ: CREB), a major remanufacturer of replacement parts for cars, trucks and farm equipment, today reported a profit for the third quarter and nine months ended Sept. 30, 1990, compared to a loss in both of these periods last year.

For the third quarter of 1990, the company reported net earnings of $192,000 or 5 cents per share, compared to a loss of $393,000 or 11 cents per share in the 1989 quarter. Net sales remained steady at $31,181,000, compared to $31,312,000.

In the nine months of 1990, the company reported net earnings of $871,000 or 24 cents per share, compared to a loss of $1,460,000 or 40 cents per share a year earlier. Net sales increased to $92,827,000 from $90,429,000.

Charles P. Schwartz Jr., chairman and chief executive officer, said, "Despite intense competition in the automotive aftermarket, Champion Parts has sustained the turnaround that began with the first quarter of 1990. We expect this positive trend to continue in the fourth quarter."

Schwartz attributed the gains to positive factors that have been evident since the beginning of the year, namely, improved product mix, along with the benefits of price increases and overhead cost reductions. Lower interest expense reflected a reduction in debt.

"Inventories having been reduced, factory overhead is now more fully absorbed by higher production levels. We are currently on overtime at some plants," said Schwartz. "Through this program, Champion Parts has been positioned to operate profitably under present aftermarket conditions. New business is being sought only if it is expected to enhance Champion's profit margins.

"Because of our diversity of customers," Schwartz continued, "we believe Champion Parts should benefit from strength in auto maintenance and repairs

that many industry observers believe occurs in an unsettled economy such as now exists. Moreover, while gasoline is currently more expensive, it is readily available so that driving remains at high levels, causing vehicle parts to wear out."

Champion Parts is the country's largest independent automotive replacement parts remanufacturer in the multi-billion-dollar automotive, truck and farm equipment aftermarket. It remanufactures, tests and distributes approximately 5 million parts each year throughout the U.S. and Canada. Its major products, representing some 80 percent of the sales volume of rebuilt parts sold by automotive jobbers and retail outlets, include fuel system products such as carburetors, and a complete line of automotive electrical and mechanical parts. The company employs 2,100 men and women and operates five major plants in the U.S. and Canada.

WILLIAMSBURG, VA (OCT. 22) PR NEWSWIRE - The enactment of legislation calling for further government interference in the gasoline market could seriously weaken the economic viability of branded gasoline marketing, the president of Amoco Oil Company said here today.

"Further government meddling in our businesses could lead to higher gasoline prices and reduced quality and efficiency," William G. Lowrie told the North Carolina Petroleum Marketers Association annual fall convention.

He said that issues including divorcement, open supply and proposed amendments to the petroleum marketing practices act, could divide suppliers and jobbers and deteriorate into an 'us versus them' equation.

Increased governmental intrusion could well start a chain of events which would restrict the ability of marketers to run their own businesses and respond to a rapidly changing and ever-competitive marketplace, he said.

"I strongly believe that we can ill afford to invite additional governmental controls over our businesses and our future," Lowrie said, noting that Congress has not been able to live within its own budget, produce a rational

energy policy, or solve the nation's economic crisis.

Lowrie said that temporary market distortions that have strained operations, marketing activities and customer relations have moderated to a great extent.

Suppliers and jobbers alike should concentrate efforts on actions that will contribute to mutual success in the marketplace in the long-term, he said.

"One of the greatest strengths of our business has been our ability to accept risks and to plan activities on a basis that extends beyond short-term considerations," he said.

Amoco has worked hard and invested significant human and financial resources to support the value of its name, its reputation for quality, and its commitment to environmental responsibility, Lowrie said.

The company's vested, long-term interest in -- and commitment to -- the success of jobbers, includes product quality assurance, research, advertising, sales promotions, and environmental innovations.

By working toward mutual objectives, "Amoco and its jobbers are better able to respond effectively and forthrightly to one another's concerns and ideas for growth," he said.

The public is sending a loud and clear message that there will be a strong demand for products from marketers who are environmentally responsible, he added. Amoco will continue to commit resources to meet the increasingly demanding environmental and fuel-economy standards that lie ahead, he said.

TROY, N.C. (OCT. 22) PR NEWSWIRE - First Bancorp's (NASDAQ: FBNC) president, Mr. John Wallace, announced today that consolidated net income for the quarter ended September 30, 1990 was $521,731, or 38 cents per share, compared to $492,250, or 36 cents per share, for the same quarter of 1989. Net income for the nine months ended September 30, 1990 was $1,442,313, or $1.05 per share, compared to $1,411,550, or $1.03 per share, for the corresponding period of 1989. Earnings per share have been restated to reflect 10 percent stock dividends paid in January 1990 and 1989.

Net interest income increased 13.7 percent to $2,526,362 for the three months ended September 30, 1990 compared to $2,222,263 for the same period of the previous year. Non-interest expenses increased $14.3 percent, primarily as a result of increased personnel costs.

Additionally, the Company received regulatory approval of its plans to open new First Bank branch offices in Laurinburg and Aberdeen, two new markets for the Bank.

First Bancorp is a bank holding company based in Troy, North Carolina. Its principal activity is the ownership and operation of First Bank, a state-chartered bank that operates 25 branch offices in an eight county market area centered in Troy.

#90295p7951 10/22/1990 ~PR Newswire

CLEVELAND (OCT. 22) PR NEWSWIRE - The Lubrizol Corporation (NYSE: LZ) announced that consolidated revenues for the third quarter of 1990 which ended on Sept. 30 were $366.6 million, an increase of 33 percent over the same period of last year. Specialty Chemicals shipments increased by 16 percent over the third quarter of 1989.

Consolidated net income was $96.3 million, or $2.74 per share. This included a gain of $62.9 million after taxes and related expenses, or $1.79 per share, from the sale of Genentech stock. These results also included a charge of $5 million, or $.14 per share, related to the planned closing of manufacturing facilities at Huelva, Spain. Consolidated net income for the third quarter of 1989 was $21.4 million, or $.57 per share.

For the first nine months of 1990, consolidated revenues were $1.1 billion, an increase of 14 percent over the same period last year. Consolidated net income was $158.5 million, or $4.42 per share. This includes the charge and gain mentioned above. For the first nine months of 1989, consolidated net income was $78.1 million, or $2.09 per share. There were no special charges or gains during this period.

L.E. Coleman, chairman, said, "We are pleased with the strong performance of the Specialty Chemicals segment in the third quarter. Shipments increased by 16 percent over the relatively weak third quarter of 1989 and were a record for the company. Again this quarter, most of the increase was in the international market. Shipments to North American customers improved in the third quarter but remained behind last year for the nine months. Prices were increased late in the third quarter due to the large increases in crude oil prices and the effect that this is having on our material costs. Uncertainty about the Mideast situation coupled with increasing prices for lubricant components may have inspired some inventory buildup by our customers and partially explain the large volume of shipments in the third quarter.

"The Huelva, Spain, manufacturing facility started production in 1968. With

the entrance of Spain into the European Economic Community and the resulting removal of import restrictions, the Spanish lubricant market has steadily moved from southwestern Spain, where Huelva is located, to the northeastern part of the country. Better road, rail and water transportation has influenced this move. To better serve our customers, we will establish storage facilities in the Barcelona area and close our Huelva plant.

"The merger of Genentech and Roche Holdings was finalized in September. We received $106 million in cash and three million shares of Genentech redeemable common stock."

NEW ORLEANS (OCT. 22) PR NEWSWIRE - Newpark Resources, Inc. (NASDAQ: NPRS) today reported net income of $464,000 ($0.11 per share) on revenues of $11,559,000 for the third quarter ended Sept. 30, 1990. This compares to a net income of $274,000 ($0.10 per share) on revenues of $10,026,000 in the corresponding quarter of 1989.

For the nine months, Newpark's net income totaled $953,000 ($0.29 per share) on revenues of $32,885,000, which compares with net income of $1,167,000 ($0.43 per share) on revenues of $29,506,000 for the same period of 1989.

Per share results have been adjusted to reflect the additional shares issued in connection with the June 28, 1990 restructuring and a 1-for-10 reverse stock split which became effective July 16, 1990.

DALLAS (OCT. 22) PR NEWSWIRE - A new generation of products designed to significantly improve the screening accuracy and consistency of Pap smears and other cytologic samples was introduced by Cytyc Corporation at the American Society of Clinical Pathologists. These products, currently in clinical trials, provide an "end-to-end" solution for the accuracy problems associated with cervical cancer screening and other diagnostic procedures in cytology.

Stanley N. Lapidus, president of Cytyc, said: "Our products are designed to help physicians and cytotechnologists control the Pap smear procedure from beginning to end, including cell collection, preparation, screening and analysis which provides for improved patient diagnosis. Cytyc believes that the innovative technology contained in our "end-to- end" approach will not only lead to a new standard of consistency and accuracy, but will also result in better medicine at lower cost.

"The introduction of our technology provides a timely response to the increased concern for diagnostic accuracy, the shortage of cytotechnologist, and new federal regulations," he added.

According to Lapidus, clinical trial sites for Cytyc's products include New England Medical Center, Salem Hospital and Brigham and Women's Hospital. Martha Hutchinson, M.D., Ph.D., of New England Medical Center, said, "Results from the initial stages of our trials with Cytyc's products have far exceeded our expectations. By significantly improving the quality of the Pap smear itself, as well as offering computer-based visual and quantitative analysis of the smear, Cytyc's products address concerns about the error rate of Pap smear screening.

Cytyc's products include the ThinPrep(R) Processor, which prepares a thin uniform layer of cells on a slide from the patient's sample rather than one "smeared" onto a slide, and the CDS-1000(tm) System, a computer directed screener which analyzes the slides prepared by the ThinPrep Processor. Additional products include proprietary reagents and disposables for Pap smears and for cytological applications.

Cytyc Corporation is developing a range of products for the clincal cytology laboratory to lower test cost while providing tools to improve the accuracy of cytologic diagnosis. These products include the end-to- end solution for Pap smear screening as well as applications in other areas of cytology, histology and pathology. The company's headquarters and research and production facilities are located in Marlborough, Mass.

STOUGHTON, MA (OCT. 22) PR NEWSWIRE - Reebok will be the exclusive athletic footwear advertiser on the NBC network Olympic broadcasts from Barcelona in 1992, it was announced today by David Ropes, Reebok vice president of marketing services.

The company has signed a multi-million dollar contract with NBC, granting Reebok footwear exclusivity during the broadcast period of July 24 to Aug. 9. Reebok's Olympic involvement also includes a variety of merchandising and promotional opportunities.

"The 1992 Olympics are one of the most important international sporting events " said Ropes. "The sponsorship will speak directly to our consumers through our advertising, and our relationship with NBC Sports will be extended through to the retail level with extensive national consumer promotions," he continued.

Reebok International Ltd. (NYSE: RBK), headquartered in Stoughton, Mass., is a leading designer and marketer of active lifestyle and performance products, including footwear and apparel.

The company's operating units include the Reebok footwear and apparel divisions, The Rockport Company, AVIA International and Boston Whaler, maker of recreational boats.

CINCINNATI (OCT. 22) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) today reported 1990 third quarter net income of $26.7 million or $.43 per share, compared with 1989 third quarter net income of $29.2 million, or $.41 per share. The increase in earnings per share occurred despite the reduction in net income, as a result of fewer average shares outstanding during the 1990 third quarter. Net revenues for the 1990 third quarter increased to $562.5 million from $468.9 million in the 1989 third quarter.

Penn Central's net income is computed after a deduction in lieu of current federal income tax, because income that would otherwise be taxable is offset by pre-reorganization loss carryforwards. This deduction is not accruable or payable. The company's third quarter 1990 income before this deduction was $39.6 million, or $.63 per share.

Net income for the first nine months of 1990 was $77.8 million, or $1.22 per share. For the first nine months of 1989, income before a gain on the disposition of foreign wire and cable manufacturing operations was $80.3 million, and earnings per share before the gain was $1.14. Including this gain, net income for the first nine months of 1989 totaled $148.8 million, or $2.10 per share.

Penn Central ended the third quarter of 1990 with shareholders' equity of $1.6 billion, or $30.45 per share.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services, insurance and energy.

#90295p7963 10/22/1990 ~PR Newswire
HERSHEY, PA (OCT. 22) PR NEWSWIRE - Hershey Foods Corp. (NYSE: HSY) today announced record consolidated net sales and earnings from operations for the third quarter ended Sept. 30, 1990.

Net sales were $735,438,000 compared with $682,375,000 for the third quarter of 1989. Net income was $56,557,000, or $.63 per share, an increase of 8.4 percent, compared with $52,195,000, or $.58 per share, for the same qarter last year.

Net sales for the first nine months of 1990 were $1,952,543,000 compared with $1,740,093,000 for the first nine months of 1989. Net income was $169,491,000 or $1.88 per share, compared with $116,964,000, or $1.30 per share, for the comparable period last year.

Net income for the first nine months includes a one-time, after-tax gain of $35,295,000, or $.39 per share, as a result of the sale of the corporation's interest in AB Marabou, a Swedish confectionery company, which was consummated on May 23, 1990. Excluding this one-time gain, net income increased by 14.6 percent for the nine-month period. Weighted average shares outstanding were 90,186,336 for all periods.

"As we expected, the increase in net sales and net income for the third quarter was somewhat less than was achieved during the first half of the year. Nonetheless, our results are quite good, especially when viewed in the context of our significant investment in new products and last year's extremely strong third quarter," said Richard A. Zimmerman, chairman and chief executive officer. "Consolidated net sales grew primarily as a result of volume growth, particularly as it relates to new products, as well as the acquisition of Ronzoni Foods Corporation in February 1990. Hershey Chocolate U.S.A. and Hershey Pasta Group were the primary contributors to increased earnings in the quarter as a result of the higher level of sales they achieved.

"We are pleased with our results for the third quarter and first nine months because they were achieved despite accelerated, costly new product activity, as well as constant competitive pressures. We firmly believe our current investments in new products will pay longer-term benefits in terms of market share growth and profitability," Zimmerman concluded.

VINEYARD, UT (OCT. 22) PR NEWSWIRE - As part of its announced modernization program, Geneva Steel (NYSE: GNV) said today that it plans to install a continuous casting facility designed to produce thin slabs as well as conventional thick slabs. In a "quick exchange" operation, the caster will convert from producing conventional slabs to producing thin slabs.

The facility will be connected to Geneva's existing rolling mill operation to allow direct rolling of cast slabs without the necessity to reheat the slabs from cold.

Joseph A. Cannon, chairman of the board and chief executive officer, said, "Geneva is the first United States producer to announce the installation of thin slab casting at an integrated steel plant. This newest phase of our modernization program demonstrates Geneva's intention to incorporate technological advancements into our steelmaking operations."

The new caster will be designed to produce conventional slabs of six inches thick, which can be utilized to produce Geneva's existing product mix of hot-rolled sheet, plate and pipe. Typical end uses for these products include

gas and water pipelines, ships, fabricated metal products and construction applications.

The caster will also be engineered to produce two-inch thin slabs.

The operating cost benefits of the new caster will further contribute to Geneva's already low cost steel production. Geneva's steel in currently produced in open hearth furnaces, which are scheduled to be replaced next year by basic oxygen process (Q-BOP) furnaces currently under construction.

Geneva has selected SMS Concast, a member of the SMS Group, to design the caster facility. SMS will incorporate into the design of Geneva Steel's continuous caster facility the experience of the first Compact Strip Production plant. The SMS Group has designed the widest caster currently operating in the world, and has also designed the first commercially operating thin slab caster," said Herb Fastert, president of SMS Concast.

Geneva Steel has also selected Lockwood Greene to perform construction engineering and Layton Construction of Utah to construct the facility.

#90295p7977 10/22/1990 ~PR Newswire

WILKES-BARRE, PA (OCT. 22) PR NEWSWIRE - Franklin First Financial Corp. (NASDAQ-NMS: FFFC), parent holding company of Franklin First Federal Savings Bank, today announced that net income for the third quarter was $1.7 million or 36 cents per share, compared to $1.5 million or 32 cents per share for the same period last year, an increase of 8.3 percent.

For the nine months ended Sept. 30, 1990, net income totaled $5 million or $1.06 per share, compared to $4.3 million or 89 cents per share for the nine months ended Sept. 30, 1989, an increase of 17.5 percent.

Elmer J. Klimchak, chairman and chief executive officer of Franklin, stated, "We are very pleased with our results, particularly with the current economic conditions adversely affecting so many financial institutions. Deposits are up, asset quality has improved, and performance ratios remain strong."

At Sept. 30, 1990, assets stood at $841.9 million, deposits increased to $646.1 million, up $4.9 million from the previous quarter. Shareholders' equity equaled $97.6 million for a book value of $21.50. With goodwill of only $2.9 million, tangible book value stood at $20.86.

Franklin improved its asset quality ratios during the third quarter. Non-performing loans at Sept. 30, 1990, totaled $7.5 million, 1.4 percent of total gross loans compared to $7.8 million, 1.5 percent of total gross loans at the end of the second quarter of 1990. The allowance for loan losses totaled $4.2 million, 55.9 percent of non- performing loans at Sept. 30, 1990, compared to $4 million, 50.4 percent of non-performing loans at the end of the second quarter of 1990.

During the quarter, Franklin completed the first phase of a stock repurchase program by repurchasing 5 percent (238,923 shares) of its common shares outstanding, making the current total shares outstanding 4,539,552 as of Sept. 30, 1990.

On Oct. 18, Franklin announced a 23 percent increase in its quarterly dividend from 13 cents to 16 cents per share. The dividend is payable Dec. 1, 1990, to shareholders of record Nov. 15.

Franklin First Financial Corp.'s common stock is listed on the NASDAQ National Market under the symbol "FFFC." The price of its stock at the close of business on Oct. 19, 1990, was $7.375. Franklin First Financial Corp. is headquartered in Wilkes-Barre. Its sole subsidiary, Franklin First Federal Savings Bank, is a federally chartered, federally insured savings bank which conducts operations throughout northeastern Pennsylvania through 19 full-service offices and two lending centers.

#90295p7979 10/22/1990 ~PR Newswire

CINCINNATI (OCT. 22) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) has announced a major change in its research and development organization with the creation of a new function called "Regulatory and Clinical Development" (R&CD). This group will coordinate all P&G activities aimed at gaining regulatory approvals for the company's drug, cosmetic, and certain food products worldwide.

The new group will manage Procter & Gamble's worldwide interaction with the agencies which regulate the approval of drugs, cosmetics and foods. It will be responsible for preparing P&G submissions to these agencies and working with them throughout the approval process.

R&CD will be staffed by experts from the company's existing research and development organization and will work closely with a range of departments at P&G.

Commenting on the significance of the reorganization, P&G chairman and chief executive Edwin L. Artzt said, "This new function will help us work more closely and effectively with the world's regulatory agencies to get important product innovations to consumers even more quickly."

The R&CD group will be divided into three areas of focus: prescription drugs, non-prescription drugs and food ingredients. P&G business segments which are affected include health care, beauty care and certain foods, such as olestra, P&G's calorie-free far replacement.

Dr. Michael D. Young will be appointed Manager, Regulatory and Clinical Development, with overall responsibility for this new function. Young has extensive experience in regulatory affairs and clinical research. He will continue to report to Geoffrey Place, vice president- research and development for Procter & Gamble.

Procter & Gamble makes and markets a wide range of products for consumers and

industry. For fiscal 1989-90, P&G had worldwide sales of $24.1 billion. About one-third of these total sales came from health and beauty care products.

#90295p7986 10/22/1990 ~PR Newswire

MOUNTAIN VIEW, CA (OCT. 22) PR NEWSWIRE - Genus Inc. (NASDAQ: GGNS), today announced financial results for its third quarter ended Sept. 30, 1990. Sales for the third quarter were $9.6 million, down 60 percent from third quarter 1989 sales of $24.2 million.

Net loss for the quarter was $6.2 million against net income of $3.8 million

posted for third quarter of 1989. Net loss per share for the third quarter of 1990 was 56 cents compared to net income per share of 33 cents for the third quarter of 1989.

For the first nine months of 1990, sales were $40.5 million, net loss was $10.5 million, and net loss per share was 94 cents. These results are compared to sales of $63.1 million, net income of $8.5 million and net income per share of 82 cents for the first nine months of 1989.

Richard D. Hannigan, Genus Executive Vice President and Chief Financial Officer, said, "This past quarter saw a continuation of disappointments at our Ion Technology division located in Newburyport, Mass. We had no shipments of our MeV ion implanters during the quarter.

As a result of poor performance and our desire to conserve cash, we eliminated all non MeV related activity and reduced headcount and spending at that location to a break-even level consistent with shipment of one system per quarter, which we believe is achievable going forward. In conjunction with these actions, we took a write-off of $2 million in third quarter."

"Although this has been another loss quarter for Genus, we saw improved bookings in our Thin Film Division and success in several head-to-head battles with our competition," stated Genus Chairman and Chief Executive Officer, William W.R. Elder.

"We have booked orders from four new customers for our blanket tungsten products and we saw the fruits of some of our recent R&D efforts in tungsten technology reach the market with the introduction of our 8720ST system for blanket tungsten. The 8720ST is the result of Genus' joint development efforts with SemaTech over the past year."

Genus will be exhibiting its first entry into the integrated products arena at Semicon Japan this week. This system, the 6000, integrates batch blanket tungsten CVD and single-wafer etching for balanced high throughput in volume production of tungsten plugs in advanced semiconductor manufacturing.

Much interest has already been shown in this new system. The company has shipped seven 6000s to customers in the United States, Europe, and Japan, and another six are in backlog.

#90295p7992 10/22/1990 ~PR Newswire

ATLANTA (OCT. 22) PR NEWSWIRE - John H. Harland Co. (NYSE: JH) today reported record third quarter sales of $91.3 million for the third quarter ended Sept.

30, an increase of 6.0 percent over last year.

Net income was $13.2 million, compared to $13.8 million for the same period of 1989. Net income per share was 35 cents, compared with 37 cents in 1989.

Sales for the nine months ended Sept. 30 were $275.5 million, representing an increase of 6.3 percent over 1989, while net income was $43.2 million vs. $43.0 million in 1989. Net income per share was $1.15 in 1990, compared to $1.14 last year.

"Check units increased 5.9 percent during the third quarter, and our implementation of offset printing technology further improved company productivity 3.9 percent versus 1989," said Robert R. Woodson, president and chief executive officer. "However, increased operating costs associated with this investment in offset and other production technology impacted our results.

"Softness in the Florida market caused our results from that state to be below normal," said Woodson. "In addition, the performance of J. William Company, our specialty printing subsidiary, was less than last year. However, we were extremely pleased with the results of our wholly owned subsidiary Scantron Corporation."

On Oct. 2, the company agreed to purchase 675,986 shares of common stock of Courier Dispatch Group Inc. (NASDAQ: CDGI) from certain shareholders comprised primarily of the chairman of Courier and his family. This acquisition, when completed, will bring the company's interest in Courier to 51 percent. On Oct. 16, Harland proposed to the board of Courier to acquire the balance of Courier stock at a cash price of $3.75 per share. The board of Courier is considering the offer.

Also during the quarter, Harland introduced a patriotic check design to its MasterPieces(TM) product line. "The situation in the Middle East has created a resurgence in patriotism in this country, and the Love The U.S.A.! check targets that movement," said Woodson.

Atlanta-based Harland is a major national participant in the financial and educational fields with production facilities across the United States and in Puerto Rico.

#90295p7993 10/22/1990 ~PR Newswire

WASHINGTON (OCT. 22) PR NEWSWIRE - Capital Bank, N.A. today reported a net loss of $453,000, or $1.18 per share, for the first nine months of 1990 compared with net income of $467,000, or $1.23 per share, during the same

period in 1989.

For the third quarter of 1990, the bank posted a net loss of $569,000, or $1.48 per share, compared wtih net income of $166,000, or $.44 per share, in the third quarter of 1989.

Chairman Abel Holtz attributed the loss primarily to an increase in the provision for loan loss reserves due to a significant weakening of the real estate market for the Washington Metropolitan area.

At Sept. 30, 1990, total assets increased to $91.3 million from $85.4 million a year ago. Deposits rose 8.5 percent from $75.1 million to $81.5 million, and net loans increased 5.8 percent from $60.2 million to $64 million. Stockholders' equity, a major barometer of the bank's financial strength, totaled $7.0 million at Sept. 30, 1990.

Effective September 1990, bank regulations were revised to require computation of "leverage" ratio to replace the primary capital ratio. A minimum ratio of three percent is required for well-run financial institutions. Capital Bank, N.A.'s leverage ratio at Sept. 30, 1990 was 7.17 percent.

Capital Bank, N.A. is headquartered in Washington on Connecticut Avenue, N.W., and has branch offices in Friendship Heights and Adams Morgan. The bank is affiliated with Florida-based Capital Bank, the largest U.S. minority-owned bank, with $1.1 billion in assets and 26 South Florida offices. It also is affiliated with Los Angeles-based Capital Bank of California, which has assets of $279 million and ten offices in Southern California.

ANN ARBOR, MICH. (OCT. 22) PR NEWSWIRE - Great Lakes Bancorp (NASDAQ-NMS: GLBC) announced it is considering alternatives for the exchange of its 7-1/4 percent convertible subordinated debentures due in 2011. Among the alternatives being considered is an offer to debentureholders to exchange their debentures for a new issue of Great Lakes Bancorp subordinated debentures. The bank anticipates that any exchange offer would not have a substantial effect on its interest expense.

Great Lakes Bancorp has 52 branches in Michigan and operates Dollar Federal Savings Bank, a subsidiary with five branches in the north- Cincinnati area. Great Lakes also operates Great Lakes Mortgage Co., a mortgage banking subsidiary. With $3.7 billion in assets, Great Lakes Bancorp is Michigan's second-largest savings bank.

#90295p8000 10/22/1990 ~PR Newswire
MINNEAPOLIS (OCT. 22) PR NEWSWIRE - Cray Research, Inc. (NYSE: CYR) today reported revenue of $186,641,000 and net earnings of $27,553,000, or $.99 per share, for the third quarter ended Sept. 30, 1990. This compares with revenue of $210,163,000, net earnings of $30,645,000, and earnings per share of $1.04, in the third quarter of 1989.

Revenue for the first nine months of 1990 was $549,525,000, compared with $454,561,000, for the first nine months of 1989. Net earnings were $79,611,000, or $2.81 per share, compared with $36,568,000, or $1.24 per share for the same period one year ago.

John A. Rollwagen, chairman and chief executive officer, said, "While we continue to expect flat revenue this year, we see significant opportunities to improve 1990 earnings over last year. Operating expenses are in line with expectations and, we expect to meet our installation schedule for the year.

As expected, order signing was weak in the third quarter, totalling approximately $83 million in net contract value, compared with approximately $145 million for the third quarter of 1989. Our backlog at the end of the quarter was about $230 million vs. $295 million at the end of the second quarter and $315 million at the end of third quarter 1989."

Rollwagen said the company is preparing a 1991 budget that calls for about a 10 percent increase in net contract value of installations in 1991 over 1990. This budget is based on current operations review and the company's 1991 prospect list. "Our ability to serve the market is bolstered by the fact that we have introduced new product offerings covering the full range of high-performance computing needs from $250,000 to $25 million," he said.

Customers accepted systems and upgrades during the quarter with a net contract value of approximately $148 million. Of the systems installed at customer sites in the third quarter, 10 were new systems and five were used systems.

Cray Research, Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

LOS ANGELES (OCT. 22) PR NEWSWIRE - Angeles Corp. (AMEX: ANG) has announced

that Angeles unitholders who participate in the current offering to tender a portion of their units (AMEX: ANG.E) for Angeles common stock will receive 3.1 shares for each unit tendered. This rate provides tendering unitholders with a premium of 32 percent, based on the average closing prices of both the common stock and the units over the last 10 business days, or a premium of 25 percent, based on today's market prices, which the company believes are more representative. The exchange, entirely voluntary, is available to all unitholders through Oct. 26, 1990.

Angeles will accept a maximum of up to 20 percent of the outstanding units. Unitholders may tender 100 percent of their units, but acceptance of the excess units for exchange cannot be determined until the end of the offering. Excess units tendered will be accepted for exchange on a pro rata basis until the overall 20 percent is reached.

Each Angeles unit consists of one-half share of Angeles common stock, subordinated indebtedness in the form of one fiftieth of a $1,000 12 1/2 percent subordinated debenture maturing in 2005 and the cash payment of a total of $.875 of principal to be paid over the next three-and-one-half years. (A principal payment of $.125 per unit was paid Oct. 15, 1990)

Angeles Corp is a diversified investment management company whose subsidiaries manage in excess of $4 billion of securities, real estate, mutual fund and leased equipment assets for corporations, institutions and 127,000 individual investors.

HOLLAND, Mich. (OCT. 22) PR NEWSWIRE - Paul G. Kalkman was elected president and chief operating officer of Donnelly Corporation (AMEX: DON) last week in Holland. He succeeds Dwane Baumgardner who was serving the company as president and chief operating officer as well as chairman of the board and chief executive officer. Baumgardner will continue as chairman and chief executive officer.

Kalkman joined Donnelly Corporation in 1966 and, during his career, has served the company in many capacities including profit plan manager and manufacturing manager. During the last eight years, he was vice president then senior vice president of the Modular Systems Business Group.

For the last 14 months, Kalkman was the executive vice president and chief operating officer for Donnelly's Automotive Business Group in Holland. In that position, he was responsible for all Donnelly automotive products which include Automotive Vision Systems (automotive interior and exterior rear view mirror components and assemblies, and interior lighting systems) and Modular

Window Systems (windows for cars, vans and trucks).

A native of Holland and a graduate of Ferris State University, Kalkman lives in Holland with his wife, Linda, and their three children.

Donnelly Corporation is an international company dedicated to serving customers around the world with high-quality fabricated, molded and coated glass products for the transportation and electronics markets. The company has been based in Holland since 1905 and today operates from 12 separate facilities in western Michigan. In addition, Donnelly has a major manufacturing facility in Naas, Ireland; a marketing liaison office in Tokyo and in Detroit; an Advanced Technology Center in Tucson, Ariz.; and a manufacturing facility (in conjunction with Asahi Glass of Japan) in Mount Pleasant, Tenn. Donnelly is also recognized as a leader in the application of participative management practices.

LONDON (OCT. 22) PR NEWSWIRE - Robert Maxwell, chairman of Maxwell Communication Corporation plc ("MCC"), announces the completion of the repayment of U.S. $990 million short-term (one year) bank borrowings entered into in October 1989, as part of U.S. $3 billion syndicated bank facility to help finance the acquisition of Macmillan, Inc. and Official Airline Guides, which cost MCC approximately U.S. $3.4 billion.

U.S. $575 million have been prepaid between January and June 1990 (well ahead of schedule).

U.S. $415 million will be repaid on Oct. 23, 1990 (on due date).

The remaining syndicated bank debt:

U.S. $750 million are not due for repayment until October 1992, and U.S. $1,260 million are not due until October 1994.

For full details of transactions which have been completed, agreed or agreed subject to contract, see pages 6 and 7 of the company's circular to shareholders dated Oct. 18, 1990, convening an extraordinary general meeting of shareholders for Monday, Nov. 5, 1990.

The disposals already achieved and announced will increase attributable profits in the current year to March 1991. The proceeds which will arise from additional disposals which are in hand will be used to reduce the group's borrowings further. The directors are determined to reduce the debt to equity ratio to 1 to 1 or below as quickly as possible.

Current Trading & Prospects
The interim results of the company will be announced on Nov. 20, 1990. The group's publishing and professional information operations are continuing to trade strongly. The directors are particularly pleased with the operations in North America where profits are ahead of budget.

SAN FRANCISCO (OCT. 22) PR NEWSWIRE - Chevron announced today that its wholly owned subsidiary, Chevron Petroleum Co. of Colombia, has signed an association contract with Empresa Colombiana de Petroleos (Ecopetrol), the national oil company of Colombia, to cover exploration and development of a new area called "Sumapaz," located about 50 miles (80 kilometers) southwest of the capital city of Bogota.

Chevron Petroleum Co. of Colombia will be the operator and during the exploration phase will hold 100 percent interest in the contract area, which covers approximately 435,000 acres in the rugged terrain between the eastern Andean Cordillera and the Upper Magdalena River valley. Any production resulting from the program would be divided between Chevron and Ecopetrol according to a sliding scale dependent on cumulative production after payment of national royalties.

The agreement provides for an exploration period of six years, with a program of approximately 150 kilometers of seismic acquisition, and a geologic field program to be carried out during the first year. At least one exploratory well might be drilled in each subsequent year of the agreement, depending on the results of the program.

Chevron has been active in Colombia since 1921, opening its first office there in 1924. Chevron Petroleum Co. of Colombia, headquartered in Bogota, holds 50 percent interest in two fields in the Llanos Basin: the Castilla field has produced an average of 13,500 barrels of oil per day in 1990. A successful step-out well in the Chichimene field increased reserves to 16.5 million barrels, and average production is now approximately 1,100 barrels per day. Expanded development of this field is scheduled to begin this year.

ST. PAUL, MINN. (OCT. 22) PR NEWSWIRE - AorTech, Inc. today announced the financial results for the second quarter and six month period ended Sept. 30, 1990. Net sales for the second quarter were $288,525 bringing net sales for the six months to $367,285. The net loss for the second quarter was $313,765 bringing the net loss for the six months to $714,939. On a per share basis, the net loss is $.09 for the second quarter and $.21 for the six month period. The quarter-to- quarter revenue increase is attributable to re-establishing and increasing the manufacturing capacity after the company's reorganization in February 1990 and the corresponding shipments to the company's distributors.

For a number of months prior to AorTech's reorganization in February 1990, the company's manufacturing and distribution operations were suspended.

AorTech, Inc. manufactures and distributes prosthetic heart valves. The company's common stock trades over-the-counter in Minneapolis/St. Paul.

CHICAGO (OCT. 22) PR NEWSWIRE - United Airlines today announced that J.C. Pope will continue to serve as the company's executive vice president-marketing and finance and chief financial officer and announced two key appointments in its marketing and finance divisions which report to Pope.

United's vice president and acting treasurer, Louis J. Valerio, has been named senior vice president-finance. In this position, Valerio will be responsible for the controller's function, treasury, audits and security, tax, financial

planning and analysis, and purchasing. He joined United in 1988 as vice president-financial planning and analysis.

United also named Adam M. Aron senior vice president-marketing. Aron most recently served as senior vice president-marketing for Hyatt Hotels Corp. In his position with United, Aron will be responsible for advertising and promotion, passenger and cargo sales, reservations and marketing programs. The areas of planning, investor relations and the Covia subsidiary will continue to report to Pope.

"Under Mr. Pope's leadership, these two key appointments will position United to compete aggressively as we move forward with our strategic plan," said United Airlines Chairman and President Stephen M. Wolf.

Pope joined United and its parent, UAL Corp. (NYSE: UAL), in 1988 as executive vice president and chief financial officer. He came to United after having served as an officer of American Airlines from 1977 until early 1988.

Prior to joining United in 1988, Valerio served as assistant vice president-financial planning and analysis for American Airlines, where he worked for more than eight years. Before entering the airline industry, Valerio was employed by the United States Railway Association in Washington, D.C.

Aron joins United from Hyatt Hotels Corp. in Chicago where he served as senior vice president-marketing since 1987. Prior to his position at Hyatt, he served as vice president-marketing programs for Western Airlines, Inc. in Los Angeles and before that, as system director - marketing plans and programs for Pan American World Airways, Inc. in New York.

#90295p8034 10/22/1990 ~PR Newswire

CAMBRIDGE, MA (OCT. 22) PR NEWSWIRE - Index Technology Corporation (NASDAQ: INDX), a leading developer of computer-aided software engineering (CASE) products, today reported revenues for the quarter ended Sept. 30, 1990 of $10,416,000, up 15 percent from revenues of $9,078,000 for the corresponding period of 1989.

The company reported a net loss for the quarter of $505,000, or 11 cents per share, based on 4,505,000 weighted average shares outstanding, compared with net income of $626,000, or 13 cents per share, based on 4,645,000 weighted average shares outstanding, for the same period a year ago.

For the nine months ended Sept. 30, 1990, net income totaled $456,000, or 10

cents per share, compared to $1,849,000, or 40 cents per share, for the comparable period last year. Revenues for the nine month period were $34,815,000, up 31 percent from $26,582,000 for the same period in 1989.

Richard A. Carpenter, chairman and chief executive officer of Index Technology attributed the loss to development costs associated with its next generation products as well as some order delays that have resulted in lower than expected revenues.

"We are in an aggressive period of new product roll-outs that form the basis of our long-term strategy for the CASE marketplace in the 1990s and beyond," said Carpenter. "During the quarter we introduced the first two of four major new products that are the result of an intensive two-year planning and investment period. We expect continued pressure on earnings due to the ongoing investment in our long-term strategy as well as the difficulty in predicting revenues from these products," said Carpenter.

In July, Index Technology introduced 4FRONT -- the first CASE product to feature online methodology and project management support -- which was developed under a strategic alliance with the professional services firm of Deloitte & Touche. In September, the company introduced Excelerator for Design Recovery, the first product to bring CASE analysis and design capabilities to the critical problem of maintaining, enhancing and documenting existing information systems.

"In addition to delivering new products, we continue to strengthen our management team and to direct resources toward the expanding international CASE market," said Carpenter. "We recently appointed a new vice president of Asia/Pacific as well as a vice president of European Operations, who is creating an infrastructure for providing international customer service and support."

Robert G. Lowe, the new vice president of European Operations, will direct sales and marketing operations throughout Europe, the Middle East and Africa, and Robert J. Collins, the new vice president of Asia/Pacific, will supervise activities in Australia, Japan, Korea and Taiwan. The company also announced the opening of new subsidiaries in Denmark and Sweden.

Index Technology was founded in 1983 and is headquartered in Cambridge, Mass. The company markets its Excelerator Series of systems analysis and design CASE products from Cambridge as well as from field sales and support offices throughout the U.S. and Canada, subsidiaries in the U.K., France, Germany, Sweden, Denmark and Australia, and through third-party distributors, providing coverage in approximately 40 countries worldwide. The company's flagship product, Excelerator, has an installed base of more than 25,000 copies.

#90295p8039 10/22/1990 ~PR Newswire

CANTON, MA (OCT. 22) PR NEWSWIRE - Officials at Cumberland Farms announced today that the company will implement additional staffing and expense reductions. Key factors leading to this decision are the final consolidation of Cumberland's Gulf Oil Division personnel and offices from the Westboro to the company's Canton, Mass. complex - expected to be completed by Nov. 9, 1990 - as well as the continued closing of marginal Cumberland Farms stores.

"There is a general weakening of the retail economy nationwide and forecasts indicate this economic environment may continue into 1991. The soft domestic retail economy, coupled with the uncertainty caused by recent world events, make it prudent for all companies to seek efficiencies and reduce expenses," according to Foster Macrides, the company's vice president of human resources.

Staff reductions can be expected to affect each of Cumberland's businesses and will begin as early as this week. The total number of employees affected is yet to be determined, however, it is expected to be approximately 200

employees or two percent of Cumberland Farms total work force.

As in the past, the company will offer assistance packages, including outplacement programs, to affected employees. These employees will be receiving notification through normal management channels.

Cumberland Farms, Inc. based here, is one of the nation's largest privately-held corporations. In addition to its 1,100 store chain of convenience stores and retail gas outlets, the company, through its Gulf Oil Division, markets and distributes petroleum products to a dealer/jobber network of over 5,000 branded locations.

The company is also a major manufacturer and distributor of dairy and bakery products throughout the Northeastern States. Cumberland Farms employs more than 9,000 people.

CONTACT: Foster G. Macrides of Cumberland Farms, (617) 828-4900.

#90295p8043 10/22/1990 ~PR Newswire

WATERBURY, CT (OCT. 22) PR NEWSWIRE - In announcing the results of the third quarter, Robert J. Narkis, chairman and chief executive officer of Centerbank (NASDAQ: CTBX) stated that "the Bank continues to be affected by the decline in the local real estate market and the recession that has gripped the entire region. It is prudent that we continue to deal immediately with problem loans as they are identified. Our strong capital position provides us with the resources to take appropriate action in a timely manner."

During the third quarter Centerbank made a $10 million provision for possible loan losses, charged off $2.8 million in other real estate owned, and adjusted its security portfolio by $1 million. These actions resulted in a loss of $13.7 million or $1.12 per share for the quarter. This compares to a loss of $7.9 million or 66 cents per share for the three months ended Sept. 30, 1989.

Centerbank's equity to assets ratio, a common barometer used to measure the strength of financial institutions, stood at 9.5 percent, still one of the highest ratios in the Northeast, and well above regulatory requirements. The bank ended the quarter with a book value of $13.85, based on shareholders equity of $169 million.

At quarter-end loan loss reserves amounted to $54 million, or 50 percent of nonperforming loans and leases of $108 million. Other real estate owned, net of liquidation reserves, stood at $68 million. Together these nonperforming assets represent 9.9 percent of total assets.

Established in 1850, Centerbank is the largest independent financial institution headquartered in western Connecticut. It operates from 19 branch

offices stretching along the I-84 corridor from Southington to Danbury.

#90295p8048 10/22/1990 ~PR Newswire
EDMONTON, ALBERTA (OCT. 22) PR NEWSWIRE - The board of directors of Numac Oil & Gas Ltd. (Toronto: NMC) today announced Numac's intention to purchase the outstanding common shares of Giant Reef Petroleums Ltd. which it does not currently own for a cash consideration of $4.65 per share.

The offer will be conditional upon, amongst other things, Numac acquiring 90 percent of the outstanding common shares of Giant Reef that it does not already own.

Numac currently owns approximately 70 percent of Giant Reef's outstanding common shares. If Numac is successful in acquiring 90 percent of the outstanding common shares of Giant Reef that it does not already own, it is Numac's intention to initiate the legal proceedings necessary to acquire the remaining shares and amalgamate Giant Reef with Numac.

The board of directors of Giant Reef has advised Numac that based upon its review of the final terms of the offer, an independent valuation of the common shares of Giant Reef prepared by RBC Dominion Securities Inc. and a fairness opinion provided by RBC Dominion Securities Inc., it intends to recommend acceptance of the offer.

A formal offer will be mailed to Giant Reef's minority shareholders on or before Oct. 26, 1990.

RICHARDSON, TX (OCT. 22) PR NEWSWIRE - St. Dominic's Hospital and Rubicon Corp. (NASDAQ: RBCN) has announced the successful "go-live" of St. Dominic's Hospital on the Rubicon intRlab(R) Laboratory Information System at the newly constructed $30 million acute care facility in Manteca, Calif.

St. Dominic's Hospital, which is affiliated with St. Joseph's Medical Center of Stockton through the St. Joseph's HealthCare Corp., now processes the majority of its own laboratory tests.

Information is transmitted between St. Joseph's Medical Center and St. Dominic's Hospital via the Rubicon intRlab(R) Laboratory Information System expanding the volume and complexity of testing capabilities. The hub site for information processing is located at St. Joseph's Medical Center in Stockton, Calif.

Teresa Bryant, department manager, Clinical Laboratories, said, "because of the Rubicon system we already had in place, we were able to bring on-line all of the bells and whistles of the main Rubicon system for St. Dominic's Hospital - and it works! The Rubicon system allows for the ease of addition of multiple sites." The installation at St. Dominic's was completed on schedule in under 60 days.

Rubicon is a 15 year old, Richardson, Texas based developer of computerized laboratory information management systems for independent laboratories, hospitals and health maintenance organizations.

#90295p8051 10/22/1990 ~PR Newswire

ST. CLOUD, FL (OCT. 22) PR NEWSWIRE - F.F.O. Financial Group, Inc. (NASDAQ: FFFG), a Florida-based unitary savings and loan holding company, today reported a net loss of $3.8 million (or $1.76 per share) for the three months ended September 30, 1990, and a net loss of $3.1 million (or $1.41 per share) for the nine months ended September 30, 1990. Such losses reflect the effects of a $5.7 million provision for possible loan losses established during the third quarter, and a decline in interest revenues resulting from an increase in nonperforming loans. The company reported net income of $290,000 (or $0.13 per share) for the three months ended September 30, 1989, and net income of $1.6 million (or $0.69 per share) for the nine months ended September 30, 1990.

Total stockholders' equity as of September 30, 1990 was $23.0 million (or $10.53 per share). Total assets declined during the third quarter to $426.1 million at September 30, 1990, as compared to $438.3 million at June 30, 1990 and $455.4 million at December 31, 1989.

The company also announced its decision to infuse an additional $750,000 of existing funds into its wholly owned subsidiary, First Federal Savings and Loan Association of Osceola County, in order to increase First Federal's regulatory capital. Following this additional capital injection, the tangible and risk-based capital ratios for First Federal will be 5.43 percent and 7.30 percent, both of which will exceed the increased regulatory capital requirements scheduled to go into effect on December 31, 1990. First Federal is currently in compliance with all existing applicable regulatory capital levels.

The company's third quarter results reflect the impact of a $5.7 million loan loss provision recorded in the third quarter. This provision brings the total allowance for loan losses to $6.4 million at September 30, 1990. The increase in the company's loan loss reserve resulted from an increase in the company's classified assets which at September 30, 1990 amounted to $40.6 million

compared to $25.8 million at December 31, 1989, and a change in the company's loan loss reserve policy.

Increases in classified assets reflect the difficulties being encountered by the company's borrowers during this economic slowdown. In response to this circumstance, the company adopted a new loan loss reserve policy during the third quarter which provides that reserves must be maintained in the aggregate amount of 10 percent of all loans classified substandard, 50 percent of all loans classified doubtful and 100 percent of all loans classified as loss. In addition, for loans that are not classified, reserves totalling 1.5 percent of the principal balance of the consumer loan portfolio and .5 percent of the principal balance of all other loans (excluding single-family residential loans) must be maintained.

#90295p8060 10/22/1990 ~PR Newswire

STAMFORD, CT (OCT. 22) PR NEWSWIRE - Rayonier Forest Resources Company (RFR), the managing general partner of Rayonier Timberlands, L.P. (NYSE: LOG), announced preliminary third quarter results today.

Sales for the quarter were $19.3 million compared with 1989 third quarter sales of $18.9 million. Partnership income in the quarter was $13.6 million compared with earnings of $13.1 million in 1989.

Cash flow available from operations for publicly traded Class A unitholders for the third quarter was 81 cents per Class A Unit, comparing favorably to 76

cents per Class A Unit generated in the third quarter of 1989. Income per Class A Unit for the quarter was 77 cents compared to 71 cents in the prior year.

Sales for the first nine months of 1990 were $79.0 million as compared to $81.0 million in the previous period. The decline in sales was caused by lower harvest volume in the Northwest which was partially offset by significantly higher prices in both the Northwest and Southeast regions.

Partnership income of $60.1 million decreased $1.8 million from $61.9 million earned last year although income per publicly traded Class A unit rose $0.05 per unit to $3.25.

Commissions paid to an affiliate of the managing general partner, which increased year over year, are not allocated to the public Class A unitholders and do not reduce the income per unit, or cash available per unit.

For the first nine months of 1990, cash available from operations for Class A unitholders was $3.46 per Class A Unit, compared with $3.40 per Class A Unit for the comparable 1989 period.

Third quarter harvest activity was unusually low compared with seasonal patterns of past years. Northwest stumpage volume was nine percent below last year's third quarter as customers delayed harvesting of export-directed timber due to high log and lumber inventories in the Far East.

The Southeast third quarter pine harvest was also below prior year by 43 percent, as abnormally dry weather in that region allowed an excess of competitive timber to be harvested.

Average prices on contracts harvested during the third quarter improved significantly over the prior year period and partially offset lower volumes. Prices for Northwest stumpage increased 33 percent while those for Southeast pine were up seven percent.

#90295p8064 10/22/1990 ~PR Newswire

BALTIMORE, MD. (OCT. 22) PR NEWSWIRE - Constellation Holdings Inc. and Hadson Corp. (NYSE: HAD) announced today that Panther Creek Partners has selected UC Operating Services (UCOS) to provide the operation and maintenance for an 80 megawatt cogeneration plant currently being constructed near Nesquehoning, Pennsylvania. The facility, which will burn processed waste coal in a circulating fluid bed boiler, brings UCOS' total of signed O&M agreements to 15-with 10 of these facilities in operation.

UCOS is a joint venture between Constellation Holdings Inc. and the Hadson Corp. subsidiary, Hadson Power Systems Inc.

Constellation Holdings, Inc., is a Maryland-based diversified business group and a wholly owned subsidiary of Baltimore Gas and Electric Co. (NYSE: BGE). Through its subsidiaries, Constellation is involved in four main areas of business: 1) the development, ownership and operation of power generation systems; 2) real estate development and ownership; 3) financial investments, and 4) senior living projects.

Hadson Corp. is a leading independent producer and supplier of energy products as well as a leading electric power services firm. Hadson has operations in natural gas and gas liquids; domestic and international oil and gas exploration and production; and is a leader in the development, construction, operation and ownership of electric power generation facilities.

#90295p8071 10/22/1990 ~PR Newswire

WAKEFIELD, MA (OCT. 22) PR NEWSWIRE - Atlantic Restaurant Ventures Inc. (the "company") reported a net loss of $840,000 or 22 cents per share on revenues of $7 million for the six months ended July 1, 1990 compared to a net loss of $127,564 or 4 cents per share on revenues of $7.5 million for the six month period ended June 30, 1989.

The decrease in consolidated revenues for the 1990 period was the result of the disposition in May of two Fuddruckers Restaurants and the company's subsidiaries which own and operate restaurants known as Little Tavern Shops. The loss for the 1990 period is principally due to the company's abandonment and sale of certain assets and restaurant development expenditures.

The company operates six franchised Fuddruckers restaurants in Virginia and Maryland. The company's stock is listed on the OTC Pink Sheets.

#90295p8072 10/22/1990 ~PR Newswire

NEW YORK (OCT. 22) PR NEWSWIRE - The France Growth Fund, Inc. (NYSE: FRF) announced results today for the fiscal quarter ended Sept. 30, 1990, its first full quarter of operations.

For the quarter ended Sept. 30, 1990, the fund reported a realized and unrealized net loss of U.S. $9.7 million, or U.S. 84 cents per share, on net

investment income of U.S. $1.9 million, or U.S. 17 cents per share. For the period May 18, 1990 (commencement of operations) to Sept. 30, 1990, the fund had a realized and unrealized net loss of U.S. $11.2 million, or U.S. 97 cents per share, on net investment income of U.S. $3.5 million, or U.S. 30 cents per share.

The fund's performance during the quarter ended Sept. 30 was affected by adverse market conditions caused by the current Middle East crisis, which resulted in the depreciation of certain investments. Net assets value of the France Growth Fund declined from $11.08 per share on June 30, to $10.41 on Sept. 30, 1990, representing a decrease of 6.05 percent. During the same period the Paris Bourse Index (SBF) fell 21.46 percent measured in U.S. dollars.

Pierre Daviron, chairman of the France Growth Fund and of its investment adviser, Indosuez International Investment Services, said the conversion of 80 percent of the fund's assets to French francs benefited the quarter's performance as the dollar fell 2.9 percent against the French franc during the period. In addition, Daviron noted that the fund's outperformance of the Paris Bourse Index (SBF) during the quarter reflected the fund's strategy of limited and gradual investment in the French equity market in response to the uncertainties created by the Middle East situation: at Sept. 30, 1990, net assets totaled U.S. $119.8 million, of which 39.1 percent was invested in French equities, 6.3 percent in French bonds, 25.9 percent in French franc short-term instruments and 17.6 percent U.S. dollar short-term instruments. Other assets in excess of liabilities accounted for the remaining 11.1 percent.

Daviron cited the fund's performance as "substantial" within the context of the French economy, which slowed to a 2.8 percent annual growth rate during the period; saw a downward revision of forecasts for 1990 corporate earnings growth from 15 percent to 7 percent; and suffered a rise in long-term interest rates from 9.7 percent in July to 10.6 percent in September. "To meet the challenge of the current economic environment the fund will focus on companies with low debt, undisputed leadership positions and high visibility," noted Daviron. He also expected that the France Growth Fund's portfolio would continue to favor growth stocks in the equipment and services sector and remain underweighted in cyclical and financial services stocks.

The fund also announced that the board of directors, at its regular quarterly meeting today, authorized a share repurchase program under which the fund may purchase in the open market up to an aggregate of 10 percent of the 11,509,000 currently outstanding shares of the fund's common stock, from time to time, as may be deemed appropriate by the fund's officers and a special committee of the board.

The France Growth Fund, Inc. is a diversified, closed-end management investment company whose objective is long-term capital appreciation through investment primarily in French equity securities.

#90295p8075 10/22/1990 ~PR Newswire

PITTSBURGH (OCT. 22) PR NEWSWIRE - National Intergroup, Inc. (NYSE: NII) announced today that it is extending its tender offer for all outstanding Cumulative Convertible Preference Units representing limited partnership interests of Permian Partners, L.P., at $3.5625 per preference unit plus one non-transferable contingent value right per preference unit.

The offer and withdrawal rights, previously scheduled to expire at 5 p.m. (New York City time) on Oct. 22, 1990, are now scheduled to expire at 5 p.m. (New York City time) on Oct. 26, 1990, subject to NII's right to extend the offer further.

As of the close of business on Oct. 22, 1990, approximately 9,919,185 preference units, including 2,067,313 preference units tendered pursuant to notices of guaranteed delivery, had been tendered and not withdrawn pursuant to the offer.

The offer is conditioned upon, among other things, there being validly tendered and not withdrawn prior to the expiration of the offer, at least 7,875,001 of the publicly held preference units, representing a majority of the publicly held preference units.

The offer is also conditioned upon, among other things, the adoption of an amendment to Permian's Partnership Agreement. The adoption of the amendment requires receipt of executed and unrevoked consents from the holders of record on July 30, 1990 of 7,889,584 preference and common units.

NII stated that as of the close of business on Oct. 22, 1990, Permian had received approximately 7,457,438 consents to adopt the amendment. Pursuant to the terms of the consent solicitation, all consents are scheduled to expire on Nov. 6, 1990. Therefore, as previously announced, if the amendment is not adopted by Nov. 6, 1990, NII intends to call off the tender offer.

#90295p8078 10/22/1990 ~PR Newswire

GERMANTOWN, Md. (OCT. 22) PR NEWSWIRE - Hughes Network Systems Inc. (HNS) today announced a limited partnership agreement with McCaw Cellular Communications Inc. of Kirkland, Wa., to construct and operate a nationwide,

digital air-to-ground telephone and data transmission service for use aboard commercial aircraft. The venture will operate under the name Clairtel(sm).

Through the use of digital technology, Clairtel will offer commercial airline passengers not only higher voice-quality telephone service -- which includes both placing and receiving calls -- but also facsimile and computer transmission capabilities, as well as video. Patrons will be able to send and receive calls, pages, faxes, and computer data transmissions while in flight. The technology represents a quantum leap in airlines' ability to provide passengers with many of the comforts and conveniences of their homes or offices during flight.

The companies have reached agreement with Alaska Airlines and Northwest Airlines as the initial carriers to provide the service. Negotiations are under way with several other major airlines.

HNS, the world leader in digital communications technologies, is a subsidiary of Hughes Aircraft Co., a unit of GM Hughes Electronics.

DALLAS (OCT. 22) PR NEWSWIRE - L&N Housing Corp. (NYSE: LHC) announced today operating results for the third quarter of Fiscal 1990. Operations for the quarter ended September 30, 1990, resulted in net income of $574,000, or 26 cents per share, as compared to net income of $899,000, or 41 cents per share, for the same period last year. Net income for the nine months ended Sept. 30, 1990, amounted to $725,000, or 33 cents per share, as compared to $2,654,000, or $1.21 per share, for the same period in Fiscal 1989.

The company has qualified as a real estate investment trust by distributing 100 percent of its taxable income in the form of dividends to its stockholders. On Sept. 28, 1990, a dividend of 26 cents per share was distributed by the company to its stockholders. During the quarter ended September 30, 1990, the company placed one of its participations on nonaccrual. If this asset had been on nonaccrual for the entire quarter, the dividend would have been approximately 20 cents.

NEW CASTLE, PA. (OCT. 22) PR NEWSWIRE - John W. Sant, chairman and chief executive officer of First Western Bancorp Inc. (NASDAQ: FWBI), today

announced that special stockholder meetings for both First Western and First Federal have been scheduled for Nov. 20 for the purpose of approving the acquisition by First Western of all of First Federal's common stock outstanding.

As further described in definitive proxy materials mailed to both groups of stockholders on Oct. 22, 1990, as part of a joint proxy statement/prospectus, First Western is offering to acquire all of the outstanding shares of First Federal in exchange for total consideration of approximately 60 percent in First Western common stock and 40 percent in cash. Holders of outstanding shares of First Federal common stock will be entitled to make an election pursuant to which, at the closing of the merger, such shares will automatically convert to the right to receive all cash at $19.00 per share of First Federal common stock, or 0.7600 shares of First Western common stock per share of First Federal common stock, or a combination thereof.

First Western has received both Federal Reserve Board and Office of Thrift Supervision approval to acquire First Federal. Certain other approvals must be received and other conditions must be satisfied prior to closing, which, if stockholder approvals are obtained, should occur at or prior to Dec. 31, 1990.

First Western Bancorp Inc., headquartered in New Castle, Pa., is the parent of First National Bank of Western Pennsylvania and Beaver Trust Co., with 18 offices in Lawrence, Beaver, Butler and Allegheny counties, with total assets at Sept. 30, 1990, of $582,826,000.

First Federal of Western Pennsylvania, headquartered in Sharon, Pa., has seven offices in Mercer, Butler and Venango counties in western Pennsylvania and three offices in Ashtabula County, Ohio. At Sept. 30, 1990, total assets were $342,052,000.

BEVERLY HILLS, CALIF. (OCT. 22) PR NEWSWIRE - Marvel Productions has entered into an exclusive agreement with Twentieth Century Fox to develop and produce original animated theatrical shorts that will be featured at the beginning of motion pictures, it was jointly announced by Joe Taritero, president and chief executive officer of Marvel Production, and Joe Roth, chairman of Twentieth Century Fox.

The initial productions of "Fox Toons," should be ready for Fox '91 summer releases.

Roth noted, "We're very excited about the possibilities of this project. Our

goal is for 'Fox Toons' to become cartoon classics of the '90's."

Taritero stated, "We will be developing completely original characters with the option of tailoring storylines in conjunction with specific releases if Fox so elects. Most importantly, we feel we are giving the creative talent in this industry the opportunity to develop brand-new characters that have the potential of becoming animated superstars for the next generation."

Marvel is currently in the process of staffing the creative team for the "Fox Toons" project.

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

DALLAS (OCT. 22) PR NEWSWIRE - John J. Pembroke, chairman and president of AFN Inc., dba American Financial Network, announced sales and earnings for the second quarter ending Sept. 31, 1990. Revenue for the quarter was $1,215,752. Net income was $274,704 up from a year earlier, same quarter, of $108,962, an increase of over 150 percent.

The company's performance for the quarter was particularly positive in light of the severe down-turn in the nation's mortgage and housing markets and the loss of the company's largest single client. Due to these circumstances, the company established an additional reserve of $125,000 in this quarter. Without this reserve, the company's earnings would have been close to $400,000.

Recently, HUD announced a favorable position on computerized loan origination networks (CLO). In that announcement, HUD stated that real estate brokers could receive fees for offering a CLO service to homebuyers as long as the CLO offered the homebuyer a choice of mortgage lenders. AFN has campaigned hard for this recognition and, today, AFN represents the only national CLO meeting these HUD guidelines.

The company continues to expand the number of origination sites. New First Realty Financial Service Centers have opened in Los Angeles and Dallas. The total number of lenders on the Network has also increased to over 125. Over 2000 mortgage products are currently displayed on the Network.

Quarter ended September 30:	1990	1989
Revenues	$1,215,752	$1,696,059
Operating Expenses	939,736	1,585,846
Operating Income (loss)	276,016	110,213
Interest Expense		

1,311 1,251 Income (loss) before taxes 274,704

LOS ANGELES (OCT. 22) PR NEWSWIRE - Pathe Communications Corp. (NYSE: PCC) and MGM/UA Communications Co. (NYSE: MGM) announced today that Pathe has delivered checks totaling $967 million to an escrow account established in connection with Pathe's acquisition of MGM/UA.

Pathe previously delivered over $353 million to the escrow account, approximately $250 million of which has already been distributed to MGM/UA stockholders. The additional $967 million in checks, when paid, together with approximately $100 million held in the escrow account, will comprise the remaining funds necessary to complete the merger.

Pathe indicated that almost $600 million of the total merger price in excess of $1.3 billion is represented by new Pathe equity financing, while the bulk of the remainder will come from the anticipated sale of Pathe assets to MGM/UA.

MGM/UA'S board of directors has scheduled a meeting tomorrow regarding the asset purchase from Pathe, and a solvency opinion to be delivered by Houlihan, Lokey, Howard & Zukin. Houlihan, Lokey has advised Pathe that it plans to render a favorable opinion as to Pathe's and MGM/UA's solvency.

Pathe indicated that, subject to MGM/UA's board's approval, it anticipates closing of the merger by this Friday.

HOUSTON (OCT. 22) PR NEWSWIRE - National Convenience Stores Inc. (NYSE: NCS) announced sales for the first quarter of fiscal 1991 of $292,203,000, up 1.8 percent from $287,078,000 in the first quarter of fiscal 1990.

Net earnings from operations for the quarter ended September 30 were $1,050,000, or 1 cent per share, down from $3,972,000, or 18 cents per share, in the first quarter of fiscal 1990. (NCS also reported an after-tax capital gain on an asset sale during the quarter ended Sept. 30, 1989, of $3,422,000, or 15 cents per share, which boosted total earnings for last year's first fiscal quarter to $7,394,000, or 33 cents per share.)

"The current quarter for NCS reflects strong results in the gasoline business which were somewhat offset by a combination of flat merchandise sales and certain operating expense increases that we believe are only temporary in nature," said V.H. Van Horn, president and chief executive officer.

"Looking ahead, I continue to be encouraged by the sales results of our re-merchandising and re-imaging efforts at Stop N Go. The response of customers and initial sales reports from our test stores are very heartening. We are looking forward to the rollout of this innovative mix of merchandise to redefine retail convenience and to stimulate the sales and profitability of NCS," said Van Horn.

National Convenience Stores Inc. operates 1,083 Stop N Go specialty retail stores in four Sunbelt states.

First Quarter Results Following are the unaudited operating results for the three months ended Sept. 30, 1990 compared with the three months ended Sept. 30, 1989.

SAN DIEGO (OCT. 22) PR NEWSWIRE - San Diego Gas & Electric (NYSE: SDO) (SDG&E) unaudited earnings per common share for the quarter ended Sept. 30, 1990, were 93 cents, compared with 91 cents for the same period last year, Thomas A. Page, SDG&E chairman of the board, president and chief executive officer, reported today.

The two-cent increase in earnings for the third quarter was primarily because of the utilities cost reduction programs. Earnings applicable to common shares increased 2.6 percent to $52 million, compared with $50.7 million for the same quarter last year.

Consolidated operating revenues and expenses for all prior periods have been restated to exclude the operations of Mock Resources Inc., which was sold during the second quarter. For the quarter, consolidated revenues were up 6.7 percent to $452.1 million, compared with $423.9 million in 1989. Consolidated operating expenses were up 7.8 percent to $373.4 million, compared with $346.3

million.

For the 12 months ending Sept. 30, 1990, earnings per share were up 20.5 percent to $3.64, compared with $3.02 for the same period in 1989. This increase was primarily because of the impact of the Public Utilities Commission disallowance related to the Southwest Powerlink in 1989 and the public offering of 20 percent of Wahlco Environmental Systems Inc. (NYSE: WAL) previously a wholly owned subsidiary, in the second quarter of 1990.

#90295p8106 10/22/1990 ~PR Newswire

CALGARY, Alberta (OCT. 22) PR NEWSWIRE - Encor Inc. today announced its financial and operating results for the nine months ended Sept. 30, 1990. Funds generated from operations were up 10 percent to $69.6 million or 30 cents per share on a fully diluted basis. This represents an improvement of $6.3 million over the corresponding pro forma period in 1989. A decline in revenues was more than offset by lower finance charges and reduced production expenses. The net loss applicable to common shares for the nine months amounted to $52.8 million or 35 cents per share compared to a net loss of $41.6 million or 28 cents per share for the same period in 1989. The 1989 results include the after-tax impact of properties sold during 1989 with a gain on sale and income associated with these properties of $39.7 million. Excluding this amount and $3.1 million of after-tax gains on 1990 properties sales included in the 1990 losses, the 1990 results show an improvement of $25.4 million or 31 percent.

Income from operations for the nine months of $10.6 million represents an improvement of $25.1 million over the same 1989 period, with lower expenses of $34.9 million being partly offset by reduced revenues of $9.8 million. Net revenues at $226.9 million included price improvements of $28.8 million as the company benefited from the rapid escalation in world oil prices in the third

quarter. This was more than offset by lower volumes which reduced revenues by $15.6 million, higher crude oil price hedging costs of $6.5 million and $15.0 million, of revenue associated with the 1989 dispositions. The 14 percent decline in expenses was largely attributable to the inclusion in 1989 of higher international dry hole and abandonment costs which included write-offs of certain assets which had been recognized as pre-production costs in prior years. Other factors contributing to the reduction in expenses include lower production and depletion costs resulting from reduced volumes in 1990 and lower amortization of undeveloped rights. Finance charges were 17 percent lower in the first nine months of 1990 reflecting the reduction in long-term debt that occurred in 1989.

Capital expenditures and exploration expenses for the nine months were $79.1 million. In western Canada spending totalled $53.3 million, an increase of $11.1 million with land acquisitions accounting for the major portion of the increase. The lands have been acquired to strengthen existing landholdings in strategic exploration areas.

At the end of Sept. 26 exploratory and 157 development wells had been completed in western Canada, with success rates of 50 percent and 92 per cent, respectively. This drilling activity compares with 19 exploratory wells and 188 development wells in the first nine months of 1989. International wells drilled during this period totalled 68, up from 36 in the first nine months of 1989.

#90295p8108 10/22/1990 ~PR Newswire

MARKHAM, Ont. (OCT. 22) PR NEWSWIRE - Magna International Inc. (TSE: MG.A, MG.B; NASDAQ: MAGAF) today announced its audited results for the year ended July 31, 1990.

Sales for the year of $1.927 billion compared favorably with 1989 sales of $1.923 billion. Sales for the fourth quarter were $518.2 million, an increase of 9.9 percent from the comparable period of the prior year. A profit of $3 million from operations before tax and special provisions was earned during the quarter compared to losses of $2 million and $35 million, respectively, in the third quarter and second quarter.

This improvement in earnings is in part a result of the company's restructuring activities commenced earlier in the year which were previously announced. These restructuring activities eliminated operations which had annualized operating losses of approximately $50 million.

Total loss for the year of $224 million includes a restructuring provision of

$169 million relating to the previously announced writedown of certain operations of $153 million in the second quarter and a provision for costs relating to the restructuring process.

MOSCOW (OCT. 22) TASS -

THE PROGRAMME FOR CULTURAL AND SCIENTIFIC COOPERATION BETWEEN THE SOVIET UNION AND LUXEMBOURG IN 1991 AND 1992, SIGNED IN THE KREMLIN TODAY, AIMS TO DEVELOP FAVOURABLE TENDENCIES IN THESE FIELDS AND ENVISAGES THE EXPANSION OF CULTURAL EXCHANGES.

THE PROGRAMME ENVISAGES, FOR THE FIRST TIME, THE DEVELOPMENT OF DIRECT CONTACTS BETWEEN LUXEMBURG AND INDIVIDUAL SOVIET REPUBLICS.

SOVIET CULTURE MINISTER NIKOLAI GUBENKO TOLD TASS THAT LUXEMBURG IS "ONE OF THE WORLD'S CULTURAL CROSSROADS AND ONE OF THE COMMON MARKET CAPITALS THAT IS ENMESHED IN THE SPIRITUAL AND MORAL FIBRES OF EUROPEAN CULTURE".

THE MINISTER RECALLED THAT DURING HIS VISIT TO STRASBOURG, SOVIET PRESIDENT MIKHAIL GORBACHEV SUGGESTED CREATING A EUROPEAN UNIVERSITY OF CULTURE, WITH LUXEMBURG AS THE CENTRE.

"THE PROGRAMME SIGNED TODAY," GUBENKO SAID, "IS AIMED AT IMPLEMENTING THIS INITIATIVE. THE DECISION TO ESTABLISH SUCH A UNIVERSITY HAS NOT YET BEEN MADE, BUT I KNOW THAT THE LUXEMBURG SIDE IS EAGER".

THE MINISTER STRESSED THAT THE PROGRAMME CONTAINS SOME GENERAL PROVISIONS ALONG WITH VERY SPECIFIC ONES, RELATING TO THE EXCHANGE OF STUDENTS, RESEARCH FELLOWS AND ARTISTS.

THE CEREMONIAL SIGNING OF THE PROGRAMME WAS ATTENDED BY SOVIET PRIME MINISTER NIKOLAI RYZHKOV AND VISITING PRIME MINISTER JACQUES SANTER OF THE GRAND DUCHY OF LUXEMBURG .

MOSCOW (OCT 22) TASS - THE SOVIET UNION HAS FEW PARTNERS LIKE INDIA, "RELATIONS WITH WHICH HAVE HISTORICALLY DEVELOPED WITHOUT SET-BACKS, GOOD TO BETTER," SAID RAFIK NISHANOV, CHAIRMAN OF THE SOVIET PARLIAMENT'S COUNCIL OF NATIONALITIES CHAMBER.

HE WAS INTERVIEWED BY TASS HERE BEFORE THE ARRIVAL OF A DELEGATION FROM THE INDIAN PARLIAMENT LED BY RABI RAY, SPEAKER OF ITS HOUSE OF THE PEOPLE.

"RELATIONS BETWEEN THE USSR AND INDIA ARE NOT ONLY RELATIONS BETWEEN THE TWO COUNTRIES' GOVERNMENTS BUT, WHAT IS VERY IMPORTANT, BETWEEN THEIR PEOPLES," NISHANOV NOTED.

"THE REGULAR DIALOGUE AT THE SUMMIT LEVEL LEADS TO THE DEVELOPMENT OF COMPREHENSIVE COOPERATION WITH INDIA. THIS DIALOGUE WAS HIGHLIGHTED BY SOVIET PRESIDENT MIKHAIL GORBACHEV'S VISITS TO INDIA IN 1986 AND 1988 AND THE MAJOR DOCUMENTS SIGNED DURING THOSE VISITS," HE SAID.

"THE INDIAN PRIME MINISTER VISHWANATH PRATAP SINGH'S RECENT VISIT TO THE SOVIET UNION CONFIRMED THE CONTINUING PERSONAL CONTACTS BETWEEN THE INDIAN AND SOVIET LEADERSHIP.

"THE JOINT SOVIET-INDIAN STATEMENT SIGNED DURING THAT VISIT WAS A WORTHY CONTINUATOR OF THE DELHI DECLARATION. IT EMPHASIZED THE TWO COUNTRIES' READINESS TO ENTER THE 21ST CENTURY ON THE BASIS OF THEIR COMMON VISION OF WORLD PROCESSES".

REGULAR CONTACTS BETWEEN THE SOVIET AND INDIAN PARLIAMENTS HAVE BECOME A TRADITION, NISHANOV SAID. THEY "PERMIT US TO EXCHANGE LEGISLATIVE EXPERIENCE IN SOLVING POLITICAL, SOCIAL, ECONOMIC, NATIONAL AND OTHER PROBLEMS AND HELP US UNDERSTAND EACH OTHER BETTER".

NISHANOV POINTED OUT THAT IF SOVIET AND INDIAN PARLIAMENTARIANS AGREED TO ACT IN SOLIDARITY IN THE INTERNATIONAL ARENA, THEY COULD PRODUCE TANGIBLE RESULTS IN THE STRUGGLE FOR A COMPLETE BAN ON NUCLEAR WEAPON TESTS AND FACILITATE TURNING THE ASIAN-PACIFIC REGION INTO A ZONE OF PEACE, SECURITY AND COOPERATION.

"WE BELIEVE THAT IT WOULD BE A GOOD IDEA FOR SOVIET AND INDIAN PARLIAMENTARIANS TO HOLD JOINTLY A REPRESENTATIVE CONFERENCE OF PARLIAMENTARIANS OF THE ASIAN AND PACIFIC COUNTRIES TO CONSIDER THE REGION'S PRESSING PROBLEMS," NISHANOV SAID.

"A FORUM OF THIS KIND COULD DISCUSS THE SETTLEMENT OF REGIONAL CONFLICTS, INCLUDING IN THE MIDDLE EAST," THE SOVIET STATESMAN SAID.

NISHANOV SAID THAT SOVIET-INDIAN ECONOMIC COOPERATION WAS MUTUALLY ADVANTAGEOUS. ACCORDING TO HIM, IN 1989, THE SOVIET UNION IMPORTED FROM INDIA ONE BILLION ROUBLES WORTH OF CONSUMER GOODS, AND THE PLANK WILL BE RAISED THIS YEAR.

BOTH TRADITIONAL INDIAN EXPORTS TO THE SOVIET UNION AND NEW INDUSTRIAL PRODUCTS -- INCLUDING MACHINES, ELECTRONIC AND MEDICAL EQUIPMENT, COMPUTERS AND MEDICINES -- ARE INCREASING.

THE TOTAL VOLUME OF SOVIET-INDIAN TRADE HAS BEEN CONSISTENTLY ON THE RISE, REACHING 2.8 BILLION ROUBLES IN 1989.

NISHANOV FAVOURED DEVELOPING NEW FORMS OF SOVIET-INDIAN INTERACTION, INCLUDING PRODUCTION COOPERATION, JOINT VENTURES AND BUILDING COOPERATION IN THE SOVIET UNION AND THIRD COUNTRIES.

HE SAID A POWERFUL IMPULSE TO FURTHER ECONOMIC INTERACTION WILL BE PROVIDED BY NEW SUMMIT AGREEMENTS ON THE DEVELOPMENT OF BILATERAL RELATIONS UP TO THE END OF THE CENTURY.

#90295t0050 10/22/1990 ~ts

VILNIUS (OCT 22) TASS - "IF OUR RELATIONS WITH THE OUTSIDE WORLD DEVELOP AT THE PRESENT PACE, WE HAVE ONLY TO FORMALISE REALITIES, ALREADY RECOGNISED BY THE WORLD, AT TALKS WITH THE KREMLIN," LITHUANIAN DEPUTY PRIME MINISTER ROMUALDOS OZOLAS SAID HERE ON SUNDAY EVENING, REVIEWING WEEKLY EVENTS ON TELEVISION.

HE COMMENTED ON LAST WEEK'S VISIT BY THE NORDIC COUNCIL TO VILNIUS AND KAZIMIERA PRUNSKIENE'S VISIT TO SWEDEN.

SINCE THE MIDDLE OF LAST WEEK OZOLAS WAS IN MOSCOW WHERE GROUPS OF EXPERTS AND SPECIALISTS ARE WORKING ON DOCUMENTS FOR THE FORTHCOMING TALKS BETWEEN LITHUANIA AND THE SOVIET UNION.

HE NOTED THAT "THE THREE DAYS IN MOSCOW WERE VERY DIFFICULT". "THE KREMLIN IGNORES BOTH OUR AND WORLD LOGIC," HE SAID.

ON THE ONE HAND, OZOLAS NOTED, THE SOVIET SIDE REJECTED ALL PROPOSALS TO SETTLE SPECIFIC PROBLEMS (THE DEPLOYMENT OF THE SOVIET ARMY IN LITHUANIA, THE QUESTIONS OF VISAS, CUSTOMS CONTROL, ETC.) IN THE BELIEF THAT THEIR EXAMINATION IS POSSIBLE ONLY AFTER POLITICAL DECISIONS ARE MADE.

ON THE OTHER HAND, THE LITHUANIAN GROUP THAT IS DRAFTING A PROTOCOL ON THE START OF THE TALKS, IS ENCOUNTERING MOSCOW REPRESENTATIVES' OPPOSITION TO THE INCLUSION OF "POLITICAL REFERENCES" IN THIS DOCUMENT, OZOLAS CONTINUED.

HE SAID THAT "THERE WILL BE NO MORE CONSULTATIVE MEETINGS" AND THAT "THE SOVIET-LITHUANIAN TALKS WILL BEGIN".

THE DEPUTY PREMIER CALLED THE DRAFTING BY A JOINT WORKING GROUP OF A PROTOCOL ON THE START OF THE TALKS WHICH COULD BE SIGNED AT THE NEXT MEETING BY THE TWO DELEGATIONS, A CONDITION FOR THE START OF THE BILATERAL TALKS.

"MOSCOW WILL BE FORCED TO RECOGNISE US: ONLY A FEW DOUBT THIS IN THE KREMLIN,

ALTHOUGH THE REVERSE IS SAID OUTLOUD," OZOLAS NOTED.

SOVIET PRIME MINISTER NIKOLAI RYZHKOV TOLD REPORTERS AFTER A MEETING WITH LITHUANIAN REPRESENTATIVES ON SATURDAY THAT THE MORATORIUM ANNOUNCED BY THE LITHUANIAN LEADERSHIP ON THE DECLARATION OF INDEPENDENCE THAT WAS PROCLAIMED IN MARCH IS THE BASIS FOR THE NEGOTIATIONS.

"IT IS UNACCEPTABLE TO US TO DEFINE THE FINAL AIM OF THE TALKS AS THEIR PRELIMINARY CONDITION NOW," HE SAID.

IN RYZHKOV'S OPINION, THE LITHUANIAN LEADERSHIP UNDERSTANDS WELL THAT "THEY ARE UNABLE NOW TO LIVE WITHOUT THE SOVIET ECONOMY AND UNITED ECONOMIC SPACE". "TALK ABOUT SECESSION FROM THE SOVIET UNION IS CONDUCTED ONLY FROM THE POLITICAL POINT OF VIEW," HE ADDED.

(OCT. 22) UPI - Congressional negotiators ended budget talks Sunday night without resolving differences on how to tax the nation's wealthiest people... as part of a deficit-reduction plan. Negotiators are trying come up with a package that can be passed by Wednesday when the latest stop-gap spending bill funding the government expires. The budget negotiations are to resume Monday morning.

President Bush is expected to issue the 16th veto of his administration Monday when he considers the Civil Rights Act of 1990. On Saturday, Bush offered his own version of the bill... but Congress rejected it Sunday as a political ploy. Critics of the presidential version concede it will be tough to hand Bush his first override defeat if the civil rights act is vetoed.

There is NO word as to the cause of an airplane crash Sunday night that killed one person and seriously injured three others in Santa Barbara, California. The small plane knocked down power lines and struck a building as it went down short of the runway at the Municipal Airport. The four people on board were graduate students from India... two women and two men.

Physicians attending an American Society of Anesthesiologists convention in Las Vegas, Nevada, were introduced to a new painkiller Sunday that is hailed as a major medical breakthrough. The painkiller, called Toradol, is a synthetic chemical that when injected into patients has the same pain relief as morphine, but without the narcotic side effects.

#90295u0132 10/22/1990 ~United Press International

(OCT. 22) UPI - A new F-B-I report on crime contains nothing but bad news. The agency's report found violent crime was on the upswing in the first half of 1990... rising 10 percent nationwide. The survey also found that murders in America's biggest cities jumped 20 percent during that time... fueled by gang violence and wars over drug turf.

Powerful winds raged through the northern Rockies Sunday... as showers and thunderstorms moved across the Midwest, parts of the Southeast and the Pacific Northwest. Livingston, Montana, was hit by gusts of 81 miles-an-hour... while Vedauwoo, Wyoming, clocked 60-mile- an-hour winds.

#90295u0207 10/22/1990 ~United Press International

(OCT. 22) UPI - Northern European nations are getting ready for a stream of refugees because of loosened Soviet restrictions on emigration. Denmark says the number of Soviet citizens seeking asylum has swelled. Sweden and Norway are preparing to receive thousands of people. Finland has increased patrols on the Soviet border.

The 10-party coalition ruling Malaysia was returned to office in yesterday's elections. Coalition lawmakers supporting Prime Minister Mahathir Mohamad won 166 of the 180 parliamentary seats already decided. Mahathir got the

two-thirds majority he wanted to form a government that can amend the constitution.

Petroleum industry analyst Trilby Lundberg reports that retail gasoline prices rose more than two cents a gallon in the last two weeks. The average price was just over one dollar 47 cents, tax included. Lundberg says most retailers have increased retail prices only as much as the wholesale increase.

The second trial in an attack on a jogger in Central Park in Manhattan begins today. Two youths are charged with attacking and raping the woman. The lawyer for one defendant plans to cross-examine the woman about her sex life. The other defense lawyer opposes cross-examination and says he may move for a mistrial.

Scientists hope to get a good look today at a huge, rare shark with a mouth that glows in the dark. The megamouth shark was caught in a fishing net yesterday and was hauled to Dana Point, California. Only two others have ever been sighted. Scientists say they have no facility for keeping the shark so it will be set free.

-30- 1749

#90295u0211 10/22/1990 ~United Press International

(OCT. 22) UPI - The Calgary Flames struck to their game plan of checking the Edmonton Oilers everywhere on the ice Sunday night and it paid off with a 2-1 victory.

Flames goalie Mike Vernon faced only 16 shots as his teammates kept the Oiler snipers off balance for the entire time.

''There was only time they got a rebound and that was it,'' Vernon said. ''We did our job defensively tonight. Sixteen shots may sound like an easy night but it's never easy against the Edmonton Oilers especially when you give them a penalty in the last two minutes of the game.

''Our team did a heck of job of clogging up the middle and taking center ice away from them.''

Edmonton goalie Bill Ranford was much busier, facing 31 shots. He played well, turning aside two breakaways and shots from close range.

''Ranford definitely deserved first star,'' said Theron Fleury, who scored the winning goal at 14:09 of the second period.

Fleury deflected an on-ice shot from defenseman Al MacInnis past Ranford.

''It was just me and Ranford back there and I just touched the puck slighly,'' Fleury said.

Brian MacLellan scored the other Calgary goal, also in the second period.

Dave Brown, known more for his policeman role than scoring, gave the Oilers a 1-0 lead in the first period.

Brown's last goal goes back 138 games - to the days when he laced on his stakes for the Philadelphia Flyers - and it has been so long, he couldn't remember the last time he scored.

''I figured it would come some time or another,'' Brown said. ''I'm not all that great with the puck ... but everyone should score a few goals a year. I've had a lot of chances but just couldn't put them away.''

In other games, Chicago routed Minnesota 7-1 and Vancouver edged Quebec 3-2.

-- AROUND THE NHL --

Blackhawks 7, North Stars 1

At Chicago, Chris Chelios had a goal and three assists and Jacques Cloutier turned back 24 shots to power the Blackhawks. Mike Modano's third goal at 17:13 of the final period ruined Cloutier's shutout bid. Chelios's power-play goal in the opening period was one of five goals scored by Chicago's special teams.

Canucks 3, Nordiques 2

At Quebec, Steve Bozek scored twice in the third period to lift Vancouver. With the score 1-1, Bozek struck at 10:51, taking a pass in the slot from Brian Bradley and depositing a low shot into the left corner of the net. Bozek then scored at 16:11, banging a rebound past goaltender Ron Tugnutt.

#90295u0237 10/22/1990 ~United Press International

CANBERRA, Australia (OCT. 22) UPI - On the eve of a five-day visit by black South African leader Nelson Mandela, Prime Minister Bob Hawke said sporting sanctions against South Africa may soon be lifted.

''From my point of view, I hope that as soon as it's reasonable now we will be able to lift the sanctions,'' the prime minister said Sunday on ABC radio's Grandstand program. ''We want to do that as soon as its clear that the process (of dismantling apartheid) is irreversible and it looks as those processes are getting to the stage where they may be irreversible.

''When that happpens, well then, these (sporting) sanctions will be able to be lifted, and they are talented people,'' Hawke said.

''If they fully integrate the society and develop the talents of their population, they could be very, very formidable opponents,'' he said.

Mandela was scheduled to arrive in Canberra Monday night from Indonesia on the third leg of his Asian tour.

The Australian government maintains no contacts with the South African military, has no official trade links and does not encourage trade with South Africa.

Hawke said South African President F.W. de Klerk acknowledged that sactions had accelerated reform of the apartheid system or racial segregation.

''They've made it clear that the pressures that have been put on by the rest of the world, including Australia, is a thing which has now bought them to the table,'' Hawke said. ''We've always wanted not to bring South Africa to its knees, but to bring it to the negotiating table.''

#90295u0246 10/22/1990 ~United Press International

TOKYO (OCT. 22) UPI - A long-standing territorial dispute over a tiny uninhabited island group in the East China Sea erupted when Japanese Coast Guard ships forced two Taiwanese vessels approaching one of the islands to turn back, maritime officials said Monday.

The incident occurred Sunday afternoon when two Taiwanese ships tried to land a sports delegation on Uotsurijima, one of the disputed Senkaku Islands, a spokesman for the Maritime Safety Agency said.

Government spokesman Misoji Sakamoto Monday expressed regret over the icncident and said the government will ask Taiwan to take measures to prevent such incidents.

''The Senkaku is part of Japanese territory and Sunday's incident is regrettable. The government will ask Taiwan authorities to take proper measures to prevent the recurrence of such incidents,'' Sakamoto, Chief Cabinet Secretary and Prime Minister Toshiki Kaifu's official spokesman, told a news conference.

The Senkaku group of eight tiny islets, located about halfway between southern Japan and Taiwan, is claimed by Japan, China and Taiwan. The group is called Diaoyutai by China and Taiwan.

The islands are uninhabited and Japanese Maritime Safety Agency ships patrol the 12-mile territorial waters around them regularly.

Japan and China agreed to shelve the dispute over the islands when the two countries signed a peace treaty normalizing relations between the two countries in 1972.

The maritime official said Japanese patrol ships spotted two Taiwanese vessels inside Japanese territorial waters about nine miles west of Uotsurijima around 2 p.m. Sunday and ordered them to turn back.

The two patrol ships were joined later by other patrol boats and helicopters flown from nearby Okinawa, Japan's southernmost island group.

The two Taiwanese vessels left the area by 5 p.m., the official said.

The official, citing reports from Taiwan, said athletes aboard the Taiwanese ships apparently tried to hoist Taiwan flags on the island and stage a torch relay for a national athletic meet scheduled for Kaohsiung Thursday.

News reports from Taipei said Taiwan was angered by installation of a lighthouse on the islands by Japan.

China, in a statement issued by the Foreign Ministry Thursday, demanded Japan dismantle the lighthouse.

#90295u0280 10/22/1990 ~United Press International

MANILA, Philippines (OCT. 22) UPI - Gunmen shot and killed a leader of an association of mini-bus drivers in his office in suburban Paranaque town Monday, possibly because of his stand on a planned general strike, police said.

Oscar Lazaro, 53, was hit four times in the head and body, possibly by rebels, and died instantly, police and hospital sources said.

Police investigator Esmeraldo Landicho said four youths entered Lazaro's office at noon, announced a holdup, ordered employees to lie on the floor and asked for Lazaro.

''Lazaro identified himself and one of the youths shot him at close range,'' said Landicho. He said the assailants then walked out of the building and escaped.

Landicho said the killing appeared to be robbery, but he said investigators were looking into other angles, including the possibility guerrillas of the communist New People's Army were involved.

The guerrillas have announced they were supporting a general strike called by trade unions on Wednesday to press demands for wage increases prompted by last month's hikes in petroleum prices.

On Sunday, gunmen claiming to be guerrillas torched in the capital two buses whose owners reportedly refused to join the strike.

Landicho said he did not know what Lazaro's stand was on the strike, but he said in the past the union leader had supported the government of President Corazon Aquino and refused to join mass actions against her.

Leftist transport drivers associations have announced plans to join the strike.

-30- 1706

#90295u0300 10/22/1990 ~United Press International

CANBERRA, Australia (OCT. 22) UPI - The Australian government has refused a request from China to provide the names of Chinese students who have been arrested as illegal immigrants, a Department of Immigration spokesman said Monday.

The request that the Chinese Embassy be routinely informed when Chinese students are detained for illegal entry was made earlier this month.

The request followed the detention of between 40 and 50 Chinese students in Victoria, Queensland and New South Wales over the past few months. The latest detentions involved 29 students in Melbourne in September.

Gordon Benjamin, a spokesman for the Department of Immigration said the request from the Chinese Embassy was ''politely declined.''

''They asked us for something we were not prepared to give,'' Benjamin said.

Benjamin said supplying such information without the consent of the person concerned was against Australia's privacy laws but such people were given the opportunity to contact their Embassy or their solicitor if they wanted to.

''We are not aware of any unpleasantness on their return and we've had no reports of any reprisals,'' Benjamin said.

The Immigration Department estimates that about 1,400 Chinese, about 7 percentof the total who came to Australia at the time of the Tiananmen Square massacre have since returned home.

-30- 1528

#90295u0359 10/22/1990 ~United Press International

(OCT. 22) UPI -, A huge cold front extending from the Great Lakes to the Gulf of Mexico marched east Monday, bringing showers to the Midwest while frost warnings were posted for Texas and fog enshrouded the Northwest.

Clear skies covered much of the Plains at the start of the week with Topeka, Kan., and Fargo, N.D., reporting lows in the upper 30s with some gusty winds topping 25 mph.

The cold front that cut a north-south line across the nation soaked parts of Ohio and Kentucky and its leading edge reached western Pennsylvania where boaters were told to use caution on the Ohio and Allegheny rivers because of high water and swift currents.

A high pressure ridge over the Middle Atlantic states brought moisture in from the Atlantic, leaving much of the South under clouds with low temperatures in the 50s and 60s.

Wet weather covered western New York state and the large front was expected to bring clouds and shower across the state during the day. New York City was partly cloudy with lows in the 50s, while Buffalo was already feeling the rains with 50-degree temperatures.

A dense fog advisory was in effect for the valleys of western Oregon, where visibilties of zero were reported in the early morning.

Winter hit Texas prompting the National Weather Service to issue a frost warning for the Hill Country.

The warning came after skies cleared over the Hill Country, Edwards Plateau and south central Texas and, combined with light north winds, temperatures in the mid 30s and lower humidity, allowed patchy, light frost to form, especially in low-lying protected areas of the Hill Country.

Partly cloudy skies and scattered showers with some local fog covered Seattle as temperatures dipped into the 40s with winds between 10 mph and 15 mph.

To the south, Los Angeles enjoyed clear skies and low temperatures in the 50s with highs predicted in the 80s for the first half of the week.

#90295u0363 10/22/1990 ~United Press International

BEIRUT, Lebanon (OCT. 22) UPI - Lebanese Christians observed a general strike Monday to mourn the weekend killing of Dany Chamoun, a staunch supporter of deposed Christian Gen. Michel Aoun, witnesses said.

The witnesses said all businesses were shut in and around Christian east Beirut and Lebanon's estimated 1 million Christians stayed home for the day.Bakeries, pharmacies and hospitals remained open.

Chamoun, his wife and two young sons were shot to death early Sunday by gunman carrying weapons equipped with silencers who burst into his house in

Syrian-patrolled Christian district of Baabda southeast of Beirut.

Police said Chamoun, 56; his wife Ingrid, 37; and his son Tarek, 8, were killed instantly. Chamoun's second son, Julian, 6, died in hospital from his wounds, police said.

Chamoun's 11-month-old daughter was not hurt as the assassins were not aware she was in the house, according to sources close to the family.

The killing of Chamoun and his family overshadowed present Lebanese- Syrian efforts to reunify Beirut and restore law and order.

The crime, which prompted nationwide condemnations, also marred a Lebanese-Syrian summit that ended in Damascus Sunday.

Syrian President Hafez Assad, at the end of a third round of closed- door talks with Lebanese President Elias Hrawi, expressed regret over the crime.

''We don't find such events comforting at this particular time,'' Assad said shortly before Hrawi wrapped up a two-day visit to Syria and returned home.

Chamoun was a main supporter of Aoun, who was ousted Oct. 13 when a combined force of Syrian troops and Lebanese soldiers thrust into the Christian enclave and engaged Aoun's followers in a bitter fighting that left more than 600 people dead.

Aoun has hidden at the French embassy on the eastern outskirts of Beirut pending a government go-ahead to let him take up refuge in France. Pro-Syrian officials want to try Aoun for ''crimes'' against the Lebanese people and embezzling.

PINE PLAINS, N.Y. (OCT. 22) UPI - Tom Carvel, the hoarse-voiced ice cream entrepreneur, died Sunday morning at his home in Pine Plains, N.Y. He was 84.

Carvel was the former chairman of the Carvel chain of 700 ice cream stores. His gravelly voice was known to thousands who heard him do radio and television commercials for his shops.

Carvel also lived in Ardsley, N.Y., and Atlantis, Fla.

He apparently died in his sleep, officials said. The cause of death was not immediately known.

Carvel who had played golf on Saturday at the All-American Sports City, a golf club he owned in Dutchess County, and gone out for dinner before going to

sleep, officials said said.

(OCT. 22) UPI - Stock prices on the Tokyo Stock Exchange surged Monday as momentum from last week's five-day rally boosted the market 2.4 percent.

The key Nikkei Average of 225 selective issues, which surged 2,091.33 points last week including 114.41 points Friday, climbed 589.35 points, or 2.4 percent, to 25,070.86.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares shot up 42.01 points to 1,858.30, topping its Friday gain of 32.76 points.

Volume continued to be stronger than the average of the past several months. An estimated 600 million shares changed hands, compared with 1.08 billion shares on Friday.

Advances topped declines 886 to 133, while 96 issues remained unchanged.

Elsewhere in Asia, stocks on the Hong Kong Stock Exchange posted solid gains, riding the wave of sharp increases in Tokyo and New York.

The benchmark Hang Seng Index, which climbed 41.43 points Friday, added another 23.61 points to 3,015.56.

Among the narrower indexes, financials gained 14.61 points, industrials rose 37.30, utilities dropped 29.23 and properties surged 78.62 points.

Volume was strong as an estimated 982 million shares changed hands, compared with 1.08 billion shares Friday.

In Bangkok, stocks surged on the Thailand Stock Exchange boosted by the strong performance in Tokyo and the drop in global oil prices.

The Securities Exchange of Thailand Index, which gained 2.88 points Friday, climbed 31.17 points or 4.8 percent to 683.33.

Volume amounted to around an estimated 3 billion shares, compared with 2 billion shares changing hands Friday.

In Singapore, stocks rallied in active trading on the Singapore Stock Exchange in line with surge in overseas markets.

The Straits Times Industrial Index, which climbed 28.32 points Friday, rose another 33.38 points to 1,173.23. The broader-based All Singapore Index rose 10.34 points to 324.18.

Volume amounted to around an estimated 72.3 million shares, compared with 48.2 million shares changing hands Friday.

Elsewhere around the region, in Seoul, stocks on the Korean Stock Exchange climbed for the fifth consecutive session.

The Korean Composite Stock Index climbed 22.93 points, or 3.2 percent, to 733.37.

In Australia, local investors ignored Tokyo's climb and sent stocks slightly lower in light trading on the Sydney Sharemarket.

The All Ordinaries Index, which gained 13.4 points Friday, slipped 4.1 points to 1,364.6.

Volume amounted to around an estimated 59.6 million shares, compared with 75.3 million shares changing hands Friday.

TOKYO (OCT. 22) UPI - Japan's increasing sales of used cars to the Soviet Union, New Zealand, Southeast Asia and the Middle East have pushed it past Germany as the world's top exporter of used cars, a report said Monday.

The Japan Auto Appraisal Institute said Japan exported 125,825 used cars in 1989, surpassing the approximately 100,000 used cars exported from Germany, according to the Mainichi Daily News.

A boom in domestic new car sales, which have topped 1.3 million in the last five years, has left Japan's used car market oversupplied. Used car dealers are turning to the export market.

Last year Japan doubled the number of used cars exported compared to the previous year, the institute said.

The trend has continued this year. In the first eight months of 1990, Japan exported 115,133 cars, or 44.8 percent more than the same period a year earlier, the institute said.

Japan expects to export a total of 200,000 used cars in 1990.

The Soviet Union is proving to be fertile ground for Japanese used car sales. The Soviets bought 3,000 used cars in the first eight months of this year, up from 414 used cars in all of 1989.

New Zealand, as a top customer, bought 58,000 used Japanese cars in 1989.

Other key markets include the United Arab Emirates and other Middle East countries and Southeast Asia.

The Auto Appraisal Institute inspects used cars for defects before they are exported and rejects those that fail the tests. Most exports are less than five years old.

In Japan the used cars sell for about $1,600 to $2,400), but can be sold for about $8,000 in New Zealand, the newspaper said.

Yoshihito Oishi, vice chairman of a union of used car inspectors, says the cost of storage and inspection adds considerably to the price of export-bound used cars.

#90295u0562 10/22/1990 ~United Press International

LAHORE, Pakistan (OCT. 22) UPI - Thousands of supporters from both Pakistan's major political groupings gathered Monday to attend rival processions in the same city on the final day of campaigning for Wednesday's elections.

Ousted Prime Minister Benazir Bhutto was expected to arrive Monday evening in Lahore, where she will lead a 10-mile procession through some of the mostly densly populated neighborhoods of the northeastern city.

Supporters of Bhutto's Pakistan People's Party arrived in trucks, buses, cars, bicycles and on foot to take part in the march. They carried large wooden arrows - the PPP's election symbol - as well as the green, red and black party flag and massive portraits of Bhutto.

Bhutto was to address the crowd at seven points along the route, which goes from the city gates to the central railway station.

PPP leaders organized the procession after they were refused permission by authorities to hold rallies at three sites in Lahore. As capital of Punjab, Pakistan's most populous province, Lahore has always been politically important and the site of the final rallies of any election campaign.

Meanwhile, supporters of the Islamic Democratic Alliance, a loose coalition of parties opposed to Bhutto, gathered at the Mochi Gate ground, the traditional site for public meetings in Lahore.

Islamic Democratic Alliance leaders, including Nawaz Sharif, former chief minister of Punjab and considered Bhutto's main rival for the prime ministership, are scheduled to address a rally at the grounds late Wednesday after a 2-mile march through the city.

Thousands of armed police, many patroling in trucks, lined the routes of the processions in case of violence between supporters of the two rival groupings.

President Ghulam Ishaq Khan sacked Bhutto's 20-month-old government on Aug. 6, accusing it of corruption and nepotism and of failing to control law and order and dissolved the National Assembly. He appointed opposition leader Ghulam Mustafa Jatoi as caretaker prime minister until elections he set for Oct. 24.

The president also set up Special Disqualification Courts to try Bhutto and members of her administration on corruption charges in what observers believe was a bid to bar her from the elections.

Many believe Ishaq Khan's actions were inspired by the army, which has run Pakistan for more than half of its 43-year history and which had been in conflict with Bhutto's democratic government.

However, analysts say the attempt to malign Bhutto and keep her from returning to power have instead evoked a wave of sympathy for the daughter of hanged Prime Minister Zulfikar Ali Bhutto.

But they say Benazir Bhutto may have lost some support after accusations by Islamic Democratic Alliance leaders that she was to blame for this month's suspension of U.S. aid, and that she is sympathetic to India and Israel.

Bhutto has drawn massive and emotional crowds at rallies across the country in an outpouring of support many observers say exceeds that of the campaign for the November 1988 elections. The PPP won those elections, the first democratic polls in the country since 1977.

Most predictions say the PPP will emerge as the single largest party from Wednesday's vote, but without an overall majority, and that the Islamic Democratic Alliance will be able to cobble together a coalition government with the help of minor parties and independents.

However, most commentators say an Islamic Democratic Alliance coalition government, founded largely on opposition to Bhutto, may not survive long and that the country could again be going to polls within a year.

#90295u0745 10/22/1990 ~United Press International

LONDON (OCT. 22) UPI - Britain's trade gap narrowed during September because an unexpected surge in exports and a drop in imports compensated for the increased costs of oil, figures released Monday said.

The Central Office of Statistics announced that Britain's trade deficit for September was $1.6 billion, a drop from $2.3 billion in August, and the first drop below the 1 billion pound figure this year.

Currency markets and the London stock exchange reacted immediately to the favorable news.

By noon, the pound had risen 1 cent against the U.S. dollar to $1.9581, and reached 2.9518 German marks and 247 Japanese yen. The blue chip Financial Times 100-stock index, which gained 6.4 points Friday, was ahead 4.4 points to 2,093.4. The narrower top 30 industrial average was up 5.2 points to 1,626.7.

Market analysts said the robust export performance indicated British products remained competitive.

#90295u0747 10/22/1990 ~United Press International

EL ALAMEIN, EGYPT (OCT. 22) UPI - Veterans of the last key World War II desert battle at El Alamein warned a Persian Gulf desert war would be ''very difficult,'' but a German veteran applauded action to keep Iraqi leader Saddam Hussein from imitating Adolf Hitler.

Allied soldiers and one Axis soldier, all in their 70s and 80s, stood at attention during ceremonies Sunday to mark the 48th anniversary of the battle where British Gen. Bernard Montgomery outwitted German ''Desert Fox'' Gen. Erwin Rommel's Afrika Corps, smashing Hitler's dream of conquering the Middle East.

Currently, troops from Britain's 7th Armored Brigade - which won the nickname ''Desert Rats'' fighting Rommel's Nazi Panzer divisions in North Africa - are deployed in Saudi Arabia alongside U.S. Marines as part of the U.S.-led international force confronting Iraq.

Sunday, the veterans discreetly wiped away tears amid memories of those who died, and Italian veteran Roberto Partini, 92, expressed caution about a new war in the Persian Gulf.

''We're all united now for peace and we're trying to build a new Europe,'' Partini said. ''I don't believe in war ... I hope and trust in peace.''

Another Italian veteran who fought at El Alamein said war in the desert was very difficult.

''War in the desert in very difficult because of the conditions of the climate '' said Franco Losardo, 74, who served as an artillery officer in the 1942 campaign. ''There is no water for a big army, there are many diseases ... a desert war must be fought fast and there isn't much time to wait around.''

Losardo said the bases of U.S. troops in Saudi Arabia are far away, ''and it is difficult to give logistic supply.''

But Losardo said he was happy U.S. forces ''have the luxury'' of 5 gallons of water a day unlike Italian troops, who received only about a half-gallon of water a day if they were lucky during the El Alamein campaign.

Losardo, standing under a plaque at the Italian war dead momorial which quoted Rommel as saying: ''German soldiers stupified the world but Italian soldiers stupified German soldiers,'' said in the El Alamein campaign, most fighting was done at night.

''We never hated the soldiers on the other side ... we could see them during

the day, but we only exchanged fire at night, when it was cooler, '' he said.

An official delegation from Germany's Afrika Corps did not attend the commemmoration at the site of the battle some 65 miles west of Cairo, apparently out of concern of becoming embroiled in the Persian Gulf war.

Germany has said its constitution prevents it from deploying troops as part of the U.S.-led international force facing off against Iraq, which invaded Kuwait on Aug. 2.

But a sole Afrika Corps veteran who happened to be in Egypt and went to El Alamein said only firm action could stop Iraqi President Saddam.

''If the allies were stronger, Hitler would not have dared to attack, and so I'm grateful that the United States, England and France are sending forces to the Arab desert to prevent Saddam Hussein from doing the same thing Hitler did '' said Helmut Heimberg, a veteran from Kaiserslautern in Germany.

Heimberg, who served as a sergeant in the Afrika Corps and was wounded in the El Alamein campaign, said he was grateful to the United States and hoped Germany would send troops to the Persian Gulf under U.N. auspices.

''I'm grateful to America and I hope that Germany can help by changing its constitution and sending army units under U.N. auspices,'' said the bespectacled former fighter.

British widow Irene Connor from London also said only quick action could stop Saddam.

''I lived through Munich and the years of fear before Hitler started the war '' she said at the graveside of Allied troops from Britain, New Zealand, South Africa, India, Pakistan, Poland and other countries.

''We should have done it earlier,'' she said while reading an inscription on the tombstone of RAF pilot Alastair Seabrook, 22, which read: ''His last flight into the sunshine.''

-30- 4271

#90295u0753 10/22/1990 ~United Press International

JERUSALEM (OCT. 22) UPI - Israeli authorities barred Palestinians from the occupied West Bank and Gaza Strip from entering Jerusalem Monday to prevent revenge attacks on Arabs following the stabbing deaths Sunday of three Israelis.

Jerusalem was quiet except for isolated incidents Monday as an additional 2,000 police patrolled the city and the third victim of the stabbing attack was buried.

Overnight the army sealed the West Bank home of Omar Abu Sirhan, 19, who is accused of fatally stabbing three Israelis Sunday in the West Jerusalem neighborhood of Baka. Police said Sirhan, a construction worker from Abbadiyeh village near Bethlehem, allegedly carried out the killings in revenge for the deaths of at least 20 Arabs killed by police during riots in the Temple Mount riots Oct. 8.

After crowds of angry Jews attacked Arab workers and cars Sunday following the stabbings, Police Commissioner Ya'acov Terner ordered Palestinians from the territories to be prevented from entering Jerusalem until further notice.

Arab-owned vehicles from the territories were turned back at checkpoints on the outskirts of Jerusalem. Only Palestinians with special permits or Jeruslaem residents were allowed to enter.

Police patrols were increased in markets and other places where crowds gather.

The funeral for Shalom Chelouche, 28, a police cadet killed trying to apprehend the assailant, took place Monday without incident but some mourners shouted, ''How long will this go on?''

Only relatively minor incidents were reported after Sunday's fatal stabbings. In the Neve Ya'acov neighborhood, a Jewish supermarket employee was stabbed by an Arab co-worker who then escaped, police said. The 46-year-old victim was slightly wounded.

In the Gaza Strip refugee camp of Khan Younis, a soldier was stabbed by an Arab and lightly wounded.

Overnight in the middle-class Baka neighborhood, the tires of more than 30 cars were slashed in what police said was a provocation.

Maj. Gen. Ehud Barak, deputy chief of staff, said Monday a price will have to be paid by all those responsible for Sunday's killings.

''It is important that we repeat to ourselves ... that we are in a bitter, long struggle with the Palestinians,'' Barak said during a ceremony in honor of former Defense Minister Moshe Dayan.

Justice Minister Dan Meridor told Israel Radio that security had to be increased in Jerusalem.

''We have to make an effort to increase the security even more, to overcome this crazy terrorism in order to avoid a situation in which they win,'' he said. ''A victory for them is that Jews won't go to East Jerusalem and that Arabs won't come to West.''

-30- 2898
#90295u0754 10/22/1990 ~United Press International
(OCT. 22) UPI - Members of Congress chose over the weekend NOT to accept a compromise civil rights bill proposed by President Bush. The president is expected today to veto the measure that was passed. Buhs said in a statement that his bill would protect employees against discrimination without imposing UNacceptable hiring quotas. The veto would be the 16th for Bush. So far, NONE has been over-ridden.

The Senate and the House have each passed their versions of a federal budget plan, but efforts continue to iron out the differences. Negotiators plan to meet again this morning after failing to reach agreement during the weekend. A temporary spending plan expires on Wednesday. House Speaker Tom Foley says agreement will have to come today in order to meet the deadline.

Testimony is to begin today in the trial of two youths charged with attacking and raping a woman while she jogged in Manhattan's Central Park. Their two lawyers have different opinions on strategy. One wants to cross-examine the victim about her sex life. The other lawyer says that will result in pity for her and threatens to ask for a mistrial. Three other youths were convicted in an earlier trial.

Boston has an uneasy anniversary tomorrow. One year ago, Carol Stuart, seven months pregnant, was shot and killed and her husband, Charles, was wounded. He said a black man forced his way into their car and an intense manhunt followed. A black ex-convict was identified by news reports as the prime suspect. Charles Stuart later killed himself and it is believed he was the killer. The case angered blacks and tomorrow many plan a protest against police and the news media.

DRESDEN, GERMANY (OCT. 22) UPI - Eastern German residents responded with outrage Monday to a weekend march by neo-Nazis in the town of Dresden, while in western Germany, one man was killed when right-wing ''skinheads'' attacked a group of basketball fans.

Police said the 23-year-old man was killed in the western German town of Ludwigsburg Sunday after neo-Nazi ''skinheads'' attacked the fans with a molotov cocktail. In the ensuing panic, the young man was pushed off a train platform in front of an oncoming streetcar.

In eastern Germany, the daily Dresdner Morgenpost said its phone lines were jammed Monday by angry citizens responding to the ''scandalous'' weekend march by more than 500 neo-Nazis.

The group, led by notorious right-wing extremist Michael Kuehnen of western Germany, rallied in downtown Dresden Saturday.

The extremists raised their right arms in the Hitler salute, carried former German war flags and shouted ''foreigners out.'' At the rally, Kuehnen announced that the group would stage a second march at what he called the ''zone border,'' meaning the German-Polish border.

''We will never give up Pommerania, eastern Prussia and the Sudetenland,'' he said, referring to former German territories which Germany lost after World War II.

Kuehnen has served seven years in West German prisons for his neo- Nazi activities. His group, which has been banned and renamed repeatedly, consists of hard-core neo-Nazis who have been connected to numerous violent attacks.

The demonstration, which was officially registered with local authorities, was accompanied by over 200 armed policemen from Dresden and western Germany.

''I cannot understand why this march was allowed,'' said a western German police officer who was on duty during the rally.

The chairman of the Central Council of Jews in Germany, Heinz Galinski, said it was an affront that the ''sieg heil-screaming vandals'' were protected by

police.

#90295u0955 10/22/1990 ~United Press International
NEW YORK (OCT. 22) UPI - A Nicaraguan diplomat was charged Monday in a federal indictment with running a smuggling ring that recruited other diplomats to carry heroin into the United States and Australia.

William Tapia, the former counsellor of the Nicaraguan Embassy in Tokyo, described by federal prosecutors as a ''significant member of the diplomatic community in Tokyo,'' was arraigned in U.S. District Court on seven counts of heroin trafficking.

The indictment charged that Tapia on two separate occasions between April and November 1987 arranged for a Guatemalan diplomat to smuggle about 125 pounds of heroin from Thailand to New York.

The estimated street value of the ''China White'' heroin was about $18 million to $21 million.

Tapia was arrested in Tokyo on Friday, and was held in the Metropolitan Correctional Center in Manhattan until his arraignment Monday. He pleaded not guilty before Judge Eugene Nickerson, who set a bail hearing for Thursday.

Assistant U.S. Attorney Cathy Palmer, who is prosecuting the case, said Tapia lives in Tokyo and has a Japanese wife, and speaks both fluent Japanese and Chinese.

She said he was an influential member of the diplomatic community in the Far East, and used that influence to recruit ''carriers'' of heroin since at least 1986.

''In the realm of diplomats, he was somebody who carried a lot of weight,'' she said.

She said Tapia would recruit other diplomats to load between 62 to 70 pounds of heroin into big suitcases that they then shipped with their own luggage through customs checkpoints.

''It was real easy,'' Palmer said. ''They never got checked.''

The diplomats would take the drug into both the United States and to Syndney, Australia, she said. The Guatamalan diplomat who transported the heroin into New York in April and October 1987 for Tapia was arrested by the Australian National Crime Authority in April 1988 on heroin importation charges, and was subsequently convicted.

If convicted on all seven counts of the federal indictment, Tapia faces a possible life term in jail and fines up to $4 million.

(OCT. 22) UPI - The crew of an Iraqi freighter halted by U-S and Australian warships in the Gulf of Oman today are cooperating with sailors who boarded the vessel. The Iraqi vessel is the same one that failed to stop after warning shots were fired across its bow during the weekend. It was boarded on Saturday and the captain promised to return to Iraq but did NOT.

Jerusalem is reported quiet today except for isolated incidents. Israel has moved another two-thousand police into the city to stop any violence against Arabs following the stabbing deaths of three Israelis yesterday. Those deaths were in retaliation for the Arab deaths on the Temple Mount two weeks ago.

President Bush has challenged Congress to pass his alternative to the Civil Rights Act of 1990 that he plans to veto today. Bush has yet to be overridden in any of the 16 vetoes of his presidency... and analysts say that may be the case this time. Lawmakers have rejected the Bush compromise bill, calling it a cynical political ploy.

House Speaker Tom Foley says congressional negotiators probably have only today to come up with a budget compromise if they want to beat Wednesday's deadline for another government shutdown. Weekend talks broke up late last night with NO agreement. Negotiators try again today.

Tom Carvel, a classic American success story and part of East Coast advertising history, is dead at the age of 84. He took a 15-dollar loan from his wife and built a 300-Million-dollar a year ice cream empire that became the third largest in the country. Carvel starred in his own commercials, becoming as much as a household name as his ice cream confections.

A Nicaraguan diplomat is being held in a New York City jail on charges of running a heroin smuggling ring. William Tapia, the former counselor of the Nicaraguan Embassy in Tokyo, allegedly recruited other diplomats to carry heroin into the United States and Australia. He was arraigned in U-S District Court in Manhattan today on seven counts of drug trafficking.

German authorities report violence by right-wing ''skinheads'' has left one person dead in the western town of Ludwigsburg. The violence broke out when neo-Nazi ''skinheads'' attacked a group of basketball fans with a molotov cocktail. Police say in the ensuing panic, a 23- year-old man was pushed off a train plotform in front of an oncoming streetcar.

In Dresden, in eastern Germany, residents are expressing outrage today over what they call the ''scandalous'' weekend march through the town by more than 500 neo-Nazis. The group was led by notorious right- wing extremist Michael Kuehnen. The extremists rallied downtown, raising their right arms in the Hitler salute and shouting ''foreigners out.''

#90295u1098 10/22/1990 ~United Press International
KUALA LUMPUR, MALAYSIA (OCT. 22) UPI - Malaysia's architect of an unprecedented opposition alliance vowed Monday to continue his ''struggle'' despite a weekend election giving his longtime archrival, Prime Minister Mahathir Mohamed, a third term.

Mahathir, 65, won a new, five-year term with his 10-party National Front coalition thwarting an unprecedented opposition alliance in Malaysia's eighth general election.

Of the 180 parliamentary seats decided, supporters of the 65-year-old Mahathir garnered 127 while the six-party opposition pack spearheaded by archrival Razaleigh Hamzah amassed 53.

Between 60 and 70 percent of the 8 million Malaysians eligible to vote turned out during the two days of weekend balloting, which gave Mahathir the two-thirds majority he sought to form a new government and amend the constitution.

Razaleigh's opposition coalition represented the first time since Malaysia gained independence from Britain in 1957 that an alliance of opposition parties was formed to challenge the National Front.

''... I wish to reiterate that this struggle will be pursued with even greater determination,'' said Razaleigh, president of the Spirit of '46 party and a former finance minister.

''We have refrained from exploiting religion as a means of rousing communal emotions and threats of national disaster such as racial riots and economic strife,'' Razaleigh said.

The 54-year-old Razaleigh, who said he accepted the voter's verdict on Mahathir, won his parliamentary campaign in his west coast state of Kelantan.

He said although his coalition of opposition groups performed below expectations nationwide, it made a significant contribution to the development of democracy in the country.

PARIS (OCT. 22) UPI - Even the veteran Chanel line was overwhelmed by black tights in the Paris spring-summer, reach-to-wear shows Monday, but designer Jean-Louis Scherrer saved the day with captivating animal-fish prints.

Chanel fashions have evolved into modern life under the talented hand of designer Karl Lagerfeld. But he also champions a collection under his own

label shown Friday, and those trapeze-shaped dresses or jackets with tights infiltrated Chanel.

The numbers fabulous for thin young females looked doubtful for Chanel's wealthy, older customers.

Charming were the Chanel new blousy tops such as white handkerchief- thin shirts with black ribbon weaving in and out of the hems or waists, worn over the usual black tights.

The tights - above-knee, skin-tight Bermudas or below-knee bicycle tights or longer to the ankle - were topped incongruously by Chanel jackets with the usual gold buttons and contrasting edging, such as a coral jacket edged in black over black tights.

Even sheer beautifully draped black chiffon short evening dresses swirled over black chiffon tights.

The riotous colors of most of the eight-day shows for press and buyers sparked the Chanel collection, such as bright orange or green traditional Chanel jackets over flaring black mini skirts. Lagerfeld used wide black stripes on white for more excitement.

At least the traditional Chanel chain handbags survived the 1991 look, appearing in a new silver lame. The traditional Chanel white camellia appeared in black satin, sometimes naughtily sewn on the jacket back. Another new touch was high-heel shoes with two straps around the ankle, replacing the usual colored-toe Chanel pump.

Chanel also bent to show the shortest shorts in Paris, right to the crotch, under Chanel jackets - without sleeves. The skirts that survived usually were flippy and pleated or straight and tight.

#90295u1107 10/22/1990 ~United Press International

CHICAGO (OCT. 22) UPI - Grain and soybean futures were higher at midmorning Monday on the Chicago Board of Trade, although the volume was relatively light and the activity was choppy.

Analysts said widespread buying and talk of Soviet interest in soybean meal supported the grain market early.

Soybeans rallied on continued rumors the Soviet Union may already have bought soybean meal on the world market. The rumors triggered a rally in meal prices in Rotterdam.

Corn was moderately higher on spillover from soybeans and light country

movement.

Gains in both corn and soybeans were tempered by reports of active harvesting during the weekend.

Wheat was fractionally higher in lackluster trading.

Interior and Gulf basis levels were mixed.

The midmorning prices:

Corn Dec 2.30 1/4 up 2; Mar 2.39 1/2 up 1 3/4; May 2.45 1/2 up 2.

Soybeans Nov 6.14 1/2 up 3; Jan 6.29 3/4 up 4; Mar 6.42 3/4 up 3 3/4; May 6.54 up 3 3/4.

Wheat Dec 2.64 1/2 up 3/4; Mar 2.79 1/4 up 1; May 2.86 1/4 up 3/4.

Oats Dec 1.24 1/4 up 1 1/4; Mar 1.34 1/4 up 1; May 1.41 up 1/2.

#90295u1118 10/22/1990 ~United Press International

GIZA, EGYPT (OCT. 22) UPI - Egypt reopened the third and smallest pyramid of Giza Monday after 18 months of renovation and opened 15 tombs to the public for the first time as part of intensive efforts to expand the famous site to tourism.

Eventually, Minister of Culture Farouk Hosni hopes to build a huge museum complex at Giza to house the extensive collection of ancient artifacts now crammed into the elegant but aging national Egyptian Antiquities Museum in Cairo.

''If you can add more things for tourists to do in Egypt, then you can convince them to stay longer and you can earn more income,'' said Hosni at a news conference following a tour of the newly opened tombs.

The third pyramid of Giza was the last of the great pyramids to be built on the desert plateau outside of Cairo and the last of the three to be renovated.

The smallest of the three famous pyramids, the 204-foot high structure was built as the tomb of the ancient king Menkaure, called Mycerinus by the Greeks around 2620 B.C. A sarcophagus that may have contained his body was found in the last century but it was lost in the Mediterranean while being shipped to England.

Officials said workers cleaned the pyramid's interior granite chambers, which were stripped of valuables long ago, and installed a new electrical system

with safe sodium lights and closed-circuit television cameras.

The 15 tombs opened Monday are among 4,000 known tombs of royal family members and high-ranking officials that surround the great pyramids, officials said.

They were discovered and explored by archeologists almost a century ago, but have remained closed for decades under the hot sun and a thick layer of sand.

''For the past 20 years, only five of the tombs have been open, and now we are opening these 15 more,'' said Zahi Hawass, director of the pyramids site. ''Every year we hope to renovate and open more and more of them.''

The newly opened tombs include those of a king's daughter who became a high priestess, a royal gardener, the king's hairdresser and a famous architect.

Stripped of the highly prized objects that were to help the deceased in the afterlife, the tombs are notable now for their carved wall decorations of scenes of everyday life - people cooking, sailing, farming and playing games.

Traces of red, blue and gold paint remain on many of the carved figures.

''We can't really open most of the tombs in Egypt but we are opening those that are the most important and the easiest for the tourists to get to,'' Hosni said.

He said he hoped that by opening a network of tombs, the famous pyramids will become more than just a day trip and visitors will be enticed to spend some time exploring the site.

Hosni has raised an outcry in some circles with his plans to build a museum complex at the pyramids, although most agree the baroque Egyptian Antiquities Museum in central Cairo is too small to house the 100,000- item Egyptian collection.

The minister of culture said at the news conference that it would cost about $18 million to expand the old building, and the money would be better spent transferring the bulk of the famous collection to a new site at Giza.

Ironically, Egypt unveiled the newly opened tombs and renovated pyramid right at a time when tourism to the country is off by an estimated 50 percent because of the Persian Gulf crisis.

(OCT. 22) UPI - Both sides are putting on their best public face as the budget crisis heads toward a Wednesday deadline to come up with an acceptable deficit reduction package or watch the government close down again. Senate Democratic leader George Mitchell is playing down any ideas of an impass. And budget director Richard Darman sounded an optimistic leaving the Capitol this morning while admitting there are ''large areas'' of disagreement.

Sailors from U-S and Australian frigates are aboard an Iraqi freighter in the Gulf of Oman today. The blockade runner, carrying iron pipes and plywood, was first boarded Saturday by sailors from the destroyer U-S-S O'Brien. At the time, the captain promised to return to Iraq. The boarding party left and the

ship continued on its way. Australian and U-S vessels closed in on the ship today and sent a multi- national force aboard.

Former British Prime Minister Edward Heath reportedly is trying to further woo Iraq into releasing an unspecified number of British hostages. The B-B-C says Heath, who is in Baghdad on an unofficial humanitarian mission, is seekingto meet with Iraqi Foreign Minister Tariq Aziz. Heath was to announce this morning the number of Britons to be freed following Iraqi assurances yesterday. But there are indications now that snags may have arisen in Heath's efforts to free the hostages.

A general strike is under way in Lebanon as Lebanese Christians mourn the death of Dany Chamoun, a staunch supporter of deposed Christian General Michel Aoun. Chamoun, his wife and two young sons were gunned down by unidentified assassins yesterday. Witnesses say the country's one-Million Christians stayed home today, shutting down all businesses- except bakeries, pharmacies and hospitals- in and around east Beirut.

The nation's big cities were a lot less safe to live in during the first half of the year. The F-B-I is out with a new report showing murders up 20 percent in the first six months, pushing overall violent crime ahead by eight percent. New York City recorded one-thousand murders in the first half of the year, up from 837. Los Angeles had 449 murders for the first half, up from 414.

The eight-thousand physicians attending a convention of the American Society of Anesthesiologists in Las Vegas are getting their first look at a new painkiller that may help many patients. The synthetic chemical, Toradol, helps ease pain for accident victims or surgery patients like morphine, but it has NONE of the narcotic side effects. It is already available for use in Italy and applications are pending in 20 other countries.

#90295u1203 10/22/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (OCT. 22) UPI - African National Congress leader Nelson Mandela and rival Zulu chief Mangosuthu Buthelezi will meet ''in the near future'' in an effort to end political violence in the country, the ANC announced Monday.

The announcement by the ANC's National Executive Committee represented a further moderation of ANC policy after months of resistance to such a meeting on the grounds it would give Buthelezi allegedly unwarranted recognition as a major political player.

It also comes prior to full-blown power-sharing negotiations between black leaders and the white government and follows an appeal last week from Anglican Archbishop Desmond Tutu for a strategy summit among blacks before the talks actually begin.

An ANC statement said the meeting between Buthelezi, leader of the Inkatha movement, and Mandela, deputy president of the ANC, was approved during a two-day meeting of the NEC and the ANC's internal leadership group that ended Friday.

In apparent reference to ongoing negotiations in Natal province to settle the bloody conflict between supporters of the ANC and Inkatha, the statement said the ANC executives ''welcomed the steps being taken jointly by the ANC and the Inkatha Freedom Party.''

''It is further agreed that a meeting of the National Executive Committee of the ANC and the Central Committee of the Inkatha Freedom Party be held in the near future, with the participation of Chief Mangosuthu Buthelezi and Nelson Mandela, to strengthen the efforts aimed at ending the violence,'' it said.

Violence that exploded in Natal province in 1987 between supporters of the two movements has left up to 4,000 dead.

It spread in August to black townships surrounding Johannesburg in the worst wave of urban black violence in the country's history and killed nearly 800 people in six weeks. The ANC blamed a ''third force'' within the South African security establishment for stirring the unrest and attempting to create tribal conflict between Xhosa members of the ANC and Zulus in Inkatha.

After his release from 27 years imprisonment in February, Mandela agreed to a meeting with Buthelezi in Natal, but key ANC officials forced its cancellation.

Senior ANC officials argued that until local cease-fires were in place a meeting between Buthelezi and Mandela would produce only political benefits for the Zulu leader and give the impression of weakness on the part of the ANC.

In September, as the death toll in the urban violence soared, the ANC began to moderate its policy and the movement invited Buthelezi to attend a summit of leaders of self-governing black homelands.

Buthelezi, chief minister of the Zulu territories in Natal, refused on the grounds he should meet Mandela directly as leader of a political movement, not a homeland.

#90295u1223 10/22/1990 ~United Press International

BONN, GERMANY (OCT. 22) UPI - The last five of eight German nationals allowed to leave Iraq arrived in Frankfurt Monday amid sharp allegations of government inaction to help Germans in Iraq and Kuwait.

Former West German Chancellor Willy Brandt meanwhile was to meet with the

Iraqi ambassador late Monday to discuss a possible visit by Brandt to Iraq.

Upon their arrival at Frankfurt airport Monday, the five Germans urged Brandt to go to Iraq.

''There's no reason not to deal with the government in Iraq about the release of hostages,'' said Horst Kaempfer, one of the five.

Three other Germans released over the weekend returned to Frankfurt Sunday.

Iraqi president Saddam Hussein is holding Western hostages, mostly men, at key military and economic facilities to guard against attack by a U.S.-led multinational force deployed in the Persian Gulf after Iraq invaded Kuwait Aug. 2.

The freed Germans have said they strongly support a letter to German Chancellor Helmut Kohl from the estimated 400 Germans still in Iraq and Kuwait urging Kohl to do more for the release of the hostages.

The Germans being held in Iraq sent Kohl a letter over the weekend, saying ''We expect (Germany) to do what other countries do and that is visits, visits and again visits - no matter if the visitors are parliamentarians, business leaders, union officials, church leaders or public persons.''

Kohl responded to the letter by saying ''every possible opportunity is being used'' to secure the release of the hostages.

Government speaker Hans Klein said Monday the government continues to support the U.N. resolution which calls for the complete withdrawal of Iraqi troops from Kuwait and the release of all foreign nationals.

He said those were the conditions for talks with Iraq, but added the government was doing all it could to help the hostages.

''Ever since the Aug. 2 invasion of Kuwait, we have been trying to secure the release of German citizens from Iraq and Kuwait,'' he said.

But the released Germans in Frankfurt said they were concerned that the situation for those still held in Iraq and Kuwait was rapidly deteriorating.

''The people there are very nervous,'' said Kaempfer. ''They want to get out and be together with their families again.''

#90295u1228 10/22/1990 ~United Press International

TOKYO (OCT. 22) UPI - U.S. troops in Saudi Arabia may soon be able to listen to something more than the desert winds.

Japan plans to send 40,000 Walkman-type cassette players to the troops as part of its aid to the multinational forces in the Persian Gulf region, The Japan Times reported Monday.

The tape players will be sent to the Saudi capital of Riyadh between Oct. 29 and Nov. 5 and distributed to soldiers in the country, the English-language daily said.

Supplying the tape players was the Japanese government's idea rather than a response to a U.S. request, the newspaper said. The equipment is part of Japan's $2 billion commitment to aid the multinational forces in the region.

#90295u1231 10/22/1990 ~United Press International

HINESVILLE, GA (OCT. 22) UPI - Opponents no longer snicker when the Fort Stewart Steelers and a couple of their moms take the field.

There had been plenty of stares, smirks and visions of easy victory from opposing sidelines at the beginning of the football season, however, when two new assistant coaches joined the squad of 8- and 9- year-old boys. However, a 5-1 record has erased the smirks and deflated premature predictions of victory.

The Steelers were a bit dubious themselves about the team's chances, since their rookie coaches had no experience and a limited knowledge of football.

Tibby Smith and Charlotte Clabough of Hinesville volunteered their services when the Army's 24th Infantry Mechanized Division, based at Fort Stewart, was deployed to Saudia Arabia, leaving Steelers Coach Larry Cutchens without male assistants. Both Smith and Clabough have sons on the Steelers squad so they volunteered.

''When we came out here they (the players) thought we didn't know anything about football because we're girls,'' said Clabough, whose football knowledge was limited to ''a little neighborhood'' playing when she was a child.

Smith is an avid fan of ABC's ''Monday Night Football'' but had never coached. Still, the rookies were undaunted by their lack of experience, and gradually won the players' respect.

''The boys made some sly remarks to them and about them at first. But they've definitely won their confidence,'' Cutchens said.

''Now we've gotten their approval - even the ones who were the most against us '' Clabough said.

It hasn't been easy, however. Smith and Clabough had to learn a few basics.

''When they're on offense they aren't supposed to use their hands,'' Smith said. ''But, after a play I'd say, 'How come you're not tackling them?' And (the player would) give me this funny look and say, 'Because I'm on offense.'''

Clabough said she and Smith have been accepted by players' parents, but they have endured disapproval and derision from opposing coaches who ''looked at us like they thought we didn't belong there.''

DANBURY, Conn. (OCT. 22) UPI - Union Carbide Corp., hurt by reduced selling prices and higher feedstock costs, Monday reported third-quarter earnings fell 35 percent to $91 million from $139 million in the same quarter last year.

Quarterly earnings per share were 62 cents, down from 95 cents a year ago.

Revenues in the latest quarter rose 3 percent to $2.20 billion from $2.14 billion.

Chairman Robert D. Kennedy said improved chemicals and plastics sales volumes, feedstock flexibility and continued strong performance of the company's industrial gases business helped mitigate the initial effect of rapidly rising oil prices.

He said the company is pleased with the results considering market conditions and the rapid rise in feedstock costs. But additional feedstock cost increases coupled with general economic weakness, will result in further pressures on margins and the need for continuing controls on capital spending and costs, he noted.

The company said the latest earnings per share reflected costs associated with an August power outage at Union Carbide's Taft, La., site, estimated at 4 cents.

Industrial gases operations continued to perform well above the prior year's levels.

Operations in Brazil contributed 9 cents a share to third-quarter earnings, the same as in the 1989 quarter but above the 3 cents a share earned in the 1990 second quarter.

Latest-quarter earnings also included a non-recurring gain of 14 cents a share from the sale of Union Carbide Chemicals and Plastics Company Inc.'s polysilicon business to Komatsu Electronic Metals Co. Ltd. This was partially offset by non-recurring charges totaling 7 cents associated with several cost-reduction programs.

Last year's third-quarter earnings included a net non-recurring gain of 5 cents a share.

For the nine months, earnings totaled $301 million, or $2.05 a share, on revenues of $6.51 billion, down from $526 million, or $3.59 a share, earned on revenues of $6.66 billion in the 1989 period.

#90295u1274 10/22/1990 ~United Press International

WASHINGTON (OCT. 22) UPI - House and Senate negotiators, ending four months of often heated haggling, reached final agreement Monday on a compromise clean air bill that would cut acid rain, urban smog and toxic air pollution from factories.

The final pieces of the mammoth bill were put in place early Monday morning following virtually round-the-clock negotiations over the weekend that settled House and Senate differences over acid rain control.

The entire clean air package now must be approved by the House and Senate before going to President Bush, who kicked off congressional debate in June 1989 by proposing a comprehensive clean air plan. The House and Senate earlier this year approved their versions, setting up the negotiations.

The compromise bill is expected to get speedy approval, though there have been some rumors that a few Senate Republicans might attempt a filibuster to block the measure.

The clean air negotiators smoothed out the last wrinkle in the package early Monday morning when they agreed to retain a modified version of a plan by Rep. Robert Wise, D-W.Va., to provide extended unemployment aid to workers who lose their jobs due to pollution reduction requirements imposed by the bill.

Wise's plan is primarily aimed at helping the thousands of Eastern coal miners expected to be thrown out of work by acid rain controls. Those requirements will make it harder for power plants to burn high- sulfur coal mined mostly in already economically ailing Appalachian states.

Under the five-year, $250 million compromise plan, workers will be able to stay on unemployment beyond their normal six-month allotment as long as they enter a job retraining program by the 13th week of receiving benefits.

Bush strongly opposed the unemployment proposal on the grounds it was too expensive and administration officials repeatedly warned congressional leaders the president might veto the clean air bill unless Wise's plan was taken out.

Aides to key negotiators said the White House had agreed to the compromise

plan, which was seen as less costly than Wise's original proposal. Wise initially called for six months additional unemployment aid for all affected workers, with no requirement for entering retraining.

However, White House press secretary Marlin Fitzwater said that while the administration was ''very pleased'' by the tentative clean air agreement, Bush remained opposed to the Wise amendment.

Fitzwater said Bush at this point was not threatening to veto the bill over the issue and hoped to work out ''an acceptable provision'' with congressional leaders. ''We'll have to see how it comes out,'' Fitzwater said.

Only hours after the compromise was reached on the Wise proposal, the completion of the clean air package was announced on the House floor by Rep. John Dingell, D-Mich.

Dingell, chairman of the House clean air negotiators, said the bill's impact would reach far beyond its estimated price tag of at least $25 billion a year in additional pollution control costs for industry.

''This is a historic piece of legislation,'' said Dingell, chairman of the House Energy and Commerce Committee. ''It is the most complex, comprehensive and far-reaching piece of environmental law this Congress has ever considered.

''It is going to affect virtually every activity. And even if we have done things right it is going to change the behavior of the people of this country.''

Dingell noted the bill was the product of thousands of hours of deliberations among lawmakers and the focus of intense lobbying campaigns by almost every major industry, ranging from automakers to oil companies to utilities.

Senate Democratic leader George Mitchell of Maine, who tussled with Dingell over auto emission controls, also hailed the compromise as ''a significant achievement'' and said: ''I am very pleased at the outcome. I am very supportive of the proposed agreement.''

JERUSALEM (OCT. 22) UPI - Israeli authorities barred West Bank and Gaza Strip Palestinians from entering Jerusalem Monday to prevent revenge attacks on Arabs following the stabbing deaths Sunday of three Israelis.

Jerusalem was relatively quiet Monday except for a knife attack by an Arab on Israeli worker and isolated minor incidents. As a third stabbing victim from Sunday was buried, an additional 2,000 police patrolled streets and major intersections to prevent Jewish crowds from attacking Arab-owned cars.

Two Palestinian teenagers from the occupied West Bank died Monday of gunshot wounds and at least nine others were wounded in clashes with soliders, Palestinian source said.

Overnight the army sealed the West Bank home of Omar Abu Sirhan, 19, who is accused of fatally stabbing three Israelis Sunday in the West Jerusalem neighborhood of Baka.

Police said Sirhan, a construction worker from Abbadiyeh village near Bethlehem, allegedly carried out the killings in revenge for the deaths of at least 20 Arabs killed by police during riots on the Temple Mount Oct. 8. A court ordered Sirhan held for 15 days for further investigation.

After the eruption of anti-Arab attacks in the wake of the Baka stabbings, Police Commissioner Ya'acov Terner ordered that Palestinians from the territories be prohibited from entering Jerusalem indefinitely. The army closed off Abbadiyeh village to prevent attacks on residents.

Arab-owned vehicles from the territories were turned back at checkpoints on the outskirts of Jerusalem. Police patrols were increased in markets and other places crowds gathered.

The funeral of Shalom Chelouche, 28, a police cadet killed trying to apprehend the knife-wielding assailant, took place Monday without incident, but some mourners cried out, ''Until when will this go on?''

Chelouche's death has stirred up a controversy over whether denunciations of police behavior during the Temple Mount riots have inhibited officers from using their weapons in life-threatening situations. The cadet shot the assailant twice in the legs before he was stabbed to death.

Prime Minister Yitzhak Shamir told a closed meeting of the Parliament's Defense and Foreign Affairs Committee that no one who had killed in an act of self-defense had been put on trial, Army Radio reported.

Shamir said the Baka stabbings were the result of incitement in the Arab world and the illusion that Iraqi President Saddam Hussein would bring salvation to Arabs.

"This is not the first time there have been attacks on Jews in Jerusalem. This is also not the first time that there have been political attacks outside of Jerusalem and outside of Israel,'' he later told the radio in an apparent reference to recent international criticism over Israel's handling of Palestinian violence.

''We stood up and got over it, and this time we will stand up and get over it '' he said.

In Jerusalem's Neve Ya'acov neighborhood, a Jewish supermarket worker was stabbed and lightly wounded by an Arab co-worker who then escaped, police said. The Arab used a bayonet as did the assailant in Sunday's attack.

In the Gaza Strip, two soldiers were slightly wounded in separate attacks that followed the Baka killings. One soldier was struck with a knife and the other an ax.

In the West Bank town of Jenin, Mahmoud Lahluh, 14, was shot in the chest during clashes with the army, Palestinian sources said. He was pronounced dead at Afula Hospital. The army was investigating the death. At least nine Arabs were wounded in Jenin, which was put under curfew along with the adjacent Jenin refugee camp, the sources said.

In East Jerusalem's Mokassed Hospital, Mohammed Abu Aker, 19, died from gunshot wounds he received in August 1988 during clashes with soldiers in the Dehesheh refugee camp, the army said.

The stabbing deaths of the three Israelis raised fears of increased violence in Jerusalem and calls for stepped up security to prevent attacks.

Maj. Gen. Ehud Barak, deputy chief of staff, said Monday those responsible for the killings would have to pay a price.

''It is important that we repeat to ourselves ... that we are in a bitter, long struggle with the Palestinians,'' Barak said during a ceremony honoring former Defense Minister Moshe Dayan.

Religious Affairs Minister Avner Shaki proposed making possession of knife by an Arab or Jews a criminal offense.

#90295u1365 10/22/1990 ~United Press International

SOFIA, BULGARIA (OCT. 22) UPI - Demand for U.S. visas has soared in Bulgaria since the overthrow of the hard-line communist government in November, and so has the number of scams by con artists who promise immigration papers for a hefty fee.

Students and young adults lured by better living standards in the West sometimes shell out the equivalent of thousands of dollars for phony travel documents. Most victims end up poorer and wiser but no closer to their dream of U.S. citizenship, officials said.

The sharp rise in visa requests has been documented by the U.S. Embassy in Sofia, which has witnessed a 300 percent increase in applications in the past year, according to First Secretary Philip Egger.

In November 1989, when hard-line leader Todor Zhivkov was toppled, 413 requests for non-immigrant visas were processed and 384 were granted, Egger said. In September 1990, there were 1,169 visa requests, nearly one-third of which were denied.

''The Bulgarian government used to do most of our screening for us before granting a Bulgarian a foreign travel passport,'' Egger said, explaining why proportionally more visa requests are being denied.

Most of the denials are based on a clause in the U.S. immigration code that compels the applicant to prove he intends to return to the country of orgin.

But several dozen other requests each month are denied because of a 1952 statute that prohibits issuing visas to members of the Communist Party, Egger said.

The official said embassy staff sometimes become inadvertently involved in immigration scams, some of which are quite comlex.

In a recent case, a married couple from Lebanon were approached at the Sofia airport by another Lebanese national who promised to arrange visas to travel to the United States for $1,800.

The con man took the wife to meet Egger at the U.S. Embassy, claiming that he was an American citizen who had been robbed of his passport, travelers' checks and all other documents. The man asked for a new passport and a visa for the woman, who he identified as his sister.

The Lebanese couple went to the embassy the next day after being assured by the con man that the travel documents would be ready for them. But the embassy staff, in the meantime, had discovered the citizenship claim was false. The couple never saw the con man or their money again.

#90295u1370 10/22/1990 ~United Press International
TORONTO (OCT. 22) UPI - Chrysler Canada Ltd. made a monetary offer Monday to the Canadian Auto Workers union, meeting earlier settlements reached in talks with Ford and General Motors, union officials said.

Union President Bob White said the offer ''clearly indicates that they are going to meet the pattern established at Ford and General Motors.''

''There really should not be a strike at Chrysler Canada,'' White said. The union has set midnight Thursday at its deadline for a deal with Chrysler.

Chrysler's top negotiator Ken Francese told reporters after emerging from a main table bargaining session with the union that, ''I think we've made a proposal to them which is both timely and responsive.''

Francese, who is Chrysler Canada's vice-president of human resources, also said he expected the talks to be wrapped-up before the deadline.

White said although there were some numbers missing from the offer, ''we are not going to have to fight about the basic economics.''

The pattern includes wage increases of 3 percent in the first year and 2 percent in each of the second and third years, improved cost-of- living protection, an annual $425 vacation bonus and more time off the job.

Francese said the company was waiting for the union's response to its offer and that the talks would move ahead at the sub-committee and local issue levels.

Neither White nor Francese provided any details of the offer.

White said the two sides needed to deal with a number of locals issues including transfers, seniority and production standards.

The merging of two assembly plants in Brampton, Ontario, also required further discussion, White said.

In Brampton, Chrysler assembles its Eagle Premier and Dodge Monaco passenger cars and Jeep YJ and Wrangler models at two separate facilities. Both passenger models and the Jeep versions are to be phased out in the coming years.

Chrylser then will close one plant and combine the work force in the underutilized Bramalea plant where the company will build its new L/H mid-size car platform, beginning in the fall of 1992.

''There are still a lot of issues to be resolved,'' White said. ''But there

are no issues that should take the negotiations in the ditch.''

Chrysler Canada Ltd. employs about 11,300 CAW members in Ontario, principally at four assembly plants in Windsor and Brampton, a trim plant in Ajax and a castings facility in Etobicoke.

The Windsor assembly plants produce Chrysler's top-selling mini-vans - the Dodge Caravan and Plymouth Voyager MagicWagons - and full-size Dodge Ram vans and wagons.

The pattern settlement was reached with Ford Motor Co. of Canada after a 9-day strike by about 13,000 autoworkers in September. GM of Canada met the pattern and averted a strike by its 36,500 CAW members earlier this month.

#90295u1390 10/22/1990 ~United Press International

LONDON (OCT. 22) UPI - Stock prices on the London International Stock Exchange closed higher Monday in moderate trading as investors reacted to Britain's best monthly trade deficit figures in a year and to lower oil prices.

Stocks eased slightly in Frankfurt.

London's blue-chip Financial Times 100-stock index, which gained 6.4 points Friday, tacked on another 13.0 points to 2,201.0. The narrower top 30 industrial average added 12.1 points to 1,633.6.

Volume amounted to around 336 million shares, down from the 465 million that changed hands on Friday.

Analysts said stocks moved higher as investors waded through key government reports on Britain's economy.

The Central Statistical Office reported Britain's merchandise trade balance narrowed last month because an unexpected surge in exports. The agency said Britain's trade deficit for September was $1.6 billion on a seasonally adjusted basis, a drop from a $2.3 billion gap in August.

The latest figures, which were the lowest so far this year, compared with market expectations of a deficit of around $2.6 billion and proved good news for the market, pushing stocks higher.

Market analysts said the robust export performance indicated British products remain competitive.

Export value totaled $8.8 million in September, a 2.5 percent improvement over the previous month's figure, despite the strength of the British pound against other currencies before its entry to the European exchange rate mechanism

earlier this month, the government said.

Meanwhile, the Central Statistical Office reported Britain's longer leading cyclical index eased marginally in August from July, continuing a decline that has been more or less steady since April 1988.

The index, which indicates turning points in Britain's economic activity about a year in advance, was a provisional 93.7 in August vs. a revised 93.8 in July.

The index's decline flattened in the second half of 1989 on the back of growth in share prices and improved company results. But since the start of this year falling stock prices and a decline in company profitability has caused the index to continue easing.

Some profit taking surfaced late in the London session, but the continued decline in the price of oil on global markets enabled stocks to hold onto gains despite a shaky early performance on Wall Street.

Among the most widely traded stocks, Anglian Water gained 8 cents to $4.33 and Northumberland Water gained 12 cents to $4.48.

Highland Distilleries gained 6 cents to $4.40 on a favorable comment from the whiskey producer.

But media group Reuters slipped 15 cents $13.22 amid cautious comments from local brokers.

Imperial Chemical Industries gained 19 cents to $15.83 on news it bought outthe other 50 percent interest in paint company Tioxide.

On the Frankfurt Stock Exchange, the key 30-stock German stock index, which gained 12.02 points Friday, slipped 7.58 points to 1,482.09.

Market watchers said stocks eased amid profit taking following last week's gains.

On the economic front, five leading German economic research institutes said in their annual report that Germany's economic growth will slow down in upcoming years because the economy will be burdened by the costs of German unification.

The report said that the growth of Germany's gross national product will slip to a worse-than-expected 1.5 percent in 1991 from an annual average of 2 percent to 3 percent, while unemployment will jump to 10 percent from an average of 6 percent this year.

The report sharply contradicted government forecasts that the German economy will continue to grow at an annual rate ranging between 2 percent and 3

percent.

#90295u1418 10/22/1990 ~United Press International

MINNEAPOLIS (OCT. 22) UPI - General Mills' board of directors Monday approved plans to construct a new breakfast cereal manufacturing plant in Albuquerque, N.M.

The plant will be General Mills' eighth major domestic packaged foods plant and the company's first in the Southwest.

Site preparation for the plant was expected to begin late this year, subject to completion of real estate transactions, issuance of industrial revenue bonds, an environmental audit and other conditions.

The plant will be part of General Mills' plans to invest $1.65 billion in new fixed assets during the next three years to support continued growth in the company's packaged consumer foods and restaurant businesses.

''General Mills' packaged foods volume has been growing at a significantly faster rate than the food industry as a whole,'' said Mark Willes, president of General Mills. ''In order to continue to grow rapidly and meet our customers' needs, we must increase our capacity to produce cereals and other food products.''

Over the past decade the company's dollar share of the $7 billion ready-to-eat breakfast cereal market has increased by five percentage points to an all-time record of more than 27 percent.

General Mills opened a new cereal plant last spring in Covington, Ga., to service its growing southeastern markets. The plant will produce Big G breakfast cereals for distribution primarily in the Southwest. When in full operation, the facility will employ about 130 people.

In addition to its new plant in Georgia, General Mills operates major domestic package foods manufacturing facilities in Lodi, Calif.; Cedar Rapids, Iowa; South Chicago and West Chicago, Ill.; Toledo, Ohio; and Buffalo, N.Y.

General Mills had sales of $6.5 billion in the fiscal year ended May 1990, with consumer packaged foods accounting for about two-thirds of those sales. Besides breakfast cereals, the company's major food lines include Betty Crocker dessert and side dish mixes, Gold Medal flour, Bisquick baking mix, Hamburger and Tuna Helpers, Fruit Corners fruit snacks, Pop Secret microwave popcorn, Gorton's seafoods and Yoplait yogurt. The company also operates more than 750 Red Lobster and The Olive Garden restaurants in the United States, Canada and Japan.

General Mills employs about 100,000 people worldwide.

#90295u1431 10/22/1990 ~United Press International
MINEOLA, NY (OCT. 22) UPI - A Long Island construction worker whose car killed a bride, groom and best man on the way to their wedding reception was denied a request for parole, officials said Monday.

Nassau County District Attorney Denis Dillon said the state Parole Board met with Vincent Laezza, 23, on Oct. 11 but gave no reason for denying his application for release. The board ruled that Laezza cannot again be considered for release until November 1992, Dillon said.

Laezza, of Selden, was allegedly drag racing on April 3, 1987, when his high-powered Buick plowed into a stretch limousine making a left turn into a Lido Beach catering hall where the wedding reception was to be held.

Killed in the crash were the bride, Carol Zagorski Phillips, 24, the groom, Peter Phillips, 27, and his brother, John, 29, who was best man.

The maid of honor, Debra Zagorski, 23, survived but suffered disabling injuries.

Laezza has served two years of a two and one-third to seven-year sentence for his 1988 conviction on three counts of criminally negligent homicide and one count of assault.

Dillon noted that he sent a letter to the Parole Board last June expressing opposition to Laezza' application for release on parole.

''Barring any changes in the circumstances of Laezza's detention, he should be denied any consideration, regarding parole, at any time prior to the expiration of the maximum sentence,'' Dillon said.

Dillon said the facts that brought about the conviction of Laezza in September 1988 ''were one of the most tragic that my office has experienced.''

''At the time of the impact, Mr. Laezza's vehicle was travelling at speeds in excess of 100 miles per hour,'' Dillon said.

#90295u1462 10/22/1990 ~United Press International
GBARNGA, LIBERIA (OCT. 22) UPI - Liberian rebel leader Charles Taylor has vowed to fight on against rival guerrillas and West African soldiers, whom he claimed receive medical treatment and military intelligence from the United States.

Taylor, speaking Sunday during the induction of a rebel national assembly that has declared him president, also warned that the turmoil in Liberia would divide West African nations if a solution was not reached soon.

Heavily armed young fighters of Taylor's National Patriotic Front of Liberia wandered among the crowd listening to his speech in the town of Gbarnga, which the NPFL has made its capital after failing to take Monrovia.

The 5,000-strong West African peacekeeping force that arrived Aug. 24 has pushed Taylor's forces about 20 miles out of Monrovia and created a buffer zone between them and warring guerrillas backing rival rebel leader Prince Johnson and remnants of the army of President Samuel Doe, who was killed Sept. 9.

Taylor said he would continue to battle other guerrillas and the five-nation peacekeeping force sent by the Economic Community of West African States. He blamed some of his recent defeats on assistance he alleges the United States has given his opponents.

''The force from the states of Nigeria, Ghana, Guinea, Gambia and Sierra Leone has killed hundreds of Liberian men, women and children and destroyed homes and property. Today, the killing and destruction continue,'' he said.

''The sole objective of these bandits is to forcibly impose a government formed by Liberians who have played no part whatsoever in the people's uprising against the tyrant Doe, nor have shown any sympathy for those who fell victim to Doe's atrocities,'' Taylor said.

Taylor claimed the United States was treating wounded members of the peacekeeping force on its Navy ships that have been sailing off the Liberian coast for six months.

He also claimed the Central Intelligence Agency was providing ECOWAS with information on the location of his forces. U.S. aircraft are reported to have made reconnaissance flights over Liberia from Freetown, the capital of neighboring Sierra Leone.

Taylor said he believed U.S.-provided intelligence led to an ECOWAS bombing of his captured radio station near Monrovia in August.

Churchmen and civilians in their Sunday best heard Taylor reaffirm his commitment to elections within a year, for which foreign organizations would be granted observer status.

Although personal animosities belie any attempt to reconcile the warring factions, the polling issue is the main outward stumbling block to a peace settlement in Liberia, which has been at war since December.

Johnson believes an interim government created and protected by ECOWAS should plan the elections to deprive any contestants of an unfair advantage.

Taylor acknowledged he could rig an election if he wished, and for that reason encourages the presence of foreign observers.

''They can put the ballot boxes in army tanks if they want, just to ensure that they are not meddled with,'' he said.

Taylor also accused the head of the ECOWAS-sponsored interim government, Amos Sawyer, of not being a ''true-born'' Liberian. Taylor, too, has lived out of the country, spending 10 years in the United States.

Taylor and a five-man delegation have pledged to attend peace talks sponsored by ECOWAS in the Gambian capital, Banjul, Oct. 29. But the rebel chief said they would only be there ''to listen'' because ECOWAS has no mandate to involve itself in the internal affairs of member states or send ''volunteer killers'' to other countries.

Taylor said he believed ECOWAS, the largest and most important regional group in West Africa, was splintering because of its involvement in Liberia.

''I think ECOWAS is finished,'' he said.

#90295u1492 10/22/1990 ~United Press International

SAO PAULO, Brazil (OCT. 22) UPI - Pressure by environment-conscious buyers is slashing Brazil's wood exports as the destruction of the Amazon rain forest gains international opposition, an industry report released Monday said.

In the period between January and August of this year, wood exports from companies in Para and Amapa states fell 15 percent over the same period last year, according to the association of exporters of the two states. The states together account for 70 percent of the wood sold from the Amazon region.

''The importers do not want to participate in the destruction of the Amazon,'' Danilo Remor, president of the exporters' group, told the Folha de Sao Paulo newspaper.

Criticizing the drop in demand as uncalled-for, he said the exporters suffered a loss of $20 million in the period. He did not release figures on the amount of wood sold.

The United States and England are the largest consumers of Brazilian wood.

The figures, though not endorsed by the government, follow a trend in dropping sales of Amazon wood. According to the Brazilian Institute of Environment and Natural Resources, 1.3 million tons of wood were exported from the Amazon region in 1988, compared to 962,500 tons the following year.

Brazil, with the largest remaining tropical forest area, is also the world's largest destroyer of rain forests, according to U.N. statistics. The losses are due mostly to the timber industry and to clearing of forested areas for livestock grazing.

Remor told Folha that efforts by the timber industry have resulted in less damage to the rain forest, with most of the trees cut by a process called selective logging, which takes only a few trees from each area so as not to destroy the ecology of the region.

Environmentalists have claimed that selective logging, however, is also destructive because most of the timber companies do it in a wreckless manner, damaging and falling other trees in the process.

Remor said wood importers have turned their business to countries likeBolivia, Indonesia, Malaysia and several African countries, where worldattention and environmentalist pressure is less.

#90295u1508 10/22/1990 ~United Press International

BUFFALO, NY (OCT. 22) UPI - Twelve years after buried toxic chemicals were found seeping from the supposedly sealed Love Canal, the question of liability for one of the nation's most costly environmental mishaps will be argued in a Buffalo courtroom.

U.S. District Judge John Curtin will begin hearing testimony Wednesday in New York state's $665 million damage suit against Occidental Chemical Corp. for punitive damages in the dumping of 21,800 tons of toxins - including deadly dioxin - at Love Canal in the 1940s and 1950s.

Curtin has already found Occidental, which acquired the Hooker Chemical & Plastics Corp. in 1968, liable for creating a public nuisance at Love Canal, a 16-acre site which was sealed with a clay cap and sold for $1 to the Niagara Falls Board of Education in 1953.

Homes and a school were later built atop the landfill, and the buried chemicals began oozing from the ground.

The state and federal governments declared a state of emergency at Love Canal in August 1978, leading to the immediate, permanent relocation of 237 families living along the canal and the evacuation of 1,000 additional families from the surrounding area over a three-year period.

Structures that were built in the neighborhood have since been leveled, and the governments have built a containment facility to halt the further spread of chemicals from the site.

The first handful of some 200 homes located in an area surrounding the immediate dump site were put up for resale in August.

The state is seeking $250 million from Occidental as punishment for the chemical dumping, $250 million in reimbursement for destruction of natural resources in the Niagara Falls area, and $165 million for creating a ''private nuisance'' and to cover the costs of cleaning up the site.

''This case has great potential to alert the business community to the importance of handling hazardous wastes,'' said Eugene Martin-Leff, assistant state attorney general. ''Love Canal is so well known that any decision or award will be seen nationally as very significant.''

Thomas Truitt, Washington trial attorney representing Occidental in the case, terms the lawsuit ''highly unusual.''

The chemical firm claims it should not be held liable for the problems at Love

Canal because Hooker Chemical had warned the School Board about the chemicals dumped there, and has filed its own lawsuits in the case against the state and federal governments, the city of Niagara Falls and the School Board.

''As far as punitive damages are concerned, this is an unprecedented case,'' Truitt said. ''The state is bringing a quasi-criminal action against Occidental for events that took place 40 years ago.''

''It's the first case we know of in which a state is seeking punitive damages for a set of circumstances like this,'' he added.

The case, which could take up to a year to hear, will likely get the attention of both environmentalists and the chemical industry.

''Love Canal has become the symbol of environmental problems in America and everyone is watching this case,'' said Lois Gibbs, head of the Citizens Clearinghouse for Hazardous Wastes in Arlington, Va., and a former Love Canal resident who spearheaded the effort to get residents relocated from the area.

''All the chemical companies and polluters are watching it, too, because the verdict could determine how they will handle cases pending against them,'' she said.

''Love Canal has always been a case that sets national precedents,'' Gibbs added, ''and this trial will be no different.''

NEW YORK (OCT. 22) UPI - One of the youths accused in the gang rape and beating of a woman jogger in Central Park broke down at his trial Monday, pounding his head with his fist and howling, ''I can't take it - No, no, no, no!''

As the final juror filed out of the courtroom during a recess, Kharey Wise, 18 jerked forward in his seat vomited on the floor of state Supreme Court in Manhattan. Four court officers rushed to surround him when he sobbed and cried out, ''I can't take it - No, no, no, no.''

With his lawyer, Colin Moore, trying to calm him, Wise howled, ''Tell the jury this is wrong. It's not right. That woman is lying!''

The dramatic outburst came moments after Assistant District Attorney Elizabeth Lederer in her opening statement told the jury that Wise and his co-defendant Kevin Richardson, 16, had led police to the scene of the April 19, 1989 attack.

Justice Thomas Galligan had just excused the jury for a short recess when Wise lost control.

Later, Richardson's lawyer, Howard Diller, asked the judge to declare a mistrial, describing Wise as ''foaming at the mouth.'' He claimed four or five jurors were still in the courtroom when it began, but the prosecution team maintains the entire jury panel was out of the room.

Galligan refused to grant a mistrial but warned Wise that another hysterical outburst would cost him a seat at his own trial.

''If you make continued outbursts you will be removed from the court and the case will be continued without you to your disadvantage and to the disadvantage of your attorney,'' Galligan told Wise.

Throughout Lederer's opening statement, Wise shook his head and mumbled to himself.

She told the four-man, eight-woman jury, ''You will learn that on the night of April 19, 1989, approximately 30 young men went in to Central Park to beat to rob, and to attack anyone they met.''

Lederer reminded the panel that Wise and Richardson made written and videotaped statements to police in which they admitted being involved in the attack in which the woman was gang raped, bashed into unconsciousness with a metal pipe and a rock and left for dead in a muddy gully.

Lederer also confirmed that the 30-year-old woman herself will tell the jury ''that on that night her life was changed forever. She will describe for you how she suffers from double vision, that because of the injuries she suffered that night she can no longer walk up and down stairs, she has permanent scarring on her face.''

Lederer told the panel that a pubic hair similar to that of the blonde jogger was found on Richardson's T-shirt. She also said head hair similar to that of the jogger was found on Richardson's underwear and jeans.

The testimony of the native of Upper St. Clair, Pa., whose name has not been widely published because of the nature of the crime, marked one of the most dramatic moments of the first trial in the highly publicized case.

That trial ended last summer in convictions for Yusef Salaam, Raymond Santana, and Antron McCray, all 16. Each is serving a 5- to- 10-year term in a juvenile jail.

A sixth youth, Steven Lopez, 16, was expected to be tried alone early next year.

In his opening statement, Diller told the jury that Richardson was merely a ''commentator'' in his videotaped statement, describing the crimes committed

by other youths. He said words included in Richardson's videotape - specifically ''male, female, east and west'' - were too sophisticated to be his own and were proof that police put words in his mouth.

Moore told the jury the prosecutor's preview of the case was ''an optical illusion,'' ''a conjurer's trick,'' and ''full of smoke and mirrors.''

#90295u1578 10/22/1990 ~United Press International

CAIRO, EGYPT (OCT. 22) UPI - Egypt slashed its oil prices $6 a barrel Monday, its largest reduction since the start of the Persian Gulf crisis, in response to world market conditions, the Middle East News agency reported.

The average price of Egyptian crude now stands at $26.30, MENA said.

MENA, a semi-official agency, quoted Hammad Ayoub, the vice-chairman of the state-owned General Petroleum Corporation, as saying the new reductions were taken ''in response to the current prices on the world (oil) market.''

Oil markets have witnessed a sharp reduction recently in response to what appears to be a desire to solve the Gulf crisis by peaceful means.

#90295u1597 10/22/1990 ~United Press International

NEW YORK (OCT. 22) UPI - Citing a ''deterioting outlook for earnings,'' Moody's Investors Service Monday cut debt ratings for two of the nation's largest airlines.

Moody's said it downgraded ratings of the nation's second- and third- largest carriers in terms of revenue passenger miles - Fort Worth, Texas-based AMR Corp. and its American Airlines Inc. subsidiary and Atlanta-based Delta Air Lines Inc.

Meanwhile, Standard & Poor's Corp. announced it lowered Chicago-based Midway Airline Inc.'s rating on $54 million convertible exchangeable preferred stock.

Moody's said about $3.5 billion of long-term debt issued by AMR and American was affected by the downgrade, in anticipation of ''reduced financial flexibility in light of the outlook for lower earnings during a period of very substantial capital spending by the airline subsidary.''

The downgrade completes a review of the company that Moody's began Sept. 18.

The rating agency said ''a combination of higher cost for jet fuel and softer travel demand could have a serious adverse effect on AMR's cash flow in the near to intermediate term and comes at a time when the company is investing

heavily in the modernization and expansion of its airline fleet and the extension of its global route network.''

Moody's lowered AMR ratings on industrial revenue bonds and senior bonds to single-A3 from single-A2, on senior unsecured debt issues to Baa1 from single-A3 and on comercial paper to prime-2 from prime-1.

In addition, Moody's ordered downgrades for about $2.4 billion of Delta's long-term debt, ''reflecting the deteriorating outlook for earnings in light of the volatile and escalating cost of jet fuel.

Moody's said it lowered the No. 3 U.S. carrier's ratings because of a ''softening demand for domestic air travel and its continuing capital spending plans to expand in the U.S.''

As with AMR, Moody's said it ''expects Delta's future cash flow to be substantially reduced at a time when the company is investing heavily in the modernization and expansion of its airline fleet and adding foreign cities in Asia and Europe to its growing international route network.''

Moody's said it downgraded the following Delta's ratings: secured equipment certificates, to single-A2 from single-A1; senior unsecured debt issues and industrial revenue bonds, to single-A3 from single-A2; shelf registration, to prospective single-A3 from prospective single-A2; industrial revenue bonds, to Baa1 from single-A3; and commercial paper, to prime-2 from prime-1.

Meanwhile, S&P announced it lowered Midway's rating on the $54 million of preferred stock to triple-C from single-B-minus and removed the issue from its ''CreditWatch'' surveillance list, where it was placed July 10.

S&P said ''the downgrade reflects heavy losses since the company's October 1989 acquisition of certain ground facilities at Philadelphia International Airport, aircraft, takeoff and landing slots at LaGuardia and Washington's National airports and Canadian route authority from Eastern Air Lines.''

Competition and fare discounting have been intense over this period, and the company, like the rest of the airline industry, has undergone a severe impact from soaring fuel prices, S&P said.

#90295u1616 10/22/1990 ~United Press International

LUXEMBOURG (OCT. 22) UPI - The 12-nation European Community failed again Monday to agree on a plan to cut farm subsidies in hopes of salvaging four years of world trade talks.

EC foreign ministers, who hoped to finalize a proposal for talks on the General Agreement on Tariffs and Trade, instead scheduled yet another meeting

for Friday, this one a joint session of agriculture and trade ministers.

''The Germans made clear they were not in a position to make any concessions today,'' said British Foreign Secretary Douglas Hurd, who was obviously annoyed at the continuing stalemate.

''The credibility of the Community is at stake'' in quickly agreeing on a GATT proposal, Hurd said.

Community farm ministers failed to reach agreement on subsidy cuts at three marathon meetings in the past two weeks.

EC heads of state meet Saturday in Rome, and the divisive issue will likely be the central topic.

The EC is already well past the Oct. 15 deadline for submitting agriculture proposals to the 105-nation GATT talks, which began in 1986 and are slated to end in just six weeks.

Substantial cuts in farm supports are crucial to the GATT talks' success, say U.S. officials, because developing countries will not otherwise agree to new trade rules on services, investment and intellectual property.

GATT currently covers only merchandise trade.

Several countries, led by France and Germany, rejected as too severe a plan by the EC executive Commission to slash subsidies by 30 percent in the decade ending in 1996.

The United States has proposed cutting agriculture supports by more than 75 percent by the year 2000, including a 90 percent cut in market- distorting export subsidies.

The United States says the EC Commission plan would mean cuts of only 10-15 percent from current levels.

The current round of GATT talks, known as the Uruguay Round, began at a Uruguayan resort in 1986 and are slated to conclude Dec. 8 in Brussels.

On other issues, the EC foreign ministers decided to forge closer relations with China and Vietnam, and dropped several sanctions imposed against China following the brutal suppression of pro-democracy demonstrations in June 1989.

''No useful purpose is served by reducing levels of contact between the West and China,'' Hurd said.

The EC agreed to reinstate high-level contacts with China and to resume scientific and cultural ties, but an embargo on arms sales remains in effect.

#90295u1641 10/22/1990 ~United Press International
SANTA ANA, CA (OCT. 22) UPI - A judge Monday rejected a surrogate's unprecedented claim to parenthood, calling her a ''genetic and hereditary stranger'' to the baby she bore for an infertile couple.

Superior Court Judge Richard Parslow, ruling after an emotional three-week hearing that may help legally redefine motherhood, concluded that surrogate mother Anna L. Johnson has no right to claim a role in the upbringing of the test-tube baby created from the egg and sperm of Crispina and Mark Calvert.

Johnson, in filing a lawsuit against the Calverts in August, became the first surrogate ever to seek parental rights to a baby with which she had no genetic link.

''I decline to split this child between two mothers,'' Parslow said in his ruling. The baby, he said, ''should be raised exclusively'' by the Calverts.

The Calverts embraced tearfully after the ruling. Johnson did not attend the hearing. Her attorney, Richard Gilbert, also was absent, but has previously promised an appeal if Johnson lost.

During the hearing, Johnson, 29, argued that she had became emotionally bonded to the baby while still pregnant and therefore has a right to be recognized as his third parent.

But Parslow disagreed, ruling, ''This would create confusion in the child to have a three-parent arrangement. This ruling is definitely pro- child.''

The judge also terminated Johnson's visitation rights as of Monday. Since his birth Sept. 19, Johnson was allowed twice-weekly visits with the boy, who she named Matthew. The Calverts named the child Christopher Michael.

The child's court-appointed guardian, William Steiner, left the courtroom Monday saying, ''The first thing I'm going to do is get a birth certificate for the baby'' listing the Calverts as his legal parents.

While recognizing Johnson played a significant role in the child's life, Parslow likened her involvement to that of foster parents, who may bond to the child but also understand they are only temporary substitutes for natural parents.

''She (Johnson) and the child are genetic and hereditary strangers,'' Parslow said. ''She provided care and nurturing during the time the natural mother couldn't care for him.''

Mrs. Calvert is medically unable to have children. In January, one of her eggs was fertilized by her husband's sperm in a petri dish and the resulting embryo was implanted in Johnson, a co-worker of Mrs. Calvert who offered to carry the child for $10,000.

''It's a glorious day,'' Mark Calvert said outside court. ''When the day comes our son will be aware of the circumstances surrounding his birth and that he was loved so much we went through this ordeal.''

The judge suggested that ''when the wounds are healed,'' the Calverts could consider keeping Johnson informed on the child's progress by sending her notes or photographs.

''Whether or not Anna Johnson has any (future) relationship with the child has to be in the best interest in the child,'' Parslow said. ''But I have found that Chris Calvert is the type of person who does have a heart and would keep Anna Johnson informed.''

Steiner, who supervised Johnson's visits with the baby, said she last saw the baby on Friday during a very tense meeting in the Calverts' home.

''She was pretty much reconciled that she wouldn't see him,'' Steiner said outside court. ''She was separating herself from the baby and held the baby very tightly.''

He said Johnson elected against coming to court Monday because ''she told me she didn't want to come to an execution.''

DHARAN, SAUDI ARABIA (OCT. 22) UPI - An Iraqi ship that U.S. forces stopped and fired upon apparently tossed a cargo of forbidden goods over the side during an unsuccessful attempt to run the multinational embargo, the Navy said Monday.

When stopped Saturday in the Persian Gulf and when fired upon on Sunday, the cargo aboard the al-Bahar al-Arabi included iron pipes and plywood bound for Aden in Yemen.

It was trailed through the night by an Italian vessel Libeccio, and then halted and boarded again late Monday morning by the frigate USS Reasoner and the Australian vessel HMAS Adelaide. The party included 15 Australians and 11 Americans.

Navy Cmdr. J.D. Van Sickle said the boarding party found none of the prohibited cargo on the ship - iron pipe and plywood - that was aboard on Saturday and the assumption was it had been pitched into the sea as the vessel moved out of the Persian Gulf to the Gulf of Oman under cover of darkness.

The ship was first intercepted Saturday morning when it agreed to be boarded

by Navy personnel from the U.S. destroyer O'Brien. Officers on the O'Brien told the Iraqi captain the ship would have to return to Iraq or divert to a non-prohibited port.

They said the captain agreed to return to Iraq, but instead continued south toward the Straight of Hormuz after the boarding party left.

The officials said when the vessel refused to heed the second order Monday to turn back, and would not acknowledge communications, the O'Brien began firing shots over its bow and it was boarded again.

After tje second boarding, the ship - originally described as a merchantman but later called a fishing vessel - was allowed to proceed to its original destination, the port of Aden in Yemen. There was no indication if any other cargo was aboard. There was no indication how long the boarding party was aboard Monday before freeing the ship.

''It was thoroughly searched. The ship was no longer carrying any prohibited cargo,'' said Van Sickle.

''Following the search the al-Bahar al-Arabi was allowed to proceed to its original destination. We don't know what happened to the original cargo and we can only presume it was dumped over the side between the first boarding and today,'' he said.

''If the cargo was pitched over the side, it was denied carrying it to its destination,'' he said, commenting on the impact of the embargo on goods coming into or out of Iraq.

''I would say the sanctions are working,'' he added.

There have been a couple of incidents in which shots have been fired across the bows of merchant ships by warships enforcing the U.N. embargo against Iraq.

HOUSTON (OCT. 22) UPI - American Exploration Co., an independent oil and gas company,said Monday it will acquire Conquest Exploration Co. in a cash-and-stock transaction valued at about $160 million.

The cash portion of the acquisition price will be about $10.1 million.

Under a definitive agreement, American Exploration will pay $1.90 cash a share for approximately 12 percent of Conquest's 44.46 million outstanding common shares and exchange 0.44 shares of its common stock for each remaining share of Conquest's common stock.

Last year, Conquest lost about $500,000 on revenues of about $51 million, said Kenneth Huffman, American Exploration's vice president of finance.

He said his company earned $2.5 million, or 5 cents a share, on revenues of $48 million last year.

Both companies are based in Houston.

As part of the proposed transaction, American Exploration agreed to purchase from Dyson-Kissner-Moran Corp., a New York-based venture- capital firm, 5 million shares of Conquest's voting preferred stock for $21 million. These share, issued in 1986, have a liquidation preference of $23.75 million and constitute all of the outstanding preferred stock of Conquest.

Dyson-Kissner-Moran also agreed to vote the preferred and the approximately 10.31 million shares of Conquest common stock in favor of the acquisition. In all, Dyson-Kissner-Moran's interest represents approximately 30 percent of Conquest's outstanding voting stock.

American Exploration will also assume approximately $55 million of Conquest's debt.

Based on American Exploration's closing stock price of $4.25 per share on Friday, the transaction, including assumption of the debt and the purchase of the preferred stock, has a value of approximately $160 million, company representatives said.

Among other things, the acquisition is subject to approval by shareholders of both companies.

#90295u1798 10/22/1990 ~United Press International

MEXICO CITY (OCT. 22) UPI - Authorities closed five ports on the Baja California peninsula and the Pacific port of Mazatlan Monday as Hurricane

Trudy approached the coast unleashing winds up to 115 mph, officials said.

Agriculture and Water Resources spokesman Roberta Loaeza told United Press International the effects of the hurricane, which was losing force Monday, would be felt by midday in La Paz, 800 miles northwest of Mexico City, and in Mazatlan on the Pacific coast.

Although the hurricane is diminishing, ''that doesn't mean there is no risk of damage from high winds or rising waters in the northwest region of the country '' Loaeza said.

He said Trudy was moving towards land at 6 mph with winds up to 115 mph, causing heavy rains in Mazatlan.

Mazatlan maritime chief Enrique Isaias said high tides had forced authorities to close the ports of Mazatlan, La Paz, Cabo San Lucas, San Jose del Cabo, San Carlos and Loreto.

Communications and Transport authorities said they had moved heavy machinery on to the Baja California highway to clear or repair the road if necessary.

#90295u1822 10/22/1990 ~United Press International
ATHENS, GREECE (OCT. 22) UPI - Iran has asked Iraq to return its former Oil Minister Mohammad Javad Tondguyan, taken prisoner of war at the start of the 1980-88 Persian Gulf conflict and believed to be still alive, the official Islamic Republic News Agency said Monday.

Mohammed Ali Nazaran, an Iranian official in charge of Iraqi POW affairs, told the news agency Tondguyan was believed to be still alive and held in an Iraqi prison. Tehran has requested that Baghdad send him home as a gesture of good will, he said.

Nazaran's remarks followed regional reports that Tondguyan, who was taken prisoner near the Abadan refinery days after the Iran-Iraq war began in September 1980, may have died under torture in an Iraqi prison.

Iraq has returned at least two men taken prisoner with Tondguyan, including one of his deputies and his driver, among the 37,000 Iranian POWs sent home since the exchange of prisoners began in August.

''There are live and documented evidences that Mohammad Javad Tondguyan ... is alive and being held in a secret Iraqi prison,'' IRNA quoted Nazaran as saying.

''We are waiting for the release of our former oil minister and are against his (continued) detention. Therefore, if Iraq has good will it should release him immediately,'' Nazaran said.

Sunday, Iran reopened its embassy in Baghdad, a week after the two countries resumed diplomatic relations. Iraq reopened its embassy in Tehran Oct. 14.

Iranian Charge d'Affaires Abuqassem Shashat, who arrived in Baghdad Wednesday, said ''the reopening of the embassies in Baghdad and Tehran came as a result of the process of normalization (of) bilateral relations.''

Over the past two months, as the Iraq-Kuwait crisis deepened, Tehran and Baghdad have steadily normalized their relations, but several issues remain unresolved.

An undisclosed number of POWs, out of an estimated total of 100,000 held by both sides, remained in prison camps, apparently because some have sought political asylum.

SAN SALVADOR, EL SALVADOR (OCT. 22) UPI - Finance Ministry employees and thousands of sympathizers ignored government threats of imprisonment and stayed away from work Monday to demand higher wages and increased fringe benefits.

''The government has threatened to throw us in jail if we continue with the strikes, but the people know that we are demanding better living conditions in the face of sharp increases in the price of basic goods,'' said Carlos Luna, a leader of Finance Ministry workers.

Workers at the ministry declared an indefinite work stoppage and demanded a monthly wage increase of $25, in addition to improved benefits.

One-day sympathy strikes were carried out by employees of the state- owned telephone company, the agency that regulates the supply of grain and by members of the Public Workers and Employees Union.

Luna said more than half of the Finance Ministry's 5,200 workers were honoring the strike, and that nearly 7,000 other state employees stayed off their jobs Monday in support.

The government, charging workers are collaborating with rebels of the Farabundo Marti National Liberation Front, or FMLN, have accused them of trying to mount what it calls a ''street offensive'' to destabilize the country with strikes and public protests.

A full page advertisement taken out by the government in local newspapers described union leaders as ''agitators pursuing political objectives by disguising them as labor demands.''

The ad reminded state employees that it is illegal for them to strike and threatened them with up to four years in prison. The ad also warned those who incite strikes would face from three months to a year in jail.

''We reject all claims that we have ties with the FMLN,'' said Luna of the government's accusation.

Successive U.S.-backed governments in El Salvador have accused their critics of being allied to the rebels, who have been fighting to topple the governent since 1979.

In that time, hundreds of union leaders have been jailed, killed or have disappeared, and labor leaders were taking Monday's threats seriously.

A diplomat in San Salvador said rebels were ''calling for their people in these (labor) movements to be as high profile as possible,'' but doubted the government would resort to violence.

''I would be surprised if they went out and beat heads in the streets,'' the diplomat said. ''I hope they are not that stupid.''

#90295u1876 10/22/1990 ~United Press International
NEW DELHI, INDIA (OCT. 22) UPI - A dispute over plans to move a 460-year-old Moslem temple and build a Hindu shrine in the mosque's place poses a threat to India's unity and could to pull down the government, Prime Minister V.P. Singh said Monday.

''It is not a question of saving the government, but that of saving the nation '' said Sing in an emotional address.

A temple or a mosque could be built any time but a nation once divided could not be united, said Singh in the broadcast over state- owned Doordarshan television.

The government hours earlier, set up a six-member committee of chief ministers to find a solution to the dispute arising out of a plan by Hindu groups to relocate a the mosque and built in its place a temple in the Hindu holy town of Ayodhya, 320 miles southeast of New Delhi.

''If we accept polarization on the basis of religion, what moral ground would the government have to counter the demand for Khalistan or secession of Kashmir to Pakistan,'' said the Indian prime minister.

Sikh militants have waged a bloody campaign in Punjab to set up an independent theocratic state called Khalistan or ''Land of the Pure'' while Moslem activists have stepped up their campaign to secede Kashmir from India.

Experts believe next week is crucial for the survival of Singh's minority National Front coalition government because the Bharatiya Janata Party (BJP), a Hindu fundamentalist group, has given an ultimatum to cut off its crucial parliamentary support if the government prevents construction of the Hindu temple at the disputed shrine in northern Uttar Pradesh state.

#90295u1902 10/22/1990 ~United Press International

WASHINGTON (OCT. 22) UPI - The Senate, warned that Iraq has targeted the Jewish state for attack if war breaks out in the Persian Gulf, overwhelmingly

approved Monday the transfer of $700 million in U.S. military equipment to Israel.

The Senate rejected 97-1 an attempt by Sen. Robert Byrd, D-W.Va., to take the equipment transfer out of the $15.5 billion foreign aid appropriations bill, reflecting once again the sweeping support Israel enjoys in Congress. Byrd cast the only no vote.

Speaking against the Byrd amendment, Howard Metzenbaum, D-Ohio, said Iraq's Saddam Hassan has made ''it very clear ... if there is a breakout of war ... he would let go with his chemical, with his biological weapons. Israel is within striking distance. We are not.''

The foreign aid bill, which has been stalled by several bitter fights, would cut in half military aid to El Salvador, cancel Egypt's $6.7 billion military debt and bar aid to countries that do not comply with U.S. sanctions against Iraq.

The legislation provides funds for economic, military and export assistance and frequently provokes some of the most acrimonious debates in the Senate. The $700 million, put in at the last moment, would be in addition to the $3 billion.

The language governing the additional military aid to Israel reads ''at least'' $700 million in the next nine months, leading Byrd to charge that President Bush would have the authority to transfer an unlimited amount of equipment, plus military training and education. The equipment would come from U.S. forces in Europe as they are reduced.

''Israel's security is not vitally dependent on this additional provision, on top of our already generous effort,'' Byrd said. ''The United States is not a bottomless pit of aid money.''

Byrd also said there is a ''fake psychology that we need to break, and that is that the the idea that any vote against anything for Israel means you are against Israel. ...

''The attitude that opposing any item that might benefit Israel means that one opposes Israel is one that has been used to considerable advantage around here for years,'' Byrd said. ''It is time that that sort of psychological stranglehold end in this body.''

Predictably, the Byrd proposal drew the fire of others senators in addition to Metzenbaum.

Sen. Daniel Inouye, D-Hawaii, said the $700 million equipment transfer is ''one that serves and enhances the interests of the United States in the Middle East.''

Sen. Arlen Specter, R-Pa., said the United States has ''enormous stockpiles'' in NATO, adding there was an ''enormous advantage to have Israeli men and women handle this equipment. The Israelis are willing to do that for their own protection and joint Israel-American protection.''

Specter said the transfer was ''relatively minor'' to the proposed $7 billion in arms sale to Saudi Arabia and the cancellation of Egypt's debt.

Sen. Dennis DeConcini, D-Ariz., said there is ''no reason we should not position (the equipment) in Israel.

CLEVELAND (OCT. 22) UPI - The Cleveland Indians announced Monday outfielder Candy Maldonado has filed for free agency.

Maldonado was also a free agent last season and signed a one-year contract with Cleveland. He hit .273 and led the Indians in home runs with 22 and RBI with 95.

Maldonado's request for a three-year, guaranteed contract reportedly has been a major stumbling block in talks with the Indians.

#90295u1944 10/22/1990 ~United Press International

NEW YORK (OCT. 22) UPI - The dollar rebounded Monday in New York and on other foreign-exchange markets around the world as currency players relaxed pressure on the enfeebled U.S. unit for fear central banks might jump in to support it.

Currency traders said the dollar also was helped technically as it was bought by participants taking profits on short positions - contracts made earlier to sell the dollar in the belief its price would decline.

The dollar's crash through the significant 1.50-German mark barrier last week and its severe slump against Japan's yen were cues for many investors to close out short positions and watch for any central bank intervention.

''The bottom line would be the market grew a little more cautious after achieving some long-term (price) objectives,'' said senior currency strategist Marc Chandler of the New York advisory firm IDEA.

Banque Paribas currency manager Joseph Cambria saw the dollar rising on ''book squaring and ... long speculative positions'' taken in expectation of gains as U.S. corporations eventually repatriate foreign profits.

In late New York dealings, the dollar was quoted at 1.5180 German marks, up from 1.5010 marks Friday, and 126.00 Japanese yen, unchanged from Friday.

Other New York dollar rates: 1.2835 Swiss francs, up from 1.2675; 5.0825 French francs, up from 5.0300; and 1,137 Italian lire, up from 1, 125.

The pound fell back, fetching $1.9425 compared with $1.9600.

Despite Monday's rally, Chandler said, the dollar could resume its fall over the next few weeks to 1.48 marks and 122 yen or so.

''I don't think the dollar has found its floor,'' he said, noting that U.S. economic factors undermining it ''continue to deteriorate.''

Besides, passage of U.S. budget legislation could allow the Federal Reserve to bring down short-term interest rates - a move that would further hone the interest-rate edge of the higher-yielding deutsche mark and yen.

A long-anticipated 1/4 percentage point easing by the Fed is already written

into prices. But the severity of U.S. economic ills could lead policymakers to take a bigger step or follow up with another dollar- bearish 1/4-point rate cut, Chandler said.

In European trading, technical factors combined with seeming progress in the Washington budget talks and lower oil prices to boost the dollar.

''The dollar is a little firmer on short-covering by dealers, although easier oil prices have helped it,'' said Warren Pinner, foreign exchange manager at Kleinwort Benson Group PLC.

In Frankfurt the dollar advanced to 1.5145 marks vs. 1.5088 Friday and was also higher in Zurich, at 1.2799 Swiss francs against 1.2670.

In London, the pound slipped to $1.9495 vs. 1.9635 Friday.

The dollar moved up in Brussels and Milan, to 31.14 Belgian francs vs. 30.99 and to 1,129.30 Italian lire vs. 1,128.25, but slipped in Paris to 5.0490 French francs from 5.0515.

In Tokyo, the dollar rebounded against the yen as investors bought it to take profits on short positions, closing at 126.25 yen, up a yen from 125.25.

Traders said investors were worried about possible central bank intervention to curtail excessive yen gains against the dollar.

Gold closed lower in both Zurich, at $368.50 per ounce against $373, and London, at $368.25 an ounce vs. $372.50.

Silver was unchanged in Zurich at $4.25 an ounce. It also held its position in London, at $4.28.

Republic National Bank in New York closed cash gold at $370.25 an ounce, down from $372.75 Friday. The New York Commodity Exchange settled contract gold at $369.60 an ounce, off from $372.80.

Republic closed cash silver at $4.22 an ounce, down from $4.285. Comex silver closed at $4.194 an ounce, off from $4.258.

(OCT. 22) UPI - Defense Secretary Cheney says Iraq did capture an UNknown quantity of U-S Hawk anti-aircaft missiles in Kuwait... but he's NOT sure if the Iraqis know how to use them. Cheney spoke in Paris after meeting with French President Francois Mitterrand. Cheney earlier said the United States ''is NOT in the Persian Gulf to launch a military offensive...'' but could counter-attack in case of Iraqi ''provocation.''

Federal budget negotiators say they've moved beyond a breakdown last night to close in on an agreement to reduce the deficit. The main dispute remains how to raise the income tax for the wealthiest Americans. The Republicans back eliminating deductions... but Democrats are pushing for a surtax on the rich. The White House says it is shooting for an agreement before the government runs out of money at midnight Wednesday.

West Coast residents of Mexico are bracing for the onslaught of Hurricane Trudy. Authorities have ordered the closing of five ports in the threatened area from Baja California to the Pacific port of Mazatlan as the storm moves toward the coast packing winds of up to 115 miles an hour.

Legal arguments get under way Wednesday to determine liability in the Love Canal environmental disaster at Buffalo, New York. The court action comes 12 years after buried toxic chemicals were found seeping from the supposedly sealed Canal in one of the nation's worst environmental disasters.

Some 10-thousand red-clad fans thronged Cincinnati's Fountain Square today to hail baseball's world champion Reds. Team owner Marge Schott thanked the crowd for hanging with the club through five straight regular-season runner-up finishes. Pitcher Danny Jackson summed up the Reds' World Series sweep of the Oakland Athletics... telling the crowd- ''We whupped 'em.'' Two red motorized street-sweepers led a parade through the city.

#90295u1986 10/22/1990 ~United Press International
(OCT. 22) UPI - Oil prices plunged a record $5 a barrel Monday, with unconfirmed reports and rumors - including one that Iraqi President Saddam Hussein dreamed he should give up most of Kuwait - combining to reinforce the market's growing belief war in the Middle East is unlikely.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for November delivery plunged a record $5.41 from Friday's close to $28.38 a barrel - a 16 percent loss on the day. It was the final day of trading activity in the November contract.

The previous Merc record for a daily decline was set Aug. 27, when WTI dropped $4 a barrel.

WTI has lost $12.04 a barrel in the last seven trading sessions, or 29.8 percent of its value, since setting a Merc record closing high of $40.42 a barrel Oct. 11.

WTI is still selling $6.84, or 31.7 percent higher, than the $21.54 a barrel it was trading at prior to Iraq's Aug. 2 invasion of Kuwait.

The drop in oil prices helped revive the stock market. The Dow Jones industrial average of blue-chip stocks slipped 4.70 points on the New York Stock Exchange to 2516.09 after being down 30 points earlier in the day.

A report that Saddam had dreamed the prophet Mohammed told him to abandon all except a small part of Kuwait was characteristic of the day, said Don Morton of PaineWebber Inc., Andover, Mass.

Another unconfirmed report that Iraq had moved troops away from its border with Saudi Arabia and a possible confrontation with U.S. and other troops stationed there ''started the market off on a weak tone in Europe that continued here,'' he said.

A weekend visit to Baghdad by former British Prime Minister Edward Heath, who said he had secured the release of an undisclosed number of British hostages following a meeting with Saddam, added downward momentum.

''The movement of the troops and Heath's comments have put pressure on the market today,'' said Thomas Blakeslee of Pegasus Econometrics Group in Hoboken N.J.

Peter Gignoux of Shearson Lehman Hutton's London office said selling also received a thrust from an unconfirmed report of Saudi Defense Minister Prince Sultan suggesting that Kuwait cede part of its territory to Iraq.

That report was ''a major catalyst'' to the downward movement of the market,

said Nauman Barakat, vice president of Merrill Lynch Futures Inc. in New York.

''The feeling is that the possibility of war is receding and perhaps evaporating entirely,'' Barakat said.

The prince is the brother of Saudi King Faud and ''if he made that statement urging Kuwaiti flexibility, that clearly is the order of the day,'' Barakat said.

Asked what might have prompted Sultan's suggestion of Kuwaiti concessions, White House spokesman Marlin Fitzwater replied: ''That I don't know. But we have been informed by the Saudi ambassador that there's no change in their policy this morning.''

He added, ''We are informed that ... they continue to believe the U.N. sanctions are effective and will work and should be pursued.''

#90295u2037 10/22/1990 ~United Press International

ATLANTA (OCT. 22) UPI - Georgia Power Co. said Monday it would not contest a $40,000 fine proposed by the Nuclear Regulatory Commission for the utility's failure to warn of an emergency situation at the Plant Vogtle atomic power station.

Georgia Power declared a site area emergency March 20 after a truck hit a utility pole, knocking out power to a reactor cooling system.

No injuries or health hazards were reported at the plant or in surrounding Burke County, and no radiation was released.

Tal Wright, Georgia Power spokesman, said the utility would not contest the penalty. ''And we will not ask our customers to pay for it,'' Wright said.

Wright said Georgia Power has reviewed its offsite notification procedures as a result of the accident.

''The company has taken prompt and extensive corrective action to prevent a recurrence,'' Wright said.

The plant, located near Waynesboro, experienced a power loss to Unit 1 when a truck in the low voltage switchyard backed into a support column for an offsite power line.

An emergency diesel power generator failed to operate properly for 36 minutes, resulting in declaration of a site area emergency.

Plant personnel failed to make initial emergency notification to the Burke

County Emergency Operations Center and the Georgia Emergency Management Agency Operations Center within the required 15 minutes.

The NRC said it was about an hour before notification was received because the power was knocked out to the plant's emergency notification network.

The NRC said plant personnel failed to use an emergency notification system located nearby in the plant's technical support center.

Georgia Power did notify the NRC within the prescribed time and notified South Carolina within 17 minutes. But the NRC said the agency was particularly concerned with the Georgia failure because most of the residents of the emergency planning zone are in Burke County.

The NRC said the base civil penalty for the violation was $80,000 but that it was reduced by half because of the company's ''prompt and extensive corrective actions to prevent recurrence.''

#90295u2059 10/22/1990 ~United Press International

NEW YORK (OCT. 22) UPI - Stocks closed mixed in moderate trading Monday after a record plunge in oil prices sparked a rebound from a sharply lower opening, but the blue-chip Dow industrials could not sustain a late advance.

The Dow Jones industrial average, which surged 68.07 Friday for a gain of 122 points on the week, lost 4.70 to close at 2516.09.

Among broader market gauges, the New York Stock Exchange composite index added 1.12 to 171.52 and Standard & Poor's 500-stock index rose 2.28 to 314.76. The price of an average share gained 19 cents.

Advances led declines, 840-724, among the 1,992 issues crossing the NYSE tape. Volume amounted to 152,650,000 shares, down sharply from 221, 714,890 shares traded Friday.

Stocks opened sharply lower, with the Dow down almost 30 points, as traders took profits from the powerful rally last week.

But then oil prices opened about $3 a barrel lower as fears of war in the Mideast began to fade amid reports that Iraqi troops have begun withdrawing from parts of Kuwait. The report, though sketchy, gave rise to the belief that chances of war in the region are becoming much slimmer.

Despite the oil plunge, two attempts to rally the Dow into the plus column failed, until oil fell through the $28 a barrel mark.

''We were really getting beaten up here until we realized oil ws falling through the sky,'' said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y. ''That's why we came back.''

But profit taking as well as concerns about the economy and corporate earnings kept a lid on stocks, Doran said, and while the Dow managed a small gain in the afternoon, when oil prices came off their lows in late trading, the Dow lost its gains and fell back into the minus column.

Those concerns manifested themselves in the action in a few Dow stocks, which depressed the average. General Electric tumbled after a weekend article in Barron's about its financial services unit raised concerns about the division may fare in a troubled economic environment.

Westinghouse hit a 52-week low, pressured by selling tied to reports that analysts have soured on the stock. And Minnesota Mining & Manufacturing fell sharply after forecasting a lackluster fourth quarter.

''There are still major concerns dealing with the economic environment out there,'' said Doran. ''There are concerns about the budget and the recessionary tones out there. And even though some companies have done better than anticipated, people are still trying to look out three to six months to see what companies are going to do.''

On the trading floor, GE was the most active issue, sinking 1 3/4 to 53 3/4. It called the Barron's article speculative and misleading and reiterated its prediction of double-digit growth in earnings per share this year.

Philip Morris followed, up 1/8 to 48 1/2.

Federal Home Loan Mortgage Corp. was third, up 7/8 to 33 3/4, reversing a plunge of almost $9 a share late last week after saying it would take charge-offs of $124 million in the third quarter against reserves on its multi- and single-family mortgage portfolios.

Federal National Mortgage Association was also active, up 1 1/8 to 29, after saying it expects record earnings for 1990 despite real estate- related problems in the banking industry.

Among the other blue chips, Westinghouse lost 1 1/4 to 25 and 3M tumbled 1 1/8

to 78 7/8, pressuring the Dow. AT&T was off 1/8 at 33 3/8, but IBM rose 1/8 to 107 3/4, American Express added 1 to 19 7/8, Merck gained 1 1/8 to 82 1/8 and General Motors rose 7/8 to 38 3/4.

Elsewhere, oil issues were little changed to slightly lower even as oil prices plummeted. Texaco was unchanged at 58, Chevron lost 1/2 to 70 1/4 and Exxon dipped 1/4 to 49 5/8.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 185,906,170 shares, compared with 256,051,990 shares traded in the previous session.

Prices fell in moderate trading on the American Stock Exchange.

The Amex Market Value index lost 1.48 to 292.23. Declines led advances 338-245 among the 816 issues traded. The price of an average share dipped 4 cents. Composite volume totaled 14,220,700 shares vs. 15, 367,070 traded Friday.

Continental Airlines Holdings led the Amex issues, up 1/8 to 6.

The National Association of Securities Dealers composite index gained 3.76 to 341.12.

-30- 4692

#90295u2071 10/22/1990 ~United Press International

INDIANAPOLIS (OCT. 22) UPI - Ron Meyer, coach of the Indianapolis Colts, received a death threat Monday but said he does not fear someone will try to kill him and even joked that death might ease the pain of the team's latest loss.

''I do not fear for my safety,'' Meyer said. ''I guess I've had these before but I just can't remember when. I'm not worried about it.''

Meyer has not sought police protection, although he said he has sent the letter to the NFL's security division. Meyer also said with a laugh that death would ease the pain of Sunday's 27-17 loss to Denver.

''I hope he finds me and puts me out of my misery. Believe me, it's tough,'' Meyer said. ''That was a bitter one. I'm taking this worse than others. I'm taking this tougher than some of the (upset) New England losses. Maybe it was high expectations.

''The ego letdown, the tremendous deflation of emotions, I haven't recovered from it. But we can't and won't allow it to go on.''

Jack Trudeau was named starting quarterback for next Sunday's game with AFC East co-leader Miami. Rookie quarterback Jeff George, sidelined with a

strained abdomen the past three games, said he expects to be ready this week but Meyer wants to be cautious to avoid long-term problems with the injury.

''I don't have any pain,'' George said. ''It feels healed. Everything I've been doing has felt fine. I'll start practicing Wednesday and let the coaches decide.''

Eric Dickerson ran 9 times for 55 yards Sunday in his first game back off the non-football injury list. He was disappointed not to have a reception but expects more action as a runner and receiver as he becomes more familiar with the changes in the Colts' system.

''The stuff came pretty easy,'' Dickerson said. ''It was about what it was last year.''

Trudeau expects better use of Dickerson over time.

''As he gets more used to the plays, he will get the ball more,'' Trudeau said. ''We will get a lot more used to throwing to him and looking for him.''

The Colts remained last in NFL rushing with just 62.7 yards a game on the ground. Miami's defense is rated second in the NFL and third against the rush. Indianapolis is 4-0 against the Dolphins with Dickerson and 0- 9 against Miami without him in the lineup.

Dickerson needs 72 yards to pass John Riggins for fifth on the NFL all-time rushing list. Dickerson has 11,281 career rushing yards and moved past O.J. Simpson into sixth on the career list Sunday.

#90295u2199 10/22/1990 ~United Press International
WASHINGTON (UPI) - President Bush vetoed the Civil Rights Act of 1990 Monday, becoming just the third president in history to veto a major civil rights bill.

''I deeply regret having to take this action ... since it contains certain provisions that I strongly endorse,'' said Bush, citing the measure's stated

objective of combating race and sex discrimination in the workplace.

But the president said, reiterating his longtime opposition to the bill, the measure would also ''introduce the destructive force of (hiring) quotas into our nation's employment system.''

In a letter to Capitol Hill, Bush again called on lawmakers to promptly pass the compromise bill he offered late Saturday. The president maintains his measure would provide equality in the workplace without quotas.

But many legislators and civil rights advocates have already rejected his proposal as a political sham that would gut civil rights. They also maintain that the bill he voted would create no quotas.

Sen. Edward Kennedy, D-Mass., a chief sponsor of the civil rights bill, called Bush's veto of the measure ''a sad day for America's ideals'' and said, ''Now it is up to Congress'' to try to override it.

The chances of overidding the veto appear slim. Although the bill passed the House and Senate by overwhelming margins last week, neither chamber had the two-thirds majority needed for an override.

Kennedy said, ''The vast majority of Democrats will vote to override the president's veto. Whether this bill becomes law will be determined by Republican members.''

He said, ''Perhaps out of loyalty to the president, they are willing to put principle aside. But sometimes, loyalty asks too mcuch - and this is one of those times.''

While it is questionable whether Congress will be able to override the veto, it is also doubtful that lawmakers will swiftly pass Bush's alternative measure before this session of Congress adjourns this week.

''We're just going to have to deal with this again next year,'' said Rep. Augustus Hawkins, D-Calif., another chief sponsor.

The bill, one of the most thorny issues between the White House and Capitol Hill this year, would reverse several recent Supreme Court decisions that supporters say made it more difficult for women and minorities to prove discrimination in the workplace.

Ralph Neas, executive director of the Leadership Conference on Civil Rights, said only two other presidents vetoed a major civil rights bill - Andrew Johnson in 1866 and Ronald Reagan in 1988.

''This veto will define the Bush presidency,'' said Neas, predicting the action would hurt the president among minorities and women.

Bush, in vetoing the bill, rejected pleas and advice from members of Congress, including several members of his own party, as well as minorities, women and labor and the U.S. Civil Rights Commission.

Instead, he embraced the counsel of his top lawyers, who maintained that the bill, despite arguments to the contrary, would indeed lead to hiring quotas.

Bush, in his veto letter to Congress, said, ''Our goal and our promise has been equal opportunity and equal protection under the law. That is a bedrock principle from which we cannot retreat.''

But, he said, ''when our efforts, however, well intentioned, result in quotas, equal opportunity is not advanced but thwarted. The very commitment to justice and equality that is offered as the reason why this bill should be signed requires me to veto it.''

#90295u2204 10/22/1990 ~United Press International

(OCT. 22) UPI - A report out today says nearly one-third of all black Americans who died in 1987 would have survived had they ''lived under the same health conditions as whites.'' American Health magazine... working with the National Center for Health Statistics... says lifestyle differences, genetics, racism and poverty affect death rates. The magazine also says one clear, fixable cause of the gap is the lack of good medical care for blacks.

In El Salvador, finance ministry workers were joined by sympathizers today in defying a Salvadoran government threat to jail them if they staged a strike. The workers walked off the job, demanding a pay increase and improved fringe benefits. The government has accused the strikers of having links to an insurgent group and of trying to destabilize the nation.

Thousands of board games will be sent to bored U-S troops in the Saudi Arabian desert this week as part of ''Operation R and R.'' University Games of Menlo Park, California, is donating the diversions... which include a Dick Tracy game and a game called Charado... described as ''charades with dough instead of body movements.'' Up until now... one of the main entertainments for the troops has been to race insects in the desert.

#90295u2260 10/22/1990 ~United Press International

NEW YORK (OCT. 22) UPI - American Express Co. said Monday it earned $344 million, or 74 cents a share, in the third quarter, a 3.6 percent gain over profits of $322 million, or 77 cents a share, in the year-ago period.

The lower earnings per share reflected a greater number of shares of stock

outstanding in the latest quarter.

But the company's earnings for the first three quarters were only $44 million, or 4 cents a share, vs. $900 million, or $2.09 a share in the 1989 period.

The effects of a $620 million loss in the 1990 first quarter, caused by heavy investment in the troubled Shearson Lehman Hutton Inc. investment firm, which has been reorganized as Shearson Lehman Brothers Inc., continued to be felt.

American Express reported revenues in the 1990 third quarter of $6.1 billion, down from $6.5 billion in the year-earlier period.

''The strengths of our products and services and our diverse revenue streams enabled our businesses to continue to perform well despite the difficult economic environment,'' said American Express Chairman James Robinson III in a statement accompanying the quarterly results.

The results were released after the close of the New York Stock Exchange, where the price of American Express stock finished at $19.875, up $1.

The charge card, travel services, banking and securities group said quarterly earnings were at record levels in three main business units. Card charge volume rose 13 percent to $27.9 billion from $24.8 billion, the company said.

The travel related services unit earned $277 million, up 15 percent from the year-ago quarter. IDS Financial Services had profits of $56 million, up 18 percent. Information Services Corp. earned $27 million, up 24 percent.

London-based American Express Bank showed quarterly earnings of $35 million, up from $21 million one year before.

The Shearson investment subsidiary, in which American Express expanded its stake earlier this year to 75 percent from 61 percent at considerable cost and some damage to its prestige, reported paper-thin profits of $13 million, downfrom the $66 million earned in the same quarter of 1989.

But American Express said it sustained a $5.4 million loss on its interest in Shearson, against $41 million profit in the year-ago period, after paying out preferred dividends and accounting for minority interests.

American Express said Shearson's results reflected ''a continued industrywide slowdown, the difficult economic environment and a reduction in the number of financial consultants'' at the Wall Street firm. Shearson lost $915 million in the first quarter after allocating $630 million for restructuring.

Shearson had total revenues of $2.5 billion, off 23 percent from $3.3 billion in the year-earlier quarter. American Express said the drop was mainly due to ''decreased interest and dividend revenues.''

The investment firm earned $155 million from investment banking, against $205 million in the year-earlier period. Commission revenues were $393 million vs. $522 million in the earlier period. Income from market-making and principal transactions was $299 million, off from $321 million.

Shearson's assets under management totaled $78.8 billion at Sept. 30, against $90.5 billion 12 months earlier.

BOSTON (OCT. 23) UPI - Fidelity Investments - the world's biggest operator of mutual funds - said Monday it is clamping down on its market-timing clients, who try to profit by switching money from one fund to another in anticipation of stock market swings.

The company bluntly warned would-be switchers to forget about trying to make any further switches on the recommendation of a particular market newsletter.

The decision could affect many thousands of Fidelity customers, including some who either hold shares in or want to switch into the Magellan Fund, its biggest fund.

The company said it has identified an undisclosed number of its customers who in the past year have repeatedly shifted money from one Fidelity fund to another on the recommendations of a market-timing newsletter that Fidelity would not name.

But the next time the newsletter urges a switch, ''we will not accept your telephone exchange order into our domestic growth or growth and income funds '' J. Gary Burkhead, president of Fidelity Management & Research Co., said in a letter to shareholders that was obtained by United Press International.

Burkhead urged customers to ''reexamine your investment strategy and come to view your investments ... with a long-term perspective,'' Burkhead said.

Otherwise, Burkhead said, market-timers should take their business elsewhere.

He said, ''we firmly believe that discouraging market-timing in our funds is in the best interests of all our shareholders.''

A company spokeswoman, Jeannette Akers, said the unnamed newsletter has recommended five switches in the past year. ''We've been watching our business and seen the pattern develop,'' Akers said. ''Five is a lot and this letter has gone to the shareholders we've identified as having been involved in a majority of those switches.''

Switching is harmful to all shareholders of a fund, Burkhead said, because the moving of a big percentage of a fund's shares ''can disrupt a portfolio manager's strategy and ultimately have a negative impact on fund performance.''

However, before the 1987 stock market crash, Fideltiy provided hourly telephone quotes on many of its funds.

A. Michael Lipper, whose company, Lipper Analytical Services Inc. of Summit, N.J., monitors fund performance, said wholesale switching can hurt a fund's other shareholders two ways.

''Typically it not only creates transaction costs (for the fund), but also works agains the trend that the portfolio manager is trying to establish if he's trying to build cash and they redeem on him or he's trying to get fully invested and they give him cash. And there's concern that other shareholders are being hurt by this.''

MONTREAL (OCT. 23) UPI - Great Atlantic & Pacific Tea Co. Inc. completed its $199.75 million purchase Monday of 69 Miracle Foodmart supermarkets in the Toronto, Ontario, area from Steinberg Inc.

The deal, announced in late July, was part of a plan by Steinberg's parent company, Socanav Inc., to reduce its long-term debt.

Socanav paid $1.1 billion for Steinberg in August, 1989 and since then has been trying to cut the takeover cost.

Socanav put Steinberg's Ontario supermarket chain up for sale in June, a day before saying it was taking its Arizona grocery chain, Smitty's Super Valu Inc., off the auction block.

A&P, based in Montvale, N.J., is a subsidiary of West German retailer Tengelmann Warenhandelsgellschaft.

OVERLAND PARK, Kan. (UPI) - Players likely to be chosen in the first round of the NBA draft or the first two rounds of the NFL draft can purchase disability insurance through a program announced Monday by the NCAA.

The program also makes low-interest loans available to all eligible athletes to finance the policy premium.

''I''m pleased that the association has been able to move ahead with the

disability-insurance program,'' said NCAA Executive Director Dick Schultz. ''It fills a need for elite athletes in football and basketball. They now can insure themselves against a disabling injury ''injury

Football players can buy up to $1.8 million in coverage and basketball players can insure themselves for up to $2.7 million. Insurance companies would determine which players were eligible for the coverage.

Schultz said many players wanted the coverage but could not but it because banks were reluctant to issue a loan for the premiums. Through an agreement between the NCAA and United Missouri Bank of Kansas City, athletes approved for coverage automatically will qualify for a loan to pay the premium. The loan, which would be issued at below-market rates, would be repaid after the athlete signs a professional contract.

Schultz said he wanted the NCAA to get involved in the insurance programs because ''agents have been using disability and catastrophic medical insurance to get a handle on top athletes.

''This program guarantees that all those who qualify for coverage can get a loan fo the full premium with just their signature. We believe this will help athletes and coaches deal with unscrupulous agents,'' he said.

Schultz said the NCAA is prepared to cover any losses that would result from the plan.

#90295u2305 10/22/1990 ~United Press International

WASHINGTON (OCT. 22) UPI - While Agriculture Secretary Clayton Yeutter sought foreign backing for agricultural trade reform, U.S. sugar growers and processors withdrew Monday their support for the government's proposal for freer trade.

''This plan will not achieve a level playing field,'' the American Sugar Alliance said in criticizing what the organization termed a ''weakened'' plan outlined in the final U.S. position paper.

Crucial trade negotiations, which cover 15 topics, are scheduled to conclude in early December.

Agricultural trade is one of the thorniest issues at the talks, which are being held under the auspices of the Geneva-based General Agreement on Tariffs and Trade. Several nations have indicated they will block an overall agreement if there is no satisfactory settlement on agriculture.

The United States initially proposed elimination of export subsidies and other

trade-distorting farm subsidies and trade barriers. The final U.S. plan calls for a 90 percent reduction in export subsidies and a 75 percent cut in unfair subsidies and barriers.

Carolyn Cheney, head of the American Sugar Alliance, said the alliance prefers the original proposal, rather than a ''partial and inequitable rollback.''

Eiler Ravnholt, who represents Hawaiian sugar growers, said the European Community has such a high sugar subsidy that its producers still could get a support price above their cost of production, while U.S. supports would fall below it.

''We would find it difficult to survive,'' Ravnholt said.

Meanwhile, Yeutter opened a one-week trip through South America with an appeal to Chileans to press for dismantling of farm trade barriers.

''Chile ... has done a great deal to advance agricultural trade reform,'' he said in a speech prepared for the Chilean Council of Foreign Relations. ''I commend you and thank you for that, and also ask for your continuting help in pushing the (negotiations) to a successful conclusion.''

Chile is a member of the so-called Cairns Group, which wants an immediate reduction in subsidies. Argentina and Brazil, the two other nations on Yeutter's itinerary, also are Cairns Group members.

#90295u2332 10/22/1990 ~United Press International

(OCT. 22) UPI - As promised... President Bush today vetoed the Civil Rights Act of 1990. The president said he deeply regretted the action because he endorses some parts of the bill. But he says the bill would also introduce what he called ''the destructive force'' of hiring quotas. Bush again called on lawmakers to pass his version of the bill. Democratic Senator Edward Kennedy says the veto marks ''a sad day for America's ideals.''

It looks as though taxes might go up for wealthy Americans. White House and congressional budget negotiators appear to agree on raising the top income tax rate from 28 percent to 31 percent. Bargainers in Washington are also deciding how- NOT whether- to take more from people with incomes higher than one-Million dollars a year. An increase in the gasoline tax is also in the works... but the amount depends on the new income tax revenues.

Oil prices plunged on world markets today amid rumors and speculation that a Persian Gulf war is UNlikely. In New York, West Texas Intermediate crude for November delivery dropped a record five-dollars- 41 cents from its Friday close... to 28-dollarscents a barrel. That's a 16 percent decline on the day. The previous New York Mercantile Exchange record decline came on August 27th

when West Texas oil dropped four-dollars a barrel.

A national survey of fifth and sixth graders reveals one out of five youngsters say they have seen drugs or alcohol at school, shopping malls or where they hang out. The youths most commonly see beer and cigarettes... but also spot marijuana, cocaine and crack. Half of the sixth graders say they know of youngsters who have either smoked cigarettes, consumed liquor or used drugs. .

The telephone poll of 250 fifth graders and 250 sixth graders was conducted by Drug Abuse Resistance Education, a project sponsored by Kentucky Fried Chicken.

#90295u2352 10/22/1990 ~United Press International

TORONTO (OCT. 23) UPI - Nickel producer Inco Ltd. and Consolidated TVX Mining Corp. announced plans Monday to join forces and create a new major international gold company.

The new company - TVX Gold Inc. - would begin operations in January with

interests in six gold mines in Canada, the United States, Brazil and Chile, merging Inco's gold division and Consolidated TVX.

Ian Telfer, president of Consolidated TVX, said his company was ''essentially buying all of the assets of Inco Gold and issuing shares to do it.''

Consolidated TVX will issue 71 million shares to Inco, expanding to about 122 million the number of shares outstanding.

Telfer said TVX Gold will be an independent, stand-alone company with one major shareholder, Inco.

Inco will have a 58 percent interest in the new company, with Consolidated TVX's existing shareholders controling the remaining 42 percent, Telfer added.

The proposed transfer of gold interests from both Inco and Consolidated TVX has been approved by the companies' boards of directors. However, the deal is not expected to close until mid-January after due diligence studies, regulatory approval and Consolidated TVX shareholder approval.

In 1991, TVX Gold's share of production from the mines would be about 350,000 ounces of gold and silver, rising to more than 400,000 ounces in 1992.

TVX Gold would be a low-cost producer with an average cash production cost of less than $200 an ounce - well below the current spot level on commodity markets of about $370 an ounce.

Eike F. Tatista, chairman of Consolidated TVX, is set become chairman of the new company.

Inco would transfer to TVX Gold: 60 percent of its operating interest in the Casa Berardi gold mining properties in Quebec, a 50 percent operating interest in the Mineral Hill mining property in Montana, a 50 percent interest in the Crikas gold mine in Brazil and interests from three other Canadian mines.

Consolidated TVX would add a 50 percent interest in the La Coipa gold and silver mine in Chile and from Brazil, a 23 percent interest in the Brasilia mine and a 49 percent interest in the Novo Astro mine.

TVX Gold would have more than seven million ounces of reserves at the outset.

Both Consolidated TVX, a gold mining company, and Inco, one of the world's leading nickel producers, are headquarted in Toronto.

#90295u2353 10/22/1990 ~United Press International

NEW YORK (OCT. 22) UPI - Metropolitan Life Insurance Co. paid out more than

$323 million to policyholders suffering from AIDS or infected with the HIV virus between 1986 and 1989, a company spokeswoman said Monday.

In 1986, the insurer paid $3.2 million in personal life insurance claims to 344 people suffering from the deadly acquired immune deficiency syndrome or having the HIV virus, but three years later those figures more than doubled, said Metropolitan Life spokeswoman Elaine Wagner.

She said 874 claimants received $8.9 million in 1989.

In payments to people infected with the HIV virus, the company paid $26.6 million in 1986, a number which rose to $153.3 million in 1989 - representing a 476 percent increase, Wagner said. Testing positive for the HIV virus precedes a carrier developing full-blown AIDS.

The spokeswoman said the insurer was likely to continue paying out more claims to AIDS- and HIV-related individual and group claims, as the insurance industry, by nature, is vulnerable to epidemics.

A 1987 Society of Actuaries study forecast that by the year 2000, the industrywide cost of all AIDS-related group and individual life insurance claims from those insured in 1986 could total $50 billion, Wagner said.

#90295u2367 10/22/1990 ~United Press International

ORLANDO, Fla. (OCT. 22) UPI - Chase Manhattan Corp.'s incoming chairman said Monday he expected the U.S. real estate slump, the main reason why his bank posted a $623 million loss in the third quarter, will stretch into 1991.

''It is my belief that the real estate market isn't going to get better tomorrow,'' said Thomas Labrecque, who will formally take over the reins of the second-largest U.S. bank from Willard Butcher Oct. 31. ''I think we have at least two or three quarters where it is going to get worse.''

But Labrecque said Chase is poised to go forward after initiating a sweeping - and costly - reorganization in the third quarter. The company set aside $1 billion to cover lending losses and the cost of cutting 5, 000 jobs.

''We have done the major things we thought we had to do and we intend to move forward,'' he told reporters at the American Bankers Association's convention.

Labrecque said 3,000 Chase employees have already departed and the remaining 2,000 will be gone by year's end. The next step is to bolster Chase's position in individual banking, corporate finance and information technology.

''We are developing plans to bust out in each one of the three,'' he said, declining to set a timetable for the plan's execution.

Labrecque said Chase executives are confident the bank will meet its targets in the fourth quarter and after. The bank has predicted core earnings of $140 million in the fourth quarter of this year.

Asked whether Chase was in any discussions regarding a possible merger with another large bank, Labrecque answered flatly, ''No.''

But he did expand on the broad theme of mergers in the industry shakeout many analysts expect.

''The options are as strong in the non-bank sector as they are in the banking sector,'' he said, meaning that bank mergers should be made with financial industry partners bringing diversification.

#90295u2390 10/22/1990 ~United Press International

SAN FRANCISCO (OCT. 22) UPI - A federal judge, using a novel sealed competitive-bidding procedure, has selected a New York law firm for the potentially lucrative right to head 20 class-action securities suits against Oracle Systems Corp.

Four law firms vied for the chance to be selected lead counsel in the series of lawsuits, representing hundreds of shareholders seeking millions of dollars in damages.

U.S. District Judge Vaughn Walker selected the 11-lawyer New York firm of Lowey, Dannenberg, Bemporad, Brachtl & Selinger, which specializes in securities and corporate finance.

About 20 suits were filed between Feburary and March against the Belmont, Calif.-based Oracle when the software company's stock plummeted 31 percent after an announcement of low first-quarter earnings.

There are also allegations that six Oracle officers reaped huge profits by selling 645,000 common shares before the March 27 earnings disclosure.

Oracle has consistently denied any wrongdoing.

Richard Dannenberg Monday likened the firm's selection to being named chairman of the board for a corporation, with responsiblities to direct the operation.

The decision will also allow the firm to collect the largest share of the fees should the shareholders prevail.

Walker's aim in ordering bids was to keep the costs of the litigation down and end the nasty name-calling by plaintiffs' lawyers that marked a May 4 hearing

over which firm would be appointed lead counsel in the case.

When Walker announced his order to submit sealed bids for the case, two groups promptly buried the hatchet and asked in August for joint leadership of the case. They submitted a single pretrial cost budget estimate of $460,000 to $780,000.

Walker rejected the proposal stating the plaintiffs have shown a ''virtual allergy to price competition.''

Lowey Dannenberg's offer placed a $325,000 cap on litigation expenses.

Traditionally, fees for plaintiffs lawyers in class actions have been set by the judge at the end of the case, based primarily on the number of hours the lawyers worked on the case.

The courts also factor in the difficulty of the case and the risk it would succeed when figuring attorney contingency fees.

#90295u2424 10/22/1990 ~United Press International

UNITED NATIONS (OCT. 22) UPI - The U.N. Security Council deadlocked Monday on how to reprimand Israel for rejecting a request to send a U.N. team to investigate the killings of at least 20 Palestinians on Jerusalem's Temple Mount.

The council recessed after more than an hour of closed-door discussions on two documents to blame Israel for Secretary-General Javier Perez de Cuellar's failure to carry out the inquiry into the Oct. 8 incident on the Temple Mount.

Diplomats said the U.N. leader told the 15-member council he is still interested in sending the U.N. team to Jerusalem for an independent inquiry into the shootings carried out by Israeli troops.

The council voted unanimously Oct. 12 to condemn ''acts of violence'' by Israeli forces in putting down the riots on the Mount and ordered Perez de Cuellar to provide a report on the incident before the end of October.

Israel strongly rejected the resolution and any U.N. involvement in the investigation.

The Israeli government had decided to conduct its own investigation and said it would provide the U.N. leader with its findings. Israel said thousands of rock-throwing Palestinians attacked Jewish worshipers, forcing an armed intervention by Jerusalem police.

The diplomats said negotiations may resume Tuesday on whether to issue a

statement by the president of the council, British Ambassador David Hannay, or to vote on a resolution drafted by non-aligned countries.

Hannay told reporters after the failed negotiations that the council had difficulties to decide which way to convey the blame to Israel. He said more discussions will be held.

The five permanent members of the council - the United States, the Soviet Union, China, France and Britain - supported Hannay's prepared statement, which expresses the council's ''deep regret'' at Israel's refusal to receive the U.N. team. It urges Israel to reconsider its objection, which ''can only hinder efforts aimed at reducing tensions.''

Such a presidential statement is not binding on member states but a resolution if adopted by the council, should be implemented.

The draft resolution by the non-aligned ''deplores'' the Israeli refusal and also urges that country to reconsider its decision.

Diplomats said the United States refused to endorse another resolution condemning Israel because it would deepen the hostility already existing between Washington and its ally in Jerusalem.

#90296b0005 10/23/1990 ~Business Wire
REDMOND, Wash. (OCT. 23) BUSINESS WIRE - Microsoft Tuesday announced Microsoft OnCall for Microsoft Basic, and expanded support for Microsoft QuickBasic development system users.

OnCall for Basic offers high-level support, extended service hours and minimal hold time for all Microsoft Basic products through a 900 number. Also available is a new support line exclusively for Microsoft QuickBasic users needing entry-level assistance. Both services come in response to customer demand for faster, more sophisticated support.

''The entry-level support line meets the requirements of most customers who need assistance with installing Microsoft QuickBasic software and getting up to speed. Those who require priority support on more advanced issues now have an additional option with Microsoft OnCall for Basic,'' said Charles Stevens, general manager of Microsoft's Data Access Business Unit. Common questions from Microsoft OnCall for Basic customers include inquiries on Microsoft QuickBasic memory management, inter-language calling and error and event trapping.

Microsoft OnCall for Basic is offered through a 900 number at a cost of $2 per minute. Hold time will be minimal and customers will not be charged until they reach a technician. Extended service hours are from 6:00 a.m. to 6:00 p.m. PST, Monday through Friday (excluding holidays). The Microsoft OnCall for Basic number is 1-900-896-9999.

The new standard assistance line for Microsoft QuickBasic supports Microsoft QuickBasic version 4.5 for DOS systems, and Microsoft QuickBasic version 1.0 for Macintosh systems. Technicians will help new Microsoft QuickBasic users get up and running as quickly as possible within 90 days of purchasing the program. The Microsoft QuickBasic support number is 206/646-5101. Service hours are 8:00 a.m. to 5:00 p.m. PST, Monday through Friday (excluding holidays).

Users of Microsoft Basic Professional Development System and earlier versions of the Microsoft Basic compiler will continue to have unlimited support on the Microsoft Product Support Services for Languages and Hardware toll line: 206/637-7096. Support for all Microsoft Basic products will continue on Compuserve as well.

Microsoft Corp. (NASDAQ ''MSFT'') develops, markets and supports a wide range of software for business and professional use, including operating systems, languages and application programs, as well as books, CD ROM products and

hardware for the microcomputer marketplace.

KANSAS CITY, MO. (OCT. 22) BUSINESS WIRE - CenCor Inc. reported higher revenues and profits in the three months and nine months ended Sept. 30 compared to the same periods a year ago.

Increases were posted in all operations of the company's business.

In the third quarter, revenues were $13,911,000 compared to $11,265,000 a year before, a gain of $2,646,000 or 23.5 percent. Net income of $446,000 compared to $286,000, an increase of 55.9 percent. The per share earnings were 40 cents against 25 cents, adjusted for a one-for-five reverse stock split, effective Aug. 31. The average number of shares was 1,129,645, down from 1,156,464 shares a year earlier.

For the nine months ended Sept. 30, revenues were $39,742,000 compared to $31,846,000 a year ago, an increase of 24.8 percent. Net income was $1,251,000 compared to $768,000, an increase of 62.9 percent. Adjusted for the reverse stock split, the earnings this year were equal to $1.10 a share on the average 1,140,682 shares compared to 63 cents a share on the 1,209,670 shares a year earlier.

CenCor had 58 consumer finance offices as of Sept. 30. A branch was opened in Orlando, Fla., in October. Volume of $92,933,000 was 12.5 percent greater than last year. Notes receivable of $122,871,000 represented an increase of 9.6 percent.

The number of temporary employment offices as of Sept. 30, was 15 vs. 14 a year before. A new operation in Santa Ana was acquired in October.

GOLDEN, CO (OCT. 23) BUSINESS WIRE - ConferTech International Inc. (NASDAQ:CFER), a leading provider of audio teleconferencing bridge equipment and services, Monday announced record revenue and earnings for its third

quarter and nine-month period ended Sept. 30, 1990.

The company reported net income for the quarter of $325,000, or 7 cents per share, a 92 percent increase over net income of $169,000, or 5 cents per share in the comparable quarter a year ago. Revenue for the quarter increased 80 percent to $4.4 million from $2.5 million in the comparable quarter.

For the nine-month period, net income increased 86 percent to $693,000, or 15 cents per share, compared to net income of $373,000, or 12 cents per share, in the same period a year ago. Revenue through nine months advanced 70 percent to $11.6 million compared to $6.8 million in the corresponding period. Through nine months, service and equipment revenue have contributed equally to overall revenue.

H. Robert Gill, president of ConferTech, said that ConferCall Service revenue for the third quarter met projections and equipment sales exceeded expectations. In addition to strong sales of the company's TEMPO(TM) product line during the quarter, ConferTech reported the first commercial sales of its high capacity ALLEGRO(TM) system.

Gill said ConferTech significantly strengthened its balance sheet during the quarter through improved controls for accounts receivable and inventory. The company eliminated about $800,000 in line-of-credit financing and closed the quarter with a cash position of more than $1 million. Also during the third quarter ConferCall capacity was expanded in anticipation of increased teleconferencing volumes.

LOS ANGELES (OCT. 23) BUSINESS WIRE - Candle Corp. Tuesday announced the new generation of OMEGACENTER, its integrated software solution for enterprise-wide system management.

OMEGACENTER combines status monitoring, analysis, automation and remote control functions into an integrated system for monitoring MVS, CICS, IMS, VM, DB2 and VTAM. In addition, OMEGACENTER's CUA (Common User Access) interface offers ease-of-use and a shortened learning curve while supporting IBM's recently announced System View system management structure.

Three recently announced Candle products combine to make up the core of OMEGACENTER: OMEGAVIEW, the advanced status management system, collects and

consolidates enterprise service level information; OMEGAMON II for MVS, the first CUA-compliant MVS performance monitor, offers online realtime and historical MVS monitoring; and AF/PERFORMER, Candle's automated performance tool, which automatically solves major problems affecting MVS, CICS and DB2 performance and availability. COORDINATING PROBLEM RESOLUTION WITH OMEGAVIEW

''OMEGAVIEW adds new power to OMEGACENTER by making problem resolution a coordinated effort,'' said Aubrey Chernick, founder and chief executive officer of Candle. ''OMEGAVIEW's display integrates system information from the user's entire enterprise, shows it to each viewer at an appropriate level of detail and indicates who is solving the problem and when it will be solved.''

OMEGAVIEW accomplishes these goals by collecting performance information from Candle's OMEGAMON performance monitors at user-defined intervals, comparing the information to the installation's threshholds or service levels and triggering system status lights on OMEGAVIEW's customizable screens. The result is an ''at-a-glance'' overview of the health of the entire enterprise.

Candle has also added a problem-tracking feature that shows which operator or technician is addressing the problem and when it will be fixed. According to Chernick, ''With the advanced warning that OMEGAVIEW provides, our users are able to launch a coordinated effort to fix system problems, often before end users experience degraded response times.''

Corporate headquarters are in Los Angeles with 11 domestic and six international offices. The company offers customers 24-hour, seven-day service and support. In addition to the OMEGACENTER performance and automation tools, Candle markets data base tools for DBAs and application development tools (the CL product family) to assist customers with end-user productivity.

For more information on Candle's family of products, contact: Candle Corp., 1999 Bundy Dr., Los Angeles, Calif., 90025. Or call: 1-800-843-3970.

SEATTLE (OCT. 23) BUSINESS WIRE - Arctic Alaska Fisheries Corp. (NYSE:ICE) Tuesday reported increased revenues and net income for the quarter ended Sept. 30, 1990.

The company also reported sharply increased revenues for the nine-month period.

Third quarter revenues were $43.6 million compared with $33.9 million a year

ago. Net income was $1.6 million, or 10 cents per share, vs. $1.4 million and 10 cents per share in the year-ago quarter.

For the nine months Arctic Alaska posted revenues of $144.0 million with net income of $13.8 million compared with revenues of $115.9 million and net income of $13.8 million in 1989. Earnings per share were 84 cents vs. 95 cents last year. Per-share earnings for the nine-month period reflect a 13 percent increase in the number of shares outstanding in 1990.

Arctic Alaska Fisheries Corp. is the largest fishing and at-sea processing company in the United States. The company's vessels operate in the 200-mile zone off Alaska catching crab and bottomfish such as pollock, cod, perch and sole. The catch is processed into a variety of seafood products that are sold in the United States, Japan and other export markets primarily under the Arctic Ice trademark.

MURFREESBORO, Tenn. (OCT. 22) BUSINESS WIRE - National HealthCorp L.P. (ASE:NHC), one of the nation's largest long-term health care chains, announced third quarter revenues rose 14 percent to $38,478,000 from $33,861,000 a year earlier.

Income for the three months ended Sept. 30 was $3,430,000, compared to $3,611,000 for the same period last year. Earnings per unit decreased to 49 cents per unit from 52 cents per unit.

For the nine months net income increased 18 percent from $10,363,000 to $12,300,000. Revenues rose to $115,718,000 from $98,607,000, a 17 percent increase. Earnings per unit climbed to $1.77 from $1.50

The flat earnings for the quarter and the nine months are a result of escalating health insurance costs and a decrease in market value of the company's investment portfolio.

NHC President Andy Adams said results for the nine month period include the sale of a center in Canton, N.C., which represents a gain of $1,865,000, or 27 cents per unit. Highlights of the quarter include the opening of three health care centers with a total of 300 beds in Florida.

The company now owns or manages 2,634 long-term health care beds in the Sunshine State at 24 locations. In addition, Adams said the company has 1,664 beds under development or construction in five states. These beds are expected to open during the next two years.

NHC is a publicly traded limited partnership with 74 long-term health care centers and 8,887 long-term health care beds. The company's other services for the nation's elderly include Alzheimer's units, homecare programs and retirement apartments.

CAMBRIDGE, MASS. (OCT. 23) BUSINESS WIRE - Genzyme Corp. (NASDAQ:GENZ) Tuesday announced that it received a positive recommendation for approval of Ceredase from the Endocrinologic and Medibolic Drugs Advisory Committee.

Ceredase is a protein replacement therapy for the treatment of Gaucher's Disease. The committee's decision was unanimous.

Genzyme Chairman and Chief Executive Officer Henri Termeer stated, ''The positive recommendation of the advisory committee for the approval of Ceredase is a major step forward toward providing treatment to patients who suffer from this debilitating disease, and will allow our planned program to go forward on schedule.

''We are delighted by the committee's decision and look forward to providing a treatment that will make a significant improvement in the quality of life for people suffering from Gaucher's Disease.'' He continued, ''Ceredase has shown very promising results in individuals who have recieved the product. This is a milestone achievement in the area of protein replacement therapy.''

Genzyme is a diversified health care products company based on the development of novel therapeutic proteins and biomaterials. The company is currently engaged in the operation of growing diagnostic products, pharmaceuticals and fine chemical businesses. The company is headquartered in Cambridge, Mass., with production and research facilities located in Cambridge and Framingham, Mass., and Maidstone and Haverhill, England, and an international sales and marketing office located in Tokyo, Japan.

SEATTLE (OCT. 23) BUSINESS WIRE - Aldus Corp. (NASDAQ: ALDC) Tuesday announced that third-quarter earnings per share increased 96 percent, while revenues increased 69 percent over 1989 third-quarter results.

For the third quarter ended Sept. 28, 1990, Aldus reported earnings of 45

cents per share, up from 23 cents per share for the same period a year ago. Net income was $6.6 million, an increase of $3.4 million from the same period a year ago. Revenues for the quarter were $36.7 million, a $15.0 million increase over revenues of $21.7 million reported for the third quarter of 1989. Results for 1989 have been restated to include those of Silicon Beach Software Inc., which Aldus acquired through a pooling of interests in February 1990.

''Demand across our product line continued to be strong this quarter,'' remarked Bill McAleer, vice president of finance. ''The popularity of Aldus PageMaker, Aldus FreeHand, and Aldus Persuasion along with stronger than anticipated European sales, helped push our third-quarter results beyond expectations. As one of the first products adapted for the new Microsoft Windows 3.0 operating environment, PageMaker 3.01 for the PC has gained widespread acceptance worldwide since its release in June. Further, our balance sheet remains strong, with over $74.2 million in cash and marketable securities at the end of the quarter.''

Aldus Corp. creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to PageMaker, the company's flagship product, the Aldus product line includes Aldus Persuasion, Aldus FreeHand, and Aldus PrePrint. The Silicon Beach Software product line includes SuperPaint, SuperCard, Super 3D, and Digital Darkroom. Aldus distributes both product lines through an international network of more than 16,000 dealers and distributors.

CONCORD, CALIF. (OCT. 23) BUSINESS WIRE - Microgenics Corp., a Concord-based medical diagnostics company, announced Tuesday the appointment of Joseph A. Fanelli to vice president, sales.

Fredric J. Feldman, Ph.D., Microgenics' president and chief executive officer, commented: 'Microgenics has reached a stage where its revenues from an expanding base of diagnostic products are rapidly increasing. The company's continued growth can best be managed with a dedicated sales organization directed by a seasoned professional.

''Joe comes to Microgenics with a wealth of experience in sales and sales management as well as an outstanding track record in business development and general management.''

With Fanelli's appointment, Robert S. Brody, formerly Microgenics' vice president, marketing and sales, becomes vice president, marketing. Brody will continue to direct Microgenics' marketing efforts as well as oversee the demands of the company's diagnostic systems program.

Microgenics Corp. is a medical diagnostics company which develops, manufactures and markets CEDIA (r) recombinant DNA-based diagnostic tests and clinical diagnostic analyzers for the hospital, clinical laboratory and physicians' office markets.

The company's diagnostic tests are based on recombinant DNA technology and represent the first advance in assay technology in 15 years.

Through its wholly owned subsidiary, BioAutoMed Systems Inc., Microgenics offers the ''ASCA,'' a cost-effective diagnostic analyzer, to the physicians' office and small laboratory market on a worldwide basis.

Microgenics, founded in 1981, is a privately held corporation based in Concord.

MONETT, MO. (OCT. 23) BUSINESS WIRE - Jack Henry & Associates Inc. (NASDAQ:JKHY) Tuesday reported net income for its first quarter ended Sept. 30 1990, of $620,000, or 18 cents per share, on net company revenues of $2,951,000.

This represents a substantial increase of 28 percent in revenues and 373 percent in earnings over the comparable period last fiscal year.

In the first quarter of last year JHA had earnings of $131,000, or 4 cents per share, on net company revenues of $2,308,000. The first quarter of last year was JHA's first full quarter since redirecting its marketing efforts to its IBM-based systems after a contract dispute with Unisys Corp.

First quarter results for FY '91 reflects continued strong sales of JHA's CIF 20/20 and Silverlake System for use on IBM-based systems; consistent growth in maintenance, support and service revenues; and strong sales of IBM hardware as a result of the company's Industry Remarketer relationship with IBM.

Backlog of sales at Sept. 30, 1990, is significantly higher than at June 30, 1990, reflecting strength in the hardware and software sales arenas.

Jack Henry, chairman of the board, stated he will recommend to the board of directors this afternoon, the payment of an 8 cent quarterly dividend. However, Henry pointed out the board will consider this matter and must approve any action relative to the dividend issue.

Jack Henry & Associates Inc. provides integrated computer systems for banks and other financial institutions. JHA markets, installs and supports these in-house systems throughout the United States and overseas.

CAMPBELL, CALIF. (OCT. 23) BUSINESS WIRE - Touch Communications and MIPS Computer Systems Inc. Tuesday announced an agreement for Touch to provide Government Open System Interconnection Profile (GOSIP) compliant products for MIPS RISC/os-compatible systems.

Under the terms of the agreement, Touch will integrate Alliance OSI, its family of portable GOSIP products, onto MIPS' systems. The resulting products will be marketed by both companies and will be sold directly by Touch to MIPS' customers. Touch will be supplying the Alliance FTAM and Alliance X.400 products as well as the underlying LAN and WAN GOSIP protocol stack integrated into MIPS' UNIX-based RISC/os operating system.

RISC/os-compatible workstations and systems are available from MIPS' OEMs and VARs worldwide, including Control Data Corp., Groupe Bull, Prime Computer, Pyramid Technology and others. Because these resellers have adopted MIPS' RISC/os system software as a reference platform, Touch products run unmodified

on each company's systems.

The GOSIP products supplied by Touch extend the capabilities of MIPS' workstations and systems and provide a rich suite of OSI communication capabilities that are required by international and domestic federal governments and large end-users.

The agreement will result in U.S. and U.K. GOSIP-compliant X.400 messaging and FTAM filing products for use in LAN and/or WAN environments. The Alliance products run in conjunction with other protocols, such as TCP/IP, and provide gateway capabilities for SMTP and UUCP to X.400-based networks. The first GOSIP products will be made available on MIPS systems in early 1991.

''Most of our international customers in commercial, government and technical markets now require GOSIP-compliant products,'' said Michael Szabados, MIPS' director of network marketing. ''MIPS views Touch as not only providing the best GOSIP technology available today, but also as the leader in building completely integrated GOSIP-compliant products for the future.''

Touch Communications Inc., a privately held company, was founded in March 1985 to develop communications solutions based on OSI (Open Systems Interconnection) standards such as GOSIP, MAP/TOP, and Network Management Forum (NMF).

MIPS Computer Systems Inc., is a leading supplier of RISC (Reduced Instruction Set Computing) technology for the computer system and embedded control markets. The company licenses its RISC architecture, compilers and system software to its semiconductor and system partners worldwide.

DENVER (OCT. 23) BUSINESS WIRE - USMX Inc. Tuesday announced that it is offering to purchase shares from stockholders who, as of Oct. 5, 1990, owned less than 100 shares of USMX common stock.

The offer allows eligible stockholders to sell all, but not less than all, of their eligible shares without being charged any brokerage commission. Participating stockholders must sell all of the eligible shares they own. Partial tenders will not be accepted and there are no withdrawal rights. Participating stockholders will be paid $1.85 per share.

USMX is making the offer to provide the more than 1800 odd-lot stockholders the opportunity to sell all of their small holdings without incurring any brokerage costs. This offer is also being made to beneficial stockholders. Through this offer USMX is seeking to reduce its administrative costs associated with servicing its small stockholder accounts.

The manager of the offer, Shareholder Communication Corp., and USMX make no recommendation whether stockholders should participate in the offer. The offer is set to expire on Nov. 26, 1990, New York time, unless extended by USMX.

USMX Inc. is involved in the exploration, development, and production of gold properties in the United States. The company's stock is listed on the NASDAQ National Market System under the symbol USMX.

EL SEGUNDO, CA (OCT. 23) BUSINESS WIRE - Net earnings for the second quarter were $13.6 million, or 85 cents per share, compared with $13.5 million, or 84 cents per share, a year ago, Computer Sciences Corp. (NYSE: CSC) reported Tuesday.

Earnings were on plan and in line with Wall Street estimates, said William R. Hoover, chairman and president of the computer-services company. Revenues for the quarter ended Sept. 28, 1990 advanced by 13 percent to $420 million from $372 million the prior year.

"Demand for information systems and services in the commercial marketplace continues to grow and we experienced a resurgence of federal contract orders in the second quarter," said Hoover. "We look forward to a strong performance in the second half of our fiscal year."

Revenue from the combined domestic and international activities of the Consulting Group was up 36 percent to $91 million in the second quarter, and the Industry Services Group posted a 25 percent gain to $73 million.

Systems Group revenue of $256 million was 4 percent above the year-ago quarter and growth prospects for the group improved with the recent increase in federal contract awards. Contract orders in the current fiscal year totaled $800 million at the half-year mark, compared with $545 milion in orders for all of the prior fiscal year.

The company's operating income, before corporate charges, was $29.6 million, up from $28.1 million in last year's second quarter. Overall operating income margin was under that of a year ago, reflecting continued investments to build

Consulting Group operations and a decline in Systems Group's operating margin. Both Industry Services Group and European operations recorded margin improvements.

Pre-tax income was $21.4 million, level with that of last year's second quarter. Pre-tax results for the quarter just ended reflect higher corporate charges and an increase in net interest expense. The year-ago quarter included equity earnings from the company's former Infonet affiliate, which was divested late in that fiscal year.

Results for the quarter brought first-half revenues to $827 million, 16 percent ahead of the $714 million posted in the same period last year. Net earnings for the half-year were up 3 percent to $27.4 million, or $1.70 per share. In the year-ago period the company earned $26.7 million, or $1.66 per share.

WASHINGTON (OCT. 23) BUSINESS WIRE - US Sprint Tuesday announced it has interconnected the SprintNet(sm) worldwide data network with a value-added data network operated in Germany by INFO AG, a major computer and telecommunications services provider based in Hamburg, Germany.

The interconnection now extends to German subscribers the benefits enjoyed by SprintNet users in the United States, offering them a seamless global telecommunications service through a single point of contact. For German users, the interconnection will provide a common user interface, simplified usage-sensitive pricing and enhanced international service, such as IBM/SDLC.

INFO AG provides data services in 14 cities in Germany and plans to expand service to 26 cities by the end of 1991. Additionally, INFO AG has provided satellite interconnection to its network for users in pre-unification East Germany. Its customers include major banks, insurance companies, and members of the travel and transport industries.

The INFO AG network uses US Sprint's TP4900 packet switches, which are based on state-of-the-art, 32-bit microprocessing technology and are used throughout

the SprintNet worldwide network. The common switching technology in the two networks assures high-quality service and uniform network management features.

''The interconnection of the SprintNet international and INFO AG networks is another measure of US Sprint's commitment to being the best provider of global communications services through alliances with overseas affiliates,'' said Paolo Guidi, president of Sprint International, the global telecommunications and private networks subsidiary of US Sprint.

''With this new agreement, US Sprint and INFO AG are well-positioned to meet the communications challenges of Europe 1992.''

''In searching for the finest packet-switching technology, INFO AG last year chose US Sprint,'' said Lutz Meyer-Schell, chairman of INFO AG. ''Our decision to interconnect with the SprintNet worldwide data network now will give German subscribers access to the world via the finest public network.''

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

SUNNYVALE, CA (OCT. 23) BUSINESS WIRE - Poqet Computer Corp. Tuesday announced a series of executive staff appointments and additions to the board of directors.

Dr. Robb Wilmot, chairman, has been appointed president and chief executive officer. Dr. Stav Prodromou has been appointed vice chairman of the company, responsible for managing the development of strategic alliances. Edward Esber a member of the board since September, will serve as acting senior vice president of sales and marketing (U.S.).

In addition, Poqet announced that Tadayasu Sugita, general manager of the Personal Systems Division for Fujitsu Ltd., has joined the board of directors. The board of directors of Poqet now includes six members: Wilmot, Prodromou, Sugita, Esber, Stewart Carrell and Yasushi Tajiri.

''Poqet is poised to begin an aggressive international marketing thrust, including a major promotional campaign in the United States and Europe and the introduction of new peripheral products for use with The Poqet PC,'' said Wilmot.

''Our executive team and board has been strengthened to manage rapid sales growth, develop alliances with leading companies in the computer and telecommunications fields and develop future products.

''Poqet has been approached by a wide range of firms -- including worldwide suppliers of telecommunications, computer and time management products -- to provide the hardware for business and professional productivity tools. The creation of a management structure to develop these relationships is key to the growth of Poqet's business in these areas,'' said Wilmot.

Prodromou's appointment will focus senior management attention on the development of strategic alliances with leading companies in the communications, electronic messaging and vertical computer application arenas.

Many of these alliances will take advantage of the totally new applications made possible by ''on-the-go'' computing -- a new category in the portable computer market made possible by The Poqet PC's unique combination of 100-hour battery-life and one-pound weight in a PC using the industry standard DOS operating system.

As acting senior vice president of sales and marketing (U.S.), Esber will manage the broadening of Poqet's distribution channels. His experience in PC-based software will greatly aid the integration of existing and new products into the ''on-the-go'' computing environment. Currently, applications representing more than 60 percent by volume of all PC software are available on the PC Card media used in The Poqet PC.

Poqet (pronounced ''pocket'') Computer Corp., founded in 1988, is the leading designer, manufacturer and marketer of high-performance, truly portable personal technology products. The company's first product, The Poqet PC, received the 1989 PC Magazine Technical Excellence Award for Portable Computers and the 1989 BYTE Magazine Award of Distinction.

The privately held company is jointly owned by its founders, employees and Fujitsu Ltd. Headquartered in Sunnyvale, Poqet has operations and offices in Monterey, Calif.; Westborough, Mass.; Dallas; Marietta, Ga.; Chappaqua, N.Y.; and Hoffman Estates, Ill. Poqet also has international offices in Paris and Valbonnes, France; Langley, England; Frankfurt; Rome and Amsterdam.

NASHVILLE, TN (OCT. 23) BUSINESS WIRE - Fidelity Bancshares Inc. (NASDAQ/NMS:FFTN) Tuesday announced that its board of directors has declared a regular quarterly cash dividend of 25 cents per share.

The cash dividend is payable Nov. 16, 1990, to stockholders of record as of Nov. 6, 1990.

Commenting on the announcement, Stanley D. Overton, chairman, president and chief executive officer said: ''This is the twelfth consecutive quarterly cash dividend declared by the board of directors.

''This achievement is indicative of the financial strength of Fidelity and our positive outlook for the future. Having stockholders share in the success we are achieving remains a high priority of the board.''

MOUNTAIN VIEW, CALIF. (OCT. 23) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Tuesday announced its support for new technology and products from the Eastman Kodak Co. developed to improve the way color and color images are represented in digital form across different output and display devices, including personal computers, televisions, laser printers and typesetters.

Specifically, PostScript Level 2, the next generation of Adobe's industry-standard page description language, will support Kodak's Photo YCC color interchange space; and PostScript Level 2 output devices will be compatible with Kodak's new Photo CD system. Adobe also endorsed Kodak's Color Management System, a set of products designed to ensure consistent, high-quality, device-independent color reproduction.

''Kodak's efforts to ensure the consistent and high-quality application of color across multiple platforms and output devices will produce an explosion of opportunity for users and vendors alike,'' said John Warnock, Adobe's chairman and chief executive officer.

''All PostScript Level 2 color output devices -- both displays and hard copy devices -- will support the Photo YCC color space, which we believe will make them the output devices of choice for rendering images generated by Kodak's exciting new Photo CD technology.''

The PostScript Level 2 language, recently announced by Adobe, includes support for device-independent CIE-based color spaces, enabling users to specify their

choice of colors and produce consistent results on different Level 2 color output devices, independent of variations in printer technologies, ink colorants, or screen phosphers.

Photo YCC improves upon existing standards by representing more reproducible colors and improving the speed and accuracy with which color images can be digitized, stored, retrieved and displayed. Photo YCC is also designed to efficiently represent high-resolution images such as those from Kodak's recently announced Photo CD system.

Adobe Systems Inc., founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard, page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays.

In addition, the company develops and markets a line of application software products. Revenues for 1989 were over $120 million.

OREM, UTAH (OCT. 23) BUSINESS WIRE - WordPerfect Corp. closed its third quarter with sales totalling $114.7 million, a 59 percent increase over third-quarter sales in 1989.

WPCorp year-to-date sales now total $329.5 million.

While versions of WordPerfect accounted for nearly 80 percent of sales, WordPerfect Office 3.0, WPCorp's recently upgraded office automation product, contributed a strong $4.4 million to third-quarter sales.

''We know that a lot of people are evaluating Office 3.0 as their strategic electronic messaging system for the long term. We think that these figures are the beginning of a vast office automation market that is just opening up.

''WordPerfect Corp. is in a good position to offer a complete office automation solution across the multiple platforms that are already supported by WordPerfect. We are expecting great things from WordPerfect Office,'' said Layne Cannon, WPCorp's vice president of corporate office automation.

In addition, DrawPerfect, WPCorp's presentation graphics package, continues to do well with third-quarter sales of $3.9 million.

For more information about WPCorp products, call WPCorp's Information Services

department at 801/225-5000.

SAN DIEGO (OCT. 23) BUSINESS WIRE - Sym-Tek Systems Inc. (NASDAQ:SYMK) Tuesday announced net income of $352,000 (24 cents per share) on sales of $7,833,000 for the second fiscal quarter ended Sept. 30, up almost 500 percent from net income of $59,000 (4 cents per share) for the like quarter the previous fiscal year.

Sales increased 10 percent from $7,103,000 reported for the corresponding quarterly period.

With this profit, Sym-Tek has realized six profitable quarters in a row, the company's longest continued level of profitability since the third quarter of 1987.

Sales for the six months ended Sept. 30 were $16,017,000, compared with $16,171,000 for the prior year period. Net income increased to $678,000 (46 cents per share) vs. $230,000 (15 cents per share) in the six months of the previous fiscal year.

''During this quarter we realized cash flow strong enough to cut our bank borrowings by more than half, from $5,425,000 at the end of the first quarter to $2,608,000 at the end of the second quarter,'' said Ray Twigg, president.

''With backlog up 46 percent from June 30 to Sept. 30, 1990, ($5,809,000 and $8,455,000, respectively), we expect that the third quarter will produce even stronger sales and earnings than those realized in the second quarter.''

Sym-Tek Systems Inc. manufactures and sells electromechanical handlers that hear or cool integrated circuits to precise temperatures, place them into position for testing and sort them based on test results. The market for the company's products is driven by worldwide capacity increases for semiconductors as well as the continually changing packages that house integrated circuits.

#90296b0102 10/23/1990 ~Business Wire
KANSAS CITY, MO. (OCT. 23) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) has recovered approximately $15 million in cash to be received over two years for its part of a recent settlement of an anti-trust lawsuit.

The legal action was related to overcharges from 1979 to 1982 by three of the company's natural gas suppliers. The overcharges were passed on to some of UtiliCorp's customers served by its Missouri Public Service and Kansas Public Service divisions. The settlement represents a recovery for overcharges, lost earnings and legal costs.

''We will achieve a very substantial recovery for our Missouri and Kansas customers,'' said UtiliCorp Chairman and President Richard C. Green Jr. ''In addition, we will recoup our legal expenses and anticipate that our divisions also will be able to recover some portion of the earnings they lost. We are extremely pleased with this settlement.''

The Missouri Public Service Commission and the Kansas Corporation Commission will determine procedures and methodology for refunding past overcharges to UtiliCorp's Missouri and Kansas customers.

In 1985, UtiliCorp joined with several other utilities, the states of Missouri and Kansas and a farm cooperative in a lawsuit against Amoco Production Company, Oxy USA Inc. and Williams Natural Gas Co. The three defendants in the lawsuit were accused of creating a monopoly and fixing prices of gas they owned on large tracts of land in south and southwestern Wyoming.

Amoco and Oxy settled their portion of the case on Sept. 25. After seven days of trial, Williams also agreed to a settlement. The case was dismissed on Oct. 4 with none of the defendants admitting guilt.

Based in Kansas City, UtiliCorp provides gas and electric service to about 820,000 customers in eight states and in British Columbia. Its divisions are Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, West Virginia Power, Northern Minnesota Utilities, and Kansas Public Service. West Kootenay Power is a Canadian subsidiary.

PSI and UtilCo Group are non-regulated subsidiaries specializing in energy and utility related enterprises.

ALAMEDA, CALIF. (OCT. 23) BUSINESS WIRE - Ingres Corp., maker of the INGRES

relational database management system (RDBMS), Tuesday announced the availability of INGRES/Windows 4GL on four new UNIX-based computer platforms.

By year-end, customers will be able to use the product on Hewlett-Packard's HP-UX, IBM's RISC System/6000, Digital Equipment Corp.'s ULTRIX and ULTRIX/SQL and The Santa Cruz Operation's Open Desktop.

INGRES/Windows 4GL, currently available on Digital VAX/VMS and Sun Microsystems SPARCStations, is a visual programming tool and fourth-generation language (4GL) development system that uses a ''point-and-click,'' Macintosh-like graphical user interface (GUI) to dramatically accelerate the creation of software applications on workstations.

The availability of INGRES/Windows 4GL on the new, widely used platforms represents Ingres' commitment to provide powerful software development tools to the general marketplace, according to Chris Kenber, executive vice president of Ingres.

Hewlett-Packard, the world leader in UNIX systems sales, shipped more than $1.8 billion worth of equipment in 1989. The RS/6000 series of workstations from IBM, the world's largest supplier of computer equipment, features AIX, IBM's version of the UNIX operating system.

Digital is the world's third largest computer company and currently bundles ULTRIX/SQL, which is based on INGRES technology, with every copy of ULTRIX. SCO is the world's leading supplier of UNIX for the 386- and 486-based desktop marketplace.

''Until INGRES/Windows 4GL came along, it was difficult to use workstations as much more than $10,000 terminals,'' Kenber said. ''There simply aren't enough quality graphical applications. Now, with such a powerful tool as INGRES/Windows 4GL available on this new, broader selection of major platforms business users -- not just scientists and engineers -- can use workstations to quickly build good-looking, object-oriented applications.

Ingres Corp. is a world leader in quality information integration products and solutions for mission-critical applications. The company's primary product is the INGRES RDBMS.

Installed on 11,000 manufacturing and enterprise-wide commercial systems worldwide, and available on more than 40 types of computers including PCs and UNIX workstations, the INGRES RDBMS enables organizations to quickly access data spanning a variety of computer systems connected in a network.

#90296b0108 10/23/1990 ~Business Wire
HOUSTON (OCT. 23) BUSINESS WIRE - Shell Oil Co. earned $227 million in the third quarter of 1990, a decrease of $113 million from the same quarter last year, President Frank H. Richardson reported Tuesday.

Earnings were heavily affected by severe distortions in oil markets caused by events in the Middle East.

''It is ironic that at the time the public perceived the oil industry was profiteering and price gouging, our oil products business lost $64 million in net income in the two months following the Iraqi invasion of Kuwait. Crude oil prices jumped dramatically in early August, but the increase was only partially reflected in higher gasoline prices,'' Richardson said.

''In response to President Bush's request, Shell exercised restraint in passing through these cost increases to consumers. Our average gasoline price rose only 19 cents per gallon during the third quarter, while our average raw material crude oil cost increased by 39 cents per gallon. We were particularly impacted because of our position as the largest U.S. gasoline marketer and our purchases of gasoline in the open market to meet customer demand.''

Nine-month 1990 earnings were $590 million, a decrease of $551 million from the 1989 period. The decline was due to substantially lower earnings in the oil and chemical products businesses, which fell $286 million and $292 million respectively.

Cash flow from operations totaled $1,071 million for the quarter, compared with $1,011 million last year. For the nine-month period, it was $1,696 million, compared with $2,392 million in 1989. Lower earnings accounted for most of the nine-month decline.

Revenues were $6.2 billion for the quarter and $17.1 billion for the nine months, compared with $5.4 billion and $16.4 billion in the respective 1989 periods.

Earnings declined 33 percent for the quarter and 48 percent for the nine months.

#90296b0109 10/23/1990 ~Business Wire
SAN MATEO, CA (OCT. 23) BUSINESS WIRE - Franklin Resources, Inc. (NYSE:BEN) Tuesday reported unaudited record earnings for the quarter and 12 months ended

Sept. 30, 1990.

Charles B. Johnson, president of the diversified financial services company, said net income for the quarter increased 4.1 percent, to $22.9 million from $22.0 million, or to 58 cents a share from 56 cents a year ago. Revenues for the period increased 7.9 percent to $73.6 million, compared to $68.2 million. Average shares outstanding for the quarter were 39,263,777 compared to 39,138,273.

Net income for the 12 months increased to $89.5 million from $78.6 million, or to $2.28 a share from $2.00 a share in the last fiscal year. Revenues for the fiscal year increased 13.7 percent to $287.9 million, compared to $253.3 million. Net income per share and average shares outstanding for 1989 were restated to reflect a 3-for-2 stock split declared in December 1989.

Johnson attributed the gains in net income to the increase in total net assets under management by the company's subsidiaries to more than $44.5 billion, up from $40.7 billion this time last year. Franklin Resources' main business is the management of the 56-member Franklin Group of Funds. The company has its headquarters at 777 Mariners Island Blvd., San Mateo, 94404.

FULLERTON, CALIF. (OCT. 23) BUSINESS WIRE - Net income of Ropak Corp. (NASDAQ:ROPK) rose to $301,000, or 8 cents per fully diluted share, in the year's third quarter ended Sept. 30 from the $29,000, or 1 cent per share, earned in the third quarter of 1989.

The company's revenues were $26.3 million in this year's third quarter and $25.4 million in the year-earlier period.

For the year's first nine months, Ropak earned $1,563,000, equal to 42 cents per fully diluted share, up from the $904,000, or 25 cents per share, earned in the same period a year ago. Revenues for the nine months rose to $75.5 million from the $73.9 million reported for the corresponding period of 1989.

Quarterly per-share results have been restated to reflect a 10 percent stock dividend paid June 30, 1990.

Ropak Chairman and Chief Executive Officer William H. Roper said the company's suppliers have again begun to raise raw material prices and that these cost increases will be increasingly difficult to pass on in Ropak's own pricing because of slowdowns in a number of client industries. He said the reductions in business activity were particularly evident late in the third quarter.

He indicated that the company views recent cost increases as an aberration in the long-term downward trend of materials prices, but said, ''They mean that our industry's outlook will remain uncertain until the difficulties in the Mideast are resolved and energy prices stabilized.''

Roper said that although the company expects to report a favorable full-year comparison with the results of 1989, higher costs and a cooling U.S. economy could hold the 1990 increase to a lesser gain than had been expected earlier this year.

Ropak is a leading multi-national maker of plastic packaging and handling products for foods, coatings and a variety of agricultural and industrial materials. Ropak also distributes for a company in which it holds a one-third equity interest, a line of test kits for the measurement of human eye and skin irritation potential from cosmetics and household chemicals.

Ropak has 10 plants in the United States, Canada and Japan.

WASHINGTON (OCT. 23) BUSINESS WIRE - US Sprint will tonight receive the 1990

Exemplary Voluntary Efforts (EVE) award from the U.S. Department of Labor for its Affirmative Action accomplishments within the federal government arena.

In 1988, US Sprint won 40 percent of the FTS2000 contract, the new federal telecommunications system that began delivering advanced, cost-effective services to the government a year ago.

Cari Dominguez, national director of the Office of Federal Contract Compliance Programs (OFCCP), and Elizabeth Dole, U.S. secretary of labor, will present the award to US Sprint's Dave King, executive vice president and chief human resources, technology and planning officer.

The OFCCP, a division of the U.S. Department of Labor, reviews and monitors Affirmative Action programs for all federal government contractors.

''Of the more than 100,000 federal government contractors, 39 were nominated by OFCCP, and US Sprint is one of seven recognized,'' King said. ''We are proud to receive this Affirmative Action award.''

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

#90296b0146 10/23/1990 ~Business Wire

KANSAS CITY, MO. (OCT. 23) BUSINESS WIRE - UtiliCorp United (NYSE: UCU) has received an order allowing its Missouri Public Service division to increase natural gas rates by $4 million, or 14.1 percent annually.

The new rates authorized by the Missouri Public Service Commission become

effective Nov. 1, 1990.

The order is in response to a request filed in February seeking to increase rates by $4.7 million annually. The increase is needed primarily to pay for extensive gas line replacements and improvements and for increases in operating costs.

Since early 1988, Missouri Public Service has invested heavily in gas distribution system improvements throughout its service area. The expenditures are expected to continue for several years.

''We are pleased that the commission has recognized that expenditures related to gas system safety are not optional,'' said UtiliCorp Chairman and President Richard C. Green, Jr.

Even with the increase, Missouri Public Service base gas rates would be only slightly higher than they were in the mid 1980s. Gas costs to consumers have declined significantly in recent years due largely to the impact of industry deregulation. Any decrease in purchased gas costs is passed through directly to customers.

The average monthly bill for a residential customer using 10,000 cubic feet of gas will increase from $48.21 to $57.03. Missouri Public Service distributes gas to about 40,500 customers in 26 communities located in north-central and west-central Missouri.

Based in Kansas City, UtiliCorp provides gas and electric service to about 820,000 customers in eight states and in British Columbia.

Its divisions are Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, West Virginia Power, Northern Minnesota Utilities and Kansas Public Service. West Kootenay Power in British Columbia is a Canadian subsidiary. PSI and UtilCo Group are non-regulated subsidiaries specializing in energy and utility related enterprises.

SAN FRANCISCO (OCT. 23) BUSINESS WIRE - Grubb & Ellis Realty Income Trust (NASDAQ/NMS:GRIT) Tuesday reported 1990 third quarter net income of $234,000, or 8 cents per share, from revenue of $620,000.

This compares to net income of $376,000, or 14 cents per share, from revenue of $733,000 for the like period last year. The REIT reported net income of $953,000, or 33 cents per share, from revenue of $2,110,000 for the first nine

months of 1990. Net income for the comparable period in 1989 was $1,060,000, or 39 cents per share, from revenue of $2,015,000.

The REIT also announced that a contract has been finalized for the sale of the Livermore Arcade Shopping Center to Hopkins Development Co. at approximately the property's appraised value. Under the terms of the contract, Hopkins will pay for the clean up of certain toxic wastes discovered in connection with the sale.

The transaction is scheduled to close in late December or early January. The marketing of the balance of the REIT's portfolio is being actively pursued as part of the REIT's Plan of Liquidation.

A per share dividend from operations of 12 cents also was declared payable Nov. 16, 1990, to shareholders of record Nov. 2, 1990.

Net income decreased in the current third quarter compared to 1989 primarily due to a reduction in interest income following the initial liquidation distribution of $4,350,000 in June of this year.

Grubb & Ellis Realty Income Trust is advised by Grubb & Ellis Realty Advisers Inc., a wholly owned subsidiary of Grubb & Ellis Co., one of the nation's largest real estate services firms.

LOS ANGELES (OCT. 23) BUSINESS WIRE - Caesars World Inc. (NYSE:CAW) Tuesday announced a court hearing has been scheduled for Nov. 28, 1990, in connection with the previously announced settlement related to its pending tender offer for any and all of the 2,175,945 shares of Caesars New Jersey Inc. (ASE:CJN) it does not already own.

The purpose of the hearing in the U.S. District Court for the District of New Jersey is to determine, among other things, whether to approve the proposed settlement.

As previously announced, Caesars World has agreed to a settlement of lawsuits brought by certain Caesars New Jersey shareholders in connection with the $22 per share tender offer which is scheduled to expire at midnight (EDT) on Nov. 19, 1990, unless extended.

Under terms of the previously announced settlement, the company amended the offer to provide for the payment of interest on the offer price and agreed to make an additional cash payment of 25 cents per share to shareholders of

Caesars New Jersey whose shares are purchased in the tender offer. The settlement is subject to final court approval.

The company also said the offer continues to be subject to all terms and conditions in the offering materials previously distributed to shareholders. Caesars World also has reserved all of its previously specified rights, including the right to terminate the offer, as described in such offering materials.

#90296b0168 10/23/1990 ~Business Wire

TORONTO (OCT. 23) BUSINESS WIRE - Gold Disk Tuesday introduced an easy-to-use path-based animation-software package entitled Animation Works for the new Apple Macintosh Classic, LC and II family of computers.

This one- to eight-bit color program is a What-You-See-Is-What- You-Get (WYSIWYG) package that allows the average Macintosh user to combine graphics, text and sound into stylish animations quickly and easily.

''Animation Works is designed to bring the advantages and fun of animation within reach and understanding of a new level of user by eliminating the lengthy learning curve typical of such products,'' said Kailash Ambwani, president of the Toronto-based software publisher.

''It gives graphic designers, creative directors, small-business owners, teachers and hobbyists the power of animation without making a massive commitment to training or expensive hardware.

''With the products currently available, a user is forced to embark on a lengthy training period to be proficient in developing animations. We took the exact opposite approach; you don't have to be a highly skilled technician to use Animation Works.''

Typical applications include animated storyboards, comps or simulations, straight animation without special effects or interactivity, educational and sales presentations, home-video titling and low-end video production. Simple Path-based Animation

Animation Works consists of the Cel Editor, where animated characters (cels) may be created or edited; the Background Editor, where backgrounds may be worked on; and the Movie Editor, where the animation is combined with static or scrolling backgrounds to create the final ''movie.''

In the Cel Editor, a full set of drawing tools allows the user to edit and/or

create the different cels that constitute an animated character.

Founded in 1986, Gold Disk is a privately held corporation with sales offices in Los Angeles and Dusseldorf, West Germany.

MOUNTAIN VIEW, CA (OCT. 23) BUSINESS WIRE - Software Publishing Corp. (NASDAQ:SPCO) announced Tuesday record financial results for its year ended Sept. 30, 1990.

Revenues for the year were $140.6 million, an increase of 36 percent over fiscal year 1989, while operating income was up 27 percent to $30.5 million. Net income increased to $19.8 million, or $1.59 per share, compared with $17 million, and $1.40 per share, last year.

Revenues for the fourth quarter were $42.4 million, representing a 39 percent increase over the comparable period of 1989, and operating income rose 30 percent to $9.4 million. Net income for the quarter was $3.6 million, or 29 cents per share, compared with $5 million, or 41 cents per share, in the like period a year ago.

Current results include a non-recurring charge of $5.4 million reflecting the estimated residual obligation under the company's existing facility lease in Mountain View, and the costs of relocation to larger leased premises in fiscal 1991.

The company had previously announced that it was negotiating a lease for new office space which it expects to occupy within the next six months.

The company also announced that its board of directors has authorized limited repurchase of common stock to fund certain employee benefit programs. ''The purpose of the buyback is to provide shares for the employee stock option plan and the stock purchase plan,'' said Truman Cole, vice president of finance and chief financial officer.

''The effect should be to offset ongoing shareholder dilution from these programs. Purchases in the next 12 months are not expected to exceed 500,000 shares.

''Our strong operating performance, in this our 10th year in business,

reflects continued customer acceptance of our products,'' added Cole. ''During the year we delivered new versions of Harvard Graphics and Professional Write. Both were major contributors to fourth-quarter revenues.'' Harvard Graphics 2.3 and Professional Write 2.2 began shipping in the quarter ended June 30, 1990.

During the fourth quarter the company introduced InfoAlliance, its first systems-level product which offers users both powerful application tools and transparent access to data in disparate storage locations. InfoAlliance is the first product in a new PC software category called datasource integration.

Software Publishing Corp., one of the original personal computer software companies, is a leading international supplier of business productivity software for IBM personal computers and compatibles. The company develops and markets a wide range of decision-critical software for accessing and presenting information, including the market-leading Professional and Havard series and the recently introduced InfoAlliance products.

#90296b0223 10/23/1990 ~Business Wire

MOUNTAIN VIEW, Calif. (OCT. 23) BUSINESS WIRE - Sun Microsystems Inc. (NASDAQ:SUNW) Tuesday reported results for its first quarter ended Sept. 28, 1990.

Revenues for the first quarter were $677.0 million, a 26 percent increase over the $538.5 million reported in the like period a year ago. Net income for the quarter was up 403 percent, to $26.1 million, or 26 cents per share, from the $5.2 million, or 7 cents per share, in the corresponding period of fiscal 1990. The company shipped 38,600 units, up 36 percent over the first quarter of last year.

During the first quarter 50 percent of Sun's revenues were derived from outside the United States. The stength of foreign currencies relative to the U.S. dollar contributed to both revenue and net income.

Scott McNealy, chairman, president and chief executive officer of Sun said: ''Although bookings and revenues were in balance during the first quarter, operating results were not at levels we had expected. While we assess the effect of both Sun specific and external issues we are taking a cautious approach to the current quarter including freezing headcount levels and curtailing expenses.

''Although we are being cautious, we continue to believe that, absent a major economic slowdown, the demand for our products will continue to grow, though perhaps less rapidly than we anticipated a quarter ago.''

During the quarter the company issued 4.6 million shares of common stock to AT&T and received $192 million. The company ended the quarter with $495 million in cash. In addition, Sun's long-term debt-to-equity ratio decreased to 34 percent from 39 percent at the end of fiscal 1990.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

ST. LOUIS (OCT. 23) BUSINESS WIRE - MCI Telecommunications Corp. and the Kansas City Chiefs today announced a business and marketing partnership that makes MCI a part of the Chiefs' team as their ''official long-distance carrier.''

Under terms of the partnership, MCI will provide the Chiefs with all of the

club's long-distance services. In addition, the two-year agreement makes MCI an official sponsor of the Kansas City Chiefs, which will include advertising, promotions and customer activities at Chiefs' games.

''We're very excited to be able to team up with MCI at a time when the Chiefs are entering a new era in their quest of an NFL championship,'' said Carl Peterson, team president and general manager. ''MCI's growing success and visibility in the Kansas City market comes precisely at a time when we are busy expanding our role in the community and as such, this union is a perfect match.''

''MCI is proud to join a team such as the Kansas City Chiefs which, like MCI, has proven to be a tough player on a very competitive playing field,'' according to Dan Crawford, president of MCI's Southwest Division. ''Since MCI was the first competitive long-distance company in Kansas City, we feel very much at home in this partnership.''

Two weeks ago, MCI and the Plaza Merchants Association announced the formation of a partnership in which they will co-sponsor the traditional Season of Lights in Kansas City.

MCI provides businesses, consumers and government agencies with a full complement of global telecommunications services. The company owns and operates the world's second-largest communications network with a variety of advanced fiber optics, digital microwave and satellite and digital switching technologies.

SAN FRANCISCO, CA (OCT. 23) BUSINESS WIRE - Home Federal Financial Corp. (NASDAQ: HFSF), the holding company formed this year for Home Federal Savings and Loan Association of San Francisco, reported net income of $1,502,000, or $1.09 per share, for the third quarter ending Sept. 30, 1990, a 60.1 percent increase over net income of $938,000, or 68 cents per share, reported for the third quarter of 1989.

For the nine months ended Sept. 30, 1990, net income was $3,223,000, or $2.34 per share, a 251.1 percent increase over net income of $918,000, or 67 cents per share, for the nine months ended Sept. 30, 1989.

Home Federal's President and Chief Executive Officer Stanley E. Bailey indicated that non-interest income for the third quarter of 1990 included $832,000 from gains on loans sales of $75,730,000, compared to gains of $1,210,000 on sales of $61,286,000 for the comparable 1989 quarter.

Core earnings as represented by net interest income increased to $3,980,000 and $11,896,000, respectively, for the three and nine months ending Sept. 30, 1990, from $2,986,000 and $9,326,000, respectively, for the like periods in 1989.

General and administrative expenses decreased to $3,021,000 and $9,110,000, respectively, for the three and nine months ended Sept. 30, 1990, compared to $3,123,000 and $9,222,000, respectively, for the like periods in 1989.

Earnings in 1989 were also impacted substantially by a write-down of the company's deferred premium on loan sales. Bailey further stated that the company increased its allowance for loan losses by $90,000 and $525,000 for the three and nine months ended Sept. 30, 1990, in response to management's concern over the general risk in the event of an economic downturn.

Management continues to prepare the company for uncertain economic times by increasing its loan loss reserves, which totaled $1,025,000, or 0.2 percent of total assets at Sept. 30, 1990. Home Federal's non-performing assets totaled $1,922,000, or 0.3 percent of total assets at Sept. 30, 1990. The company currently has no real estate acquired by foreclosure.

Home Federal's assets totaled $630,541,000 at Sept. 30, 1990, compared to $570,944,000 at Dec. 31, 1989. Stockholders' equity was $37,921,000, or $27.48 per share, and 6.0 percent of assets at Sept. 30, 1990, compared to $34,698,000, or $25.14 per share and 6.1 percent of assets at Dec. 31, 1989.

PORTLAND, OR (OCT. 23) BUSINESS WIRE - Portland General Corp. (NYSE:PGN) Tuesday closed on its previously announced investment in Bonneville Pacific Corp., an independent power producer headquartered in Salt Lake City.

Under the agreement, Portland General has acquired 3,333,333 shares of newly issued Bonneville Pacific common stock for $20 million and has completed the acquisition of warrants for 4 million shares of Bonneville Pacific's common stock previously held by a third party for $4 million.

The company had previously purchased a $10 million note from Bonneville Pacific, convertible into 1,333,333 common shares at $7.50 per share. Portland General has the option to acquire additional shares to bring its ownership up to 49 percent of Bonneville Pacific stock through purchases from Bonneville Pacific or in the open market.

As a part of the agreement, Portland General President Richard G. Reiten, Senior Vice President and Chief Financial Officer CD Hobbs, and Assistant to the Chairman Richard E. Dyer have been appointed to Bonneville Pacific's board.

The agreement between Portland General and Bonneville Pacific was reached in September 1990 and was approved by Portland General's board of directors Oct. 2.

''Portland General's investment in Bonneville Pacific fulfills our corporate strategy to acquire a well-regarded company with an established presence in the independent power production business,'' said Reiten.

Bonneville develops, owns, and operates independent energy projects around the United States. Portland General is an electrical energy holding company headquarted in Portland, Ore.

CUPERTINO, CA (OCT. 23) BUSINESS WIRE - Cupertino National Bancorp Tuesday announced declaration of a 5 percent stock dividend payable to shareholders of record on Nov. 13, 1990 for payment on Nov. 27, 1990.

Fractional shares will be paid in cash.

''We have been pleased with results for the past nine months,'' said President Don Allen, ''and we are anxious to share our success with our shareholders.'' Allen further commented, ''Our strong capital position affords a number of excellent financial opportunities provided by referrals from our shareholder group.''

Cupertino National Bank, with total assets exceeding $120 million, serves the mid-Santa Clara County market, specializing in commercial loans for local companies, construction lending to quality builders, Small Business Administration lending, and trust services to both individuals and businesses.

The independent bank features a ''one-stop banking'' philosophy emphasizing customized service. CNB has dedicated itself to serving the financial needs of Santa Clara Valley while continuing strong support of the local community.

RACINE, WI (OCT. 23) BUSINESS WIRE - Modine Manufacturing Co. was notified Tuesday that the U.S. Court of Appeals for the Federal Circuit has affirmed the final judgment of the U.S. District Court for the Northern District of California that the G&O Manufacturing Division of The Allen Group Inc. had willfully infringed Modine's patent for the Beta-Weld dual-bond joint used in heavy-duty truck radiators.

The Appeals Court affirmed the District Court's finding of $14 million in damages plus pre-judgment and post-judgment interest and certain limited costs totaling approximately $18.5 million.

''We are pleased that the Federal Appeals Court has affirmed the judgment of the District Court and upheld our Beta-Weld patent,'' said Richard T. Savage, president and chief operating officer of Modine. ''We have invested much effort in research and development of heat-transfer products and in patenting this technology.

''The jury's original decision that our patent was valid and that our competitor willfully infringed upon it has been reaffirmed.''

Modine Manufacturing Co. is an independent, worldwide leader in heat-transfer technology, serving vehicular, industrial and building HVAC (heating, ventilating, air-conditioning) markets.

MACON, GA (OCT. 23) BUSINESS WIRE - William A. Fickling, chairman and president of Charter Medical Corp., announced that Edwin M. (Mac) Crawford, currently assistant to the president and chairman, has assumed additional responsibility for hospital operations of the company, until now handled by Michael Kay.

Crawford will become executive vice president, hospital operations reporting to William A. Fickling, chairman and president.

Crawford, who has been with Charter Medical for two years, has been a director of the company since March 1990. Prior to becoming assistant to the president and chairman, Crawford served as president of Mulberry Street Investment Co., which is owned by the Fickling family.

Kay joined Charter in June 1990 as a consultant to develop a long-term planning process, and to assess and redirect the company's marketing approach

in view of quickly changing conditions in the psychiatric healthcare marketplace. Under Kay's direction, the company developed a planning process and established a new corporate marketing organization to oversee sales and marketing activities. Kay returns to a consulting role with Charter.

The company also announced the appointment of several additional vice presidents. New hospital operations vice presidents include: Larry W. Carter; Vernon S. Westrich; David A. Richardson; Elbert T. McQueen and Billie Martin Pierce.

These additions result in a total of nine hospital operations vice presidents who will each supervise 10-12 hospitals. Each of these vice presidents have served in hospital administrative positions with the company for several years or more.

Stephen L. White has joined Charter as vice president of customer service. White is responsible for developement and implementation of programs to enhance patient and customer satisfaction, including the development of new porducts and services. Prior to joining Charter, White was executive vice president of Preferred Healthcare Ltd., in Wilton, Conn.

Mark Kaiser has become vice president of marketing for the company. Kaiser comes to Charter from Telecom U.S.A. Inc. in Atlanta where he was senior vice president, marketing.

Lawrence W. Drinkard has been promoted to senior vice president and treasurer. Drinkard was previously vice president and treasurer.

Charter Medical Corp. is an international healthcare provider of psychiatric addictive disease and medical treatment services. The Macon-based firm owns and operaties 90 psychiatric and 12 general hospitals in the United States and Europe.

SAN FRANCISCO (OCT. 23) BUSINESS WIRE - BankAmerica announced Tuesday it has consolidated its World Banking Group's U.S. capital markets and wholesale banking activities into a new United States Division under Executive Vice President David A. Coulter, who previously headed its Capital Markets Division.

''Combining our trading and investment and wholesale banking resources in a single product and marketing organization enables us to provide clients with a more unified and efficient delivery system for all of our corporate finance services,'' Vice Chairman Lewis W. Coleman, head of the World Banking Group, noted. Coleman said,''The new organization reinforces a longstanding commitment to relationship banking, which has served BankAmerica well, and gives us a very timely opportunity to build on a strong competitive position in the markets we serve.''

The new division will focus its marketing activities through a Western and a Eastern Regional organization. Executive Vice President R. Thomas Decker, who managed the former Americas group, will head the Western Region, and Senior Vice President Barbara L. Rambo, who headed the bank's New York-based Northeast/Southeast Institutional Group, will manage the Eastern Region. Also reporting to Coulter is Executive Vice President Federico

Sacasa, former head of the Latin America Division. Sacasa will manage the consolidation of administrative functions for the combined division, as well as assume responsibility for the bank's Foreign Currency Services subsidiary and head the establishment of a Section 20 subsidiary.

Section 20 subsidiaries enable a commercial bank holding company affiliate to conduct a number of investment banking activities previously restricted to brokerage houses and investment banks.

McPherson was Deputy Secretary of the U.S. Department of Treasury before joining BankAmerica, and administrator for the U.S. Agency for International Development prior to that.

PHOENIX (OCT. 23) BUSINESS WIRE - Talley Industries Inc. (NYSE:TAL) Tuesday announced earnings for the quarter ended Sept. 30, 1990, of $1.4 million, or 10 cents per share, compared with earnings of $3.3 million, or 26 cents per share, for the same period in 1989.

Revenues from continuing operations were $74.9 million for the quarter, compared with $88.8 million a year ago.

Earnings for the nine months ended Sept. 30, 1990, were $6.4 million, or 52 cents per share, compared with $24 million, or $1.91 per share, last year. Revenues from continuing operations for the nine months were $246.4 million compared with $277 million recorded in the same period a year ago.

Results for last year's nine-month period included a $60 million pretax gain on the sale of Talley's automotive air bag business and a $36.6 million charge to establish reserves against the company's realty assets.

Additionally, due to the previously announced pending sale of East-West Federal Savings Bank to Nuri Investments, a subsidiary of privately owned Nuri Investment Limited, the bank's results have been reclassified into discontinued operations for both the current and prior year third quarter and nine-month reporting periods.

Talley Industries is a diversified designer, manufacturer and supplier of aerospace, industrial and commercial products and services, including high-reliability electronic components and stainless steel rod and bar products.

Talley also invests in and develops real estate, primarily in the Phoenix area and operates a federally chartered savings bank as an autonomous, wholly owned subsidiary, which specializes in serving the Asian population in the greater Los Angeles area.

#90296b0314 10/23/1990 ~Business Wire

LOS ANGELES (OCT. 23) BUSINESS WIRE - Castle & Cooke Inc., the Los Angeles-based holding company for Dole Food Co. and Castle & Cooke Properties

Inc., Tuesday reported record net income for the third quarter of 1990 of $44 million after unusual items, up from $23.4 million in the third quarter of 1989.

Earnings per common share were 74 cents compared with 39 cents in the prior year's third quarter.

Third quarter 1990 net income totalled $51.8 million before reflecting a $4.8 million after-tax gain on the sale of the company's investment in common stock of FirstFed America Inc. and before reflecting a $12.6 million after-tax charge, related to the restructuring of the company's worldwide pineapple sourcing.

This restructuring of product sourcing is expected to contribute substantially to the company's ongoing program to reduce operating costs and enhance its worldwide competitive position.

For the first three quarters of 1990, the company reported net income of $101 million, or $1.70 per share, compared with $71.1 million, or $1.20 per share, in the same period of 1989.

Third quarter revenue was $879 million vs. $762 million in last year's third quarter. Revenue for the first three quarters of 1990 was $2.3 billion compared with $2 billion in the same period of 1989.

Dole Food achieved significantly improved results in its 1990 third quarter performance compared with 1989, primarily in its fresh fruit and vegetable operations where the opening of markets in Eastern Europe increased demand for Dole products.

David H. Murdock, Castle & Cooke chairman of the board and chief executive officer, commented: ''Our food business is achieving record profits and we expect to continue to report strong earnings. As a low-cost producer, we are well positioned to take advantage of the increased worldwide demand for fresh produce.''

Castle & Cooke's residential and commercial real estate operation reported increased earnings over last year while startup costs associated with The Lodge at Keole, which opened earlier this year, resulted in an overall decline in its operating results compared with the third quarter of 1989.

Interest expense, net of interest income and capitalized interest, during the third quarter decreased to $12 million from $15.2 million in 1989.

Castle & Cooke is a holding company conducting business in two primary operating areas: food production and distribution through Dole Food and real estate development through Castle & Cooke Properties Inc.

OAK BROOK, IL (OCT. 23) BUSINESS WIRE - On Monday, Oct. 22, In-Flight Phone Corp. (''In-Flight'') filed an application with the Federal Communications Commission (FCC) to provide air-to-ground telephone service to the American traveling public.

In-Flight's application, which contained contracts with three of the five major airlines, indicates that it has already spent close to $8 million on engineering and other development costs.

John D. (''Jack'') Goeken, founder of MCI, FTD Mercury Network, Railfone, Airfone (now GTE Airfone), and In-Flight Phone, announced his resignation as chairman and chief executive officer. Sandra Goeken, president of In-Flight Phone International, has been named chairman and chief executive officer.

According to Mark Ferdinand, president and chief operating officer of In-Flight, ''We expect to have our fully digital network operational in the second quarter of 1991. Our digital system will provide higher quality and reliability than the present system.''

SAN FRANCISCO (OCT. 23) BUSINESS WIRE - Three new appointments at The Boston

Safe Deposit and Trust Company of California have been announced by F. Daniel Prickett, California Division Manager for the company.

The Boston Safe Deposit and Trust Company is a wholly owned subsidiary of The Boston Company, an international financial services firm.

Carolyn Poe has been promoted to senior vice president of the Palo Alto office. She was previously vice president and regional manager. She will continue in her role as regional manager, managing the operations of the Palo Alto office of The Boston Company, as well as directing the sales and marketing efforts of the representative office.

Susan Cook Hoganson has been named senior vice president and regional manager of the San Francisco office, responsible for sales development and marketing. Hoganson joined The Boston Company in 1988.

William A. Gifford joins The Boston Company as senior vice president and regional manager of the Newport Beach office, overseeing operations south of Los Angeles, including Palm Desert, San Diego and Hawaii. Gifford was previously senior vice president and manager of private banking at First National Bank in San Diego.

Headquartered in Boston, The Boston Company is an international financial services firm that provides private banking, institutional asset management, master trust and global custody, and mutual fund accounting and administration services through its offices in Boston, California, New York, London and Zurich.

The Boston Company is a wholly owned subsidiary of Shearson Lehman Brothers Inc., an American Express Company.

LOS ANGELES (OCT. 23) BUSINESS WIRE - On Aug. 16, Coral Inc. (OTC:Pink Sheets) filed the Item 3. Bankruptcy or Receivership Form 8K with the Securities and Exchange Commission which stated:

''On August 13, 1990, the registrant's principal subsidiary, System 800 International Inc. (S800), filed a Chapter 11 Voluntary Petition for Bankruptcy (File LA90-10071-CA) in the United States Bankruptcy Court, in the Central District of California.

''The primary precipitating factor was the termination of the processing of customer's credit card sales drafts by S800's financial institution.

''On August 16, 1990, S800 was successful in obtaining a preliminary injunction in the State Court to reinstate credit card sales draft processing. Management is still attempting to locate a secondary financial institution to process future credit card drafts.

''S800 has 100,000 shares issued and outstanding, all held by Coral Inc.''

Subsequent events include:

-- System 800 has filed for dismissal of its Chapter 11 case. The dismissal hearing date is scheduled for Nov. 19, 1990.

-- On Sept. 11, 1990, Security Pacific National Bank, the processing institution, appealed the preliminary injunction.

-- Management is still seeking a secondary financial institution to process future credit card drafts.

Coral Inc. is located at 9255 Sunset Blvd., Los Angeles, Calif., 90069. The telephone number is 213/288-2100.

EINDHOVEN, Netherlands (OCT. 23) BUSINESS WIRE - Philips announced Tuesday that the company has reached a settlement amounting to 9.25 million U.S. dollars with the lawyers of the plaintiffs in the American class action.

The class action arose because a number of American shareholders considered that Philips' financial results in the first quarter of 1990 did not match up to the expectations that they claimed to have formed from statements made previously by the company's management. It was for this reason that they initiated legal proceedings.

Philips is of the opinion that there are no grounds for the accusations made by the American shareholders and that, therefore, there is no basis for any liability. The company sought a settlement in order to reduce the high costs of what might have been a lengthy procedure and to avoid a major call on the management's time.

The settlement, which fits into the framework in which legal affairs of this nature are dealt with in the U.S.A., will be submitted to the judge dealing with the case for his approval.

MOUNTAIN VIEW, Calif. (OCT. 23) BUSINESS WIRE - IntelliCorp Inc. (NASDAQ, NMS:INAI), a leader in knowledge systems development and delivery software, Tuesday reported a net loss of $2,777,000, or 35 cents per share for the first quarter ended Sept. 30.

This compares to a net profit of $393,000, or 5 cents per share, for the comparable quarter a year ago.

First quarter revenues were $3,282,000, compared to $5,803,000 reported for the like period a year earlier. The company capitalized $617,000 of research and development expense during the first quarter, in connection with the beta testing of its ProKAPPA product.

Thomas Kehler, chairman and chief executive officer, stated, ''Results for the quarter, as anticipated, continue to reflect the transition from our existing KEE product line to our new KAPPA family.

''On a positive note, we made the ProKAPPA system generally available and began customer shipments on schedule at the end of September. Although initial response to the KAPPA line is encouraging, we expect the product transition to significantly impact the second quarter as well.''

IntelliCorp develops, markets and supports industry-leading knowledge system products, software development tools and advanced engineering and manufacturing application solutions. The company's customers span all industries, including financial services, automotive, aerospace, telecommunications, chemical, government, energy, manufacturing and engineering.

IntelliCorp products are marketed through a combination of the company's direct sales force and its authorized dealers, resellers, OEMs and VARs.

Headquartered in Mountain View, IntelliCorp has 220 employees and offices throughout the United States, as well as in Europe and Asia.

SAN FRANCISCO (OCT. 23) BUSINESS WIRE - The Boston Software Works Tuesday announced that it will offer a version of its InterOFFICE electronic mail gateway for the integrated OfficeVision/400 office system (formerly known as AS/400 Office) that runs on IBM's AS/400 product line.

The announcement was made in San Francisco at the Electronic Mail Association's Annual Conference.

The InterOFFICE product for OfficeVision/400 will provide seamless electronic mail integration between OfficeVision/400 and other popular office automation (OA) systems, including Digital Equipment Corporation's ALL-IN-1, Wang's VS OFFICE, and Hewlett-Packard's DeskManager.

The InterOFFICE product family is a software-only solution that requires only one copy of InterOFFICE per IBM AS/400, DEC VAX, Wang VS or HP 3000 network. InterOFFICE features automatic directory synchronization and automatic document translation, enabling users of one integrated office system to send office automation system objects, such as revisable documents, memos, meeting invitations, and binary files to users of other, incompatible OA systems. This transparent conversion and delivery is accomplished without users learning any new commands, addressing formats, or keystroke sequences.

The InterOFFICE product line includes InterOFFICE/VAX for DEC's ALL-IN-1, InterOFFICE/VS for Wang's VS OFFICE, and InterOFFICE/XL for HP's DeskManager. The Boston Software Works is also pursuing expansion of the InterOFFICE product line to other OA platforms, including UNIX, OS/2 and DOS integrated office systems.

Software updates and a 24-hour telephone support hotline are available for all InterOFFICE products. Pricing and availability of InterOFFICE for OfficeVision/400 will be announced at a later date.

The Boston Software Works, located in Boston, is a privately-held software development firm, specializing in high-quality office automation integration

and coexistence products.

     #90296b0618 10/23/1990 ~Business Wire
SUNNYVALE, CA (OCT. 23) BUSINESS WIRE - IKOS Systems Inc. (NASDAQ:IKOS) Tuesday announced pre-tax profits of $175,000 on revenues of $3,787,000 for the fourth quarter ended Sept. 30.

Net income for the period was $152,000, or 1 cent per share. The net income results reflect a lower tax rate due to the company's tax loss carryforward position. Revenue for the 1990 fiscal year was $15,789,000, with net income of $1,695,000, or 18 cents per share.

The 1990 results compare to revenue for the fourth quarter of 1989 of $2,854,000, with net income of $270,000 or 3 cents per share. For fiscal year 1989, revenue was $7,739,000 with a loss of $1,952,000 or 24 cents per share.

The company expects next quarter revenue and profit similar to last quarter. Gerald S. Casilli, chairman and chief executive officer, said, ''The effects of the recent changes to our strategic partner agreement with Mentor Graphics are not expected to have a positive revenue impact until the March 1991 quarter when our products are anticipated to be integrated with Mentor's Release 7.0 design environment which has a large installed customer base.

''We are planning to implement an upgrade path to Mentor Graphics' Release 8.0 for 7.0 customers desiring higher performance ASIC and system simulation.''

IKOS Systems Inc. designs, manufactures, markets and supports advanced hardware-assisted simulation systems for the application-specific integrated circuit and systems design markets. Headquartered in Sunnyvale, the company employs more than 100 people worldwide. IKOS is publicly traded over-the-counter under the NASDAQ symbol, IKOS.

ALISO VIEJO, CALIF. (OCT. 22) BUSINESS WIRE - Armor All Products Corp. (NASDAQ:ARMR), the leading supplier of automotive appearance products, reported a decline in revenues and earnings for the second fiscal quarter ended September 30, 1990, Kenneth C. Hicken, president and chief executive officer reported Tuesday.

Revenues for the quarter were down 7 percent to $23,497,000 from $25,296,000 reported in the year-earlier period. Net income for the quarter was $1,044,000, or 5 cents a share, a decline of 71 percent from $3,618,000, or 17 cents a share, in the second quarter a year ago.

For the six-month period, revenues were $56,489,000, a decline of 7 percent from $60,653,000 reported in the year-earlier period. Net income for the six-month period was down 67 percent to $3,051,000 from $9,250,000. Earnings per share for the six-month period decreased 66 percent to 15 cents from 44 cents.

Hicken attributed the decline in revenues in both periods to lower volume as a result of lower sales of Armor All and Rain Dance waxes and No. 7 car care products. Sales of Armor All Protectant in North America were unfavorably impacted by high retail inventory levels, along with consolidation in the company's retail store customer base. Sales in overseas markets increased 40 percent for the first six months over the like period a year ago. International sales represent 13 percent of consolidated revenue so far this year compared with 9 percent last year.

Gross margins declined due to higher sales of promotional items. Selling, general and administrative expenses were up significantly as a result of higher levels of cooperative advertising and promotional spending and the incurrence of other expenses earlier in the current fiscal year than in the prior year. The company said that it expects total selling, general and administrative expense for the full year will be approximately the same as in the prior year.

#90296b0630 10/23/1990 ~Business Wire

MARLBORO, MA (OCT. 23) BUSINESS WIRE - Stratus Computer Inc. Tuesday announced that K mart Corp. (Troy, Mich.), the world's largest retailer, and The Office Club Inc. (Concord, Calif.), the largest office products retailer in the Western U.S., have chosen Stratus XA2000 Continuous Processing Systems to run online software applications aimed at lowering their operating costs and improving customer service.

Kmart has begun using Stratus to run distribution center order processing and credit card authorization, with store data collection and distribution planned to go online next year. Office Club plans to run sales data collection and credit card authorization on Stratus by mid-1991.

Stratus also announced today an agreement with Lowell, Mass.-based Interactive

Systems Inc. (ISI) to jointly develop and market ISI's Order Management System (OMS) on fault-tolerant Stratus systems. This agreement is focused on expanding Stratus' presence in the rapidly-growing order processing segment of the retail and wholesale distribution markets.

These announcements mark Stratus' aggressive expansion in the retail and distribution markets. In only three years, Stratus' direct sales in retail and distribution have more than tripled to $14 million in 1989. Stratus has fostered this growth by targeting emerging market segments with new software applications and broadening market awareness through high-profile customer contracts. In the 1990s, Stratus expects the fastest growth in retail and distibution to occur in the order processing, merchandising, and credit authorization segments and in the international markets.

Kmart has chosen a Stratus Model 220 to run distribution center order processing, credit authorization, and store data collection and distribution. The retailer expects to significantly lower operating costs and enhance customer service by expanding the 24-hour processing capabilities of its existing systems with the Stratus Computer.

Stratus Computer Inc. is a leading supplier of fault-tolerant systems for critical on-line applications. One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988. The company, whose headquarters are in Marlboro, Mass., U.S.A., has 11 international subsidiaries. Stratus Computer Inc. common stock is traded via the New York Stock Exchange and the Boston Stock Exchange under the trading symbol SRA.

MOSCOW (OCT. 22) BUSINESS WIRE - Montagespezbank, one of the leading commercial banking institutions in the Soviet Union, has appointed International Marketing Promotion Co. as its international representative, announced Mr. Vasin, chairman.

IMPC is presently investigating opportunities in the financial community to establish a corresponding banking relationship between Montagespezbank and a foreign currency banking group with offices in the United States and Europe.

''This affiliation will allow companies engaged in business in the USSR to be afforded deposits, transferability, clearing, credit and loan availability.

''It will also provide a vital facility for corporations dealing in hard currency and letters of credit, to successfully function in this huge

potential marketplace without having to directly access the Soviet Union's complex banking system,'' reported Paul Friedlander, chairman and chief executive officer, IMPC.

IMPC offers a wide spectrum of marketing services to companies seeking to take advantage of business opportunities that exist today and gain ground-floor entry into commercial and social trends which will prevail in the international community in the future.

In addition to its Montagespezbank connection, IMPC is involved in a number of major projects in the Soviet Union including The All American Rodeo & Wild West Show, a Worldwide Electronics exhibition in Moscow and is presently developing other exciting marketing opportunities in the Soviet Union and Europe.

International Marketing Promotion Co. is a part of Miami-based Marketing Dynamics Group which also includes Dynamic Communicators Inc., a public relations agency, Bodner Advertising Inc., a national advertising agency and Marketing Dynamics Inc., an international marketing consulting company.

For further information contact International Marketing Promotion Co. Inc., 4949 S.W. 74th Court, Miami, Florida 33155. Telephone 305/667-1719, FAX 305/667-1731.

#90296b0635 10/23/1990 ~Business Wire

AUBURN, CALIF. (OCT. 23) BUSINESS WIRE - HeartFed Financial Corp. (NASDAQ:HFED), the holding company formed in 1989 for Heart Federal Savings and Loan Association, Tuesday reported net income of $1,784,000, or 40 cents per share, for the three months ended Sept. 30, 1990.

Net income for the three months ended Sept. 30, 1989, was $1,697,000, or 38 cents per share. HeartFed's net income was $5,854,000, or $1.31 per share, for the first nine months of 1990. Net income for the first nine months of 1989 was $5,241,000, or $1.17 per share.

Net interest income increased to $7,765,000 for the three months ended Sept. 30, 1990, from $6,095,000 for the three months ended Sept. 30, 1989. For the three- and nine-month periods ended Sept. 30, 1990, Heart Federal's net interest rate spread increased to 3.48 percent and 3.42 percent, respectively, from 2.71 percent and 2.92 percent for the similar periods a year ago.

Non-performing assets (loans 90 days or more delinquent plus real estate acquired through foreclosure) were $2,162,000 at Sept. 30, 1990, down from

$3,597,000 a year earlier.

Heart Federal's provision for loan loss reserves was $253,000 in the third quarter of 1990, compared to $105,000 during the third quarter of 1989, bringing the total loan loss reserves to $2,290,000 at Sept. 30, 1990, compared to $1,702,000 a year before.

''The economic uncertainty created by the threat of war in the Mideast, the lack of a deficit reduction budget from Congress, and concerns over a national recession have caused a general slowdown in our real estate markets,'' commented Stuart R. Foster, president and chief executive officer.

''Although our ratio of non-performing assets to total assets declined to 0.23 percent from 0.41 percent a year ago, we felt under the current economic environment it was prudent to increase our general loan loss reserves,'' Foster added.

Real estate loan originations during the third quarter of 1990 were $56,603,000, compared to $39,132,000 for the third quarter of 1989. Real estate loan originations during the nine months ended Sept. 30, 1990, were $170,197,000, compared to $141,139,000 for the like period in 1989, an increase of 20.6 percent.

#90296b0636 10/23/1990 ~Business Wire

SOUTH SAN FRANCISCO, CALIF. (OCT. 23) BUSINESS WIRE - As previously forecast, Genentech Inc. (NYSE:GNE) posted a loss for the third quarter due to expenses related to its $2.1 billion merger transaction with Roche Holdings Ltd., which was completed on Sept. 7.

The third-quarter loss was $133.7 million, or $1.45 per share, and the special charges, primarily merger-related expenses, for the quarter were $148.9 million, or about $1.60 per share. Earnings for the third quarter last year were $11.4 million, or 13 cents per share.

For the first time since its founding in 1976, Genentech's total assets topped $1 billion, reaching $1.1 billion, compared with $712.5 million a year ago.

Total cash at the end of the third quarter was $678.3 million, up from $205.4 million a year ago. Total stockholders' equity almost doubled, from $448.7 million at the end of the third quarter last year, to $871.9 million this year.

Revenues for the third quarter rose 12 percent to $112.1 million, up from

$100.0 million for the like quarter last year. Sales of the company's heart attack drug, Activase or t-PA, were $48.2 million for the third quarter, compared with $43.6 million for the like quarter of 1989 and compared with $48.3 million for the second quarter of this year.

Activase market share remained at nearly two-thirds during the third quarter, unchanged from the previous quarter.

Protropin, human growth hormone, sales were $40.2 million, up from $32.4 million for the like quarter a year ago, and compared with $41.2 million for the second quarter of this year.

Marketing, general and administrative expenses increased to $36.8 million, up from $32.0 million a year ago. The additional expenses are primarily for marketing expenses due to increased competition for Activase. Research and development expenses were $42.2 million, up from $38.5 million, largely due to additional products entering clinical trials.

Genentech has six potential new products in clinical trials and plans to begin clinical trials for at least one more product before the end of this year.

Genentech Inc. is a leading biotechnology company focusing on the development, manufacture and marketing of pharmaceuticals produced by recombinant DNA technology.

LOS ANGELES (OCT. 22) BUSINESS WIRE - Oct. 23, 1990, YES Clothing Co. (YSCO/NASDAQ) today announced the appointment of Daniel Goodstein, CPA, as the company's new chief financial officer.

Goodstein will begin his employment with the company on Nov., 1, 1990.

Goodstein, 57 years of age, has been a partner with the accounting firm of Laventhol & Horwath since 1983, where he specialized in the apparel manufacturing and retail industries, and supervised the auditing of YES Clothing's financial statements. Prior to this, Goodstein was a partner at another accounting firm, also focusing on the apparel industry, for over 23 years.

Chairman, George Randall noted, ''We are extremely pleased with the appointment of Mr. Goodstein. He brings with him over 30 years of experience with the apparel manufacturing industry and will contribute many valuable

skills to our Company. As he has worked with YES Clothing in the past, we expect a rapid and smooth transition.''

YES Clothing Co. designs, contract manufactures and distributes women's, men's and children's apparel to department and specialty stores in the United States Canada, Europe and Japan.

#90296b0640 10/23/1990 ~Business Wire

VERNON HILLS, IL (OCT. 23) BUSINESS WIRE - Scotsman Industries, Inc. (NYSE:SCT) Tuesday reported third quarter net income of $1.8 million, or $.26 per share, up 8 percent from net income of $1.7 million, or $.24 per share for the third quarter of 1989.

Net sales for the quarter increased 5 percent to $44.7 million compared with $42.5 million for the same period a year ago.

For the first nine months of 1990, net income was $7 million, or $.98 per share, an increase of 9 percent over pro forma net income of $6.4 million, or $.91 per share for the first three quarters of 1989. Net sales for the nine months increased 5 percent to $144.1 million compared with $137.2 million for the year-ago period.

The sales increase for the quarter and year-to- date was largely due to foreign currency translation, which accounted for $5.4 million of the $6.9 million nine-month gain. Results for the first nine months of 1989 are presented on a pro forma basis due to Scotsman's spin off from Household

Scotsman's debt-to-equity ratio improved to 2.2 to 1 compared with 2.4 to 1 at the end of the second quarter and 3 to 1 at the end of 1989. Continued strong cash flow is sufficient to support the company's anticipated growth and Scotsman expects that its focus on reducing inventory will further enhance its positive cash flow.

Scotsman Industries, Inc. is a market leader in the manufacture of commercial refrigeration products, with a primary focus on the food service industry. The global manufacturing and marketing of ice machines is the largest component of Scotsman Industries' business.

#90296b0641 10/23/1990 ~Business Wire
MEMPHIS, TN (OCT. 23) BUSINESS WIRE - TBC Corp. (NASDAQ/NMS:TBCC) Tuesday reported new quarterly highs in net sales and earnings for the third period and first nine months of 1990.

For the three months ended Sept. 30, 1990, net sales totaled $136,397,000 compared with $132,208,000 in the year-earlier period. Net income was $4,799,000, or 34 cents per share, compared with $4,571,000, or 31 cents per share, in the third quarter of last year.

The third quarter results brought net sales through the first nine months to a record $385,518,000 compared with $361,346,000 in the year-earlier period. Net income amounted to $12,495,000, or 88 cents per share, compared with $11,950,000, or 78 cents per share, in the year-earlier period.

The per share results and the number of shares outstanding for the third quarter and first nine months of 1989 have been adjusted to reflect the 3-for-2 stock split distributed in October 1989.

TBC Corp. is one of the nation's largest marketers and distributors of products for the automotive replacement market. The company's common shares are traded over-the-counter under the National Market System symbol TBCC.

#90296b0656 10/23/1990 ~Business Wire
PORTLAND, Maine (OCT. 23) BUSINESS WIRE - UNUM Corp. (NYSE:UNM) Tuesday announced 1990 third-quarter net income of $46.3 million or $1.35 per share compared with $44.1 million or $1.09 per share for the same quarter in 1989.

Revenues for third quarter 1990 were $551.9 million vs. $499.0 million for third quarter 1989.

Net income for the nine months ended September 30 was $140.1 million or $4.02 per share. For the same period in 1989, net income was $116.5 million or $2.80 per share. Revenues for the first nine months of 1990 were $1.57 billion vs. $1.45 billion for the comparable period in 1989.

''Continued progress in Individual Disability Division results was a key

contributor to this quarter's increased earnings. Although the Employee Benefits Division's performance did not quite reach last year's unusually strong quarter, its year-to-date earnings are in line with expectations,'' said James F. Orr III, UNUM chairman and chief executive officer.

Pre-tax income for the Employee Benefits Division was $41.6 million for third quarter -1990 compared with $45.7 million for the same period in 1989. Premiums for third quarter 1990 were $230.6 million vs. $212.6 million in third quarter 1989. Sales for the segment were $44.8 million compared with $42.8 million in the same quarter last year.

Retirement Products had third-quarter 1990 pre-tax income of $1.9 million compared with $0.9 million in the same quarter of 1989. Third-quarter revenues for the segment were $109.9 million vs. $109.3 million for third quarter 1989.

Pre-tax income for UNUM's Individual Disability Division increased to $8.5 million in third quarter 1990 from $2.1 million in the same quarter of 1989. Third-quarter premiums for the division were $43.6 million compared with $37.8 million in the same quarter 1989. Sales increased from $7.4 million in third quarter 1989 to $8.4 million in third quarter 1990.

The Related Businesses Division had third-quarter pre-tax income of $9.0 million versus $7.1 million in the same quarter of 1989. Premiums for the period increased 39 percent to $78.9 million from $56.9 million in third quarter 1989.

For third quarter 1990, UNUM's Individual Life Division had pre-tax income of $1.8 million compared with $2.3 million for the same quarter in 1989. Premiums of $2.1 million for third quarter 1990 compares with $2.3 million for third quarter 1989.

As of September 30, UNUM Corp.'s invested assets including N.E.L. Permanent Health Insurances Ltd., the recently acquired disability carrier in the United Kingdom, were 61.6 percent in bonds, 24.3 percent in mortgages, 2.4 percent in real estate and 5.5 percent in common stocks.

Commenting on the company's mortgage portfolio, Orr said, ''Investment managers have been aware of declining real estate markets for several years. At UNUM, we have reduced our mortgage portfolio since 1987, directing cash flow primarily into investment-grade bonds.''

About potential problem mortgages, Orr added, ''UNUM's 60-day delinquency rate is 2.65 percent of the mortgage portfolio, slightly below the life insurance industry average of about 3 percent.''

UNUM Corp. is a specialty insurance holding company with $9.3 billion in assets. Headquartered in Portland, Maine, UNUM is the nation's leading provider of group long term disability insurance and a major provider of

employee benefits and individual disability insurance. The company also markets retirement plans and long term care insurance.

#90296b0663 10/23/1990 ~Business Wire

HOUSTON (OCT. 23) BUSINESS WIRE - Candle Corp.'s Database Tools division Tuesday announced that its recently unveiled SQL/DS WORKBENCH, the most comprehensive integrated toolset available for developing and maintaining databases under SQL/DS, has moved into field test and will ship in Q2 1991.

SQL/DS is IBM's strategic database for managing distributed nodes in an enterprise-wide database system. In IBM's Systems Application Architecture (SAA) cooperative processing architecture, SQL/DS managed nodes communicate with central databases managed by IBM's DB2.

In the Sept. 5 announcement, IBM reaffirmed the importance of SQL/DS in the SAA picture, according to Candle's chairman and chief executive officer, Aubrey Chernick.

''SQL/DS is a key piece in the SAA cooperative processing puzzle, and Candle is committed to maintaining currency with IBM technologies by providing tools to support them,'' Chernick said. ''SQL/DS WORKBENCH is another example of our ability to bring leading-edge mainframe software solutions to customers in a timely fashion.''

Chernick noted that Candle's SQL/DS WORKBENCH is functionally identical to DB2 WORKBENCH, the company's flagship toolset for DB2. This makes it possible for database administrators to easily manage both environments with the same powerful workbench.

SQL/DS WORKBENCH Simplifies Administration of SQL/DS

SQL/DS WORKBENCH offers database administrators (DBAs), SQL/DS systems programmers and end users an easy-to-use yet robust feature set that includes facilities for display, analysis and reporting of SQL/DS catalogs, as well as for generating DDL utility jobstreams.

Candle Database Tools is a division of Candle Corp., a Los Angeles-based software company that is the leading independent supplier of IBM systems management software. Candle's wide range of products include solutions for systems management, data center automation, productivity and application development tools for DB2 and SQL/DS.

SANTA MONICA, CA (OCT. 23) BUSINESS WIRE - FirstFed Financial Corp. (NYSE:FED), parent company of First Federal Bank of California, Tuesday announced net earnings of $20.9 million, or $2.39 per share of common stock, for the nine months ended Sept. 30, 1990.

This earnings level is 47 percent greater than that posted for the same period last year, previously the best in the bank's history. The strong year-to-date results were attributable to continued growth in the company's basic operations, particularly net interest income which increased 49 percent over the prior year.

Core earnings for the year-to-date period represented 96 percent of pre-tax profits. Return on assets for the nine-month period was 1.01 percent and return on equity was 19.21 percent.

William S. Mortensen, FirstFed's chairman and chief executive officer, further noted that prior year pre-tax earnings included $3.6 million in non-recurring gains on the sale of loans and securities, while this year's results included only $376,000.

Net earnings for the third quarter were $6.7 million, or 77 cents per share, which were 9 percent greater than the third quarter figures for last year. As with the year-to-date profits, the improved third quarter results came from growth in core earnings.

Net earnings for the second quarter of 1990 were $7.1 million, or 81 cents per share of common stock.

Despite a slowdown in real estate activity in Southern California, the quality of FirstFed's loan portfolio is still among the best in the nation. At Sept. 30, 1990, non-performing assets were 0.61 percent of total assets. At the end of the second quarter they were 0.50 percent and one year ago they were 0.30 percent.

Mortensen commented, ''We do not foresee any significant problems with loan deliquency in our portfolio; however, we decided to increase our general loan loss reserves as a cushion for the future.''

OAKLAND, CA (OCT. 23) BUSINESS WIRE - American President Companies Ltd. (APC) Tuesday announced for the third quarter ended Sept. 21, net income of $9.3 million, or 40 cents per share, excluding the effect of a restructuring charge of $69.9 million on an after-tax basis ($109.2 million pretax) related to the company's previously announced cost repositioning and process simplification program.

Including the effect of the restructuring charge, the company reported a net loss of $60.6 million, or $3.28 per share, for the quarter. For the corresponding quarter in 1989, the company reported net income of $8.1 million or 30 cents per share. Revenues decreased to $539 million in the third quarter from $543 million in 1989.

For the first three quarters of 1990, excluding the effect of the restructuring charge, net income was $8.2 million, or 16 cents per share, on revenues of $1.6 billion. Including the effect of the restructuring charge, the company reported a net loss of $61.6 million, or $3.43 per share, for the first three quarters of 1990. For the corresponding period in 1989, net income was $19.6 million, or 64 cents per share, on comparable revenues.

The restructuring charge included a provision of $46.4 million for employee severance payments, for the consolidation of certain facilities and the termination of certain facility lease commitments. Also included in the restructuring charge is $36.4 million for the write-off of goodwill related to the acquisition in 1985 of certain domestic brokerage operations from the BRAE Corp.

The write-off of the goodwill is related to the company's decision to change its retail sales focus to support of its stacktrain system rather than brokerage activities. The balance of the restructuring charge of $26.4 million primarily covers anticipated costs to consolidate certain of the company's information resource capabilities and to align its fleet of leased equipment with expected customer needs.

The company's transportation operations, excluding the restructuring charge, had pretax income of $13.8 million for the third quarter and $1.7 million for the first three quarters of 1990 compared with pretax income of $11.5 million and $21.0 million reported for the corresponding periods in 1989.

American President Companies Ltd. provides container transportation and distribution services within and between Asia and North America through an intermodal system combining ocean, rail and truck transportation.

KIRKLAND, WA/GERMANTOWN, MD (OCT. 23) BUSINESS WIRE - McCaw Cellular Communications Inc., of Kirkland, and Hughes Network Systems, of Germantown, Tuesday announced the formation of a limited partnership to construct and operate a digital nationwide air to ground/ground to air telephone and data transmission service for use aboard commercial aircraft.

The new service, which requires FCC approval, would be provided under the name Clairtel (TM). It would bring unprecedented levels of communications service, quality and convenience to the flying public, including, for the first time, the ability to receive as well as send calls during commercial flights.

Agreements to test and use the service have already been reached with Alaskan Airlines and Northwest Airlines and negotiations are under way with several other major carriers.

In addition to higher voice-quality telephone service, Clairtel would offer facsimile and computer data transmission as well as airborne video capabilities. While in flight, patrons would be able to receive as well as send calls, pager messages, faxes and computer data transmissions. Clairtel's digital technology would represent a giant leap in airlines' ability to provide passengers with the comforts and conveniences of their homes or offices during flight.

The Federal Communications Commission had previously announced they would accept applications to provide air to ground service on allocated frequencies to parties who meet certain criteria. Among these criteria are financial capability to construct and operate the system, and a technical and engineering plan demonstrating that 50 land-based sites had been acquired along with agreements with commercial airlines, all of which Clairtel has satisfied.

Hughes Network Systems Inc., is a world leader in advanced digital telecommunications. The premier provider of interactive very small aperture terminal (VSAT) satellite networks, Hughes offers a range of communications solutions, including turnkey packet switching and interactive videoteleconferencing.

In addition, Hughes features the SkyRider (TM) mobile satellite communications system. Hughes Network Systems is a subsidiary of Hughes Aircraft Co., a unit of GM Hughes Electronics.

McCaw Cellular Communications Inc. (NASDAQ: MCAWA) is the nation's leading cellular telephone company, with ownership positions in over 100 markets across the country, representing 106 million potential customers, or ''pops.''

Approximately 80 percent of the ''pops'' of McCaw and of LIN Broadcasting Corp. (NASDAQ: LINB), which is 52 percent owned by McCaw, are in the nation's 30 most populous markets and their contiguous service areas.

McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast, currently offering service primarily under the name Cellular One (R). LIN Broadcasting holds significant interests in cellular systems in New York, Los Angeles, Philadelphia, Dallas and Houston, and operates seven network-affiliated television stations. McCaw also is the nation's fifth largest paging service provider.

#90296b0675 10/23/1990 ~Business Wire

WESTBORO, MASS. (OCT. 23) BUSINESS WIRE - Signaling a strong commitment to ECLIPSE MV customers, Data General Corp. Tuesday introduced the fifth generation ECLIPSE MV/30000 multiprocessor, bringing high-end performance and high-availability features to the mid-range of the MV/Family product line.

Oracle Corp. of Redwood Shores, Calif., Tuesday endorsed the new MV/30000 as an excellent ORACLE RDBMS platform. Oracle is a market and technology leader in the development of relational database products, distributed applications and services.

Joseph Vassallo, Oracle's senior director of Minicomputer Marketing said: ''We have worked closely with Data General to tune and certify Oracle's family of integrated, high-performance database software on the ECLIPSE MV/30000. Our cooperative testing shows significant additional transaction throughput as job processors are added, making these systems an ideal platform for ORACLE-based applications.

''We see significant demand for these systems. Today ORACLE is used on almost 2,000 Data General ECLIPSE MV systems.''

As with the ECLIPSE/MV 5500 DC, the ECLIPSE MV/9500, and the MV/3500 DC, the MV 30000 is based on a single-chip, custom CMOS microprocessor designed by Data General and manufactured in Japan by Hitachi. This chip implements the ECLIPSE MV/Family architecture on a single integrated circuit. At the system level, this reduces chip count, increases reliability, and allows more space in the system for functional features.

The ECLIPSE MV/30000, which runs the AOD/VS II operating system, is available in a single through quad processor configuration. It represents the high end of the company's mid-range line and extends mid-range performance from five MIPS for the ECLIPSE MV/9500 to 19 MIPS for the ECLIPSE MV/30000 quad-processor.

In addition to multi-processing capability, the highly configurable ECLIPSE MV/30000 can be expanded with up to three Burst Multiplexor Channel/Data Channel (BMC/DCH) I/0 channels; up to 256 MB of error checking and correcting (ERCC) memory available in 16-, 32-, and 64-MB increments; a diagnostics processor; and up to 2,472 direct asynchronous connections. The system can grow economically and incrementally with a customer's computing requirements.

Data General is a leading manufacturer of computer systems for business, industry, education, and government. The company reported revenues for fiscal year 1989 of $1.31 billion.

SCHAUMBURG, ILL. (OCT. 23) BUSINESS WIRE - As the era of the personal computer shifts into high gear, corporate powrhouses such as Brunswick and DuPont have begun to tap into the efficiency and creativity of the floppy disk to communicate information to time-pressed journalists.

Moreover, marketing executives are looking to interactive software as a valuable tool in 21st century trade and consumer promotions.

Developed by CanCom Marketing Group, Schaumburg, the Diskette Press Kit (DPK) features remarkably user-friendly menu access to automatic review, print and file functions. The custom software, available in IBM-compatible and Macintosh formats, boasts graphics/ animation flexibility and offers text storage that dramatically surpasses the limitations of the traditional paper press kit.

''The apparent simplicity of the DPK program belies its sophistication,'' noted Dr. Len Bewersdorf, vice president of informational systems for CanCom. ''The base program of the DPK was developed over more than a year and, of course, it has undergone modifications to increase its operational speed and enhance its ease of use.''

In addition to Brunswick and DuPont, the DPK has recently been used by electronics firm Bottom Line/Computrol and the American Fishing Tackle Manufacturers Association (AFTMA).

#90296b0681 10/23/1990 ~Business Wire

TERRE HAUTE, IN (OCT. 23) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW) Tuesday reported net sales and net income from continuing operations for the third quarter of 1990 were $18,144,000 and $1,318,000 (or 45 cents per share), respectively, compared to restated $20,011,000 and $571,000 (or 19 cents per share) for the same period last year.

Operating income for the quarter of $2,947,000, or 16.2 percent of sales compares to restated $2,193,000, or 11.0 percent of sales for the same period in 1989.

For the nine months ended Sept. 30, 1990, net sales from continuing operations were $48,872,000 compared to restated $52,592,000 for the first nine months of 1989. Net income from continuing operations for the first nine months of 1990 was $2,283,000, or 77 cents per share compared to 1989 restated nine-month net income of $1,105,000, or 37 cents per share.

Operating income for the 1990 period was $6,126,000, or 12.5 percent of sales compared to restated $5,418,000, or 10.3 percent of sales for the same period last year. Giving effect to first quarter losses associated with discontinued businesses and their disposition (which resulted in after tax charges of $1.4 million, or 47 cents per share), the company's net income for the first nine months of 1990 was $883,000, or 30 cents per share as compared to restated net income of $1,505,000, or 51 cents per share for the first nine months of 1989 (after recognizing income from discontinued operations of $400,000, or 14 cents per share).

In making the announcement, Paul A. Saxton, president and chief executive officer, stated: ''Our third quarter sales reflect the difficult retail environment which, if anything, deteriorated during the period. Notwithstanding 9 percent lower sales, our earnings from continuing operations for the quarter were up 131 percent. This provides strong evidence that our restructured compny can cope well with uncertain times and is well positioned to take full advantage of the opportunities that will be presented when the retail environment improves.

#90296b0682 10/23/1990 ~Business Wire
SOUTHAMPTON, NY (OCT. 23) BUSINESS WIRE - John F. Kidd, president and chief executive officer of Hamptons Bancshares Inc., announced Tuesday the company's third quarter operating results.

Kidd said that during the quarter the company had added $763,000 to its Allowance for Loan and Lease Losses, resulting in a net operating loss of $536,000 or 63 cents per share. Third quarter 1989 earnings were $278,000 or 33 cents per share.

Kidd cited the continuing impact of non-accrual loans and the need to increase reserves as the primary factors effecting profitability but added that the company's still increasing deposit base and the deliberate shrinkage of its loan portfolio have allowed the company to increase investments and improve the overall liquidity and quality of its assets.

The Loan Loss provisions which have been contributed throughout the year, Kidd added, are mandated by economic realities. The company's Allowance for Loan and Lease Losses now stands at a substantial 2.6 percent of total loans.

He stressed that the company enjoys a solid capital base and has enlarged and diversified its customer base with the opening of new branch offices by its major subsidiary, The Bank of the Hamptons, N.A., in Westhampton Beach and Bohemia during 1990.

In recent communiques with its shareholders, Bancshares has announced a series of cost-cutting measures including the temporary suspension of dividends, directors' fees and employee bonuses. Kidd described these decisions and consistent with the company's commitment to deal head-on with fiscal challenges and position itself for long-term vitality.

Hamptons Bancshares, a one bank holding company, owns the nine branch Bank of the Hamptons as well as separate leasing, mortgage banking and appraisal subsidiaries. The company's administrative offices are located in Southampton. Its stock is traded on the NASDAQ National Market under the symbol ''HBSI.''

MILWAUKEE (OCT. 23) BUSINESS WIRE - Fiserv Inc. (FISV), a leading computer services company providing data processing and information management systems to financial institutions worldwide, has announced continued record results for the third quarter of 1990.

For the three-month period ended Sept. 30, 1990, Fiserv revenues were $46.3 million, a 13 percent increase over the $41.0 million reported for the third quarter of 1989. Net income rose to $3.6 million, an increase of 22 percent over the $2.9 million reported in 1989. Net income per share for the period based on 8,622,000 shares outstanding was 41 cents per share, a 21 percent increase over the 34 cents per share on 8,541,000 shares outstanding for the third quarter of 1989.

For the nine-month period ended Sept. 30, 1990, revenues were $136.1 million, a 13 percent increase over the $120.1 million reported in 1989. Net income rose to $10.1 million, a 22 percent increase over the $8.3 million in 1989. Net income per share for the 1990 nine-month period based on 8,607,000 shares outstanding increased 19 percent to $1.17 per share from 98 cents on 8,466,000 shares in 1989.

A substantial portion of the revenue increase reported since the beginning of 1990 relates to revenues of companies acquired after Sept. 30, 1989. The company continues to experience overall revenue growth in the operation of its previously existing business.

In the past six years Fiserv, a Milwaukee-based company, has grown into a national network of specialized information management centers and subsidiary companies. The company's data centers are located throughout the United States, providing processing for over 19.5 million customer accounts and serving more than 950 client financial institutions in the United States and 13 foreign countries. A publicly held company, Fiserv stock is traded in the NASDAQ over-the-counter market system under the symbol FISV.

CHATTANOOGA, TN (OCT. 23) BUSINESS WIRE - Inter Federal Savings Bank (NASDAQ/NMS:IFED) Tuesday announced that net earnings for the nine month period ended Sept. 30, increased 8.2 percent to $1,734,507, or $1.68 per share as compared with the 1989 period of $1,603,409, or $1.55 per share.

Net interest income also increased to $5,555,570, or 9 percent, up from $5,098,196 in the corresponding period of 1989, according to Vernon W. Cox, president.

Earnings for the three months ended Sept. 30, were $581,623, or 56 cents per share, as compared with $460,822, or 45 cents per share for the third quarter of 1989. The net income figures for the third quarter included extraordinary income of $105,798 in 1989 and $143,032 in 1990, resulting from tax loss carryforwards.

Assets for the nine month period increased to $374 million, up $64 million, or 20.7 percent, from the beginning of the year. This increase was partially due to the acquisition by the Bank of First Federal of Summerville, Ga., extending the bank's activities and rights to branch in Georgia. ''This acquisition is already showing profitable results,'' Cox stated.

Inter Fed is a federally chartered savings bank insured by the FDIC. It now has nine full-service offices, including strategic locations in Chattanooga, Signal Mountain, Rossville, South Pittsburg and our newest office in Summerville, Ga.

ASHLAND, KY (OCT. 23) BUSINESS WIRE - Addington Inc. has been awarded a long-term contract to supply coal to the W.H. Zimmer generating station near Cincinnati.

Addington Inc., a subsidiary of Ashland-based Addington Resources Inc. (NASDAQ/NMS:ADDR), will supply coal to the Zimmer generating station beginning

in April 1991, the company said.

The Zimmer plant is jointly owned by Cincinnati Gas and Electric Co., Dayton Power and Light and Columbus Southern Power Co.

The agreement calls for Addington Inc. to ship at least 10 million tons of coal to the plant over an initial term of 10 years. The coal will be produced from Addington Inc.'s Ohio reserves.

The contract calls for coal with a BTU content of 11,300 per pound and a maximum sulfur content of 3 percent. The initial base price is $25.50 per ton f.o.b. shipping point.

The agreement is the second long-term contract announced within the last five weeks. As previously reported, Addington Resources' Appalachian Mining Inc. subsidiary was awarded a contract to supply at least 11.32 million tons of coal to the American Electric Power Service Corp. over a 15-year term.

Addington Resources mines and markets coal and is engaged in developing and operating integrated solid waste disposal systems. Its stock is traded on the NASDAQ National Market System under the symbol ADDR.

#90296b0689 10/23/1990 ~Business Wire

SAN ANTONIO, TEXAS (OCT. 23) BUSINESS WIRE - Diamond Shamrock Inc. (NYSE:DRM) Tuesday reported third quarter earnings of $53.2 million, or $2.15 primary earnings per share compared to $10.1 million, or 35 cents per share for the like period last year.

For the first nine months, the company reported net income of $69.7 million, or $2.72 primary earnings per share, up from $51.9 million or $1.93 per share for the nine month period in 1989.

Revenues for the first nine months were $1.9 billion compared to $1.5 billion for the first nine months last year.

Diamond Shamrock Chairman and CEO Roger R. Hemminghaus explained that the company's earnings during the quarter were primarily a result of strong operations and record sales throughout the company during a time of favorable refining industry conditions, despite lower operating profit in the retail segment.

Another important factor in the third quarter results was the revaluation of the company's crude oil and refined product inventories. Just as the

company's devaluation of inventory in the second quarter dropped earnings by about 40 cents per share, the revaluation of crude oil during the third quarter increased earnings by 83 cents per share.

Hemminghaus, commenting on the strong results, explained that record sales volumes during the third quarter were achieved in total wholesale refined products, retail gasoline, retail merchandise, and allied businesses.

''New refinery units were operating for the entire quarter, and both refineries continued to operate at near capacity. At Mont Belvieu, the propane/propylene splitter, also completed during the late second quarter, was operating profitably, and we continue our retail marketing expansion with 28 new Corner Stores completed thus far this year,'' Hemminghaus said.

''During the third quarter we saw a continuation of very good refining industry fundamentals that began in the second quarter. A tight gasoline environment coupled with high refinery utilization throughout the industry enabled our company to maintain strong refinery margins.

Diamond Shamrock, with annual sales of approximately $2.1 billion, is primarily a regional refiner and marketer of petroleum products. The San Antonio-based corporation has two Texas refineries with a throughput capacity of 165,000 barrels per day, and markets gasoline through about 2,000 Diamond Shamrock branded outlets.

#90296b0692 10/23/1990 ~Business Wire

SALT LAKE CITY (OCT. 23) BUSINESS WIRE - Research Industries Corp. (NASDAQ:REIC) reported an all-time record for quarterly earnings in the first quarter of fiscal 1991 ended Sept. 30, 1990.

The corporation generated first quarter net income of $453,934, or 8 cents per share, a 57 percent increase over last year's first quarter earnings of $289,864, or 5 cents per share.

A major contributor to this record earnings performance was an acceleration in the growth rate of health care product revenues, which expanded 33 percent in the quarter to $2.3 million compared to $1.7 million in the prior year's first quarter.

Also contributing to the corporation's improved earnings performance was an increase in health care gross profit margins from 64 percent in the prior year's first quarter to 65 percent this year.

Total corporate revenues for the quarter increased 35 percent to $2.6 million over the prior year's revenues of $1.9 million. Revenues increased in most segments of the company's business, including cardiovascular disposables and proprietary urological pharmaceuticals.

The only operating division with declining revenues was the low gross margin private label sterile solutions business, which the corporation is de-emphasizing in order to free up capacity and resources for the anticipated market introduction of its pending Herpid antiviral product.

As a result of the corporation's continuing substantial sales and earnings increases, its current assets increased to $6.3 million from $5.5 million at the end of the fiscal year ended June 30.

Significantly, cash and cash equivalents increased over $500,000 during the quarter to $2.5 million compared to $2 million on June 30. As of Sept. 30, cash and cash equivalents almost doubled the past 12 months compared to $1.3 million as of Sept. 30, 1989, despite the elimination of the company's long-term debt position.

Research Industries Corp. is a diversified biomedical firm specializing in the development, manufacture and sale of hospital disposable products for cardiovascular intervention, as well as specialty pharmaceuticals. Research Industries' common stock is traded over the counter, NASDAQ, National Market System, with the symbol REIC.

NEW YORK (OCT. 23) BUSINESS WIRE - The Open Software Foundation Tuesday took a major step toward enabling large networks of different computer systems to join together through a common operating environment with the release of OSF/1 a new open computer operating system that offers more features and better security levels than other popular multi-user operating systems available today.

In press conferences held in New York, Nice and Tokyo, OSF executives today unveiled the new OSF/1 operating system as the cornerstone for the industry's first comprehensive open computer operating environment.

An open operating environment includes an operating system as one of its core technologies, and adds a powerful user interface and distributed computing capabilities to surpass the limitations of today's operating systems.

Today's announcement was highlighted by endorcements for the new OSF/1

operating system from participating senior executives from OSF's sponsor companies -- Digital Equipment Corp., Groupe Bull, Hewlett Packard, Hitachi, IBM and Siemens Nixdorf Information Systems.

By using the complete OSF operating environment, individual users will be able to work from any station on a network of computers as if the person were sitting at his or her own workstation, regardless of what city or country the user is in or what type of computer he or she is using.

In addition, large organizations will be able to consolidate information from all their departments, divisions, agencies and groups in new ways and make all or part of that information accessible to employees, according to each employee's level of access privileges or security clearance.

These capabilities enable large organizations to fulfill the promise of a much-heralded approach to using computers, known as Enterprise-Wide Computing.

The Open Software Foundation is a not-for-profit research and development organization developing and delivering an open software environment based on standards for the benefit of the information processing industry.

OSF uses an innovative open process, soliciting technologies from the industry-at-large and delivering the technology in source code form. OSF encourages member participation via its open process to influence the technical direction for the Foundation's efforts. Headquartered in Cambridge, Mass., the OSF has 260 employees in locations around the world.

CORAL GABLES, FLA. (OCT. 23) BUSINESS WIRE - Wackenhut Services Inc., a subsidiary of The Wackenhut Corp. (NYSE:WAK), has signed a two-year contract with the United States Department of Energy for security services at its Rocky Flats, Colo., nuclear manufacturing facility.

The estimated cost of the contract is $28.9 million per year and the services provided will include an armed security force in excess of 350 persons, the safeguarding of special nuclear materials, a tactical response team for security emergencies, alarm monitoring, traffic enforcement and accident investigations, other security services and related administrative and maintenance tasks.

The company is eligible for a portion of an additional $1.65 million award fee pool depending on its performance as graded by the Department of Energy during the period of the contract.

Wackenhut Services Inc. (WSI), which performs security related contract services to municipal, state and federal agencies nationwide, has been performing security services for the Rocky Flats Office of the Department of Energy during the past two months under a transition contract after the initial award was announced in August, 1990.

Richard R. Wackenhut, president of The Wackenhut Corp., expressed the pride of the Corporation in being selected on a sole source basis by the U.S. Department of Energy for this critical security assignment, and pledged the commitment of ''whatever Corporate resources are necessary in order to bring quality security services to this contract site.''

Wackenhut's general manager at Rocky Flats is Dr. William K. Rector, a WSI senior vice president who was previously the general manager at the Department of Energy's Central Training Academy (CTA) at Albuquerque, N.M. Wackenhut has operated the CTA for the past six years.

Dr. Rector previously served as the Director of Training and Operations at the Department of Energy's Savannah River Site, where Wackenhut Services Inc. maintains a contract security force of over 900 personnel.

The Wackenhut Corp. is one of the world's larges private sector providers of security, investigative and related services. It has offices in over 125 U.S. cities and operates in 40 other countries, on six continents.

FAIRFIELD, CONN. (OCT. 23) BUSINESS WIRE - General Electric Company Tuesday announced that R. Michael Gadbaw, 42, has been named Vice President - Senior Counsel for International Law and Policy, effective Dec. 1.

In his new position, Gadbaw will serve as GE's key legal advisor on international law and trade issues. He will be based in Washington, D.C.

Ben Heineman, Senior Vice President and General Counsel of GE, said of the appointment: ''Mike brings outstanding talent and experience to the task of assessing, and affecting, the impact of international law and policy on GE's global competitive position.''

Gadbaw comes to GE with extensive government and private experience in international business and trade negotiations. He is currently a partner with Dewey Ballantine in Washington, which he joined in 1985 to help establish the firm's trade department. As a partner in Dewey Ballantine, he served as

counsel to a number of major corporations and associations with worldwide operations and interests.

Over the past decade, Gadbaw has been involved in a wide range of trade, investment and intellectual property rights issues, including the development of corporate policies and strategies in connection with the Uruguay Round of trade negotiations, EC 1992, and the electronics trade issues.

#90296b0698 10/23/1990 ~Business Wire

NEW YORK (OCT. 23) BUSINESS WIRE - The Open Software Foundation Tuesday introduced a key component of its distributed operating environment with the first release of the OSF/1 operating system.

OSF/1's innovative, extensible architecture incorporates advanced technologies while fully supporting industry standards and maintaining compatibility with existing systems.

The OSF/1 operating system offers a breakthrough in operating system technology while protecting the industry's investment in existing software.

Full compliance with industry, national and international standards and specifications and compatibility with UNIX System V and Berkeley programming interfaces ensures application portability. Unlike UNIX System V, however, OSF/1's advanced architecture, based on Mach technology, is designed to support the applications of the 1990s and beyond.

OSF has integrated a number of existing advanced technologies in OSF/1, including significant portions of IBM's AIX v3.1 operating system, and the Mach kernel technology from Carnegie Mellon University. A full-featured command set merges System V and BSD4.3 commands, and is further enhanced by advanced internationalization capabilities. Other key advanced technology components of OSF/1 include Encore Computer's symmetric multiprocessing implementation, SecureWare's SMP+security technology, Mentat's networking STREAMS technology, the Berkeley 4.4 Virtual File System, and network and local file systems from the University of California at Berkeley.

The new Mach-based kernel, a small but critical piece of the operating system that serves as its nucleus, incorporates several modern capabilities offering improved support for both commercial and technical systems. Its unique architecture allows workloads to be distributed among multiple processors for greater efficiency, allows programmers to access multiprocessor capabilities such as threads, and is easier to maintain. The new kernel offers dynamic

system configuration, logical volume management, and disk mirroring, essential features for commerical use. OSF/1 also includes features required for NCSC B1 level certification.

OSF is committed to and participates in the standards definition process. In areas where standards are under discussion, OSF tracks progress and implements the standard as it becomes accepted. As a result, the OSF/1 operating system complies with all relevant international and national standards, as well as industry and proprietary specifications.

This initial release of OSF/1 provides a portable, extensible, commercial quality operating system base for computing today, and a clear migration path to upwardly compatible micro-kernel-based distributed operating environments for the future. OSF expects to release subsequent versions of OSF/1 every 12 to 18 months as development continues, culminating in the micro-kernel implementations.

OSF/1 is initially available for three OSF-supported reference implementations: Intel 302 (80386-based), Digital Equipment Corporation's DECstation 3100 workstation (MIPS-based), and the Encore Multimax multiprocessor system (National Semiconductor-based). Also included on the OSF distribution tape are three vendor-contributed implementations: Hewlett-Packard DN2500, Intergraph 6000, and an Intel 860-based system.

The Open Software Foundation is a non-profit research and development organization developing and delivering an open software environment based on standards for the benefit of the information processing industry. OSF uses an innovative open process, soliciting technologies from the industry-at-large, and delivering the technology in source code form. OSF encourages member participation via its open process to influence the technical direction for the Foundation's efforts. Headquartered in Cambridge, Mass., the OSF has 260 employees and more than 200 members in locations around the world.

#90296b0703 10/23/1990 ~Business Wire

BALTIMORE (OCT. 23) BUSINESS WIRE - Alex Brown Inc. Tuesday reported revenues for the quarter ended Sept. 28, of $58 million, a 27 percent decline from revenues of $79.6 million in the third quarter of 1989.

The company reported a net loss of $3.1 million, or 21 cents per share, as compared to net earnings of $6.3 million, or 38 cents per share, in the third quarter of 1989.

Alex Brown's board of directors approved a cash dividend on Alex Brown common

stock of 7 cents per share, payable on Nov. 14, to stockholders of record on Nov. 5.

The financial services industry - especially banks, insurance companies and securities firms - has been experiencing significant problems during 1990. In times such as these, capital strength is especially important. Alex Brown's capital funds remain very strong, totalling $191.7 million at the end of the third quarter with a book value of $11.33 per share. Alex Brown's liquidity also remains excellent.

During the third quarter Alex Brown repurchased approximately 600,000 shares of its common stock pursuant to a repurchase program. This program has been expanded such that it has a remaining authorization of 1 million shares. The stock will be purchased from time to time in the open market, in block purchases or as otherwise determined by the company.

For the nine months ended Sept. 28, revenues totalled $203.7 million, a 3 percent decline from $210.5 million in 1989. Net earnings were $3.9 million and earnings per share were 25 cents for the first nine months of 1990 compared to net earnings of $4.3 million and earnings per share of 26 cents in the first nine months of 1989. Results for 1989 include an after-tax charge of $6.9 million related to anticipated losses in eliminating excess office space.

Alex Brown Inc. is a holding company whose primary subsidiary is Alex Brown & Sons Inc., the oldest investment banking firm in the United States. Alex Brown is traded in the NASDAQ National Market System, symbol ''ABSB.''

#90296b0705 10/23/1990 ~Business Wire

BATON ROUGE, La. (OCT. 23) BUSINESS WIRE - Piccadilly Cafeterias Inc. (NASDAQ:PICC), Tuesday reported net income for the first quarter ended Sept. 30, 1990 totaled $2,554,000, or 27 cents per share.

Last year's net income for the first quarter was $3,148,000, or 33 cents a share. First quarter sales were $75,985,000 compared to $75,848,000 in the first quarter of last year.

James C. Malmberg, president and chief executive officer, said that the first quarter earnings decrease was attributable to lower sales volumes per unit due to a decline in customer traffic and a slight increase in food costs. ''The competitive environment in which we operate is the significant factor in

reduced customer traffic. We are taking a variety of steps to address this problem and are confident that these will be successful.''

Malmberg pointed out that total cafeteria customer traffic in the quarter declined one percent from the prior year, and customer traffic in cafeterias that were open during both periods decreased eight percent.

Malmberg added, ''During the first quarter we opened our second cafeteria in Nashville, Tennessee. Also, today in Jackson, Mississippi, we opened a new Ralph & Kacoo's seafood restaurant. Two more new cafeterias and two more new seafood restaurants are planned for the remainder of this fiscal year.''

Piccadilly Cafeterias owns and operates 142 cafeterias in 14 states and seven Ralph & Kacoo's seafood restaurants in Louisiana, Texas, and Mississippi. All operating units are company owned.

NORTH STONINGTON, CT (OCT. 23) BUSINESS WIRE - Analysis & Technology Inc. achieved record revenues and earnings for its September quarter and six months ended Sept. 30, 1990, A.T. Mollegen Jr., president and chief executive officer announced Tuesday.

For the second quarter, net earnings per common share of 44 cents advanced 16 percent above the 38 cents earned in the previous September quarter. Record revenues of $25,271,000 and net earnings of $946,000 compared favorably with revenues of $23,792,000 and net earnings of $848,000 in the September 1989 quarter.

For the six-month period ended in September, net earnings rose 10 percent to $1,895,000, compared with $1,721,000 in the prior first-half period on record revenues of $51,007,000, compared with $45,811,000. Net earnings per common share were 89 cents compared with 78 cents in the six-month period of the prior year.

''Our business continued strong with the U.S. Navy and in all training services areas in the September quarter,'' Mollegen commented. ''With our total contractual backlog now at more than $295,000,000, up more than 6 percent year-to-year, we remain confident of achieving another record year in both revenues and earnings.''

Analysis & Technology Inc., a professional and technical services company, provides submarine and antisubmarine warfare services to the U.S. Navy and specialized training services for commercial and military customers. The company's shares are traded in the NASDAQ National Market System under the symbol ''AATI''.

COLUMBIA, S.C. (OCT. 23) BUSINESS WIRE - Colonial Companies Inc. (NASDAQ/NMS:CLACB) Tuesday reported net income for the first nine months of 1990 of $23,882,000, or $1.58 per share, an increase of 5 percent over net income of $22,715,000, or $1.51 per share, earned in the first nine months of 1989.

After-tax operating income, excluding realized gains (losses) on investments, totaled $24,151,000, or $1.60 per share, compared with $21,415,000, or $1.42 per share, for the first nine months of 1989, an increase of 13 percent.

For the third quarter ended Sept. 30, 1990, net income was $7,682,000, or 51 cents per share, a decrease of 2 percent from the third quarter 1989 net income of $7,853,000, or 52 cents per share.

After-tax operating income for the third quarter of 1990 was $8,284,000, or 55 cents per share, compared with $7,193,000, or 47 cents per share, for 1989, an increase of 15 percent.

Commenting on the results, President Stephen G. Hall said, ''The positive trends from the first half of the year continued through the third quarter. Sales for the first nine months increased 29 percent.

''As a result of this solid growth, we now expect sales for the full year to increase approximately 25 percent. Continued improvement in policyholder

retention and the strong sales growth produced a 15 percent increase in premiums for the first nine months of the year.

''The outlook for the remainder of the year is good. We expect 1990 to be another year of consistent growth,'' Hall concluded.

Colonial Companies Inc. is a holding company whose shares are traded on the National Market System with the NASDAQ Symbol CLACB. Its principal subsidiary is Colonial Life & Accident Insurance Co., which operates in 49 states and underwrites a broad line of personal accident, life, and cancer insurance policies.

WHITE PLAINS, N.Y. (OCT. 23) BUSINESS WIRE - IBM and Micro Focus Tuesday announced a distribution agreement that will offer users of IBM's Customer Information Control System (CICS)(a) an efficient, convenient way to develop and test CICS applications by using CICS Operating System/2(a) (CICS OS/2(a)).

The applications can then be used on IBM mainframes or personal computers.

CICS OS/2 is one of the newest members of IBM's well-established and accepted CICS family of transaction processing products, which improve the availability of the information customers need to run businesses worldwide. CICS OS/2 extends transaction processing to the personal computer by providing both the CICS application programming interface and, in conjunction with the operating system, services for a transaction processing environment.

Part of IBM's Systems Application Architecture(a) (SAA(a)), CICS OS/2 also provides support for cooperative transaction processing -- where information is processed on a local workstation, invoked on a CICS host, or on another networked CICS OS/2 system.

Under the agreement announced today, Micro Focus will provide screens and other features that integrate IBM CICS OS/2 into the Micro Focus COBOL/2 Workbench, a tool that helps programmers develop and test applications. The CICS OS/2 option for the Micro Focus COBOL/2 Workbench includes a screen painter and will give the CICS programmer a powerful and productive environment to develop CICS applications. The CICS OS/2 Option will be offered on diskette with an easy menu-driven installation procedure.

The CICS OS/2 feature of the Micro Focus COBOL/2 Workbench requires an IBM Personal System/2 computer running Operating System/2(a) Extended Edition Version 1.2 or later. Technical support for the new feature will be provided

by Micro Focus, of Palo Alto, California. Planned availability is fourth quarter 1990. -0- (a) Customer Information Control System, Operating System/2, CICS OS/2, CICS, Systems Application Architecture, SAA, Personal System/2, and Operating System/2 are trademarks or registered trademarks of International Business Machines, Inc. Micro Focus COBOL/2 Workbench is a trademark of Micro Focus, Inc.

#90296b0719 10/23/1990 ~Business Wire

KING OF PRUSSIA, PA (OCT. 23) BUSINESS WIRE - Envirosafe Services Inc. (NASDAQ:ENVI), a leading provider of hazardous waste management services, reported record performance in revenues, income from continuing operations and net income for the third quarter of 1990, C. Edward Ashby Jr., president and chief executive officer, announced Tuesday.

For the quarter ended Sept. 30, 1990, Envirosafe's revenues advanced 85 percent to $13.6 million from the year earlier quarter of $7.4 million. Income from continuing operations increased 90 percent to $1.4 million, or 38 cents per share, as compared with $0.8 million, or 20 cents per share, in the prior year.

''The increases in revenues and income from continuing operations during the third quarter reflect a continuation of very strong volume and pricing trends which the company benefitted from during the first half of 1990,'' Ashby said. Disposal volume increased due to the removal by ESI of the self-imposed capacity constraints which impacted Ohio during most of 1989; the establishment of more aggressive sales and marketing efforts; and the anticipation by some customers of land ban deadlines restricting direct landfilling of certain wastes.

''It is disappointing that our record 1990 financial results, which reflects the dedication and commitment of our employees, have been overshadowed by the recent decision of the Ohio Hazardous Waste Facility Board,'' stated Ashby.

As previously announced, on Aug. 29, 1990, the board announced that it will renew the company's operating permit for its Ohio facility, but denied the construction of an expansion cell.

The company expects to request a reconsideration of this decision, and may also decide to seek judicial review.

Envirosafe Services is a leading provider of land disposal services for environmentally sensitive wastes. The company owns major disposal sites in Ohio and Idaho -- two of the 20 such sites authorized under federal law.

SANTA CLARA, Calif. (OCT. 23) BUSINESS WIRE - Hitachi Data Systems (HDS) Tuesday announced that the company plans support for IBM's ESA/390 architecture and newly announced versions of the MVS/ESA, VM/ESA and VSE/ESA operating systems along with other industry-standard System/390 software on its HDS EX Series mainframe systems.

In addition, HDS intends to support the Systems Complex (Sysplex) through Sysplex Timer and Cross-System Coupling Facility implementation.

HDS also announced plans to support the new IBM Enterprise Systems Connection architecture (ESCON), allowing the implementation of both high-speed fiber-optic serial channels and conventional copper parallel channels on EX Series processors. Last month the company announced its intention to support ESCON on its storage subsystems.

''We view these enhancements as strategic to the future of our customers,'' said Paul Hastings, vice president of systems marketing for HDS. ''Over time, we believe these enhancements will provide real benefits to mainframe customers.

''Historically, it has taken about 12 months from general availability to deliver compatibility for features like these and we expect to maintain that historical track record.''

Commenting on HDS's EX Series, Hastings continued: ''About four months ago we added two new high-end models to to our EX Series, the EX 310 and the EX 420. As our customers' requirements grow and the competitive environment changes, we expect to add larger models to the EX Series and make further enhancements.''

Details on the availability, terms and conditions of support for new and currently installed EX Series processors will be announced subject to public availability and review of specifications for these new developments.

Hitachi Data Systems is a joint venture company owned by Hitachi Ltd. and Electronic Data Systems. HDS markets a broad range of mainframes, peripheral products and services. With products installed in more than 30 countries worldwide, HDS has more than 2,500 employees.

CHICAGO (OCT. 23) BUSINESS WIRE - Medical Management of America Inc. (NASDAQ:MMOA) has agreed in principle to accept the offer of British Land of America Inc. (''BLA'') to repurchase the shares of its common stock owned by BLA, and has additionally stated its intention to repurchase all other shares of MMA common stock not currently owned by James H. Desnick, MMA's chairman and president.

Terms of the agreement include an aggregate purchase price of $8.25 per share to be paid with $3 per share down and the balance in eight equal quarterly installments with interest at 10 percent per annum.

Performance would be collateralized by a $4 million letter of credit and a lien on certian MMA real estate, medical equipment and other personal property.

Although the transaction is subject to approval by a majority of the company's outside stockholders, BLA, which owns 49 percent of the outside shares, has stated its intent to vote in favor of the transaction.

Based in Chicago, MMA owns and operates ambulatory surgical centers and manages medical centers specializing in comprehensive eye care and surgery. The company's current managed medical facilities are located in Illinois, Indiana, Florida and southern California.

CORPUS CHRISTI, TX (OCT. 23) BUSINESS WIRE - Marine Holding Co. (NASDAQ:MDCO) Tuesday reported financial results for the quarter ended Sept. 30.

The net loss for the quarter was $6.9 million on revenues of $20.3 million. The loss applicable to common stockholders was $8.7 million (51 cents per share). Year-to-date (nine months) results through Sept. 30 include a loss of $18.5 million from revenues of $55.8 million with the loss applicable to stockholders amounting to $23.5 million ($1.64 per share).

These results include the results of operations of the Keyes Offshore group since March 1. Comparable period results for the three months and nine months ended Sept. 30, 1989, respectively, included losses of $7.8 million and $23.4 million from revenues of $8 million and $23.7 million with losses applicable to common stockholders of $9.3 million ($1.02 per share) and $28.1 million ($3.60 per share).

Dan O. Dennis, president and chief executive officer, commented, ''The third quarter's results were slighly depressed due to weakened Gulf of Mexico jackup rig utilization and dayrates during July and early August. August activity later recovered somewhat and remained at improved levels through late September.''

Marine Holding Co. operates 23 jackup drilling rigs in the Gulf of Mexico.

#90296b0735 10/23/1990 ~Business Wire

KENILWORTH, N.J. (OCT. 23) BUSINESS WIRE - ''AM-VAX,'' Schering-Plough Animal Health's new vaccine for the prevention of anaplasmosis in beef and dairy cattle, has been approved for marketing in the United States by the U.S. Department of Agriculture.

''AM-VAX'' is manufactured using a new ''Micropure'' purification process, which removes impurities that can cause potentially fatal complications in offspring of cows vaccinated with the current federally licensed vaccine.

Anaplasmosis is an infectious disease that attacks the red blood cells of cattle. It is transmitted primarily by biting pests such as flies, ticks and mosquitoes. The disease causes severe anemia, often leading to death of the animal. The monetary cost of anaplasmosis is estimated to exceed $300 million a year in death losses alone in the United States.

''The real economic loss is far greater than just death loss, '' said Harlan Bigbee, D.V.M., director of technical services for Schering-Plough Animal Health. ''The additional costs result from reduced milk production, abortion, weight losses and sterility in bulls. These are difficult to calculate accurately, but far exceed losses due to death alone.''

''AM-VAX'' is administered to cattle by intramuscular injection. Field trials demonstrate that it confers a high degree of protection to vaccinated cattle. The new vaccine is approved for use in cattle of all ages, including cows through all stages of pregnancy.

''AM-VAX'' is expected to take a significant share of the market now held by the current vaccine, which also protects cattle but can cause severe problems in calves born to vaccinated cows.

''Because 'AM-VAX' can be used safely in breeding cattle, the emphasis will shift to prevention from treatment with antibiotics once symptoms appear -- the practice now followed by most producers,'' said William Edwards, product manager of the bovine strategic marketing unit, Schering-Plough Animal Health.

''Antibiotic treatment is expensive and often requires additional handling of clinically ill cattle,'' he added. ''It is also costly both in terms of

labor costs and the effect on the already stressed animal.''

''AM-VAX'' is expected to expand the total U.S. cattle vaccine market, which recorded sales of $91 million in 1989. The new vaccine is being marketed through veterinarians.

Schering-Plough Animal Health manufactures and markets worldwide a broad line of pharmaceutical and biological products for livestock and pets. It is a unit of Schering-Plough Corporation of Madison, N.J., a research-based company engaged primarily in the discovery, development, manufacturing and marketing of pharmaceutical and health care products worldwide.

NEW YORK (OCT. 23) BUSINESS WIRE - American Body Armor & Equipment Inc. (NASDAQ:ABAE), America's oldest manufacturer of bullet resistent vests, announced Tuesday that they have received a $1 million order for ''equipment'' from a Middle Eastern military unit.

The order, to be delivered in December, was placed by the U.S. government.

Steve Giordanella, president of ABA commented, ''As we have seen an increased level of activity in the Middle East in recent months, we have received several large orders from this region. However, this is one of the largest orders we have received in the history of American Body Armor.''

Revenues for the third quarter of 1990 are the second largest in the history of the company. In September, American Body Armor received an order, totaling over $500,000, for bullet resistent vests from a Middle Eastern government. Also in September, the company received three orders for armored vehicles, totaling over $250,000, from international clients. One vehicle, for a Middle Eastern Head of State, was delivered on 24 hours notice. The individual was in New York to attend ''The World Summit For Children'' at the United Nations.

On the domestic front, in September, American Body Armor fulfilled a $370,000 order for an elite special forces unit in the U.S. Military. A follow-up order is expected in the near future.

American Body Armor, based in Fernandina Beach, Fla., is a leading supplier of soft body armor and armored products. Their clients include law enforcement and government agencies in the U.S., the Middle East, Europe and Asia.

SAN JOSE, CALIF. (OCT. 23) BUSINESS WIRE - Cygnet Systems Inc. Tuesday announced a 2-1/2 year OEM agreement with Siemens AG EK21 in West Germany, signifying the first major offering of a 5.25'' optical disk system in Europe.

Siemens will offer the Cygnet Model 5250 Jukebox on their MX family of office systems to provide an integrated text and imaging system.

Jeffrey Dunn, vice president of sales and customer support for Cygnet, said, ''We are truly pleased that Siemens, after extensive testing, has selected Cygnet's 5250 for their 5.25'' jukebox hardware on the Siemens imaging system. Their evaluation is clearly one of the most rigorous quality and reliability tests in the world.''

Four key reasons were cited by Siemens for selecting the Cygnet jukebox. First, the Cygnet 5250 is the fastest box available, an absolute requirement for Siemens' applications response time. Second, the Model 5250 supports the LMS LD 510 drives. Siemens already uses LMS products and is well aware of their high quality.

Third, Siemens felt that they have received excellent technical support from Cygnet. Lastly, Siemens perceives Cygnet as a ''solid and serious jukebox vendor.''

According to Data Storage Concepts of Boulder, Colo., shipment of 5.25'' optical automated data libraries in Europe will exceed 1,300 jukebox units in 1990 and will reach 2,400 units by 1992.

Siemens is the largest provider of Unix-based systems in Europe. Their systems run under SINIX (Siemens' proprietary version of Unix.) Siemens has been shipping the MX systems for two years now, and will announce the MX systems with optical disks for January 1991 availability in Europe.

The Cygnet 5250 Jukebox will be attached to an MX series file server which is capable of supporting multiple jukeboxes per system.

Cygnet Systems Inc., headquartered in San Jose, Calif., is a peripheral products company that designs and manufactures robotic mass storage devices. Cygnet products are provided exclusively to OEMs and VARs for system integration and value-added resale into global markets, primarily in image processing and mass data storage applications.

Cygnet Systems Inc. is located at 2560 Junction Ave., San Jose, Calif., 95134-1902.

MIAMI (OCT. 23) BUSINESS WIRE - North American Biologicals, Inc. (''NABI'') (NASDAQ:NBIO) Tuesday announced record unaudited results for the third quarter and nine months ended September 30, 1990.

Net sales for the third quarter ended September 30, 1990, increased 20% to $18,149,000 from $15,095,000 in the third quarter of 1989. Income before income taxes and extraordinary credit rose 57% to a record $847,000, up from $539,000 in the quarter ended September 30, 1989.

Net income for the quarter was a record $665,000 or $.04 per share, up from $509,000 or $.03 per share in the comparable period last year.

For the nine months ended September 30, 1990, sales rose to a record $55,438,000, up 29% from $42,887,000 in the first nine months of 1989. Income before income taxes and extraordinary credit increased 155% to a record $2,210,000 from $865,000 in the comparable period of 1989. Net income was a record $1,736,000 or $.11 per share, up from $810,000 or $.05 per share in the nine months ended September 30, 1989.

North American Biologicals, Inc. is the largest independent provider of human blood plasma elements to the health care industry worldwide. The company collects, processes, tests and distributes human-blood-related products, markets clinical diagnostic testing services, and manufactures and distributes diagnostic products.

BASKING RIDGE, N.J. (OCT. 23) BUSINESS WIRE - AT&T Tuesday announced it will make it easier for Americans to call Armenia by installing a 5ESS gateway switch, a satellite earth station, credit-card pay phones, and electronic billing systems in the Soviet Republic.

The 5ESS switch, which is expected to be in service by mid-1991, will enable Americans to direct dial into Armenia. AT&T also announced it has received a $5 million order from Poland to install a digital radio link between Warsaw, Psary and Katowice.

The 5ESS gateway switch for Armenia will connect the local phone network into the international network. Currently the only gateway switch in the USSR is in Moscow. The total value of the equipment for Armenia, which will be supplied by AT&T Network Systems International BV (AT&T NSI), is about $6 million.

AT&T has also reached an agreement with the Ministry of Telecommunications of Armenia to establish direct international communications service between the U.S. and Armenia. There are over 300,000 people living in America who have family ties to Armenia.

''This agreement represents an important step forward in meeting the growing demand of both U.S. industry and the large Armenian community living in the U.S. to have direct communications service with Armenia,'' said Art Pencek, Managing Director of AT&T's International Communications Services for Eastern Europe and the USSR.

The order for Poland was placed by Electrim (the Polish foreign trade organization for electrical equipment). It includes the provision of radio transmission equipment and 12 repeater stations, as well as the conversion to digital operation of the satellite earth station in Psary.

The Polish radio link, to be completed in the first quarter of l991, will be connected to the 5ESS international gateway switch in Warsaw that was delivered by AT&T earlier this year.

WILLOUGHBY, OH (OCT. 23) BUSINESS WIRE - Figgie International Inc. has announced the appointment of Owen G. Stout as president of Snorkel-Economy, St. Joseph, Missouri, effective November 1, 1990. Snorkel-Economy is the world's largest manufacturer of industrial work platforms, scissorlifts and aerial platforms as well as boom water towers for firefighting.

Mr. Stout replaces Arthur D. Moore, who is retiring after 31 years as president of Snorkel-Economy. Mr. Stout will report to Charles B. Miner, group vice president.

Mr. Stout most recently was president of Figgie International's Logan Co. division, Louisville, Kentucky.

He previously spent 20 years with ''Automatic'' Sprinkler Corporation of America, Cleveland, a Figgie International division that designs and installs fire protection systems. At ''Automatic,'' Mr. Stout served in the positions of vice president of fire protection systems, director of contracting, manager of nuclear power services, national construction superintendent, manager of contract operations and sprinkler fitter foreman.

Mr. Stout attended Detroit College of Business and served in the U.S. Army from 1965 to 1967.

Figgie International Inc. is a diversified Fortune 500 operating company serving consumer, industrial, technical and service markets worldwide. Sales in 1989 were $1.3 billion.

FORT WORTH, TX (OCT. 23) BUSINESS WIRE - Tandy Corp. announced Tuesday that consolidated sales and operating revenues for the first quarter of fiscal 1991 were $1,090,286,000, an increase of 11 percent over the year earlier sales and operating revenues of $985,977,000.

Net income per average common share for the first quarter of fiscal 1991 was 65 cents, compared to 73 cents, reported for the year earlier period. Net income for the three months ended Sept. 30, was $52,243,000 compared to $62,754,000 in the same quarter of the prior year.

John V. Roach, chairman and CEO commented, ''Given the uncertain retail environment in the wake of the Middle East crisis, we began to clear Radio Shack's inventories of certain discontinued consumer items and computer models prior to the holiday selling season. Clearance sales of these discontinued items were strong and negatively influenced gross margin and earnings in the period.''

MONTVILLE, NJ (OCT. 23) BUSINESS WIRE - The "Segri-Gator" will change forever methods of transporting and disposing of asbestos-containing material waste.

ADA (Asbestos Disposal Agency Inc.) introduced at the New York/New Jersey Environmental Expo, Oct. 16-18, the most advanced, environmentally safe, cost-effective "reduced pressure" containerization system ever designed for the transportation and disposal of asbestos waste.

Reactions to the Segri-Gator by contractors, transporters, consultants, and laboratory supervisors were unanimously positive. Contractors were impressed with the features of the Segri-Gator such as its tough hide, its evacuation port along with its nesting and stacking capability.

Consultants immediately saw the Segri-Gator as the definitive answer to temporary storage of ACM waste on site. They were also impressed with the ability of the Segri-Gator to allow movement of ACM waste through buildings and utilizing elevators without possible contamination or fiber release episodes.

Laboratory supervisors were impressed with the Segri-Gator as a secure storage container for ACM bulk samples which now pose a serious storage problem for their operations. Transporters liked the high packing efficiency possible with the Segri-Gator and the elimination of sloped and shifted loads.

New Jersey-based ADA Inc. reports that the "Segri-Gator," the trademark name for its patent pending container, will transport asbestos waste from its origin to a disposal site without risk to the public or the environment.

The system can be used in conjunction with truck trailers, railroad cars, airplane compartments, sea lane, or any mode of transportation used to move ACM to the asbestos waste monofill.

Unlike conventional transportation of asbestos, the Segri-Gator prevents any release of asbestos since bags are placed in airtight and leakproof, reduced-pressure containerization chambers that act as secondary containment.

In addition, the Segri-Gator takes the necessary steps to comply with Bill H.R. 3386 which prohibits transporting of asbestos or any infestious wastes except in a motor vehicle which is used only to provide transportation of asbestos or infestious waste.

The Segri-Gator, which is a state-of-the-art secondary chamber completely isolates its waste form the interior of a vehicle which insures no contamination of the vehicle interior.

MERIDEN, CONN (OCT. 23) BUSINESS WIRE - Cenvest Inc. (NASDAQ:CBCT), the bank holding company for Central Bank, First Central Bank and Meriden Trust & Safe Deposit Co., announced a loss for the quarter ended Sept. 30, 1990, of $3,635,000, or 93 cents per share.

The loss was due primarily to a special loan loss provision of $5,360,000 recorded in September after Cenvest recognized loan losses of approximately $5,475,000. The special provision was in response to continuing weakness in the Connecticut economy, particularly in commercial real estate.

During the same quarter last year, Cenvest reported a loss of $1,517,000, or 39 cents per share, which was also the result of an addition to the allowance for loan losses of $3,591,000.

For the nine months ended Sept. 30, 1990, the net loss was $10,592,000, or $2.71 per share, compared to net income of $603,000, or 15 cents per share, for the comparable period last year. During the second quarter of 1990, Cenvest recorded a special loan loss provision of $13,200,000.

At Sept. 30, 1990, Cenvest's allowance for loan losses was $16,054,000, or 2.20 percent of total loans, compared to $6,753,000, or 0.95 percent of total loans at Dec. 31, 1989, Cenvest's fiscal year end. Nonperforming loans increased to $43,614,000, or 5.98 percent of total loans at Sept. 30, 1990, compared to $14,836,000, or 2.09 percent at year end and nonperforming assets increased to $59,608,000, or 7.08 percent of total assets, compared to $23,192,000, or 2.78 percent at year end.

Total assets were $841,875,000 at Sept. 30, 1990, compared to $835,194,000 at Dec. 31, 1989. Cenvest's capital at Sept. 30, 1990, was $58,352,000, or 6.93 percent of total assets. Cenvest's primary capital was $74,406,000, or 8.67 percent of total assets at Sept. 30, 1990. Primary capital, as defined by the Federal Reserve Board, is shareholders' equity plus the general loan loss allowance. Primary capital on Dec. 31, 1989, was 9.14 percent of total assets.

Cenvest banks serve the central Connecticut area with 16 branches in 11 cities and towns.

COLUMBUS, OH (OCT. 23) BUSINESS WIRE - Max & Erma's Restaurants Inc. (NASDAQ: MAXE) announced Tuesday that its board of directors has increased the amount authorized for repurchase of its common stock from $1.0 million to $1.5 million.

Additionally, the company announced it has purchased approximately 53,000 shares and signed an agreement to redeem 303,000 shares and warrants to purchase 100,000 shares from Raymond D. Schoenbaum, a member of the company's board of directors from July 1987, until resigning Oct. 16, 1990, for personal reasons.

Todd B. Barnum, chairman and chief executive officer, thanked Schoenbaum for his significant contributions to the company. He said Schoenbaum's input will be deeply missed.

After completion of the transaction with Schoenbaum, Max & Erma's will have approximately 2,840,000 shares outstanding. Over the past 52 weeks, Max & Erma's stock has traded between 8-1/2 and 3-1/4 and closed Monday, Oct. 22, at 3-7/8. Barnum added that the remaining $250,000 authorized for repurchase of common stock will be used if the company's shares continue to be undervalued.

#90296b0772 10/23/1990 ~Business Wire

RYE, NEW YORK (OTC. 23) BUSINESS WIRE - Melville Corp., specialty retailer of a apparel, footwear, prescription drugs, health and beauty aids, toys and household furnishings, Tuesday reported sales and net earnings for the third quarter and nine months ended Sept. 29, 1990.

The company completed two significant acquisitions during the third quarter. On Aug. 17, 1990, the acquisition of the operating assets of Circus World Toy Stores Inc. was completed.

Peoples Drug Stores Inc. was acquired on Sept. 17, 1990. Both of these acquisitions were accounted for using the purchase method. The post-acquisition operating results have been included in the company's results for the third quarter and nine months ended Sept. 29, 1990.

For the third quarter ended Sept. 29, 1990, consolidated net sales increased 10.5 percent to $2,023,033,000 as compared to $1,830,658,000 last year. Net earnings for the third quarter of 1990 were $64,272,000, or 59 cents per share as compared to net earnings of $74,111,000, or 62 cents per share for the third quarter last year. The third quarter of 1990 was unfavorably impacted by one less selling day than the comparative prior year period. Excluding the sales of the third quarter acquisitions, sales have increased 8 percent during the third quarter of 1990.

Consolidated net sales for the nine months ended Sept. 29, 1990 were $5,590,067,000, an 11 percent increase over net sales of $5,035,025,000 for the nine months ended Sept. 30, 1989. Net earnings for the first nine months of 1990 amounted to $150,333,000 as compared to $159,067,000 for the first nine months of 1989.

Net earnings per share for the nine months ended Sept. 29, 1990 was $1.35 as compared to $1.40 last year. Sales and operating results generated from assets held for sale have been excluded and are not material to the

consolidated results.

Melville specialty retail chains, with stores located across the country, include Marshalls, the off-price brand name apparel chain; Chess King, the young men's apparel chain; Wilsons, in leather apparel; Bob's, the casual family apparel and footwear chain; Accessory Lady, the quality fashion accessory stores; CVS and Peoples, the prescription drugs, health and beauty aids chain; Freddy's, the ''deep discount'' drug and sundries stores; Thom McAn, Fan Club and the Meldisco Leased Department division in footwear; the Kay-Bee toy chain; Linens 'N Things, the brand name linens and domestics chain; This End Up, the casual furniture stores; and Prints Plus, the prints and wall decor stores.

LONDON (OCT. 23) BUSINESS WIRE - Brian Garraway, Deputy Chairman of B.A.T Industries, will join the Board of Allied Dunbar as executive chairman.

Brian Garraway's appointment follows the announcement that Sir Mark Weinberg, who has been non-executive chairman of Allied Dunbar since January 1989, wishes to pursue other options.

Sir Mark said, ''I am immensely proud to have led the original team that founded Allied Dunbar, and immensely proud of how Allied Dunbar has developed into a major part of the financial services industry of this country.

''The time has come to recognize that, as the Company has grown in size and importance, the vision of the founders has evolved into a vision that is the property of the management as a team and of the members of the Company's staff and sales force as a whole. This makes it a good moment for me to bow out.

''I wish them every success and look forward to seeing Allied Dunbar continue to prosper in the future.''

Mike Wilson will continue as chief executive until the end of December 1990 and then act as a consultant to Brian Garraway, on Allied Dunbar business, until the end of July 1991.

Allied Dunbar's new executive chairman, Brian Garraway, will continue to be the Deputy Chairman of B.A.T Industries and a member of the Chairman's Policy Committee (CPC), the key strategic and executive body of the B.A.T Industries Board. He will remain responsible to Pat Sheehy, Executive Chairman of B.A.T Industries, for the strategic development of the Group's activities in financial services.

#90296b0776 10/23/1990 ~Business Wire

ILLIOPOLIS, ILL. (OCT. 23) BUSINESS WIRE - Borden Chemicals and Plastics Limited Partnership (NYSE: BCP and BCU) Tuesday announced a cash distribution of 53 cents per preference unit and enhanced common unit for the third quarter of 1990.

The increase over the 50 cent cash distribution for the same period last year reflected stronger industrywide demand for polyvinyl chloride (PVC) resins versus last year's quarter.

The distribution was declared at a meeting of the Board of Directors of BCP Management, Inc. (BCPM), the General Partner of the Partnership, and is payable November 12 to unitholders of record November 2.

The Partnership reported revenues of $101.7 million and net income of $11.7 million for the three-month period ended September 28, 1990, versus $103.4 million and $11.0 million, respectively, in the third quarter of 1989. After the General Partner's interest, net income per unit was 31 cents, compared with 30 cents in the same period of 1989.

The cash distribution declared exceeds earnings for the quarter primarily due to depreciation, a noncash expense, which when added back to earnings, results in higher cash flow and more cash available for distribution.

Borden Chemicals and Plastics Limited Partnership was formed to acquire and operate Borden, Inc.'s basic chemicals and polyvinyl chloride resins business and assets at Geismar, Louisiana, and Illiopolis, Illinois, and began operations on November 30, 1987. Borden, Inc. retains an ownership interest of two percent and serves as General Partner; publicly traded units account for 98 percent ownership.

FORT LAUDERDALE, FL (OCT. 23) BUSINESS WIRE - Encore Computer Corp. announced Tuesday its intention to make OSF/1 available on its Multimax family of shared-memory multiprocessor systems.

In November 1989, Encore and OSF announced a strategic relationship in which Encore would provide its implementation of Mach and would work with OSF to provide a fully parallelized version of OSF/1. Encore worked with OSF to parallelize the 4.4 BSD file system, NFS, terminal handling, security, and other portions of OSF/1.

Additionally, Encore's Multimax computer system was chosen as the reference symmetric multiprocessing (SMP) port for OSF/1. Based on this endorsement by the OSF of Encore's leading multithreaded operating system technology, Encore has been actively involved in supplying reference machines to the OSF member companies for use in the development of their own versions of OSF/1.

On July 18, Encore delivered to the OSF the final implementation of the parallelized OSF/1 kernel making possible the release of OSF/1 in November. Encore is pleased to have been associated with OSF during this critical development period and looks forward to further strategic partnerships with OSF in the future.

It is Encore's intention to make available during early 1991 a significantly enhanced research environment based on OSF/1 on its high-performance Multimax platform.

According to Jim Spoerl, Encore's director of UNIX Product Management, "This is one mechanism that allows Encore to transfer our strategic and long-term investment in Mach, OSF/1, and parallel processing technology to our customer base.

"Encore's ivnestment of over a hundred man years in the research and development of multithreaded operating systems, networking, parallel languages and development environments, thus will be directly available to Encore's Multimax customers.

"Encore's enhanced OSF/1 will be offered as an 'Advanced Technology Research Product,' and it is intended to provide an evolving computational environment for many of Encore's 4.3 BSD customers in the academic, research, and government areas. In many cases, this will constitute a direct fulfillment of the request of our BSD customers for advanced technology."

"Now, due to this strategic relationship with OSF, Encore will be able to offer researchers in high-performance computing a state-of-the-art parallel and distributed operating system, network, tools, and an advanced development environment.

NORWOOD, MA (OCT. 23) BUSINESS WIRE - Phoenix Computer Products Inc., a subsidiary of Phoenix Technologies Ltd., Tuesday announced the availability of the PC User Guide with Diagnostics.

The PC User Guide was developed for resellers and manufacturers of PC-compatible systems to address their customers' demands for quality, well-written product documentation. It is a complete technical reference manual containing hardware diagnostic software. The User Guide comprehensively reviews all components and operations of PC, XT, and 286/386 AT compatible systems.

''Since most branded systems come with complete documentation and diagnostics, the PC User Guide offers resellers, system integrators, and manufacturers an important product that helps them achieve a degree of parity with the larger branded vendors. Together with the PhoenixBIOS and packaged MS-DOS, the Phoenix PC User Guide enhances the value of a PC-compatible system. In addition, diagnostic software is fast becoming an essential tool for today's PC user,'' said Howard Marson, product manager of Phoenix Computer Products Inc.

The diagnostic and utility software bundled with the PC User Guide includes: hardware diagnostics for testing system board components, ports, disk drives, and I/O devices; Phoenix Control Center with disk cache, environment testing performance metrics and system analysis; and additional Phoenix utility software, such as UnDelete, AT Setup, low-level formatter, and external floppy driver.

''The Phoenix PC User Guide and Diagnostics is a key, value-added feature of my compatible system offering. We believe users have a right to expect complete documentation and diagnostics when they purchase a PC-compatible system. But, since most vendors don't typically include this as part of their product offering, we have a definite competitive advantage. The Phoenix name has added an important measure of brand name recognition to my offering,'' said Steven Wagstaff, president of Ares Microdevelopment, a PC-compatible manufacturer located in Farmington Hills, Mich.

Phoenix Computer Products Inc. is a wholly owned subsidiary of Phoenix Technologies Ltd. (NASDAQ: PTEC), the compatibility products company, famous for its Phoenix ROM BIOS. While Phoenix Technologies specializes in developing and licensing compatibility products directly to OEM customers, Phoenix Computer Products' focus is on distributing and marketing systems software, packaged MS-DOS, and operating system enhancement products to PC-compatible manufacturers, integrators and resellers.

RIVER GROVE, IL (OCT. 23) BUSINESS WIRE - Major League Baseball has designated Wilson fielder's gloves and mitts as the ''official gloves'' of Major League Baseball.

As part of the exclusive endorsement, Wilson professional model baseball gloves will be included among merchandise offered in MLB's prestigious Authentic Diamond Collection.

Nearly 250 Major League Baseball players currently use Wilson model gloves, including Barry Larkin, Roger Clemens, Kirby Puckett, Kirk Gibson, Shawon Dunston, Kevin McReynolds, Dave Righetti and George Brett.

Beginning next spring, Wilson will feature the MLB and individual team logos on selected professional and retail gloves. Wilson will also market MLB-endorsed glove-leather office accessories such as desk folders, attache cases and baseball card binders, and a line of director's chairs featuring individual team colors and logos.

''The success of our NFL licensed product line spearheaded the drive to establish similar products for Major League Baseball,'' said Dennis Grapenthin Wilson's director of special markets. ''It's no secret that there is a certain executive prestige connected to briefcases manufactured from actual football or baseball glove leather.''

Wilson Sporting Goods Co., the largest sporting goods company in the United States, is based in River Grove. The company designs, manufactures and distributes sporting goods throughout the world. Wilson is a market leader in golf, racket and team sports.

ATLANTA (OCT. 23) BUSINESS WIRE - Atlantic Southeast Airlines Inc. (NASDAQ/NMS:ASAI) Tuesday reported net income of $6.8 million for the third quarter ended Sept. 30, 1990, compared with $8.0 million for the quarter ended Sept. 30, 1989.

Net income per share was 58 cents on 11.6 million average shares outstanding for the third quarter 1990 compared with 66 cents per share on 12.0 million average shares outstanding for the same period of 1989.

For the nine months ended Sept. 30, 1990, net income was $21.0 million, or $1.79 per share, compared with $22.8 million, or $1.87 per share, for the similar period in 1989.

Revenues for ASA's third quarter and nine months ended Sept. 30, 1990, were $47.9 million and $141.1 million, respectively, compared with $46.8 million and $134.8 million in the similar periods of 1989.

Third quarter 1990 results were affected by a 23.7 percent increase in the per gallon price of jet fuel and a $1.8 million write-down of assets associated with the phase-out of an aircraft type, offset by the receipt of a $2.0 million sales tax refund.

Atlantic Southeast Airlines Inc. is Atlanta's largest regional air carrier, and now offers service to 15 cities from a second hub in Dallas/Fort Worth, Texas. ASA's stock is traded in the National Market System under the NASDAQ symbol ASAI.

#90296b0809 10/23/1990 ~Business Wire

HOUSTON (OCT. 23) BUSINESS WIRE - Seitel Inc. (AMEX: SEI) Tuesday reported record revenues and earnings for the third quarter and nine months ended Sept. 30, 1990.

Revenues for the quarter ended Sept. 30, 1990 reached an all-time third quarter record of $5,669,922, a 63 percent increase over third quarter 1989 revenues of $3,472,246.

Net income for the 1990 quarter increased 99 percent to $1,184,888, or 23 cents per fully diluted share, compared with 1989 third quarter net income of $595,778, or 14 cents per fully diluted share.

The increase in net income per share was even more significant since there was an increase in the weighted average number of fully diluted shares outstanding from 4,361,429 in the 1989 quarter to 5,128,734 in the 1990 quarter.

Revenues for the first nine months of 1990 were a record $16,523,088, a 43 percent increase over revenues of $11,577,673 reported for the first nine months of 1989. Net income for the first nine months of 1990 increased 72 percent to $3,361,600, or 71 cents per fully diluted share (4,714,477) compared with $1,954,887 or 46 cents per fully diluted share (4,247,843) in 1989.

Paul A. Frame, Seitel's president, said: ''Seitel's ability to create a library of high quality data in active exploration areas has been recognized by our clients in the form of strong library sales as well as new funding of data creation projects.

''Our data library, created to allow for lower-risk, more cost-effective exploration for hydrocarbon reserves, has continued to perform for our shareholders.

''Client confidence in our geophysical and marketing ability has allowed us to continue data creation at an aggressive rate, positioning Seitel to take advantage of conditions prevalent in the industry both now and in the future.''

Seitel Inc. is engaged in the development of a proprietary seismic data library and arranging the creation and marketing of seismic data.

The analysis of seismic data for the identification and definition of underground geological structures is a principal technique used in oil and gas exploration to determine the existence and location of subsurface hydrocarbons.

NEW YORK (OCT. 23) BUSINESS WIRE - In response to Disney's announcement Tuesday of its plans to go forward with Yamaichi Securities Co. Ltd. on a film financing joint venture related to Disney's 1991 film productions, Roland W. Betts, president and founder of Silver Screen, stated:

''During the past six years, Silver Screen has built sturdy, equitable parnership structures that have produced some 75 feature films and that have been profitable and fun for our investors. Today there are 140,000 Silver Screen investors across America -- roughly the same number as Disney shareholders -- who have invested in excess of $1 billion in Silver Screen.''

Tom A. Bernstein, executive vice president of Silver Screen, added: ''The Silver Screen/Disney relationship has been a true partnership -- serving both companies well. However, the difficulties faced by Hollywood today, including rapidly escalating film budgets and talent participations, made it impossible for us to come to terms with Disney on a new Silver Screen offering. While we regret that the investing American public will not have the opportunity to continue its partnership with Disney at this time, we take pride in our achievements over the past six years.''

#90296b0817 10/23/1990 ~Business Wire
DALLAS (OCT. 23) BUSINESS WIRE - Centex Corp. (NYSE:CTX) Tuesday announced financial results for the second quarter and first six months of the company's 1991 fiscal year.

Dallas-based Centex, has operations in home building and mortgage banking, general construction, construction products and savings and loans.

For the quarter ended September 30, revenues reached $601,921,000, a record for any quarter and a 15 percent increase over $521,312,000, for the same quarter in the previous fiscal year. Net earnings for the quarter were $14,600,000, a 7 percent decline from $15,644,000 for the same quarter a year ago.

Earnings per share for the current quarter were 95 cents, 6 percent less than $1.01 last year.

For the current six months, corporate revenues totaled a record $1,167,835,000 up 18 percent from $985,940,000 for the same period in fiscal 1990. Net earnings for the current period reached an all-time high of $31,070,000, one

percent higher than $30,909,000 for the same period a year ago.

Net earnings for the current six months were $2 per share compared to $2.01 per share for the same period last year, due to a slight increase in the number of shares outstanding.

Revenues from Centex's home building and mortgage banking business were a record $303.5 million for the current quarter, 20 percent higher than $253.3 million for the same quarter last year. Operating earnings from home building and mortgage banking were $24.8 million for the current quarter, an 11 percent increase over $22.3 million a year ago.

Home building and mortgage banking revenues rose 27 percent to a record $580.9 million for the current six months from $456.8 million for the same period last year. Operating earnings from this business reached an all-time high of $50.7 million in the current period, 20 percent above $42.4 million reported for the similar period a year ago.

Home closings for the current quarter were 2,220 units, a 12 percent increase over 1,991 units for the same quarter in fiscal 1990. Closings for the six months reached 4,241 units, 17 percent higher than 3,640 units for the same period a year ago. The backlog of units sold but not closed at September 30, 1990 was 2,674 units, 11 percent below 3,012 units at September 30, 1989.

General construction revenues were $241.4 million for the current quarter, 14 percent higher than $212.6 million for the same quarter last year. Operating earnings from general construction were $2.8 million, down 10 percent from $3.1 million for the same quarter a year ago.

Revenues from general construction were $476.5 million for the current six months, 13 percent higher than $422.7 million for the six months a year ago. Operating earnings from general construction were $5.8 million, 17 percent less than $7 million for the same period last year. The backlog of uncompleted construction cnntracts at September 30, 1990 was $1.030 billion, 3 percent higher than $1.001 billion at September 30, 1989.

Construction products revenues were $44.1 million for the quarter, 12 percent higher than $39.5 million for the same quarter in fiscal 1990. Operating earnings from construction products were $2 million for the current quarter, 60 percent below $4.8 million for the same quarter last year.

Revenues from construction products were $84.6 for the current six months, up 13 percent from $74.9 million for the same period in the prior fiscal year. Operating earnings from construction products were $4.6 mlllion for the current period, a 47 percent decline from $8.5 million for the similar period last year.

Savings and loan revenues were $12.8 million for the current quarter, 19

percent below $15.8 million for the same quarter last year. Operating earnings from the savings and loan were $544,000 compared to $130,000 for the same quarter a year ago.

Revenues from the savings and loan were $25.8 million for the current six months, down 18 percent from $31.6 million for the same period in fiscal 1990. Operating earnings from the savings and loan were $813,000 for the current period vs. $186,000 for the same period last year.

#90296b0819 10/23/1990 ~Business Wire

WAUKESHA, WI (OCT. 23) BUSINESS WIRE - Electronic Tele-Communications Inc. announced its highest earnings in over three years for both the quarter and the first nine months of 1990.

Net income for the nine months ended Sept. 30 was $444,125, or $.21 per Class A common share, compared to $120,639 or $.07 per share for the first nine months of 1989. Net income for the third quarter was $217,720 or $.10 a share vs. $34,869 or $.02 for the third quarter of 1989. Net sales for the three and nine month periods of 1990 were $3,130,889 and $9,440,934, respectively, compared to $3,256,383 and $6,777,103 for the comparable periods of 1989.

Dean Danner, President of ETC, said, ''Demand for our products continues to be strong and we anticipate continued healthy sales and earnings growth in the coming quarters. Our new systems like the AIRO, System 3, and Intr-Act, are moving Electronic Tele-Communications into new markets and strengthening our position in the expanding voice information industry.''

Danner continued, ''ETC is now realizing significant savings from the full integration of operations resulting from the acquisition of The Audichron Company last year. Earnings from operations for the first nine months of 1990 were $950,595 compared to $350,883 for the same period in 1989.''

Electronic Tele-Communications is a leading domestic manufacturer of digital voice information systems. Its equipment, compatible with most telephone systems, provides a wide range of audio information via the telephone network. These systems interface with customer computer systems to provide voice access to computerized information. Time, temperature, road conditions, stock prices, repair status and other types of information are examples of the wide range of services ETC equipment provides. ETC systems can also announce new and old telephone numbers, flexible pay telephone charges, class of service announcements, and service specific customer dialing information. Manufacturing, engineering, and marketing operations are located in Waukesha and Atlanta. A regional sales office is located in Fairfax, Calif.

#90296b0822 10/23/1990 ~Business Wire

NEW YORK (OCT. 23) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) announced Tuesday that the Filipino Supreme Court upheld the authority of the National Telecommunications Commission (NTC) to grant permission to Express Telecommunications Co. (EXTELCOM), a subsidiary of Millicom Inc., to operate its cellular telephone network in the Philippines and to interconnect with the Philippine Long Distance Telephone Co. (PLDT).

The decision dismissed the petition filed by the PLDT which questioned the provisional authority granted by NTC to EXTELCOM to operate mobile telephone service in metro Manila. By ruling in favor of the NTC, the Supreme Court said the commission is the regulatory agency of the government with jurisdiction over all telecommunications entities.

The majority decision of the Supreme Court noted, ''Despite the fact that there is a virtual monopoly of the telephone system by the PLDT in the country at present, service is sadly inadequate. Customer demands are hardly met, whether fixed or mobile. There is a unanimous cry to hasten the development of higher quality telephone service ... Free competition in the industry may provide the answer ... and reduce user dissatisfaction.''

Millicom's Chairman and CEO, J. Shelby Bryan comments, ''We are now in the process of arranging interconnect with the PLDT, which will enable us to provide modern, efficient, and continuous telecommunications service to the citizens of the Philippines.''

Millicom Inc., is a diversified, international telecommunications company with its main interests in radio telephony, alphanumeric paging, and satellite television.

#90296b0838 10/23/1990 ~Business Wire

NEW YORK (OCT. 23) BUSINESS WIRE - Foster Wheeler Corp. Chairman and President Louis E. Azzato, speaking to a group of investment analysts Tuesday, said he expected third quarter earnings for the corporation to be in the range of 20 to 25 cents per share, which will result in estimated nine-month earnings of 75 to 80 cents per share.

''Our nine-month financial results should show a significant improvement over the same period in 1989,'' Azzato noted. For the third quarter of 1989, Foster Wheeler reported earnings of 17 cents per share, and 68 cents per share for the nine month period.

Foster Wheeler will issue full third quarter results on Monday, Oct. 29.

''Our backlog is estimated to be $2.45 billion, which will be the highest in our history,'' Azzato said. This compares with $1.444 billion for the similar period last year. ''New bookings for the nine-month period of this year are estimated at $2.1 billion,'' he noted, ''compared to $1.233 billion at the end of the third quarter last year.''

Looking forward to the end of the year, Azzato said he anticipated net earnings of $37 million to $40 million for 1990, up some 10 to 20 percent from last year's net earnings of $33.6 million.

Similarly, he estimated year-end revenues to be about $1.750 billion, up 35 percent from 1989's $1.293 billion; 1990 bookings of $2.8 billion, up 64 percent from $1.712 in 1989; and a year-end backlog of $2.6 billion, up 62 percent from last year's $1.604 billion.

Foster Wheeler Corp., is a worldwide organization offering a broad range of design, engineering, construction, manufacturing, management, real estate development and environmental services. The corporation's headquarters are at Clinton, N.J.

#90296b0840 10/23/1990 ~Business Wire

CHICAGO (OCT. 23) BUSINESS WIRE - Amoco Oil Co. Tuesday decreased its wholesale gasoline, heating oil, and diesel fuel prices to dealers and jobbers in many markets by as much as 5 to 6 cents per gallon, the company said Tuesday.

Amoco's 30-state average wholesale gasoline price decreased 1.25 cents per gallon today, while the average price of heating oil and diesel fuel fell 5.3 cents.

''Our price moves today reflect competitive pressures and lower crude oil costs,'' said Robert J. Rauscher, Amoco's marketing vice president. ''We said at the time of rapidly rising prices that we were being responsive to the market, and the same holds true now.''

While several cities saw Amoco reduce gasoline prices by less than 1 cent per gallon, and several markets saw modest increases, Amoco's gasoline price decreases included 1-cent drops in Milwaukee, the Twin Cities, St. Louis, and Chicago; 2 cents in Des Moines; 3.5 cents in Cedar Rapids; and 5 cents in Richmond, Va., and Charleston, S.C.

Amoco's heating oil and diesel fuel prices declined 5 cents per gallon in Detroit, Nashville, and Fairfax, Va., and 6 cents in Chicago.

Factors leading to the price reductions include lower competitive wholesale prices, strong product inventories, and falling crude oil prices. However, there were no price decreases in many major markets where gasoline prices had not gone up nearly as much as crude oil.

''We have witnessed extraordinary volatility in world oil markets based on tensions in the middle east,'' Rauscher said. ''No one can predict the outcome of events in that troubled part of the world.

''Crude oil price increases consistently have exceeded gasoline price increases, and at its peak, crude oil had increased 55 cents per gallon since July 1,'' he said. ''Amoco's average wholesale gasoline price increase over the same period has been only 29 cents. While we have been in a substantially underrecovered position during most of that time, our policy of responding to the competitive pressures of the marketplace has not changed.''

#90296b0845 10/23/1990 ~Business Wire

GREENVILLE, S.C. (OCT. 23) BUSINESS WIRE - American Federal Bank (NASDAQ:AMFB) announced Tuesday third quarter net income of $3.7 million or 44 cents per common stock equivalent assuming full dilution, compared with $520,000 or 13 cents per share in the third quarter a year ago.

Net income for the first nine months of 1990 was $5.7 million compared to $3.7 million in the first nine months of 1989. Earnings per common stock equivalent assuming full dilution for the 1990 period were 78 cents.

No comparable per share amount is available for the first nine months of 1989 since the bank did not become a public stock company until Jan. 26, 1989. Earnings per share from Jan. 26 to Sept. 30, 1989 were 74 cents.

Earnings for the third quarter of 1990 were affected by the sale of 25 Finance South branch offices and related loans receivable. Finance South is the bank's consumer finance subsidiary. Roy Abercrombie, president and chief executive officer, said, ''This transaction resulted in an after-tax gain of $2.7 million in the third quarter on the sale of only 2 percent of our assets.

''Because this line of business has been so successful, we are going to continue the Finance South operations,'' Abercrombie said. ''A new office has been opened in Williamston and additional offices are planned for the near

future. The bank's future earnings will, however, be reduced somewhat while we rebuild the Finance South portfolio.''

Third quarter net income without the gain on sale was nearly twice that of the third quarter a year ago, due primarily to higher fee income, continued control of operating expenses, and reduced interest expense from the conversion of subordinated debentures into preferred stock earlier in 1990.

''Loan volumes for the first nine months of the year have been in line with the bank's projections for modest growth,'' Abercrombie said. ''Upstate South Carolina is beginning to experience a softening in loan demand.

''Like other financial institutions around the nation, we are seeing an increase in nonperforming loans,'' he said. Total nonperforming loans increased to $19.4 million at Sept. 30, 1990 compared to $12.6 million at Dec. 31, 1989.

''Residential loans account for 44 percent of nonperforming loans and have historically experienced virtually no loss. The allowance for possible loan losses at Sept. 30, 1990 was $6.0 million or 31 percent of total nonperforming loans.

''Weakening economic conditions suggest the need for extra caution in recognizing problem assets,'' Abercrombie said. ''In order to preserve quality, we are classifying loans in the nonperforming category and taking charge-offs at an earlier stage.''

The provision for possible loan losses was $4.5 million for the first nine months of 1990 compared with $2.8 million for the like period in 1989. Charge-offs in the first nine months of 1990 have been $4.5 million compared to $3.8 million for the like period in 1989.

American Federal, whose common stock is traded on the over-the-counter market under the NASDAQ symbol AMFB, has $1.1 billion in assets and operates in eight counties of northwestern South Carolina.

LITTLETON, MA (OCT. 23) BUSINESS WIRE - Alliant Computer Systems (NASDAQ-ALNT) has filed a lawsuit with the U.S. District Court in Massachusetts against Honeywell Inc. and Alliant Techsystems Inc., a newly created subsidiary being spun off to Honeywell stockholders.

The suit is for trademark infringement and unfair competition. It seeks to prevent Alliant Techsystems from using the ''Alliant'' name. ''Alliant'' is a

federally registered trademark of Alliant Computer Systems Corp.

Alliant Techsystems, based in Minnetonka, Minn., is comprised of Honeywell's former defense and marine systems business, test instruments division and signal analysis center. Honeywell is in the process of distributing to its stockholders the shares of Alliant Techsystems' stock, after which Alliant Techsystems will be listed on the New York Stock Exchange (NYSE).

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

FITCHBURG, MA (OCT. 23) BUSINESS WIRE - Anthony Cetrone, president of Micron Products Inc. (ASE:PMR) announced that Kuno Laren, a controlling shareholder and chairman of the board of directors of the company, resigned from the board of directors as of today.

Laren had served as chairman of the board of the company for the past five years and as the president of the company during various periods between 1982 and 1990. He will continue to serve the company as a vice president.

Laren's son, Guy Laren, also resigned from the board of directors of the company on Oct. 23. Guy Laren has served as a director of the company since 1988. Laren and his son resigned from the board to allow a greater management role for other principal shareholders of the company.

The board of directors of the company elected Clifford R. Roth and Richard J. Emerine to fill the vacancies created by the resignations. Roth and Emerine are directors of American Consolidated Financial Corp. (''AmCo''), the parent company of AmCo Investment Co., a principal holder of the company's Class F Preferred Stock.

Effective Oct. 23, the board of the company elected Roth the chairman of the board and the chief executive officer of the company.

Cetrone added that Kuno Laren and his affiliates who jointly own approximately 41 percent of the outstanding common stock of the company, and AmCo Investment

Co., the owner of 45.5 percent of the shares of the company's Class F Preferred Stock, entered into a voting agreement under the terms of which each shareholder will vote all of the shares of the company's stock held by the shareholder for the election of the slate of directors nominated by the board at the annual meeting on Nov. 27, 1990 thereby confirming a change of control of the company.

Each shareholder also agreed to vote for the proposed amendment to the company's Articles of Organization to amend the terms of the Class F Preferred Stock to permit immediate conversion of the Class F Preferred Stock into 3,666,850 shares of common stock (58 percent ownership interest) of the company.

Previously conversion was conditioned by the requirement to register and list such common shares with the American Stock Exchange. Freiburghaus & Partners S.A. of Geneva, Switzerland, owner of 54.5 percent of the Class F Preferred Stock, indicated that it will also vote for the amendment.

DFW AIRPORT, TEXAS (OTC. 23) BUSINESS WIRE - American Airlines Tuesday announced a $100 million expansion program that will make its Caribbean hub at San Juan, Puerto Rico, nearly four times larger than it is right now.

Robert L. Crandall, the airlines's chairman and president, said the Phase II expansion of the San Juan hub will increase the total size of the facility from its present 260,000 square feet to more than one million square feet when construction is completed in about four years.

The project includes the development of a new passenger concourse, the creation of 10 additional wide-body gates -- increasing the terminal's total

capacity to 25 gates -- and the construction of a new customs and immigration facility capable of handling up to 5,000 passengers per hour.

Crandall said American and its regional airline partner, American Eagle, eventually may operate a total of as many as 200 flights a day from the San Juan hub, which was opened in 1986 as the focal point of the airline's Caribbean route network.

The Phase II expansion, announced by Crandall at a news conference in New York is on top of an existing expansion and improvement program at the hub that will be completed by December and includes an expanded Admirals Club, a larger customs facility and six new aircraft gates.

Elsewhere in the Caribbean, the airline is investing in an assortment of terminal expansion and improvement projects on several islands. These include a new terminal at St. Thomas, a new passenger concourse at Santo Domingo and expanded terminal facilities at St. Croix, St. Maarten, Puerto Plata, Montego Bay and Kingston.

''American is committed to growth and expansion in the Caribbean,'' Crandall said. ''The region has fully recovered from the effects of last year's hurricane. In fact, the Caribbean is better than ever -- once again one of the world's truly great resort and vacation destinations -- and American is expressing its confidence in the long-term future of the Caribbean basin by making substantial investments to improve and enlarge the San Juan hub.''

OAK BROOK, IL (OCT. 23) BUSINESS WIRE - McDonald's Corp. Tuesday announced record Systemwide sales, total revenues and net income for the nine months and third quarter ended Sept. 30, 1990.

This was McDonald's 102nd consecutive quarter of record year-to-year increases in operating results. Net income per common share rose 13 percent for the nine months and 14 percent for the quarter. Net income and Total revenues increased 11 percent for both periods. Systemwide sales grew 8 percent for the nine months and 9 percent for the quarter.

KEY HIGHLIGHTS	Nine Months Ended September 30			
(Dollars in millions, except			Increase	
per common share amounts)	1990	1989	$	Pct.
Net income per common share	$ 1.69	$ 1.49	.20	13
Net income	$ 616.1	$ 555.6	60.5	11
Total revenues	$ 5,050.6	$ 4,561.7	488.9	11

Systemwide sales	$13,938.8	$12,862.2	1,076.6	8

	Third Quarter Ended September 30			
			Increase	
	1990	1989	$	Pct.
Net income per common share	$ .67	$ .59	.08	14

Total revenues	$ 1,816.2	$ 1,631.8	184.4	11
Systemwide sales	$ 4,998.1	$ 4,587.7	410.4	9

OPERATING RESULTS

Systemwide sales represent sales by company-operated, franchised and affiliated restaurants. Increases in Systemwide sales for the nine months and third quarter were due to new restaurant expansion, higher sales by existing restaurants and stronger foreign currencies. U.S. sales were affected by marketing and promotional programs, as well as competition.

Sales outside of the United States continued to grow, reflecting increased market penetration and higher sales by existing restaurants. Expansion and marketing programs helped sales in Canada.

Sales in Europe were exceptionally strong as a result of accelerated expansion promotional programs, new products, and stronger foreign currencies in most countries. Sales in the Pacific were affected by weaker local currencies, partially offset by expansion and marketing efforts. In Latin America, sales trends were strong as a result of a greater number of restaurants and advertising programs.

Four of the six largest markets outside of the U.S.--Australia, Germany, England and France--reported double-digit sales increases on a local currency basis, with Canada and Japan growing at a slower pace. Many other markets--including Spain, Switzerland, Hong Kong, Taiwan, Brazil, and Mexico--continue to expand and increase market penetration. These markets recorded strong sales gains; as economies of scale are achieved over the next several years, these markets should be important contributors to consolidated profitability.

A total of 317 restaurants were added in the first nine months of 1990 (360 in 1989), including 159 outside of the United States (157 in 1989). An additional 342 restaurants were under construction at quarter-end (322 in 1989), including 163 outside of the U.S. (143 in 1989).

Company-operated restaurant margins for the nine months of 1990 were 17.9 percent of sales, compared to 18.1 percent in 1989. Third quarter margins were 18.6 percent in 1990, compared to 19.3 percent one year ago.

Increases in occupancy and other operating expenses as a percent of sales were partially offset by lower food costs in the quarter, and for the nine-month period, by lower food and labor costs. Franchised restaurant margins for the nine months were 83.0 percent of applicable revenues, compared to 83.7 percent one year ago. Third quarter margins were 83.4 percent in 1990, compared to 84.5 percent one year ago.

Margins in markets outside of the United States continued to improve. For the nine-month periods, markets outside of the United States contributed 49 percent and 24 percent of consolidated company-operated and franchised restaurant dollar margins, respectively, compared to 40 percent and 20 percent one year ago.

Increases in Other revenues--net were principally due to higher gains on sales of restaurant businesses ($44 million for the first nine months of 1990, compared to $30 million in 1989), higher gains on debt extinguishments and property dispositions.

Increases in general, administrative and selling expenses were due primarily to higher employee and advertising costs resulting from expansion around the world.

Increases in interest expense were attributable to higher average debt outstanding as a result of expansion, reinvestment and treasury stock purchases.

The effective income tax rate decreased to 35.8 percent for 1990, compared to 37.3 percent one year ago, primarily due to the realization of greater tax benefits related to certain foreign operations.

#90296b0867 10/23/1990 ~Business Wire

DALLAS (OCT. 23) BUSINESS WIRE - International Remote Imaging Systems Inc. (IRIS) reported further progress Tuesday on its revolutionary new multi-color image analysis technology applied to the differentiation of white blood cells at the joint fall meeting of the College of American Pathologists and the American Society of Clinical Pathologists.

Dr. Harvey Kasdan, IRIS vice president of Research and Development, described further development of this new way to differentiate white blood cells based on color expression of 2-methylpolymethine (2-MPM), a supravital metachromatic

stain.

Using the company's proprietary Automated Intelligent Microscopy (AIM) technology, Dr. Kasdan showed how a machine could automatically distinguish various immature white-blood cells using an extension of the special algorithms and new color parameters measured by AIM and used in the differentiation of the five major classes of white blood cells reported earlier this year.

Significantly simpler than conventional subjective morphological interpretation of size and nuclear details of Wright-Glemsa stained blood cells, the new IRIS method measures unique color expressions of cytoplasmic composition among different classes of cells.

For example, maturation of myelocytic cells is indicated by a transition from yellow to magenta to yellow coloration, with blast cells appearing pale yellow promyelocytes magenta, myelocytes deep brown and mature neutrophils deep yellow.

Dr. Kasdan expressed his belief that this application of AIM heralds the beginning of a new era in which 1,000 to 2,000 cell-based white cell differential counts can be obtained automatically in less than two minutes, while at the same time collection and display of images of immature white blood cells for technologist review becomes possible.

Such an instrument would obviate the need for manual preparation and examination of blood smears, a procedure which is the most time-consuming activity in many clinical laboratories today.

IRIS, a NASDAQ-listed Chatsworth, Calif. company, manufactures and sells The Yellow IRIS urinalysis workstation, an instrument based on its proprietary AIM technology, to clinical laboratories nationwide.

NEW YORK (OCT. 23) BUSINESS WIRE - Ogden Corp. (NYSE:OG), which owns approximately 68 percent of the outstanding shares of common stock of ERC Environmental and Energy Services Co. Inc. (NASDAQ:ERCE), has offered to acquire the remaining interest for a cash consideration of $14.75 per share.

Ogden's offer was communicated to the ERCE Board of Directors Tuesday.

ERCE has appointed a Special Committee of its Board of Directors, consisting of three non-management directors, to consider the fairness of the proposal to

the public stockholders of ERCE. If the Special Committee recommends acceptance of the offer, the proposed transaction will be submitted to the ERCE stockholders at a special meeting.

The favorable vote of 66-2/3 percent of the shares held by the public stockholders will be required to approve the transaction. Ogden's offer is also contingent upon the approval of a definitive merger agreement.

Ogden Corp. is a company engaged in providing operating, project and professional support services through subsidiaries. ERCE is headquartered in Fairfax, Va., and is engaged primarily in providing professional and technical services to the environmental, energy and infrastructure markets in the United States and abroad.

#90296b0883 10/23/1990 ~Business Wire

CLEVELAND (OCT. 23) BUSINESS WIRE - Centerior Energy Corp. (NYSE:CX) Tuesday reported third-quarter earnings of $99.7 million, or 72 cents per share, down 8 percent from $108.9 million, or 78 cents per share, for the third quarter of 1989.

The Northern Ohio electric utility holding company attributed the earnings decline to continuing reductions in operating cost deferrals and carrying charges; organizational restructuring costs; higher depreciation charges for nuclear units, and higher interest expenses resulting from additional financings.

The company has written off $49 million this quarter ($53 million in total) to cover pension and severance package enhancements for nearly 600 employees who elected early retirement and 45 who left under a severance program and to additional related restructuring costs. The remaining $4 million was expensed earlier. The $49 million charge in the third quarter was largely offset by a related pension settlement gain of $41 million resulting from many departing employees selecting lump sum, rather than monthly, payments.

The organizational restructuring was the outgrowth of a management audit which was completed this past spring and identified potential savings of nearly $100 million a year in operations and maintenance costs for Centerior's two subsidiaries, Cleveland Electric and Toledo Edison.

The salary and benefit savings associated with the restructuring will amount to $20 million in 1990 and a greater amount in future years.

In reporting third quarter results, Centerior noted the continuing improvement

in the quality of its earnings. The company's non-cash credits continue to decline and the cash component of its earnings continues to grow as electric rates increasingly reflect investments in two nuclear units, Perry 1 and Beaver Valley 2, both of which went in service late in 1987.

Third quarter revenues were up 6 percent from the 1989 third quarter, reflecting a 7 percent rate increase effective Feb. 1, 1990, slightly offset by a change in the mix of residential, commercial and industrial sales. Total kilowatt-hour sales remained level.

HOUSTON (OCT. 23) BUSINESS WIRE - Continental Airlines (AMEX:TEX) Tuesday announced it has restructured its senior management in tandem with reconfirming its primary goal of becoming a preferred global carrier.

At an Oct. 22 meeting, the board of directors took steps to ensure the company is well positioned to succeed in the face of higher fuel costs, including a streamlining of its senior management structure.

''With radically higher fuel costs, Continental must become a stronger competitor in the global marketplace. We have reaffirmed our intention to become a preferred airline among frequent travelers around the world,'' said Hollis Harris, chairman and chief executive officer.

Harris was given the additional role of president, replacing Mickey Foret who

will leave the company to pursue other interests.

As part of an effort to ensure that Continental's management structure is lean and efficient at a time when all airlines are facing unpredictable and unprecedented fuel costs, other management changes were announced.

Leaving the company will be Neal Meehan, senior vice president-customer services; Clark Onstad, senior vice president-properties and government affairs; Jim Arpey, senior vice president aircraft programs; and Elliott Seiden, vice president and associate general counsel for Continental Airlines Holdings Inc.

''These executives helped to grow Continental, and certainly deserve recognition for their ceaseless efforts here,'' Harris said. Thomas Kalil was named senior vice president-customer service, reporting to John Nelson, executive vice president-marketing.

Lewis Jordan, executive vice president and system general manager, was given additional responsibility for managing the company's international division. International division vice president Pete Runnette will report to Jordan.

''These actions position Continental with a lean and efficient management structure that reflects the realities of operating during this fuel crisis,'' Harris said.

#90296b0892 10/23/1990 ~Business Wire
POMPANO BEACH, Fla. (OCT. 23) BUSINESS WIRE - ROCK-A-BYE-BABY INC., a Pompano Beach-based manufacturer of proprietary infant care products, has arranged the sale of 100,000 shares of preferred convertible stock to a group of European investors.

The private placement, in which the firm was represented by the New York law firm of Gold & Wachtel, will generate $500,000 in working capital for the company when fully subscribed. If converted to common stock, the placement will represent 35 percent of ROCK-A-BYE BABY INC.'s issued common shares, which are traded over the counter.

Andrew Horn, president of the company, said proceeds from the sale are being used for operating capital, and to expand the company's product line. ''We have signed letters of intent on innovative new products and continue to look for others that complement our growth strategy.''

Last year ROCK-A-BYE-BABY acquired the rights to COMFY WIPE WARMER, a patented

warming device for baby wipes, and recently began marketing an improved edition of the product. In addition, the company has just introduced ROCK-A-BYE BUNNY, the new companion product to ROCK-A-BYE BEAR, its original natural audio pacifier.

Both COMFY WIPE WARMER and ROCK-A-BYE BUNNY were well received when previewed at the Juvenile Products Manufacturers Show in Dallas in October.

The firm's sales have climbed rapidly in the past 12 months and are running at an annualized rate of approximately $1 million.

OKLAHOMA CITY (OCT. 23) BUSINESS WIRE - Pit Stop Auto Centers Inc. (NASDAQ:PSAC) Tuesday announced a halt in negotiations for the acquisition of Grease Monkey Holding Corp. of Denver (NASDAQ:GMHC), citing failure to reach accord on key elements of the proposal.

The companies had announced a proposed acquisition of Grease Monkey Holding Corp. by Pit Stop Auto Centers on Sept. 24.

''We obviously would like to have made the Grease Monkey acquisition because we believed that with a combination of the two companies that capitalizing on our respective strengths would have allowed Grease Monkey to operate profitably again,'' said Tom E. Hays, president of Pit Stop Auto Centers.

''However, we must acquire them at a price that reflects their current financial situation. Anything else would not be fair to our shareholders. Because of the market conditions, our stock is selling below our book value. The Grease Monkey stock is selling at several times their book value, not based on any multiple of earnings. Therein lies the problem,'' said Hays.

''Pit Stop has the financial strength to continue to grow. We wish Grease Monkey's managment and shareholders the best of luck in the future.''

Pit Stop recently announced the successful acquisition of four quick oil change centers in the Phoenix area, and is currently negotiating for six additional sites in the same area.

#90296b0902 10/23/1990 ~Business Wire

MONTREAL (OCT. 23) BUSINESS WIRE - BCE Mobile Communications Inc. (TSE ME:BCX)(BCE Mobile) Tuesday announced its unaudited consolidated operating results for the third quarter of 1990.

Consolidated revenues for the three months ended Sept. 30 were $81 million, an increase of some 29 percent over the figure for the same period last year. For the nine months, the figure was $236.8 million, up 37 percent from one year ago.

Bell Cellular Inc., a wholly owned subsidiary which operates a cellular telephone system in Ontario and Quebec, was responsible for most of the increase. Its customers numbered 179,000 at Sept. 30, 1990, an increase of some 12,000 since June 30 of this year and some 52,000 since Sept. 30, 1989.

Bell Cellular's cash flow margin, before interest and taxes, was 33 percent during the third quarter and 37 percent on a year-to-date basis.

National Pagette Ltd., also a wholly owned subsidiary which operates paging and telephone answering systems, contributed $15.6 million to consolidated revenues for the quarter, up marginally from the same period last year.

The number of pagers in service increased by some 6,000 to 143,000 during the quarter (15,000 since Sept. 30, 1989), but increased competition, particularly in Ontario and Quebec, offset the positive revenue impact of the growth in pagers.

BCE Mobile's quarterly operating income was $5 million, compared to $5.5

million one year ago. On a year-to-date basis, the corporation reported operating income of $18.3 million compared to $14.4 million in 1989. The reduction in third quarter operating income was due to provisions being taken in National Mobile as part of the restructuring of its operations.

Third quarter consolidated net loss was $5.9 million (9 cents per share) compared to a loss of $3.3 million last year (5 cents per share). On a year-to-date basis, consolidated net loss was $13.4 million (22 cents per share) compared to $3.2 million in 1989 (5 cents per share).

BCE Mobile is the Canadian leader in mobile communications. Its diversified activities include cellular telephone, paging, telephone answering and private radio services integrating communications and information systems technology. The principal subsidiaries of BCE Mobile are Bell Cellular Inc., National Pagette Ltd. and National Mobile Radio Communications Inc. BCE Mobile is a subsidiary of BCE Inc.

#90296b0903 10/23/1990 ~Business Wire

RENO, NV (OCT. 23) BUSINESS WIRE - FirstMiss Gold Inc. (NASDAQ: FRMG) reported earnings of $340,000, or two cents per share for the three months ended Sept. 30, 1990, vs. earnings of $1.1 million, or six cents per share prior quarter and $621,000, or three cents per share for the same period last

year.

The earnings decrease primarily was due to higher operating costs at the Getchell Mine in north central Nevada. The mill processed more high-carbonate sulfide ore during the quarter requiring an increase in sulfuric acid.

Sales for the quarter were $17.8 million on 44,880 ounces, compared with $18.4 million on 46,641 ounces prior quarter and $11.1 million on 29,676 ounces first quarter last year. Average sales price was $398 per ounce, up from $394 last quarter and $373 last year.

Total production for the first quarter was 45,098 ounces, down slightly from 45,930 ounces prior quarter due to lower heap leach production. First quarter total production last year was 31,413 ounces. Cash production cost was $280 per ounce vs. $255 prior quarter and $241 prior year.

Mill production improved to 39,210 ounces vs. 38,427 ounces prior quarter as gold recovery increased to 89 percent. Mill production first quarter last year was 24,242 ounces.

Cash cost for mill production increased to $299 per ounce from $278 prior quarter due to greater sulfuric acid consumption. Ore grade was 0.17 ounces per ton, essentially the same as prior quarter.

"Although the mill is operating near design rate, we recently encountered a mechnanical problem which likely will slow production in the second quarter," Cecil Alvarez, president and chief executive officer, FirstMiss Gold, said. "We will reschedule the 60-day operating efficiency test begun last month." Exploration expenses for the three months were $557,000, up from $323,000 last year.

FirstMiss Gold Inc. is a Nevada-based gold mining and exploration company with headquarters in Reno, Nev. and operations at the Getchell Mine in north central Neveda.

PRINCETON, NJ (OCT. 23) BUSINESS WIRE - Dwight C. Minton, chairman and chief executive officer of Church & Dwight Co. Inc., (NYSE: CHD) announced that Spencer J. Volk has resigned as president and chief operating officer and member of the board of directors.

In accepting his resignation, Minton said he regretted the loss of Volk's outstanding operating skills and wished him success in his future ventures.

Volk joined Church & Dwight Co. Inc. in July, 1989.

During Volk's tenure the management team was strengthened and excellent operating results achieved as the company focused on its core Arm & Hammer brands.

At the request of the board, Minton has assumed Volk's duties. A search for a replacement has already begun, the company said.

WALTHAM, MASS. (OCT. 23) BUSINESS WIRE - Meiko World Inc. Tuesday introduced two high performance, scaleable parallel processing computer systems for engineering/scientific and real-time applications.

They are called the Engineer's Computing Surface and the Embedded Real-Time Computing Surface systems.

Meiko World also announced that it is locating its headquarters in Waltham, Mass.

The Engineer's Computing Surface is for application developers working on engineering and scientific applications. A typical entry-level Engineer's Computing Surface consists of four INMOS central processors, 4 Mbytes of memory, and development software. It is priced at approximately $50,000.

A 2.6 GFLOPS system, comprising 64 i860 central processors, each with 8 Mbytes of memory and software, is priced at less than $1.5 million.

The Embedded Real-Time Computing Surface is designed to be part of a larger deployed system. An entry-level system includes two Intel i860 processors, 8 Mbytes of memory, and development software. It is priced at approximately $50,000.

The systems can scale up to more than 1 GFLOPS of power in a single 19-inch rack.

All the systems are available immediately.

Meiko's products will follow a two-phase strategy. The first, announced today, is to offer a line of products to application developers and engineering users. The second, to begin in 1991, will introduce a line of turnkey application solutions. These will substantially expand Meiko's commercial and federal markets.

Meiko was founded in 1985, and has been profitable since its inception. With more than 300 systems installed worldwide, The Computing Surface line is the most widely used family of scaleable systems.

NEW ORLEANS (OCT. 23) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE:FRP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), Tuesday reported third-quarter 1990 net income of $28,944,000, or 35 cents per unit, on an average 82,713,000 units outstanding compared with third-quarter 1989 net income of $17,494,000, or 22 cents per unit, on an average 81,185,000 units outstanding.

Revenues during the third quarters of 1990 and 1989 totaled $220,254,000 and $304,003,000, respectively.

For the first nine months of 1990, net income was $220,067,000, or $2.67 per unit, on an average 82,441,000 units outstanding compared with net income of $116,588,000, or $1.44 per unit, on an average 80,870,000 units outstanding during the first nine months of 1989. Earnings for the first nine months of 1990 included net gains totaling $162,483,000 from the sale of assets.

Revenues for the nine months ended Sept. 30, 1990 and 1989, totaled $646,024,000 and $890,353,000, respectively.

Third-quarter 1990 external sales volumes of Frasch sulphur increased by more

than 4 percent from the year-ago period because of strong domestic and export demand. The average price FRP realized for its Frasch sulphur during the third quarter of 1990 was virtually unchanged from the year-ago period but nearly 5 percent higher than during the previous quarter.

During the third quarter of 1990, the market price for Frasch sulphur rose to $134 per long ton, f.o.b. Tampa, Fla., a 14 percent increase from its recent low price of $117.50 per long ton during the fourth quarter of 1989, reflecting the strong demand for sulphur by phosphate fertilizer producers.

During the three months ended Sept. 30, 1990, FRP sulphur production exceeded third-quarter 1989 levels because of higher output from the partnership's Caminada sulphur mine, where boiler capacity was recently expanded. Increased production at the more efficient Caminada mine has lowered the partnership's unit production costs at that mine by approximately 28 percent from the year-ago period.

#90296b0942 10/23/1990 ~Business Wire

BURLINGTON, Vt. (OCT. 23) BUSINESS WIRE - The board of directors of Banknorth Group Inc., at Tuesday's regular meeting, declared a fourth quarter cash dividend of 27 cents per share, payable Dec. 7, 1990 to shareholders of record Nov. 23, 1990.

The announcement was made by President and Chief Executive Officer John H. Barry.

''The action taken today was considered very carefully by the board of directors and management,'' said Barry. ''We are keenly aware of our unprecedented payout percentage of current year's earnings, the present high yield in relation to the current price of our stock and, most importantly, the importance of protecting our strong capital base for the future. Many banking companies in New England have been forced to cut or suspend their dividends and have stated, in doing so, that losses were expected in the forseeable future. While, given the present economic environment, we do not foresee an improved level of profits in the fourth quarter, we also do not expect losses at this time,'' he said.

The company reported earnings for the nine months ended Sept. 30, 1990, of $7.3 million or $1.08 per share. After today's dividend action the total dividend for 1990 equals $1.08 per share.

''Our shareholders, for the most part, are Vermonters, many of whom have held

the stock for a long time and some are presently retired. They have been loyal and supportive through these difficult economic times and believe, as we do, that our longer-term outlook is bright. Obviously, if our ability to earn the dividend in 1991 becomes impaired by a worsening economic environment, we will seriously consider, at that time, steps to protect our strong capital base from eroding,'' Barry said.

Banknorth Group Inc., the largest commercial banking company in Vermont, was formed on Dec. 1, 1989 with the merger of Banknorth Group Inc. and Howard Bancorp and is comprised of First Vermont Bank and Trust Co., Franklin Lamoille Bank, Granite Savings Bank and Trust Co., The Howard Bank, N.A. and Woodstock National Bank.

Banknorth Group Inc. common stock is traded on the NASDAQ National Market System under the symbol BKNG. Information published prior to Dec. 1, 1989 does not relate to the new BKNG stock.

#90296b0943 10/23/1990 ~Business Wire

SHREWSBURY, NJ (OCT. 23) BUSINESS WIRE - Wellman Inc. (NYSE:WLM) Tuesday reported net earnings of $14 million for the third quarter ended Sept. 30, compared to $11.1 million in the third quarter of 1989, an increase of 26 percent.

Earnings per share for the third quarter rose 13 percent to 43 cents from 38 cents in last year's third quarter. Sales and operating income for the third quarter were $205.4 million and $34.6 million, respectively, compared to sales and operating income of $86.4 million and $17.1 million in the corresponding quarter of 1989.

For the nine-month period ended Sept. 30, net earnings increased 30 percent to $50.2 million from $38.6 million in the comparable 1989 period and earnings per share rose 16 percent to $1.54 from $1.33 in last year's nine month period. Sales and operating income for the first nine months of 1990 were $623.4 million and $117.8 million, respectively, compared to sales and operating income of $270.4 million and $58.8 million, respectively, in the first nine months of 1989.

The increase in year-to-year third quarter sales was due to higher sales in the Man-Made Fibres Division, reflecting the contribution of Fiber Industries Inc. (FI), which Wellman acquired on Nov. 1, 1989.

Sales results were mixed at the company's non-wovens, plastics and wool divisions.

Third quarter profit levels reflect reduced selling prices on FI's textile-grade polyester staple fibres, which the company lowered the last week in June in response to a similar move by a major competitor, and lower production levels at Wellman's man-made fibre manufacturing operations in Ireland.

Wellman's board of directors declared a quarterly dividend of $0.03 per share on the company's outstanding common stock, payable on Dec. 17, to shareholders of record on Dec. 3.

Wellman, the nation's largest recycler of post-consumer plastic, fibre and film wastes, manufactures high-quality polyester textile fibres under the Fortrel brandname and manufactures polyester and nylon fibres and plastic resins from its recycling operations.

NEW ORLEANS (OCT. 23) BUSINESS WIRE - Freeport-McMoRan Copper Co. Inc. (NYSE:FCX), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), Tuesday reported third-quarter 1990 net income of $33,284,000 or 39 cents per share on an average 86,380,000 shares outstanding compared with third-quarter 1989 net income of $25,311,000 or 30 cents per share on an average 85,380,000 shares outstanding.

Third-quarter 1990 and 1989 revenues totaled $135,911,000 and $90,909,000, respectively.

For the first nine months of 1990, net income was $71,687,000 or 84 cents per share on an average 85,780,000 shares outstanding compared with net income of $74,479,000 or 87 cents per share on an average 85,380,000 shares outstanding during the first nine months of 1989. Revenues during the nine months ended September 30, 1990 and 1989, totaled $323,504,000 and $270,422,000, respectively.

Total estimated future production at June 30, 1990, increased to 10.9 billion payable pounds of copper, 12.7 million payable ounces of gold, and 31.3 million payable ounces of silver. The 107 million metric ton ore reserve increase at Grasberg is approximately three times the reserve position of the company's original Ertsberg deposit when mining operations began in 1972.''

During the three months ended September 30, 1990, the price realized by FI for copper averaged $1.27 per payable pound compared with $1.29 per payable pound during the third quarter of 1989, exclusive of positive adjustments of 8.0

cents and 7.4 cents per payable pound, respectively, for price increases on prior period concentrate sales. The average price realized by FI for gold during the third quarter of 1990 rose to $381 per payable ounce compared with $356 per payable ounce during the third quarter of 1989.

Earnings for the three months ended September 30, 1990, were also affected by additional depreciation and increased interest expense attributable to placing into operation certain facilities to accommodate production from Grasberg.

Mine and mill expansion efforts continued on budget and ahead of schedule during the third quarter of 1990. A second service tramway was commissioned during the quarter to carry personnel and material to the mine site from the lower mill level. During the quarter, work was nearly completed on an adit for a two kilometer conveyor at the mill level that will carry ore from all mines to the mill site.

#90296b0949 10/23/1990 ~Business Wire

NEW ORLEANS (OCT. 23) BUSINESS WIRE - Freeport-McMoRan Oil & Gas Company (NYSE: FMP), an affiliate of Freeport-McMoRan Inc. (NYSE: FTX), Tuesday reported third-quarter 1990 net income of $3,639,000 or 3 cents per share on an average 124,341,000 shares outstanding compared with third-quarter 1989 net income of $5,214,000 or 5 cents per share on an average 108,806,000 shares outstanding.

Pretax international exploration expenditures charged to earnings during the third quarters of 1990 and 1989 were $8,016,000 and $1,411,000, respectively. Financial results for the third quarter of 1989 included other income of approximately $8 million, of which $4.5 million was related to a natural gas contract settlement.

Third-quarter 1990 and 1989 revenues totaled $54,858,000 and $53,597,000, respectively.

For the first nine months of 1990, net income was $12,496,000 or 10 cents per share on an average 122,091,000 shares outstanding compared with net income of $24,843,000 or 24 cents per share on an average 105,332,000 shares outstanding during the first nine months of 1989.

Financial results for the nine months ended September 30, 1990 and 1989, included other income of $10.6 million and $17.5 million, respectively, primarily related to natural gas contract settlements. Revenues during the nine months ended September 30, 1990 and 1989, totaled $165,136,000 and

$197,515,000, respectively. Financial results for periods prior to March 30, 1990, have been restated to reflect the restructuring of FMP from a master limited partnership into a corporation.

FMP was organized on January 5, 1990, and succeeded to the business of Freeport-McMoRan Energy Partners and certain other oil and gas related businesses of FTX in accordance with a plan of restructuring consummated on March 30, 1990. As a result of the restructuring, all outstanding units representing partnership interests in Freeport-McMoRan Energy Partners were, in effect, converted into FMP common shares.

During the initial five-year period from inception in April 1985, the units of Freeport-McMoRan Energy Partners had an assured minimum distribution and therefore were basically a yield-driven security. Upon the scheduled termination of this five-year period at the end of March 1990 and the determination that most of the company's available funds would thereafter be reinvested in exploration and development activities, the nature of the investment was changed from a yield-driven security to an asset-based one.

#90296b0952 10/23/1990 ~Business Wire

BIRMINGHAM, Ala. (OCT. 23) BUSINESS WIRE - Birmingham Steel Corp. (NYSE:BIR) Tuesday announced that its wholly owned subsidiary Salmon Bay Steel Corp. has signed a definitive purchase agreement to acquire certain steel manufacturing assets of Seattle Steel Inc. located in West Seattle.

The acquisition is scheduled to be completed by calendar year-end, subject to certain conditions which include the issuance of a favorable ruling by governmental regulatory agencies. Under the terms of the proposed transaction Salmon Bay Steel Corp. will pay approximately $54 million for the assets of Seattle Steel, plus the value of certain inventories on hand as of the closing date.

Upon consummation of the transaction, Salmon Bay Steel plans to operate the Seattle Steel rolling facility in West Seattle in addition to its current rolling mill in Ballard, Wash. Salmon Bay Steel plans to consolidate all melt shop production in West Seattle and to discontinue melting operations at its current facility in Kent, Wash.

The West Seattle melt shop has capacity to produce 600,000 tons of steel per year and will furnish all semi-finished steel billets for operations of the two rolling mills.

Birmingham Steel has also advanced the schedule for the previously announced phase-out of operations at its Barbary Coast Steel mini-mill in Emeryville, Calif.

Due to escalating electric power rates and equipment limitations, the Emeryville operation is currently unprofitable and economically unattractive relative to the alternative value of its real estate. The Emeryville steel manufacturing facility is scheduled to be closed by the end of March 1991.

Until development is completed on the company's previously announced mini-mill project near Phoenix, the California and Arizona steel markets will be supplied by the expanded Salmon Bay manufacturing and distribution capacity.

To complement Salmon Bay's increased production capabilities, customer distribution outlets will be established at several locations in California and Arizona. Environmental and engineering studies on the Arizona steel mill project are proceeding and will continue, subject to a review of the project's market and optimum capacity requirements.

James A. Todd Jr., president and chief executive officer, commented: ''Birmingham Steel is firmly committed to the West Coast market and our current consolidation and expansion plans will significantly improve our ability to supply quality steel products at competitive prices. The acquisition of Seattle Steel's manufacturing assets presents an economically attractive and unique opportunity to concentrate our productive resources in a more efficient manner.

''In the current economic climate and competitive steel environment, we believe the interest of our West Coast steel customers will be significantly enhanced by the Seattle acquisition and the Arizona construction program.''

Birmingham Steel operates steel mini-mills producing steel and steel products, primarily reinforcing bar, and is the largest U.S. manufacturer of steel roof support systems used in underground coal mining. The common stock of Birmingham Steel Corp. is traded on the New York Stock Exchange under the symbol ''BIR.''

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (OCT. 23) COMTEX - The House Banking Committee acted today to break its political stalemate with the Bush administration over funding for the savings and loan cleanup, voting an additional $10 billion in short-term financing to keep the Resolution Trust Corp. running through February, 1991.

The legislation, passed on a voice vote, stipulates that no RTC funds should be used to pay out deposits in excess of $100,000 or provide assistance to thrifts unless the RTC deems this would result in the least cost to the RTC and taxpayers. In addition, the bill requires a six-month spending plan must be accompanies for all additional funding requests for the RTC.

The measure actually provides $28.8 billion for the RTC because the agency has additional borrowing authority of $18.8 billion which does not fall under congressional jurisdiction.

Treasury Secretary Nicholas Brady sent a letter to the congressional banking committees on Oct. 10 seeking $40 billion to cover thrift failures through Sept. 30, 1991, the end of fiscal year 1991. This would be in addition to the $50 billion Congress authorized the RTC, the agency responsible for handling the thrift crisis, in 1989.

In his letter, Brady warned the RTC would use up $49 billion of the $50 billion by year-end and "virtually cease within the next two months unless additional funds are provided." He asked Congress to act before it adjourns

for the year later this month.

Within 48 hours of receiving Brady's appeal, the Senate Banking Committee agreed to appropriate $57 billion for the RTC, $40 billion to cover the losses of failed S&Ls and an extra $17 billion to act as reserves for temporary short-term borrowing.

However, House Banking Committee Chairman Henry Gonzalez (D-Texas) said his panel would only act on the funding request if Brady testified before the panel to defend the administration's request for the money. Brady refused twice last week to appear before the panel.

With elections just two weeks away, and public resentment growing over the soaring costs of the thrift cleanup, the issue has become a political hot potato. Neither Democrats nor the administration wish to be identified with the thrift mess.

"For them (the administration) not to show up is a very bad precedent," said Rep. Charles Schumer (D-N.Y.). "They have as much responsibility as anyone else."

"I do not think that funding RTC should be regarded as an open-ended endorsement of the administration's handling of the cleanup," Gonzalez said. "It is important that questions about the RTC be answered. Therefore, I am proposing that this committee limit funding until Secretary Brady and other officials of the administration do appear in full-dress oversight hearings."

WASHINGTON (OCT. 23) COMTEX - The 8-K report filed at the SEC shows First Bancorporation of Ohio (TICKER: FBOH) on Sept. 30, 1990, completed its acquisition of Peoples Savings Bank, an Ohio Savings and Loan Association, with the merger of Peoples Savings into Peoples Interim Savings Bank,, a wholly-owned subsidiary of First Bancorporation.

Each share of common stock of Peoples Savings was converted into a right to receive 0.775 shares of the common stock of First Bancorporation.

Each shareholder of Peoples Savings entitled to receive a fractional share of Bancorporation's common stock will receive cash at the rate of $30.875 per whole share, in lieu of the common stock.

Peoples Savings had total assets of $283.77 million as of Dec. 31, 1989.

Peoples Savings has 15 banking locations in Ashtabula, Lake, Geauga and eastern Cuyahoga counties in Ohio.

WASHINGTON (OCT. 23) COMTEX - The 8-K report filed at the SEC shows Fayette Federal Savings Bank (TICKER: FAYT), on Oct. 15, 1990, entered into a restated plan of merger with First Financial Bancorp (TICKER: FFBC).

The restated agreement amends and restates the June 26, 1990, agreement, relating to the proposed acquisition of Fayette Federal by merger into an interim subsidiary of First Financial.

It provides that the holders of Fayette's common stock would receive First Financial common stock with a value of $25.23 in exchange for each share of Fayette's common stock.

WASHINGTON (OCT. 23) COMTEX - The 8-K report filed at the SEC shows on Sept. 28, 1990, the Office of Thrift Supervision (OTS) approved the capital plan of King City Federal Savings Bank (TICKER: KCFB), amended Aug. 21,1990.

The OTS also approved the bank's request for an exemption from the sanctions and penalties that may be applied as a result of the bank's failure to comply with its capital requirements.

The amended plan provides for a reduction in assets, controlled growth and retention of earnings.

It eliminates the sale of $2.0 million in convertible subordinated debentures and the sale of $3 million in non-residential loans, included in the previously proposed capital plan dated June 19, 1990.

#90296c0080 10/23/1990 ~Comtex
WASHINGTON (OCT. 23) COMTEX - The 8-K report filed at the SEC shows HomeCorp Inc.(TICKER: HMCI) reported net income of $903,000 or $1.22 per share for the third quarter of 1990, as compared to $1.41 million during the same period in 1989.

The company reports the change in net income was primarily the result of a $527,000 adjustment to income tax made in 1989 as a result of HomeBanc's adoption of the Financial Accounting Standards Board Statement No. 96 - Accounting for Income Taxes.

According to C. Steven Sjogren, HomeCorp's president and chief executive officer, the bank's net income before taxes increased 7.4 percent to $1.17

million for the third quarter of 1990, up from $1.09 million for the same period last year.

WASHINGTON (OCT. 23) COMTEX - The 8-K report filed at the SEC shows CFS Financial Corp.(TICKER: CFSC) announced it anticipates reporting a loss for the three months ended Sept. 30, 1990, as a result of a decision to significantly increase its provisions for potential loan losses.

The provisions will include a $1.5 million in specific reserves which relate to two real estate loans, and increased general reserves pursuant to a decision to accelerate CFS' previously-announced program to increase such reserves to 1% of the total loan portfolio.

WASHINGTON (OCT. 24) COMTEX - Maverick Tube Corp. filed a registration statement with the SEC in which it proposes to offer 1.33 million shares of its common stock with an additional 667,000 shares being sold by selling shareholders of the company.

The initial public offering price is still to be determined.

Application will be made to have the common stock approved for listing on the American Stock Exchange upon completion of this offering under the symbol MAV.

PaineWebber Inc. is underwriting the offering.

Maverick Tube manufactures electric resistance welded pipe used in the energy industry for drilling and production applications and line pipe for surface handling and transportation of oil and natural gas.

The company's executive office is located at P.O. Box 4128, Chesterfield, Missouri 63006 and its telephone number is (314) 537-1314.

WASHINGTON (OCT. 24) COMTEX - Lynx Energy Services Inc. filed a registration statement with the SEC in which it proposes to offer 3 million shares of its common stock.

After completion of this offering, Ocelot Industries Ltd. will own 25 percent of the outstanding common shares of the company.

The initial public offering price is still to be determined.

Application has been made to have the common shares approved for quotation through the NASDAQ National Market System.

Salomon Brothers and Howard Weil Labouisse Friedrichs Inc. are managing the offering.

Lynx Energy is engaged in threee business segments: pipeline construction; contract drilling of oil and gas wells; and the manufacture, sale, repair and rental of oilfield equipment.

The company's executive office is located at 500, 622-5 Ave. S.W. Calgary, ALberta T2P OM6. Its telephone number is (403) 264-0650.

#90296d2110 10/23/1990 ~French/German News Agency

TOKYO (OCT. 23) - The Toyota Motor Corp.'s operations in the United States are revitalizing U.S. industry, the Japanese automaker's chairman Shoichiro Toyoda said in an interview published Tuesday.

"If they do things our way, their exports will become competitive," he told the Mainichi Daily News.

Mr. Toyoda rejected accusations that Japanese firms were "using money to get America's intellectuals" to lobby for their interests in the United States, and said, "I would like to see the American media become a little more honest."

Toyota was making "a splendid contribution" to the U.S. economy and society, he said.

"Right now, were working on the revitalizing of American industry," he said. "In order to energize American parts manufacturers, we consult with them from the planning stages so they can make good products."

"Because of Toyota's presence, American employment has increased," he continued, adding that education has also benefitted as Americans studied longer to qualify for the better jobs now available.

A series of high-profile acquisitions by Japanese investors in the United States -- where several key industries have declined over the past two decades in the face of Japanese competition -- has inflamed anti-Japanese sentiment in the United States recently.

#90296d2260 10/23/1990 ~French/German News Agency

BEIJING (OCT. 23) - Beijing Jeep Corp., a Sino-U.S. joint venture with

Chrysler Corp., has put a new 28 million dollar engine factory into operation, press reports Tuesday said.

The plant, with nine automated production lines, 290 workers and an initial output capacity of 30,000 engines a year, was inaugurated Monday, the official New China News Agency and China Daily newspaper said.

It lifts to 40.4 percent the proportion of Chinese-made parts used by Beijing Jeep in assembling its Jeep Cherokee and BJ-2020N utility vehicles, thus enabling it to apply for duty-exempt status for imported components.

Beijing Jeep plans to turn out 41,831 vehicles this year, slightly more than it had initially forecast, including 7,600 Cherokees. Profits are expected to rise 6.8 percent over last year's.

China's auto industry was hard hit last year by state-imposed austerity measures, resulting in huge inventories of unsold vehicles. Looser credit this year has since eased the pressure.

#90296d2270 10/23/1990 ~French/German News Agency

WELLINGTON (OCT. 23) - A Japanese joint venture has purchased management and harvesting rights to two New Zealand pine forests covering 21,980 hectares (54,290 acres), officials said Tuesday.

State-owned Enterprises Minister Richard Prebble said the company, formed by Japanese firms Nissho Iwai and Juken Sagyo, had paid the government 41.5 million New Zealand dollars (24.9 million U.S.) for the forest rights.

The group bought rights to another New Zealand forest last month.

Juken Sangyo is one of Japan's biggest timber processing companies producing plywood, flooring, laminated veneers, doors and fittings.

It is to hold 85 percent of the joint venture and will manage processing facilities if they are built.

Nissho Iwai ranks among Japan's top trading companies measured by sales.

#90296d2280 10/23/1990 ~French/German News Agency

TAIPEI (OCT. 23) - Trade between Taiwan and Eastern European nations totaled 372.5 millon U.S. dollars in the first nine months of this year, a 36 per cent rise over the same period of 1989, the Board of Foreign Trade (BOFT) said Tuesday.

Exports to the nine countries of Eastern Europe in the January-September period surged a whopping 97 per cent to 143 million dollars while imports from the region increased 14 per cent to 229.5 million dollars, BOFT said.

The Soviet Union was the largest of the island's East European trading partner for the nine months, registering a two-way trade of 76.6 million dollars, up 38 per cent, it said.

Exports to the Soviet Union ballooned 286 per cent to 39.4 million dollars but imports from the country declined 18 per cent to 37.2 million dollars, the BOFT said.

The export-oriented island sold products worth 32.5 million dollars to Hungary which overtook East Germany as the second largest buyer of Taiwan-made products in the region.

Trade between Taiwan and Yugoslavia in the first nine months registered a spectacular 353 per cent ascent over a year earlier to 36.2 million dollars.

Taiwan authorities have encouraged local businessmen to beef up trade and investment links with the East bloc to seek cheaper raw materials and expand overseas markets for local products.

Taiwan exports consumer goods, electrical appliances and information products to Eastern Europe and imports lumber, minerals and industrial raw materials.

#90296d2290 10/23/1990 ~French/German News Agency

TOKYO (OCT. 23) - Bank of Japan Governor Yasushi Mieno said Tuesday the central bank would combat inflationary pressure stemming from higher oil prices, but would not make any hasty change in its monetary policy.

Mr. Mieno, in his opening speech to a meeting of the central bank's 23 branch managers, said Japan's economic expansion would generally continue as long as "home-generated" inflation was averted

He said the pace of growth might slow in coming months due to the Gulf crisis, but he said the yen's strength in recent weeks would help stabilize domestic prices in the face of soaring crude oil prices, which are calculated in dollars.

Mr. Mieno the central bank would do its utmost to prevent the "imported inflation" caused by higher oil prices from translating into "home-generated" inflation that could cripple economic growth.

But he indicated that the bank would not make any hasty change in its monetary policy, saying "I think it is proper to keep watching the effects of past

hikes in the official discount rate."

On August 30, the Bank of Japan raised its key lending rate to commercial banks from 5.25 per cent to six per cent, the fifth increase in 15 months and the highest level in almost nine years.

Addressing the fall of the dollar, Mr. Mieno said the United States needed to reduce its budget deficit to restore market confidence.

Meeting through Thursday, the central bankers will evaluate the effects of a higher yen, lower stock prices and higher interest rates on corporate finance and domestic business conditions, central bank sources said.

#90296d2340 10/23/1990 ~French/German News Agency

TOKYO (OCT. 23) - Japan intends to propose a cut in tariffs on tropical agricultural products at an Uruguay Round of multilateral trade talks slated for Wednesday in Geneva, officials said Tuesday.

Hisao Azuma, director-general in the agriculture ministry, told a parliamentary committee that Tokyo plans to cut the tariffs on coffee, mangos,

papayas and other tropical products to around 5.5 per from the current 7.9 per cent.

The tariff cut had been strongly requested by developing countries at the Uruguay Round talks under the General Agreement on Tariffs and Trade (GATT).

PRETORIA (OCT. 23) - The growth rate in South Africa's broad-based M3 money supply tumbled to a new three-year low with the stock of money in the economy increasing by only 13.28 percent in the year to September, according to preliminary Reserve (Central) Bank figures Monday.

This reflected a slump in credit spending as interest rates remain high and recession bites, the financial daily Business Day said Tuesday.

The year-on-year rate of increase has slid without interruption from 19.12 percent in May, as the monthly tempo at which banks have expanded their balance sheets has slowed dramatically.

If the expansion in money supply continues at the present slow rate, South Africa could end the year with growth below the Bank's 11 - 15 percent target range.

The annualised increase from the fourth quarter of last year is very much at the bottom end of the target range at 11.21 percent.

The Bank has made clear that a fall to below the target range would in itself not necessarily signal the need for a cut in bank rate -- prime rate is currently 21 percent, with annualised inflation at 13.6 percent.

Inflation and trade figures, due to be released this week could temper any bullish sentiment in the markets because of the positive developments on money supply.

"The Reserve Bank is doing what it must do to keep inflation down," a spokesman told Agence France-Presse.

Comparative M3 figures in billions of rands with the dollar equivalents in brackets, using average exchange rates of 38 U.S. cents to the rand in September and in August, and 36 cents in September 1989:

September 1990	August 1990	September 1989
155,177 (58.967)	154,305 (58.635)	136,984 (52.053)

#90296d2400 10/23/1990 ~French/German News Agency

JOHANNESBURG (OCT. 23) - An oversupply of gold on the market, together with a static gold price and rising costs, could cause the South African gold industry to cut back considerably during the next three years, state-run radio said Tuesday.

An analyst quoted by the radio said that if the gold price remained at its present level and costs rose over the next three years by an average of ten per cent a year, South Africa will be producing only 250 tons a year by 1993, as against the current 586 tons.

Income from this source will then drop from 18,000 million rand (6,840 million dollars) to 8,000 million rand (3,040 million dollars), or 56 per cent.

This will mean that the 45 mines with a gold yield of less than seven grams per ton would have to close.

The analyst said, however, this scenario was unlikely because mines would be operated on a smaller scale and the rand would probably weaken to counter the rising costs.

The latest bulletin of the World Gold Council says it is mainly oversupply that is determining the gold price. The report goes on to say that South Africa's gold production, which has been levelling off for the past 16 months,

will be 11 percent lower in 1995 than it was in 1989.

MOSCOW (OCT. 23) - The commercial rouble will be devalued by 66 per cent on November 1, Ivan Ivanov, vice president of the cabinet commission for external relations said Tuesday.

In an interview with the Novosti agency, Mr. Ivanov said the rouble would be exchanged at 1.8 roubles to the U.S. dollar against the present 0.6.

The devaluation was announced on October 9 by Soviet state bank president Viktor Gerashchenko who said it would not take place until January 1.

The commercial rouble, whose exchange rate has been unchanged since 1961, is used for all the Soviet Union's trade transactions with other countries. Its devaluation is aimed at bringing Soviet prices gradually up to the world level.

MANILA (OCT. 23) - The Japanese government has agreed to reschedule the payment of 925 million dollars of the Philippines' debt incurred under a Paris Club accord, the Japanese Embassy here said Tuesday.

The agreement was signed here Monday between Japanese Embassy minister Nobuyase Abe and Finance Secretary Jesus Estanislao.

The amount to be rescheduled includes 400 million dollars owed to the Overseas Economic Cooperation Fund, 165 million dollars to the Export-Import Bank of Japan, and 360 million dollars in commercial debts insured by the Japanese

government.

The rescheduling agreement stipulates that the debts, due to be paid on June 1991, will be stretched out over 10 years with an initial six-year grace period.

The Philippines has a 27 billion dollar foreign debt.

PARIS (OCT. 23) - The French Generale des Eaux water and diversified industrial group on Tuesday reported an increase of 19.1 per cent in net consolidated half-time profits after minorities to 892 million francs (about 165 million dollars) compared with the same period of 1989.

For the whole of 1990 the net profit after minorities might not be far from 2.2 billion francs (about 407 million dollars) compared with 1.83 billion francs last year, the company said. Cash flow should exceed eight billion francs.

Sales figures on consolidation of 1,300 companies totalled 53 billion francs, an increase of 16.7 per cent. Sales abroad totalled 13.7 billion francs, showing an increase of 52.2 per cent. The company said that sales for the year should exceed 110 billion francs of which 28 billion francs would be registered abroad.

TOKYO (OCT. 23) - Nissan Motor Co. said Tuesday it would start exporting in November its luxury Maxima and sporty Fairlady Z models to Mexico.

Nissan hopes to sell 3,600 Maximas and Fairladys each year, targeting high-income earners in Mexico, Nissan officials said.

Nissan is the first Japanese carmaker to export cars to Mexico, which lifted a ban on imports of completed vehicles on October 1.

#90296d3350 10/23/1990 ~French/German News Agency
SYDNEY (OCT. 23) - Media magnate Rupert Murdoch said Tuesday that he expected his News Corp. Ltd. to perform better in 199091 despite an expected world economic slump.

"As a whole ... I would expect trading to be ahead of last year," Mr. Murdoch told the annual general meeting in Adelaide.

News Corp.'s net profit before abnormal items fell 43 per cent to 282 million Australian dollars (219 million U.S.) in the year to June 30.

The media group's share price recently tumbled to a nearly five-year low of 4.85 dollars compared to the year's high of 11.50 dollars due to concern about its excessive debt. On Tuesday the shares jumped 54 cents to close at 6.10 dollars.

Analysts have aired concern about the sharp growth in News Corp.'s short term borrowings from about 558 million dollars (434 million U.S.) more than a year ago to about 2.95 billion dollars (2.29 billion U.S.) at June 30.

Chairman Richard Searby told shareholders the company wanted to cut its short term debt which stemmed from investment in projects that would keep the group competitive.

"Our aim is to replace the whole or a substantial part of the short term debt with long term debt," Mr. Searby said.

Shareholders approved the company's controversial resolution to issue limited-voting preference shares.

HANOI (OCT. 23) - Vietnamese exports leapt 18.4 percent in value above year earlier figures in the first nine months of 1990 while imports returned more

modest growth for the same period, the Nhan Dan said Tuesday.

The paper also said exports had reached 75 percent of the annual plan while imports in the first nine months represented 66.8 percent of the annual plan and were up 2.8 percent on last year's corresponding period.

National corporations achieved 95.3 percent of their export targets in trade with non-socialist countries, a rise of 20 percent on the corresponding period for last year.

Imports were also up a whopping 83 percent over the previous year in trade with these countries, Nhan Dan said.

The report did not give figures for exports and imports with the Soviet Union and east Europe but these are likely to have slipped given changes under way in those countries and their economic problems.

It also did not give value of imports and exports.

The paper also said that in the first nine months of the year retail sales on the domestic market were worth more than 12,000 billion dong (almost two billion dollars), or 70 percent of the annual target.

#90296d3380 10/23/1990 ~French/German News Agency

BEIJING (OCT. 23) - China on Tuesday praised as "sensible" a decision by the European Economic Community (EEC) to lift most sanctions imposed after last year's Tiananmen Square crackdown.

"In our view, the decision ... is a sensible one. We welcome it," a foreign ministry spokesman said in a statement.

China had always regarded its relationship with Europe as an important one, based on "mutual respect for sovereignty, non-interference in each other's affairs, equality and mutual benefit," he said

"We hope that the two sides will make joint efforts to further improve and develop relations between China and Europe," the spokesman added.

EEC foreign ministers resolved Monday to lift most sanctions against China, clearing the way for normal exchanges of high-level visits as well as economic, scientific and technical co-operation.

But an embargo on arms sales and military co-operation is to remain in force.

Sanctions were imposed after the June 4, 1989 military suppression of student-led democracy protests in Beijing, though many were progressively

loosened over the past several months.

#90296d3510 10/23/1990 ~French/German News Agency
JAKARTA (OCT. 23) - The government Tuesday revoked the publishing license of Monitor, a popular Indonesian weekly tabloid, for running a poll on "most admired persons" that rated the Prophet Mohammad in 11th place.

"The government has cancelled Monitor's publishing license," a spokeswoman for the information ministry said, adding that a press statement was expected later in the day.

The revocation meant the publication's closure under Indonesian press laws.

The move followed two days of intense, and sometimes violent, protests from Moslem organisations calling for sterner government measures against Monitor and for the trial of its editors.

The government had already issued Friday a strong warning against the newspaper, saying the poll could disrupt existing religious and racial harmony in this country of 184 million people.

The government's decision broke with tradition whereby a news organisation was allowed three warnings before having its license revoked, indicating the strong pressure brought to bear by Moslem organisations.

The Monitor poll put President Suharto at the top of its list, Iraqi President Saddam Hussein at seventh, and its own chief editor Arswendo Atmowiloto came 10th just above the Prophet Mohammad.

A number of Moslem groups staged peaceful but tense demonstrations under the watchful eyes of heavily armed troops in various parts of Jakarta Tuesday, calling for Monitor's closure and the trial of its editors.

Police Tuesday appealed for calm and warned the public against taking the law into their hands after a group of students stormed into Monitor's office Monday and broke windows and equipment.

Several of Monitor's editors have been under questioning, police said.

The tabloid is owned by Gramedia, a business group associated with Chinese Catholic interests, which also controls Kompas daily, the country's largest newspaper in terms of readership.

The protests made no direct mention of the Chinese Catholic proprietorship,

but observers said this was implicit in the reference to religious or racial harmony, which also appeared in the government warning.

Islam is the dominant religion in Indonesia with nearly 90 percent of the population following the faith. The Christian minority, however, holds many key, powerful posts in both government and business.

TOKYO (OCT. 23) - Japan's Big Four securities firms announced Tuesday steep profit declines in the six months to September, reflecting plunges in both share prices and trading volume in the first half of the financial year.

All four companies - Nomura Securities Co. Ltd., Daiwa Securities Co. Ltd. Nikko Securities Co. Ltd. and Yamaichi Securities Co. Ltd. - also suffered sharp falls in revenue, marked by lower commissions and hefty trading losses.

The plunge in earnings, the sharpest in more than a decade, follows a decline of more than 46 percent in the Nikkei Stock Average during the six months. Average daily turnover on the Tokyo Stock Exchange also contracted by almost 30 percent to around 516 million shares in the same period.

Nomura, the world's biggest securities firm, said its net profit plunged 48.5 percent from a year earlier to 55.5 billion yen (437 million dollars) in the six months. Operating revenue declined 30.2 percent to 339 billion yen (2.7 billion dollars) in the same period.

Commissions plunged 33.2 percent 211 billion yen (1.7 billion dollars) while income from interest and dividend payments rose 124 percent to 29 billion yen (224 million dollars).

Trading losses came to 972 million yen (eight million dollars) compared with profits of 82 billion yen (646 million dollars) in the first half of last year.

Daiwa said its net profit dived 58.6 percent to 32.7 billion yen (257 million dollars) in the six months. Operating revenue fell 26.7 percent to 244 billion yen (1.9 billion dollars) in the same period, it said.

Commissions fell 32.8 percent to 154 billion yen (1.2 billion dollars) while interest and dividend income jumped 71.3 percent to 94 billion yen (740 million dollars).

Losses from trading activities amounted to almost four billion yen (31 million dollars) compared with profits of 49 billion yen (384 million dollars) in the same period last year.

#90296d3670 10/23/1990 ~French/German News Agency

MOSCOW (OCT. 23) - Some 2,500 delegates representing 140 million workers belonging to official Soviet trades unions began their 19th congress here on Tuesday in the presence of Soviet President Mikhail Gorbachev, officials said.

The Soviet TASS news agency said that they were due to launch "radical restructuring" of their member unions.

These unions "showed themseleves to be largely ineffective in protecting workers' interests at a time when the country is evolving towards a new treaty of union and a market economy", TASS said.

The organisation, due to adopt the title of "General Confederation of Soviet Unions", was expected to give itself the task of protecting "the interests of workers during radical economic reform", TASS reported.

Prime Minister Nikolai Ryzhkov, and the president of the supreme soviet (parliament) Anatoli Lukianov, also attended the opening of the congress.

Unions from the three Baltic republics of Estonia, Latvia and Lithuania, and from Georgia refused to send official delegations, and were to be represented only by "invited" individuals.

The previous congress of Soviet unions, which was the first to be held following the arrival of Mr. Gorbachev in power, was held in February 1987.

Mr. Gorbachev had then strongly criticised the unions for lacking dynamism and for dragging their feet over "the imperative need for perestroika (restructuring)".

The official unions have taken a conservative stand on current changes, even organising demonstrations against some effects of the reforms which they consider to be negative, such as increases in prices or "speculation".

Since the resignation in July of Guennadi Ianaev, who was elected to the politburo of the Communist Party, the post of president of the unions has been vacant and someone should be appointed to it during the congress.

"The unions today hold a new position in society. They are now independent of any political or governmental structure," Mr. Ianaev said a few days before leaving office.

Meanwhile the second congress of coal miners, which opened on Monday in Donertsk, in the Ukraine, was continuing with a view to creating an independent union.

The move towards the creation of independent social and professional organisations is one of the biggest challenges facing the official unions, analysts said.

TOKYO (OCT. 23) - Visiting Czechoslovkian Foreign Minister Jiri Dienstbier Tuesday asked Japan for its technological assistance and direct investments to help his country undergo economic reforms, Japanese officials said.

The officials said that Mr. Dienstbier made the requests when he met with Prime Minister Toshiki Kaifu.

They said that Mr. Kaifu told the foreign minister that Japan would positively cooperate with Prague's economic reform through international bodies, including the International Monetary Fund and the World Bank.

But Mr. Kaifu told Mr. Dienstbier that Czechoslovakia needs to improve its environment to lure more direct investment.

Mr. Dienstbier invited the Japanese prime minister to visit his nation, the officials said.

#90296d3740 10/23/1990 ~French/German News Agency

BONN (OCT. 23) - A leading German environmental action group that is angry at Japan's huge imports of timber called Tuesday for a consumer boycott of Japanese products.

The German Union for the Environment and Nature Protection, known as Bund, said Japanese business was heavily involved in the destruction of eco-systems that were of worldwide importance.

Bund chairman Hubert Weinzierl said here the Japanese had imported one third of world production of tropical timber, or 12.5 million cubic metres, in the couse of last year and were thus to blame for the destruction of a large part of Malaysia's rain forest.

Japanese companies had been setting up environmental survey departments because of international presssure, but the scale of timber felling had not been reduced, said Weinzierl. Germans should stop buying any sort of Japanese import, he said.

''Japanese companies apparently won't even spare us the depletion of forests in the temperate zones,'' he added, charging that the Canadian province of Alberta had just granted cutting rights to 245,000 square kilometres of woods to the Japanese Mitsubishi group.

#90296d3760 10/23/1990 ~French/German News Agency

LONDON (OCT. 23) - British Prime Minister Margaret Thatcher conferred here Tuesday with Kuwait's ousted leader, Sheikh Jaber al-Ahmad as-Sabah, amid new assertions by the government-in-exile that Iraq would receive no territorial concessions in return for withdrawing its occupation forces.

Thatcher has consistently called for unconditional Iraqi withdrawal and restoration of a legitimate government in Kuwait.

Earlier Tuesday, the ambassador to London of Kuwait's exiled government, Ghazi al-Rayes, rejected any peace-for-land swap that would involve Kuwait's accepting a partial Iraqi withdrawal and ceding two islands to Iraq.

''There is no concession for the aggressor because if you give any concession and give any reward to the aggressor, that means you are just encouraging him '' the diplomat told the British Broadcasting Corporation.

Prospects of such a swap were raised anew over the weekend when the Saudi foreign minister, Prince Sultan bin Abdul-Aziz, suggested to Arab journalists that it would not be wrong for an Arab country to grant land to a ''brother Arab country''.

#90296d3810 10/23/1990 ~French/German News Agency

ROME (OCT. 23) - Admiral Fulvio Martini is to be removed as head of military intelligence in an apparent disciplinary measure after letters belonging to a former prime minister were found at a terrorist hideout, newspapers said Tuesday.

Prime Minister Giulio Andreotti told a National Defense Council meeting Thursday he would appoint General Alessandro D'Ambrosio to the position when Adm. Martini's term runs out in March, according to the reports.

Adm. Martini was said not have been informed of the decision.

The reports linked his impending dismissal to the discovery of letters belonging to former Christian Democrat prime minister Aldo Moro a few weeks ago at a Red Brigades hideout in the northern city of Milan.

Mr. Moro was kidnapped in 1978 and subsequently killed.

BAGHDAD (OCT. 23) - Iraqi President Saddam Hussein is willing to meet his U.S. counterpart George Bush to examine the Gulf crisis, a visiting U.S. delegation chief said here Tuesday.

Salim Mansour told a news conference that Mr. Hussein suggested either a U.S.-Iraqi summit or direct talks at foreign minister-level to examine the Gulf crisis and ways of achieving peace and stability in the Middle East.

"The Iraqi President Saddam Hussein told us Sunday of his country's readiness to launch a direct dialogue with the United States to examine the Gulf crisis and means of achieving peace and stability in the Middle East," Dr. Mansour said.

Dr. Mansour met for two hours Sunday in Baghdad with President Hussein and later announced that Iraq would release 14 elderly and ill U.S. nationals trapped here since the August 2 invasion of Kuwait.

Mr. Hussein has also agreed to let go 50 elderly and ill Britons, five Finnish nationals and has asked parliament to discuss the possibility of releasing some 300 French citizens to confirm Iraq's "friendship" with France.

Dr. Mansour heads the private Iraqi-American Friendship Foundation that has been here for more than a week of talks with Iraqi officials on the Gulf crisis and ways to let foreigners detained here and in Kuwait go home.

SYDNEY (OCT. 23) - Nelson Mandela was upset Tuesday when he apparently thought he had been set up by the Australian Broadcasting Corporation (ABC) to debate with Inkatha Freedom Party President Mangosuthu Buthelezi.

Mr. Mandela -- who is on a three day official visit to Australia -- had just ended an interview with ABC Radio show PM and was sitting in the ABC's Canberra studio when the program introduced Chief Buthelezi as its next guest.

Mr. Mandela was apparently surprised when he heard the voice of Chief Buthelezi, who has agreed to hold long-awaited talks with him aimed at settling black violence in South Africa.

Kerrie Weil, PM's executive producer, later said that it was never intended to set up a debate between the two prominent rival black South Africans, whose followers are engaged in bloody strife in Natal and elsewhere.

Mr. Mandela asked interviewer Paul Murphy after he heard the start of the next interview: "Was that Buthelezi? In fairness you should have told me."

Mr. Murphy answered: "Mr. Mandela, yes, I should tell you that I have just been talking to Chief Buthelezi. I don't know whether you want to listen to what he has to say."

Mr Mandela said: "I don't. In fairness you should have told me the full picture beforehand."

Ms. Weil said: "It was intended that a live self-contained interview with Mandela be followed by a live self-contained interview with Buthelezi.

"We had finished the interview with Mandela and the compere read out the lead for the following item which was Buthelezi," she said.

A television cameraman, in the studio to record the Mr. Mandela interview, said the deputy president of the African National Congress was visibly angry at the incident.

TOKYO (OCT. 23) - Japan will propose a cut in tariffs on more than 100 tropical farm products at the Uruguay Round of multilateral trade negotitions this week, a government official said Tuesday.

Director-General of the International Affairs Department of the Agriculture, Forestry and Fisheries Ministry Hisao Azuma told a farm trade committee of the ruling Liberal Democratic Party (LDP) that the ministry planned to lower tariffs on more than 100 tropical farm products by 30 percent to around 5.5 percent from the current 7.5 percent.

The tariff reduction has been strongly requested by developing countries at the Urugay Round talks under the General Agreement on Tariffs and Trade (GATT).

According to Mr. Azuma, Japan will make the official proposal at GATT working-level meetings on tropical trade to be held on Wednesday and Thursday in Geneva.

BEIJING (OCT. 23) - China announced Tuesday the continuation of its nationwide crackdown on crime and pornography, which has already seen hundreds of people executed and tens of thousands prosecuted.

Liu Zhongde, deputy secretary general of the State Council (cabinet), said a new campaign against pornography would be launched from this winter until next spring to "get rid of cultural garbage," the New China News Agency reported.

He said the new attack would be used to reinforce the gains of the preceding campaign, which began after the Beijing massacre in June last year.

The communist party People's Daily published a statement by Qiao Shi, the permanent member of the party politburo charged with public security, in which he said the crackdown on crime would also be pursued.

It will be aimed at all serious crimes, criminal gangs and fugitive criminals, Mr. Qiao told a press conference Monday, the newspaper said.

He demanded in particular for the authorities to stem the resurgence of the so-called "six evils": prostitution, pornography, white slave trade, narcotics

trafficking and use, gambling and feudal superstitions.

Ren Jianxin, head of the supreme court, told the same conference that from May when the fight against crime began, until September, 796,000 cases, 157,000 of which were classified as serious, were dealt with.

CENTRAL COMMAND HEADQUARTERS, SAUDI ARABIA (OCT. 23) - General Colin Powell, chairman of the U.S. joint chiefs of staff, held talks with U.S. Middle East commander General H. Norman Schwarzkopf here Tuesday and said he had seen no evidence to back up reports that Iraq had withdrawn some of its troops from Kuwait.

Gen. Powell told reporters that he and Gen. Schwarzkopf, during some 10 hours of talks over two days, had "examined every possible contingency with which we might be faced.

"I explored all options with General Schwarzkopf," said Gen. Powell, who arrived in Saudi Arabia on Monday. "We've looked at the manner in which the buildup has gone so far and how close we were to achieving the original objectives assigned to us by the president, to deter and defend."

Asked about reports from Kuwaiti exiles that Iraq may be withdrawing some of its troops from Kuwait, Gen. Powell said: "I've seen those reports but I have no evidence that would substantiate them.

"The Iraqi forces still remain very solidly in Kuwait in the numbers we have been reporting all along and, frankly, I have not seen any evidence of withdrawal."

#90296d4280 10/23/1990 ~French/German News Agency

GBARNGA, LIBERIA (OCT. 23) - Ten months after launching his bid for the presidency, Charles Taylor has his own executive mansion, cabinet, legislature and constituency -- but not in the Liberian capital.

The National Patriotic Front of Liberia (NPFL) rebel chief has had to set up his dream in this town 150 kilometers (95 miles) north of Monrovia, after a West African expeditionary force beat back his troops from the capital in three weeks of heavy fighting.

The 6,000-strong expeditionary force, dispatched under the auspices of the Economic Commmunity of West African States (ECOWAS) and comprising troops from Nigeria, Ghana, Guinea, the Gambia and Sierra Leone, has driven the NPFL rebels out of Monrovia and is seeking to create a 20-kilometer (12-mile) buffer zone around the capital.

Mr. Taylor conceded on Sunday that his troops may lose the "urban areas," but would fight to the end in the country's bush. "They may drive us out of Monrovia and Paynesville, but we will buckle down, and there will be no peace in this country," he told journalists Sunday.

Undaunted, the stocky 42-year-old guerilla, who appointed himself president of this war-wracked West African state in July, moved on Sunday to consolidate his position by installing a 24-member national assembly under his leadership.

For the occasion, he brought in about 250 area residents for a church service followed by an induction ceremony for five NPFL members, one elected representative from each of Liberia's 13 counties and designates from six political parties.

Christian hymns were sung as a dozen boys and girls, members of the "junior commandos," armed with Soviet-made AK-47 assault rifles paced in front of the stage where Mr. Taylor, his companion Agnes and other members of the cabinet took their places.

Dressed in a white flowing African robe, the rebel chief, who says that he is a Baptist, sent a Bible around during the swearing-in ceremony for each of the new legislators to kiss, as an NPFL band played on.

BANGKOK (OCT. 23) - Burmese troops on Tuesday launched lightning raids on the Rangoon offices of the opposition party which won May's general elections, eyewitnesses said, one day after security forces raided 133 Buddhist monasteries.

The assault on the offices of the National League for Democracy (NLD), the country's largest political party, and Monday's move against the monks in the central city of Mandalay is the latest round in what Rangoon-based observers said was a concentrated campaign to silence the junta's critics.

Eyewitnesses reported that at least five of the NLD offices in southwest Rangoon were surrounded by troops as security police carried out searches inside the buildings.

The military, who videotaped the raids, gave no reason for the searches or details of what they were looking for and NLD leaders were not immediately available for comment. NLD sources said their headquarters had been among the offices searched.

In their raids on the monasteries in Mandalay, troops seized what the ruling military junta described as proof of a plot to overthrow the regime.

"The NLD has all but been neutralised and as a political party it now seems incapable of mounting any real threat to the regime," said one of the Rangoon-based observers.

"With the move against the monks, it looks as if the last serious opposition is now out of action," the observer said.

Observers had no doubt that the latest move against the NLD was linked to the raids on the Buddhist monasteries in Mandalay.

The government-run Working People's Daily newspaper reported that a search of the Payagyi monastery in Mandalay resulted in the discovery of anti-government pamphlets.

The paper said that materials, badges of various political parties including of the NLD, as well as newsletters published by alleged communists, had also been uncovered.

An official decree on Sunday had warned that action would be taken against political parties exploiting religion for their own ends, and Burma-based observers said the raids on the NLD offices were simply a followup to the raids on the monasteries.

ISLAMABAD (OCT. 23) - The Pakistani president has introduced a new measure designed to prevent defection by a member from a party in the national parliament or provincial assemblies.

An ordinance issued by President Ghulam Ishaq late Monday amends an existing political parties act to tighten up restrictions on members abandoning a party on whose ticket they are elected to a legislature.

Under the act a member changing his loyalties runs the risk of losing his seat. The ordinance is aimed at removing some loopholes in that law.

The president had cited political horse-trading as one of the reasons for his dissolution of the assemblies in August.

The Pakistani electorate is to go to the polls on Wednesday to elect a new national assembly, to be followed by elections to the four provincial assemblies on Saturday.

At the time of a failed no-confidence motion against former premier Benazir Bhutto in November 1989, some opposition members sided with her and were later given cabinet posts.

The presidential ordinance provides that a member shall be deemed to have defected from a political party if he votes or abstains from voting in violation of his party's directive.

Members are barred from accepting any office under a government of a political party other than their own without prior permission in writing from their party.

The restrictions also cover any alliance or combination of political parties which participate in an election under one election symbol. The symbols are allotted to help the illiterate to cast their votes.

BRUSSELS (NATO) (OCT. 23) - Romania on Tuesday became the last Warsaw Pact country to establish diplomatic relations with NATO, the organization's secretary general Manfred Woerner said.

Mr. Woerner, who met with Romanian Prime Minister Petre Roman at NATO headquarters, also accepted accreditation of a Romanian ambassador to the North Atlantic Treaty Organization.

Romania will be represented at NATO by its ambassador to Belgium and the European Community, Ovidiu Corneliu Popescu.

Mr. Roman, who was paying his first visit to NATO, also met ambassadors of the 16 NATO member states. He later told journalists he had been asked "many questions" on his country's attitude to the Warsaw Pact and on the "democratic process" and economic reforms in Romania.

He said the Warsaw Pact -- whose members include the Soviet Union, Czechoslovakia, Poland, Hungary, Bulgaria and Romania -- was losing its "military component" to be left simply with "a political component."

"One quite rightly these days wonders whether this political component is really useful, if it can really contribute to stability in Europe," he said. The Warsaw Pact members should "think about these questions and try and find answers, if there are any," Mr. Roman added.

Hungary plans to withdraw from the Warsaw Pact next year. Czechoslovak President Vaclav Havel said Sunday that the upcoming Warsaw Pact summit to be held on November 3 and 4 in the Hungarian capital, Budapest, should consider "liquidating its joint military command."

OSLO (OCT. 23) - Norway will try to assist jailed Kenyan dissident Koigi wa Wamwere by presenting his case to the United Nations, acting Foreign Minister Tom Vraalssen said here Tuesday.

Because Kenya broke diplomatic relations with Norway on Monday, Norway is barred from taking bilateral action against the Kenyan Government to help the former politician, said Mr. Vraalsen, also Minister of Overseas Aid.

The Norwegian Government has notified the U.N. High Commissioner for Refugees, the U.N. Commission on Human Rights, and the International Lawyers Commission of Mr. Wamwere's upcoming trial. The moves were to compensate for Norway's lost opportunities to assist him, Mr. Vraalsen said.

Meanwhile Norway has sent an official note to Kenya, denouncing accusations of a conspiracy to topple the regime of President Daniel arap Moi.

In a statement announcing the decision to break relations with Norway, Kenyan Foreign Minister Wilson Ndolo Ayah accused Norway of harbouring Kenyan dissidents.

Norway assumes relations will be formally cut next Monday, Mr. Vraalsen said, and that the Kenyan Government will not reverse its decision.

As a result of the move, all state-to-state relations will cease and most Norwegians involved in development programs will leave Kenya by the end of the

week, he said.

He commented that it was a sad way to end 25 years of cooperation, adding that frequent violations of human rights had made the internal situation in Kenya worse over the years.

The Danish development organisation Danida would be closing down Norwegian projects and the Swedish Embassy would from now on represent Norwegian interests in Kenya.

Meanwhile in Copenhagen, well-informed sources in the Danish Foreign Ministry said Kenya's unilateral diplomatic break with Norway could put an 83-million-dollar Nordic aid project at risk.

The five-year project supported by Denmark, Finland, Norway and Sweden concerns farming cooperatives and rural development.

Foreign Minister Uffe Ellemann-Jensen issued a communique regretting Monday's break and saying Denmark had been concerned for some time that the Kenyan leadership was distancing itself from democratic procedures.

In future aid programmes, Denmark wanted to encourage democratic reforms and help for Kenya's poorest sectors, he said.

Denmark's bilateral assistance, standing at 35 million dollars for 1990, would face considerable cuts in coming years because of Kenyan refusal to respect human rights, the minister warned.

LONDON (OCT. 23) - Italian President Francesco Cossiga arrived here Tuesday on a three-day state visit to Britain and was greeted at Victoria station by Queen Elizabeth.

They then drove together in a horse-drawn carriage procession to Buckingham Palace.

Mr. Cossiga, a friend of Margaret Thatcher, is to hold talks Wednesday with the British prime minister on the Gulf crisis and European unity.

He will join the queen later Wedneday to open an exhibition entitled "The Lions of Venice" at the British Museum.

On Saturday, Mrs. Thatcher met with Italian Prime Minister Giulio Andreotti ahead of a European Council meeting next Saturday, at which they plan to call on the European Economic Community to draw up a statement condemning Iraq for the invasion of Kuwait.

BOGOTA (OCT. 23) - The cousin of fugitive drug cartel leader Pablo Escobar Gaviriar was killed Tuesday in a shootout with police at a ranch near the cartel's Medellin headquarters, police spokesmen said.

Luis Hernando Gaviria Gomez, alias Abraham, was responsible for the cartel's military wing, the police said in a statement without specifying exactly what his functions were.

He was killed during a predawn raid on a ranch known as Manantial, near Medellin, 250 kilometers (150 miles) northwest of here, where police investigators had tracked him.

Police found several cassettes, letters and other documents at the ranch which they said were of great value to their ongoing investigation of the cartel's activity.

Mr. Gaviria was the second of Mr. Escobar's relatives to have been killed during the government's 14-month-long crackdown against drug trafficking operations in the country.

Gustavo Gaviria Ribero, another of Mr. Escobar's cousins, was killed in August by authorities.

Two other cartel bosses, Jose Gonzalo Rodriguez Gacha and John Jairo Arias Tascon died December 1989 and last August, respectively, in other clashes with the authorities.

#90296d4720 10/23/1990 ~French/German News Agency
ISTANBUL (OCT. 23) - A drought in Istanbul has been ended by rain which fell at the push of a button.

The rain has fallen continuously on Istanbul for 24 hours and is due to continue intermittently for the next seven months under a contract to "bomb" the capital's reservoirs with planned precipitations.

Since mid-July Turkish university researchers and a U.S. company Weather Modifications, together with the Turkish weather service, had been waiting for a big cumulus cloud formation to pass over the dry reservoirs serving the 7.5 million people living in Istanbul.

Under a seven-month contract worth 580,000 dollars, the U.S. company used an aeroplane to vaporise silver iodine inside the cloud to provoke rain in the

right place.

The method, developed in 1946 by U.S. scientist Vincent J. Schaefer, causes a sudden cooling of the cloud, leading to rainfall.

MOSCOW (OCT. 23) - The Soviet Union Tuesday said it was pleased that the prime ministers of North and South Korea had met to try and lessen tension on the Korean peninsula.

Youri Gremitskikh, a spokesman for the Soviet foreign affairs ministry, also called on South Korea to cancel this year's "Time Spirit" joint military exercises with the United States.

He said military exercises with the United States had hindered the inter-Korean dialogue "on several occasions."

Mr. Gremitskikh added that the "Soviet Union, as a permanent member of the United Nations' Security Council, would support any decision" (concerning a Korean seat at the U.N.) chosen by the two Koreas.

BANGKOK (OCT. 23) - The Khmer Rouge has warned foreign governments and companies against passing agreements with Phnom Penh, saying such accords would not be recognized when an interim authority of the warring factions takes over.

The warning came in a statement issued here Tuesday by the Beijing-backed Marxist Khmer Rouge, the dominant faction in a guerrilla coalition fighting Phnom Penh's Vietnam-installed government.

The statement mentioned no specific country or firm.

But analysts said it could be aimed at countries such as France which recently

announced a bilateral cooperation package with Phnom Penh, or airlines which have decided to open direct airlinks with the Cambodian capital.

"Any agreement or treaty signed with the puppet regime installed in Phnom Penh by the Vietnamese occupying forces is null and void," the statement said.

The statement was issued by the ministry of foreign affairs of the National Government of Cambodia - the formal name for the guerrilla coalition in which the foreign ministry is held by Khmer Rouge leader Khieu Samphan.

It said the only recognised accords would be those signed with the interim authority, the Supreme National Council (SNC) "under the chairmanship of Samdech (Prince) Norodom Sihanouk," the nominal head of the coalition.

Cambodia's warring factions accepted last month a United Nations framework to end their 12-year-old war and set up the SNC with six representatives of Phnom Penh and six others from the coalition.

But they have since been squabbling over the inclusion of Prince Sihanouk as chairman of the body.

The prince, Cambodia's former monarch, is both head of the Khmer Rouge-dominated coalition and the leader of one of two non-communist factions.

#90296d5090 10/23/1990 ~French/German News Agency

HARARE (OCT. 23) - An unemployed 26-year-old Zimbabwean has been jailed for eight years for spying for the South African government on the African National Congress in a sensitive border region dividing the two countries, it was reported here Tuesday.

Ziana, Zimbabwe's national news agency, said that Lovejoy Ndou pleaded guilty before a magistrate in the western city of Bulawayo to having reported to South african military commanders that there were Anc personnel in the remote Shashi district in the south-western corner of Zimbabwe in April this year.

South Africa until recently had complained frequently that Zimbabwe allowed Anc guerrillas to deploy from the Shashi area into South Africa for attacks and sabotage, but President Robert Mugabe's government has denied the charge. Ndou's testimony is a rare admission that the Anc has stationed personnel in the area.

Ndou pleaded with Magistrate Wilbert Mapombere to give him a chance, and said he was able to provide authorities with the identities of other Zimbabweans who had also been recruited by South Africa for espionage, but his plea appeared to have been ignored and Mapombere passed the maximum sentence permissable by his court.

#90296d5170 10/23/1990 ~French/German News Agency

NEW YORK (OCT. 23) - Many hospitals and clinics are refusing to perform abortions on women infected with the AIDS virus or are charging exhorbitant rates for the procedure, it was reported Tuesday.

Citing a study by the New York City Commission on Human Rights, The New York Times reported that undercover investigators called 50 clinics and hospitals that offer abortions and made appointments for the procedure.

But 20 of the clinics cancelled when informed the prospective patient tested positive for the HIV virus responsible for AIDS. One private hospital hiked the 500 dollar fee to 3,000 dollars to perform the abortion.

Clinics refusing to perform the abortions cited the lack of appropriate sterilization equipment and inexperience in treating AIDS patients.

"That's nonsense and a flimsy excuse," said Hakim Elahi, medical director of Planned Parenthood of New York, which performs 10,000 abortions annually.

"The procedure is no different if a patient is HIV-positive. They are supposed to follow unviersal blood precautions regardless. And sterilization of equipment is in no way special," Dr. Elahi said.

The inability of AIDS patients to get medical care has been repeated in the offices of dentists, proctologists and surgeons, the newspaper reported.

Bernard McNamara, chairman of the AIDS Committee of the Los Angeles County Medical Society, said their concerns are out of proportion to the risk.

But the problem for women seeking abortions is that there is a 30 to 40 per cent chance that an HIV-infected woman will pass the virus on to her child.

"The reason they're concerned is that there is a very small, but finite, risk of a surgeon being exposed. But precautions can be taken, and I don't think that risk justifies turning people away," Dr. McNamara said.

KAMPALAKHARTOUM (OCT. 23) - Libyan Revolutionary leader Moamer Gaddafi arrived Tuesday in the Ugandan capital Kampala for a surprise visit after a four-day stay in war-torn Sudan.

Unconfirmed reports said Gaddafi was to meet with Rwandan rebels who on October 4 attacked Kigali, the capital of their country, from bases in Uganda.

Libya has been giving financial aid to Uganda to help rebuild its economy shattered by a past civil war. Official in Kampala were tight-lipped about Gadaffi's plans in Uganda.

Gaddafi arrived in the East African state with about 200 body guards, while several transport aircrafts landed in Kampala with military vehicles for his guards and a bullet-proof limousine.

In Khartoum, Gaddafi pledged to meet the leader of the rebel Sudan People's Liberation Army (Spla), Colonel John Garang, to convince him to end his rebellion, the Sudan News Agency Suna reported.

It quoted him as saying before leaving the country that if Garang was still a revolutionary, he would participate in the ''people's rule which all revolutionaries support''.

Vienna (OCT. 23) - The democratisation process in Eastern Europe is the key to solving the critical environmental problems that blight that region, the head of the Parliamentary Assembly of the Council of Europe said Tuesday at the outset of an unprecedented all-European parliamentary conference in Vienna.

Anders Bjoerck said the environment must be viewed as ''a major portion of the human-rights'' issues facing Eastern Europe.

''Rapic democratisation'' is a precondition for improving the environmental situation there, he told the opening session of the conference, which runs through Thursday.

Austrian Chancellor Franz Vranitzky called for an international environmental charta to combat such things as the devastation of tropical rain forests.

He also called on industrialised countries to abandon their ''school-masterly attitude'' toward developing countries and to shift the emphasis to eliminating poverty and indebtedness as a step toward helping those countries improve the environment.

In related developments, a report issued in London Tuesday said oil pollution of global oceans has receded by 60 per cent over the last decade. The report by the U.N. International Maritime Organization (Imo) said 568,800 tons of oil was spilled worldwide in 1989, compared with 1.47 million tons in 1981.

ZANZlBAR (OCT. 23) - Belgium stepped up pressure Tuesday on the Rwandan government and invading rebels to hold political dialogue when Prime Minister Wilfried Martens held four hours of talks here with Tanzanian President Ali Hassan Mwinyi.

In a joint communique, they called on the Rwandan authorities and the internal and external opposition to enter into peace talks under Organisation of African Unity auspices.

They also asked OAU secretary-general Salim Salim to bring pressure to bear for the entire enactment of an outline peace agreement worked out a week ago by the Rwandan and Ugandan leaders Juvenal Habyarimana and Yoweri Museveni.

It includes a cease-fire, negotiations with the Patriotic Front rebels who attacked from Uganda three weeks ago, the return home of Rwandan refugees, and a regional conference on Rwanda.

Mr. Martens and Mr. Mwinyi said they supported those proposals. They also welcomed a message from the rebel executive committee that it would obsserve a cease-fire for up to three weeks.

#90296d5480 10/23/1990 ~French/German News Agency

SOFIA (OCT. 23) - The Warsaw Pact summit, which was to be held in Budapest on November 3 and 4, has been postponed, according to a Bulgarian Foreign Ministry official.

Foreign Ministry Eastern European department head Ivan Katrandjiev said the decision had been taken at the Soviet Union's request.

In Prague, the Czechoslovakian foreign ministry confirmed that Moscow had requested the postponement, and said a new date was being discussed.

Sources in Sofia said that Moscow would prefer to hold the session after the meeting in Paris from November 19 to 21 of the 34-member Conference on Security and Cooperation in Europe (CSCE), which is to discuss the question of a new European order.

The Budapest meeting of the Warsaw Pact had been expected to confirm the organization's transition from a military to a political alliance.

#90296d5500 10/23/1990 ~French/German News Agency

JAKARTA (OCT. 23) - Indonesian Foreign Minister Ali Alatas will travel to Paris on Monday to meet his French counterpart to pave the way for a series of meetings on Cambodia before the end of the year, diplomatic sources said here

Tuesday.

Mr. Alatas's talks with Roland Dumas are expected to result in the reconvening of the International Paris Conference in Jakarta between now and the end of the year or at the beginning of next year, the Indonesian and Western sources said.

An initial eight- or 10-day meeting has been scheduled for the beginning of November in Jakarta with a second to be held in Paris later in the same month, Indonesian sources said.

According to observers, the first meeting could not stretch beyond November 10 on account of Mr. Alatas's full schedule, which sees him leaving for Japan on November 11.

Nobody was in a position to comment Tuesday on either the nature of the future meetings or who would participate in them.

The same source said the main issue was to get together the six countries which run the three commissions, set up by the Paris Conference co-chaired by Indonesia and France in 1989: Australia, Canada, India, Japan, Laos and Malaysia.

#90296d5580 10/23/1990 ~French/German News Agency

COLOMBO (OCT. 23) - Government troops have taken control of an area of 40 square kilometers held by Tamil rebels in northern Sri Lanka, a senior military official said Tuesday.

Journalists who were flown to the Palaly area on the northern peninsula were told by the officer in charge of northern operations, Major General Denzil Kobbekaduwa, that the area has now been cleared of the rebels of the Liberation Tigers of Tamil Eelam.

The operation was part of a major offensive launched last week in the strategic region, 18 kilometers from the northern provincial capital of Jaffna.

There were no civilians left in the area from Palaly to Kankesanthurai, a distance of 4 kilometers, the officer said. All but a few houses in the area had been pulled down during the operation.

The general claimed that the civilians had fled the area before the operation commenced and that there were no civilian casualties.

The cement factory in Kankesanthurai was extensively damaged, and journalists were not permitted to enter it because it was believed the buildings were heavily mined.

Kobbekaduwa said 119 Tamil rebels had been killed in the operation. Twenty soldiers were also killed and 117 others injured, he added. The officer said that over 1,000 troops were involved in the operation against about 2,000 Tamil rebels in the area.

He said the main reason for the operation was to clear a strategic supply route in the vicinity of the Palaly military camp and air base and the Kankesanthurai harbour area.

Sniper fire was heard even as journalists toured the harbour area, and it was estimated that Tamil rebels were about 150 meters away. The troops have cleared the area up to the harbour so far.

#90296d6260 10/23/1990 ~French/German News Agency
HAMBURG (OCT 23) - General Agreement on Tariffs and Trade (Gatt) Director-General Arthur Dunkel warned here Tuesday against a failure of the present talks to liberalise world trade.

Dunkel told a gathering of Hamburg businessmen that a break-up of the present Uruguay Round of trade talks, which opened four years ago and is due to end in early December, would hit all Gatt members.

The European Community's failure to produce a common stance on cutting farm subsidues is threatening to torpedo the talks. The issue is only one of 15 sectors negotiated at the Uruguay Round which is held within the Gatt framework.

Dunkel said Germany as as a major world exporting nation bore a special responsibility.

Britain Monday blamed Germany for the failure of E.C. foreign ministers talks in Luxembourg on the issue. Italy, which currently chairs the E.C., warned that any further delay to produce a common negotiating formula might result in a break-up of the Uruguay Round.

Germany opposes the E.C. Commission proposal for a 30-per-cent cut in farm subsidies, saying it fails to provide compensation for farmers which will suffer as a result of the cuts.

#90296d6610 10/23/1990 ~French/German News Agency

BRASILIA (OCT 23) - Censorship made a comeback in Brazilian television Tuesday after the government decreed that programs must be sanitized of scenes of sex and violence during prime time viewing.

Censorship, which was a staple under decades of dictatorial rule prior to the return to civilian government in 1985, was outlawed in Brazil's 1988 Constitution but was again decreed on Monday and was to go into effect Tuesday.

Freed of censorship in 1988, O Globo and Manchete television networks went into a ratings war in which their prime time soap operas increasingly showed scenes of violence and sexual intimacy, including frontal nude shots of women.

Government officials said the new restrictions were required under the recently adopted Child and Adolescent Protection Statute.

Programming will be banned from prime time if it shows violence or sexual acts or "undermines ethical values," according to the decree.

Programming is now to be divided into categories with racier scenes being shown later at night and with advisories to parents about the contents of the upcoming programs. There are no sanctions for violators.

Under the new system, shows deemed inappropriate for children under 12 must be

shown after 8:00 p.m., programming for those 14 years or older will be shown after 9:00 p.m. and adult entertainment for persons 18 or older must be shown after 11:00 p.m.

#90296d7840 10/23/1990 ~French/German News Agency

WASHINGTON (OCT 23) - A Republican congressman convicted in 1988 of having sex with a 16-year-old girl has decided to resign rather than face charges he sexually harassed a congressional employee, Republican sources said Tuesday.

The latest charge against Donald Lukens of Ohio involved a young woman who said the congressman approached her more than once on the same day, fondled her and gave her his business card, asking her to call him, the sources said.

The woman told her supervisors who brought it to the attention of the House Ethics Committee and House leaders, the sources said. The ethics committee voted Monday to revive its previous case against Mr. Lukens and expand it to include the new charge.

The sources said Mr. Lukens would announce his resignation Wednesday. An aide to the congressman said resignation was one option Mr. Lukens was considering but would not confirm that he had decided to resign.

STOCKHOLM (OCT. 23) EFE - The Swedish car manufacturer Volvo is considering setting up shop in a former Soviet weapons factory which was closed under an arms reduction agreement between the superpowers, a top Volvo official said Tuesday.

The official said the company is studying a Soviet proposal to convert the former arms factory in the town of Cherepovets, east of Leningrad, into a plant with four assembly lines capable of putting together 20,000 cars of the Volvo 240 series a year.

Under the plan, the car parts would be manufactured in Sweden and sent to the Soviet factory for assembly.

The director of Volvo Car Intercontinental, Ralph Johansson, said his company was interested in the idea but the decision would depend on the size of the investment and the taxes it would be required to pay in the Soviet Union.

"The ball is now in the Soviet court," Johansson said.

CADIZ, SPAIN (OCT. 23) EFE - Spanish customs officers have seized 77 exotic birds and other animals from members of a state-funded expedition who have just returned from an environmental and archaeological study trip to Latin America, officials said Tuesday.

The animals, which included Amazonian parrots, toucans, a macaw, a monkey and five stuffed caimans, were confiscated Monday when the expedition's boat docked in the southern port of Cadiz.

Customs officials and members of the Civil Guard's Nature Protection Service said most of the animals, all of protected species, had been bought at markets and that none of the expedition's passengers had obtained permission to take them out of Latin America.

The expedition, known as Adventure '92, was financed by the state's Fifth Centenary Commission which is organizing events to commemorate the 500th anniversary of Christopher Columbus' discovery of America.

Around 350 youths went on the 45-day trip to Mexico, Puerto Rico and through the Panama Canal, where they took part in ecological and archaeological study projects.

The confiscated animals will be kept at a zoo in the southern city of Jerez de la Frontera until arrangements are completed for them to be shipped back to the countries where they came from.

#90296e0026 10/23/1990 ~Latin America New Agency

Rio de Janeiro (OCT. 23) EFE - Delegates from Argentina, Brazil, Uruguay and Paraguay attending the meeting in Rio de Janeiro are working towards a preliminary agreement, possibly to be signed in November, which would lay the foundation for a tariff-free regional market, dubbed Mercosur, by 1995.

The talks focus on including Uruguay and Paraguay in a import tariff reduction accord signed by Argentina and Brazil in 1985 as the first step towards setting up Mercosur.

According to Brazilian delegate Celso Amorin, the four countries have agreed in principle to the formation of the common market but many technical problems still have to be worked out because of the differences in their economies.

Delegates to the meeting said that the more diversified economies of Brazil and Argentina would reap more short-term benefits from Mercosur than Uruguay and Paraguay.

Mercosur, whose headquarters may be in the Uruguayan capital of Montevideo,

would establish common import tarifs for non-member countries and a joint organization to resolve trade disputes.

Earlier this year, Chile rejected the possibility of entering the proposed common market in the short term because it felt its economy was more advanced than the other four countries.

Delegates from the four countries met for the first time for talks on setting up Mercosur earlier this month.

#90296e0041 10/23/1990 ~Latin America New Agency

GUATEMALA CITY (OCT 23) EFE - Guatemala's Roman Catholic Church Tuesday urged former military dictator Gen. Efrain Rios Montt to back off from his attempts to disrupt next's month presidential race because it could provoke a coup.

Guatemalan Archbishop Prospero Penados del Barrio said Tuesday, "in the name of peace in Guatemala, as a friend and Guatemalan, I ask Gen. Rios Montt to desist from attitudes that confront and polarize our people" because "it could bring about a coup."

Rios Montt has called on his supporters to write his name on ballot papers after the Constitutional Court upheld previous court decisions barring him from running in the November 11 presidential elections under a constitutional clause banning anyone from holding office who has taken part in a coup.

The former military dictator seized power in a 1982 coup and ruled for 16 months during the Army's brutal counter-insurgency campaign against leftist rebels before he himself was ousted by a military coup.

Penados del Barrio said it was possibile that the retired general could disrupt the elections and bring about a military intervention if the civilian government lost control because he is "a charismatic man" who "has sympathizers in part of the military as well as power over the urban masses."

Rios Montt was creating a dangerous situation by inciting "a sector of the population which will not respect laws, anything or anyone," the archbishop added.

The former military ruler, who was pipped to win next month's election by opinion polls, has also said that violence could break out if he were not

allowed to run for president.

"It is stubbornness on (Rios Montt's) part that he has run the whole legal course from the Supreme Electoral Tribunal to the Supreme Court and Constitutional Court with negative results yet still insists on something that cannot be," Penados del Barrio said.

The run-up to the November ballot has been plagued by violence with at least 11 leading political party members murdered since July.

Guatemala has a history of coups, with no successive democratically-elected governments in the past 35 years.

#90296f1854 10/23/1990 ~United Press International

CHICAGO (OCT. 23) UPI - Soybeans rallied to session highs during the final 30 minutes of trading and were higher at the close Tuesday on the Chicago Board of Trade.

Grain futures were mixed.

Most of the buying in soybeans was attributed to short-covering and reports of a move in Congress to delay the ''triple base'' option program until 1992.

Aggressive buying in soybean oil provided additional support for soybeans, along with minor gains in soymeal. However, heavy delivery notices against October meal kept a lid on prices.

Corn was higher across the board, partly on spillover from the soy complex. Trading ranges were narrow and the volume was relatively light.

Wheat was pressured by light commercial selling and the lack of near- term export business.

Gains in both corn and soybeans were limited by the harvest, and the likelihood that the activity will continue the rest of the week. The extended weather outlook calls for generally favorable conditions next week in the Midwest.

Country movement was light to moderate.

At the close, corn was up 3/4 to 1 1/2, soybeans up 2 to 8, wheat up 1/2 to off 1 and oats off 1/4 to up 1/4.

#90296h0023 10/23/1990 ~Chinese News Agency

WARSAW (OCT. 22) XINHUA - POLAND AND ARGENTINA WILL INCREASE THEIR COOPERATION PROGRAMS OF PERSONNEL EXCHANGES AND ECONOMIC RESEARCH, THE PRESIDENTS OF THE TWO COUNTRIES NOTED HERE TODAY.

HEADS OF STATE WOJCIECH JARUZELSKI AND CARLOS SAUL MENEM REACHED AN AGREEMENT ON THE EXEMPTION OF VISAS FOR TOURISTS WANTING TO VISIT THE OTHER'S COUNTRY, AND EXCHANGED DIPLOMATIC NOTES, PAP REPORTED.

MENEM ARRIVED IN THE POLISH CAPITAL TODAY ON AN WORKING VISIT AT THE INVITATION OF PRESIDENT JARUZELSKI. IT IS THE FIRST VISIT TO POLAND BY ANY LATIN AMERICAN LEADER IN NEARLY A DECADE.

LOCAL REPORTS SAID THAT MENEM'S VISIT WILL NOT ONLY STRENGTHEN POLISH-ARGENTINE TIES, BUT WILL ALSO HAVE A POSITIVE IMPACT ON THE EUROPEAN NATION'S RELATIONS WITH OTHER LATIN AMERICAN COUNTRIES.

MENEM MET WITH PRIME MINISTER TADEUSZ MAZOWIECKI AND LEADERS OF THE POLISH SEJM, OR PARLIAMENT, AND DISCUSSED WAYS TO TACKLE THE PROBLEMS OF MASSIVE FOREIGN DEBTS AND INFLATION, TWO HURDLES COMMON TO BOTH NATIONS.

ACCOMPANYING MENEM DURING HIS STAY IN POLAND ARE 30 ARGENTINE INDUSTRIALISTS WHO ARE SCHEDULED TO MEET WITH THEIR POLISH COUNTERPARTS. OFFICIALS HERE ARE REPORTED TO BE HOPING THAT THEIR MEETING WILL BRING FRUITFUL RESULTS.

EXPERTS FROM BOTH SIDES STUDIED TRADE ISSUES SUCH AS THE ELIMINATION OF DOUBLE TARIFFS AND THE PROTECTION OF INVESTMENT IN EACH OTHERS COUNTRY, AND ANALYSTS SAY A DOCUMENT ON THEIR FINDINGS IS LIKELY TO EMERGE.

A COMMENTARY CARRIED BY THE RZECZYPOSPOLITA NEWSPAPER URGED THE POLISH GOVERNMENT TO ATTACH IMPORTANCE TO ARGENTINA'S POSITION AND DRAW VALUABLE LESSONS FROM THE ARGENTINE APPROACH," BECAUSE THE TWO COUNTRIES SHARE MANY THINGS IN COMMON IN THE ECONOMIC REALM.

South Africa Now (PBS) October 17, 1990 (Transcript #32)

The Afrikaaner Resisitance Movement (AWB) claims it will launch a rebellion against government reforms; Mandela wins the realease of 35 people in Soweto,

as demands for the release of political prisoners lead to more violence; Gregory Rockman, former South African police Lieutenant, discusses the force; black South African businessmen and African-American businessmen meet to discuss new black businesses in South Africa; an in-depth interview with Joe Slovo, General Secretary of the South African Communist Party; South African film depicting black miners' music, as well as the music of the women they've left behind.

Nightline (ABC) October 17, 1990 (Transcript #2453)

The Price of Oil - Who Profits?: Third quarter profits will be embarrassingly enormous, but the oil industry says it's not price-gouging. Senator Joseph Lieberman (D-CT), William O'Keefe of the American Petroleum Institute and oil analyst Bernard Picchi discuss Sen. Lieberman's proposal of a pricing authority similar to the Federal Reserve to replace the speculative market now setting prices.

Crossfire (CNN) October 17, 1990 (Transcript #163)

Gray Power: The Senior Lobby: Paul Hewitt of the National Taxpayers Union and Theresa McKenna of the National Council of Senior Citizens discuss the power of the senior lobby and its role in killing the budget summit plan.

Larry King Live (CNN) October 17, 1990 (Transcript #152)

''Wyley Gates: Guilty or Not Guilty?'' (a discussion concerning Wyley Gates' guilt or innocence in the murder of his family members with attorney Charles Wilcox, and Maime and Pete Brahm, relatives of one of the murder victims); ''John List: A Murderer Captured'' (Ed Illiano, a confidant of one of List's victims, and Joe Sharkey, author of Death Sentence, discuss the case of List, who was captured and convicted 18 years after he murdered his family).

Good Morning America (ABC) October 17, 1990 (Transcript #1133)

Administration's budget view; San Francisco quake, a year later; anti-terrorist ads; Teddy Kollek interview (Mayor of Jerusalem); workaholism; AIDS: a prognosis for America; Steve Martin in Saudi Arabia; plunder of Kuwait's art; Bess Armstrong interview.

Oprah Winfrey Show October 17, 1990 (Transcript #1068)

Staying Together for the Children: Couples debate whether it is better for children to have parents remain together or split up with Dr. Judith Coche and Vicki Lansky, author of Divorce Book for Parents - Helping Your Children Cope With Divorce and Its Aftermath.

Sally Jessy Raphael October 17, 1990 (Transcript #553)

Girls Obsessed With Their Bodies: Thin and attractive teenage girls who believe they are fat and ugly share their reasons for their obsession with their looks. An overweight woman tells them it's more important to cultivate inner beauty than outer beauty; while an image consultant explains that its normal for today's teenagers to feel self-concious.

Geraldo October 17, 1990 (Transcript #805)

Teen Extremes: A debutante, an athlete, a junkie, the class president, a cheerleader, a community service worker, the National Honor Society president, an activist, a punk, a college student, a new waver, a lesbian and an uptown girl discuss their lifestyles and why they enjoy being what they are.

Donahue October 17, 1990 (Transcript #3057)

Asexuality: People who've largely lost the desire for sex try to explore the reasons for their lack of interest and the effect it has on their spouses.

Thursday's Line-Up: (To be summarized in tomorrow's Daily Report) Donahue: Outrage Over Playboy's Campus Centerfolds Sally Jessy Raphael: When Adults Can't Read Geraldo: Hollywood First Wives... Ex-Wives (R) Oprah Winfrey: Ex-Girlfriend Scams (R)

Fax Volume Discount Available Individual transcripts cost $15-20 by fax, but if you open a fax account for $100 or more, you pay only $10 per faxed transcript up to one hour in length. You also get unlimited free research queries on our toll-free telephone number.

#90296k0029 10/23/1990 ~Japanese News Agency

TOKYO (OCT. 23) KYODO - JAPAN'S FARM OUTPUT ROSE 5.1 PERCENT IN VALUE IN 1989 FROM THE PREVIOUS YEAR TO 11,051.3 BILLION YEN FOR THE FIRST UPTURN IN FOUR YEARS, THE MINISTRY OF AGRICULTURE, FORESTRY, AND FISHERIES SAID TUESDAY.

THE NATION'S TOTAL AGRICULTURAL OUTPUT IS CALCULATED BY MULTIPLYING THE YEAR'S TOTAL OUTPUT OF FARM PRODUCE BY PRODUCER PRICES.

THE MINISTRY SAID JAPANESE FARMERS' ANNUAL INCOME, INCLUDING FARM SUBSIDIES, TOTALED 4,614.0 BILLION YEN, UP 15.3 PERCENT FROM 1988 DUE TO INCREASED SALES PRICES FOR RICE, FRUIT, AND FLOWERS.

THE OUTPUT OF RICE GREW 6.3 PERCENT IN 1989 FROM A YEAR EARLIER TO 3,226.6 BILLION YEN, ACCOUNTING FOR 29.2 PERCENT OF THE TOTAL PRODUCTION OF FARM PRODUCTS, THE MINISTRY SAID.

VEGETABLE PRODUCTION INCHED UP 0.8 PERCENT TO 2,321.4 BILLION YEN. FRUIT POSTED A STEADY 15.7 PERCENT GROWTH TO 943.7 BILLION YEN, PARTLY DUE TO HIGHER SALES PRICES. FLOWERS SHOWED 10.7 PERCENT GROWTH TO 320 BILLION YEN.

-30- 1147

#90296k0032 10/23/1990 ~Japanese News Agency

TOKYO (OCT. 23) KYODO - THREE MAJOR JAPANESE GAS COMPANIES SAID TUESDAY THEY HAVE CONCLUDED A LONG-TERM TRADE CONTRACT WITH THE INDONESIAN STATE-RUN OIL FIRM PERTAMINA FOR SUPPLY OF LIQUIFIED NATURAL GAS (LNG).

THE CONTRACT TERM BEGINS IN 1994 FOR A PERIOD OF 20 YEARS, ACCORDING TO OFFICIALS OF THE THREE FIRMS -- TOKYO GAS CO., OSAKA GAS CO., AND TOHO GAS CO.

UNDER THE CONTRACT, TOKYO GAS WILL PURCHASE A YEARLY TOTAL OF 800,000 TONS OF LNG, WHILE OSAKA GAS BUYS 1.1 MILLION TONS AND TOHO 100,000 TONS.

IT WAS THE FIRST TRADE CONTRACT FOR TOKYO GAS, WHICH IS BUYING A TOTAL OF 3.89 MILLION TONS WORTH OF LNG ANNUALLY FROM THE UNITED STATES, BURNEI, MALAYSIA, AND AUSTRALIA, TO IMPORT INDONESIAN-PRODUCED LNG.

TO DELIVER THE LNG, THE OFFICIALS SAID, THE JAPANESE FIRMS WILL INVEST A TOTAL OF ABOUT 60 BILLION YEN TO BUILD TWO LNG TANKERS.

#90296k0058 10/23/1990 ~Japanese News Agency

TOKYO (OCT. 23) KYODO - SCIENCE AND TECHNOLOGY SHOULD CONTRIBUTE TO CREATING SAFER AND HEALTHIER LIFESTYLES BY HARMONIZING WITH NATURE AND HUMANITY, A GOVERNMENT REPORT SAID TUESDAY. THE SCIENCE AND TECHNOLOGY AGENCY'S ANNUAL REPORT STRESSED THE ROLE OF SCIENCE IN PROVIDING NEW VISIONS AND AN IMPROVED INTELLECTUAL ENVIRONMENT, URGING THE CREATION OF WHAT IT CALLED A "TECHNO-AMENITY SOCIETY."

THE DOCUMENT STRESSED THE DESIRABILITY OF SCIENCE POSITIVELY INFLUENCING THE QUALITY OF LIFE, TAKING THE VIEW THAT SHOULD THIS BE ACHIEVED, PEOPLE WILL BE ABLE TO ENJOY A "TRULY AFFLUENT" LIFE WITH THE FREEDOM TO EXPRESS THEIR OWN PERSONALITIES.

NOTING CHANGING ATTITUDES TOWARD SCIENCE AMONG THE PUBLIC, THE 1990 REPORT SAID PEOPLE SHOULD REGARD IT AS A MAJOR FACTOR IN THEIR LIVES RATHER THAN ECONOMIC DEVELOPMENT.

THE BOOK SAID GREAT THINGS ARE EXPECTED OF SCIENCE IN THE FIELDS OF HEALTH, A COMFORTABLE AND SAFE ENVIRONMENT, AND AN EXPANSION IN THE SCOPE OF HUMAN ACTIVITIES.

IT EMPHASIZED THE GROWING CONTRIBUTION TO A BETTER QUALITY OF LIFE FROM RESEARCH INTO SUCH AREAS AS MATERIALS SCIENCE, LIFE SCIENCE, AND ELECTRONICS, DESPITE THEIR APPARENT ABSENCE OF IMMEDIATE IMPACT ON MOST PEOPLE'S DAILY LIVES. SPECIFICALLY, THE REPORT CITED SUCH DEVELOPMENTS AS THE MEDICAL USE OF IMAGE SCANNERS, PRODUCTION OF NEW MEDICINES THROUGH GENETIC ENGINEERING, WATER AND HEAT DISPOSAL, WASTE PROCESSING TECHNIQUES, AND INFORMATION PROCESSING TECHNOLOGIES AS SEEN IN THE WIDESPREAD USE OF PERSONAL COMPUTERS.

JAPAN'S EXPENDITURE ON RESEARCH TOTALED NEARLY ONE TRILLION YEN AS OF 1988, UP 50 PERCENT FROM 1983, WHILE RESEARCHERS NUMBERED 460,000 IN 1989, ALSO AN INCREASE OF 20 PERCENT COMPARED WITH FIVE YEARS BEFORE. IN BOTH CATEGORIES, THE ROLE OF PRIVATE COMPANIES IS GROWING, THE REPORT SAID.

THE REPORT SAID THE LEVEL OF JAPAN'S RESEARCH ACTIVITIES RANKS SECOND IN THE WORLD AFTER THE UNITED STATES AND FORMER WEST GERMANY.

-30- 2143

#90296k0059 10/23/1990 ~Japanese News Agency

HONG KONG (OCT. 23) KYODO - AROUND 200 HONG KONG STUDENTS DEMONSTRATED OUTSIDE THE JAPANESE CONSULATE GENERAL HERE TUESDAY MORNING IN THE THIRD DAY OF PROTESTS OVER JAPANESE CLAIMS TO DISPUTED ISLANDS IN THE EAST CHINA SEA.

THE DEMONSTRATORS PRESENTED A LETTER TO CONSULATE OFFICIALS CALLING FOR THE REMOVAL OF THE JAPANESE FLAG FROM THE ISLANDS. THE UNINHABITED ISLANDS, KNOWN AS SENKAKU IN JAPAN AND TIAOYUTAI IN CHINA AND TAIWAN, ARE CLAIMED BY JAPAN, CHINA, AND TAIWAN.

THE DEMONSTRATION, ORGANIZED BY A STUDENT GROUP CALLED THE COALITION OF PATRIOTIC YOUTH DEFENDING THE DIAOYUTAI, TOOK PLACE PEACEFULLY.

THE WAVE OF PROTESTS CAME AFTER JAPANESE PATROL BOATS PREVENTED TWO TAIWANESE FISHING BOATS FROM APPROACHING THE ISLANDS SUNDAY.

FURTHER HONG KONG PROTESTS ARE PLANNED LATER IN THE WEEK, INCLUDING A MAJOR RALLY SUNDAY, ACCORDING TO SPOKESMEN FROM STUDENT AND OTHER CIVIC ORGANIZATIONS IN THE TERRITORY.

-30- 1098

#90296k0079 10/23/1990 ~Japanese News Agency

TOKYO (OCT. 23) KYODO - KURAYA PHARMACEUTICAL CO. OF TOKYO SAID TUESDAY IT HAS BOUGHT A U.S. CLINICAL TESTING FIRM IN CALIFORNIA FOR 25 MILLION DOLLARS.

KURAYA PURCHASED THE INSTITUTE FOR BIOLOGICAL RESEARCH AND DEVELOPMENT INC. TO HELP JAPANESE PHARMACEUTICAL COMPANIES OPERATING IN THE UNITED STATES WITH THE CLINICAL TESTS NECESSARY TO SUPPORT APPLICATIONS TO THE U.S. FOOD AND DRAGS ADMINISTRATION (FDA) FOR THE APPROVAL OF NEW MEDICINES, KURAYA OFFICIALS SAID.

ACCORDING TO THE OFFICIALS, THERE ARE ABOUT 400 CLINICAL TESTING AGENTS IN THE U.S., BUT THIS IS THE FIRST SUCH PURCHASE BY A JAPANESE PHARMACEUTICAL FIRM.

THE INSTITUTE CURRENTLY POSTS ANNUAL CLINICAL TESTING FEES OF 14 MILLION DOLLARS. SOME 20 PERCENT OF ITS COMMISSIONS ARE FROM DRUG MAKERS IN JAPAN AND EUROPE, THE OFFICIALS ADDED.

-30- 977

#90296m0001 10/23/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 23) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED

BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

World stock markets are generally higher. ... The Nikkei adds 227 points for seventh straight gain. ... The FTSE is up a strong 24 points in midday London trading. ... U.S. stocks are directionless overseas. ... The dollar is up sharply on the yen. ... Bonds are flat. ... Crude bounces -- Brent North Sea is up $1.70 to $28.50. ... PRESIDENT BUSH vetoes the Civil Rights Act of 1990. ... Federal regulators are seeking $30.8 million from the former chairman of the now defunct CENTRUST BANK OF MIAMI. ... AMERICAN EXPRESS says third-quarter net income rose 3.6% from a year earlier, but per-share earnings were off 3.9% to 74 cents. ... PATHE COMMUNICATIONS says it delivered $967 million in checks to complete its purchase of MGM-UA COMMUNICATIONS. ... A three-year contract covering 100,000 FORD workers has been approved by an 82% margin. ... LORAL CORP. is taking on three European partners in its purchase of FORD's communications and weather satellite business.

WHAT'S AHEAD:

PRESIDENT BUSH campaigns today in New England as budget talks drag on in Washington. ... ENERGY SECRETARY JAMES WATKINS addresses the U.S. CHAMBER OF COMMERCE on national energy strategy this morning. ... AT&T says that it will raise its weekend and night rates 2.2% effective Nov. 2.

FROM THE BULLS:

"Right now, we are bullish on stocks and don't want to fight the tape," says "Davis/Zweig Futures Hotline" editor CRAIG CORCORAN. "The averages have turned up, and we look for an upside bias through the rest of the year." Corcoran thinks the market may reach 2700 by the end of the year, in part as a result of what he sees as an imminent "aggressive" easing by the Fed. ("Investor's Daily", 10/23)

BOB JAMES of TIMING RESEARCH in Fort Lauderdale, Fla., says the strength in the market could spread to the Blue Chips. "I imagine that if we keep oil under $30 a barrel then we have a pretty good shot at 2600 [on the Dow] this week," says Mr. James. ("USA Today", 10/23)

The Dow utility average moved above its 200-day moving average yesterday, giving some analysts hope for the broader market. "It's extremely rare for a bear market to remain intact with a major index rallying above its 200-day moving average," says RICHARD EAKLE of EAKLE ASSOCIATES. ANDREW ADDISON, editor and publisher of "The Addison Report," says the utility average's performance may signal a turnaround. "My feeling is that a short-term low is in place," says Addison. ("Investor's Daily", 10/23)

FROM THE BEARS:

"The fundamental outlook for the near future still doesn't support a sustainable upward move," says SURESH BHIRUD, chief investment strategist at OPPENHEIMER & CO. Mr. Bhirud argues that there is no relief in sight for the credit pressures currently hounding the economy. He also believes that the deficit-cutting bill when passed

"won't address longer-term structural deficits, which are running very, very high." (WSJ, 10/23)

STOCK MARKET:

"A serious bear market is in effect, the worst since 1974," says GERALD APPELL at "Systems & Forecasts." But he says his Time Trend III model remains on a buy signal: "In recent years, declines have turned out to be excellent buying opportunities." Stocks are no longer overvalued by many measures, and there is not likely to be much downside risk from the recent lows. "The worst in terms of downside momentum may now be over." (CNBC "World Business", 10/23)

"There was too much fluff from Friday and a lot of air in the market," says KEN DUCEY at S.G. WARBURG by way of assessing why the Dow did not respond more positively to plunging oil prices yesterday. "The market got overextended last week because of the expiration of options and futures; now it's catch-up time." Even so, he notes, "It's the Dow stocks that are down; the broad-based market is still firm." (NYT and "USA Today", 10/23)

Despite the seven day rally in Japan, SHEARSON LEHMAN's PETER DAPUZZO remains leery. "We think the market's gotten ahead of itself and there will be some more correction." Japanese interest rates may have stabilized, but questionably high real estate valuations have yet fully to hit the country's banks and brokerage houses, says DaPuzzo. Germany currently has the most attractive financial markets followed by Great Britain, Italy and France, says DaPuzzo. (FNN "World Market Update", 10/23)

"The broader market is trying to catch up with the Dow," says MARSHALL ACUFF of SMITH BARNEY. There was some profit-taking yesterday morning, but he says "it was encouraging that some bargain hunters came in in the afternoon." (FNN "Marketwrap", 10/22)

"The course of oil over the next few weeks ... is definitely going to continue to influence the stock market," says A.C. MOORE of ARGUS RESEARCH. He says third quarter earnings have looked much better than expected, but says "that's history and not the future." Moore thinks earnings will be worse in both the fourth quarter and the first half of next year. (FNN "Marketwrap", 10/22)

"I don't see anybody throwing caution to the wind and saying, 'Let's go out and buy a lot of things because the worst is over,'" says ROBERT McCREADY, an

institutional trader for A.G. EDWARDS & SONS. (WSJ, 10/23)

"The bigger market has been resilient here," says JON GROVEMAN, president at LADENBURG, THALMANN. ("The Washington Post", 10/23)

BILL WOLMAN of "BusinessWeek" and "CNBC" says he has moved from "disinterested" to "disgusted" with the marathon budget talks in Washington and that most people he knows feel the same way. "Like any event," he says, "it tends to get more and more discounted, so when it happens everybody is bored out of their gourd and the market will do nothing." (CNBC "Market Wrap-Up", 10/22)

STOCK TIPS:

"USA Today" reports this morning that analysts are warming up to natural gas stocks. "I clearly think it's the fuel of the '90s," says RON BARONE of KIDDER, PEABODY. "It's plentiful. It's clean, relative to other fossil fuels. And it's cheap. To me, that seems like a winning combination." GEORGE GASPAR of ROBERT W. BAIRD & CO., says, "I'm bullish on natural gas." Barone likes explorers LOUISIANA LAND & EXPLORATION, ENRON OIL & GAS, ARKLA EXPLORATION and ANADARKO PETROLEUM. He also likes pipeline operators ARKLA and TRANSCO. Among utilities, he picks ATLANTA GAS LIGHT. CURT LAUNER of DONALDSON LUFKIN & JENRETTE recommends COLUMBIA GAS SYSTEM. ("USA Today", 10/23)

K.C. GRAINGER of JESUP, JOSEPHTHAL & CO. thinks it is still a bear market, but says that affords the best opportunity for the average investor to buy stocks because they are so cheap. He likes OMI CORP., EDO, CENTRAL PACIFIC and SYNTECH as good "buy and hold" stocks for the patient investor. (CNBC "Market Wrap-Up", 10/22)

The poor performance of casino stocks reflects the slow utilization of recently constructed gaming facilities, says STEVEN EISENBERG, leisure time analyst for BEAR STEARNS. "Volumes have been a little below expectations in Atlantic City. They've been fairly decent in Nevada, but we suspect that trend is slowing." Many operators are too highly leveraged, says Eisenberg: "We think CIRCUS CIRCUS is not as highly leveraged as some of the other operators and generates a lot of free cash flow. Of any of the stocks in the group, its the one we're most comfortable with at the moment." Hold higher quality gaming stocks, but with a year or longer time horizon, advises Eisenberg: "It could be a little bumpy over the next three to six months." (CNN "Business Morning", 10/23)

DAVID TICE, editor of "Behind the Numbers," believes that PROCTER & GAMBLE shares are overpriced at their current growth-stock multiple of 18 times the past 12 months' earnings. Although P&G's per-share earnings grew 23% in the fiscal year ended in June, "a close examination shows that without the benefit of several one-time events, pretax earnings grew at only a 7% rate." EDWIN

ARTZT, P&G's chairman, replies: "It's inaccurate and untrue. I think he must have had his bifocals on upside down." Most analysts also disagree with Mr. Tice. "This is the wrong company to pick on," says JOSEPH KOZLOFF, a SMITH BARNEY analyst. "These guys are so conservative they squeak." (WSJ, 10/23)

-30- 8718

#90296m0002 10/23/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 23) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar is up sharply against the yen in overnight trading. But MORGAN STANLEY's DAVID GERMANY says it is too early to say that the dollar has hit bottom against the Japanese currency. Germany says the factors which were pushing the dollar down remain in place -- the relative strength of the Japanese economy and the belief that Japanese interest rates will stay firm. "[However], the dollar is extremely low against most currencies. It is about 25% below where it was at the start of [the year] and it's getting close to bargain basement levels." (FNN "World Market Update", 10/23)

Plunging oil prices helped the dollar strengthen because cheaper oil reduces investors' fear of accelerating inflation and recession, says IAN FOAKES, manager of foreign exchange at PAINEWEBBER GROUP. (WSJ, 10/23)

The dollar's gain yesterday "was a short-covering move -- nothing more than that," says FRANCOISE SOARES-KEMP, treasury vice president at CREDIT SUISSE in New York. Nothing has changed, she says, referring to the suspense over budget negotiations in Washington and the Mideast crisis. (WSJ, 10/23)

"If you think about fundamentals, the only conclusion is that the dollar will go down," says MASAFUMI IWAMOTO, assistant general foreign exchange manager with MITSUI TRUST & BANKING in Tokyo. But, he adds, pushing the dollar lower will be "difficult and dangerous," especially with the BANK OF JAPAN eager to avoid a sharp decline of the dollar. (WSJ, 10/23)

In the absence of fresh news to motivate trading, "the market is out of ideas" to justify dollar selling, says ERIK LEHTIS, a trader at CREDIT AGRICOLE in New York. (WSJ, 10/23)

"People are being just a little more cautious about running the dollar down," says ERIC NICKERSON, vice president and economist at BANK OF AMERICA in San Francisco. (WSJ, 10/23)

"Once they get the budget accord out of the way" the Fed is likely to ease a quarter point, according to A.C. MOORE of ARGUS RESEARCH. Moore says the

markets have already discounted the easing to some extent, but adds, "I don't think it's totally in the market." (FNN "Marketwrap", 10/22)

Bond investors "don't believe this drop in oil is sustainable," says ROBERTA OLSON, fixed income portfolio manager at BANC ONE ASSET MANAGEMENT. Bond traders also worry that the Treasury's quarterly debt refunding next month will drive prices down and yields up. The government is expected to announce details of the $30 billion auction next week. (WSJ, 10/23)

MITCHELL HELD, chief economist at SMITH BARNEY, HARRIS UPHAM & CO., explains why the bond market didn't react more favorably to the drop in oil: "We had a huge drop in oil prices, but peace hasn't broken out yet, and we have to look at the reality of things." (WSJ, 10/23)

THE ECONOMY:

BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC," says the third-quarter gross national product figures due out a week from today could be stronger than previously expected. "For us GNP bears, it's not good because the number could be as high as 2% for the third quarter," says Wolman. But he says it would be a "phony number to some extent" because high inventories and consumer spending may skew the figure upward. "We could come up with a rather large number and it would be deceptive ... [because] it would be large for not very good reasons. ... If you take the statistical quirks, the implications are that inventories will be run down in the fourth quarter and if we do 2 [percent growth] in the third quarter then we've got a fourth quarter that is down an extra 1 percent." (CNBC "Market Wrap-Up", 10/22)

"You have to be a military strategist, a psychologist and now a dream interpreter," says JOHN LICHTBLAU, chairman of PETROLEUM INDUSTRY RESEARCH FOUNDATION, commenting on the dramatic drop in oil prices on Monday. "But it appears that market psychology has completely turned around: war fears are now being totally dismissed." (WSJ, 10/23)

Yesterday's action on the oil market was due to "increasing supply, sagging demand and Saddam's dream," says PETER BEUTEL of PEGASUS ECONOMETRIC GROUP. "As the day progressed, momentum built to the stage where now the market is in a complete rout." ("Investor's Daily", 10/23)

"At this stage, the [oil] market is not focusing on [the Middle East] as much " says PETER BEUTEL of PEGASUS ECONOMETRIC GROUP. "There is a feeling that the tension is dissipating a little bit, so I don't think that's a major factor at this particular moment. But somewhere down the road, it could still be a factor." (CNBC "Market Wrap-Up", 10/22)

"[Oil] prices could easily go up again ... if Saddam [Hussein] said he was ready to fight the Great Satan," says energy analyst ADAM SIEMINSKI. ("USA Today", 10/23)

IN WASHINGTON:

"Every year you're going to see the same pattern," says REP. CHUCK DOUGLAS (R. - New Hamp.). "The Democrats are the pork-barrelers, the Republicans are saying, 'Let's cut spending ... that way we won't have to raise your taxes.'" (FNN "Marketwrap", 10/22)

#90296p8118 10/23/1990 ~PR Newswire

SALT LAKE CITY (OCT. 23) PR NEWSWIRE - Smith's Food & Drug Centers Inc. (NYSE: SFD) today reported record sales and net income for the third quarter 1990.

Sales for the 13 weeks ended Sept. 29, 1990 totaled $510 million compared to $432 million last year, an increase of 18 percent. Net income was $8.6 million or 34 cents per common share, up 19 percent over $7.2 million or 29 cents per common share reported for the like quarter last year.

For the first 39 weeks of the year, sales totaled $1.5 billion, up 20 percent from $1.3 billion last year. Net income of $25.3 million was up 34 percent over last year's $18.9 million. Net income per common share, diluted by additional shares issued in connection with last year's public offering, was $1 compared to 87 cents, an increase of 15 percent. Sales in comparable stores opened at least a full year were up 7 percent for the first 39 weeks of the year.

According to planned expansion, Smith's opened eleven new combination food and drug centers during the first 39 weeks of 1990. These new centers are located in Burley, Idaho; Sunset City, Bountiful, Salt Lake City, Sandy, and Orem, Utah; two in Las Vegas, Nev.; Las Cruces, N.M.; and two in Phoenix. Fifteen obsolete, smaller stores were closed during the like period, including six stores in Southwest Idaho. The company also converted two stores to warehouse-type supermarkets. Four additional stores, currently under construction, are planned to open during the fourth quarter of 1990.

Gross margins for the third quarter decreased slightly to 21.8 percent from 21.9 percent for the like quarter last year. Pressure on gross margins is created by new markets as the company promotes price competition to establish market share and build sufficient volume to effect economies of scale. The decrease in gross margins was offset by a reduction in the percentage of total expenses to net sales caused by higher sales volumes and increases in comparable store sales which spread fixed costs over a larger sales base. The decrease in interest expense, experienced largely in the first part of the year, was due to the reduction of debt from the proceeds of the company's initial public offering.

An ice cream plant, located at the Layton, Utah distribution complex, is near completion. Construction is on schedule for a large central distribution center located west of Phoenix in Tolleson, Ariz. This new center will open at the end of 1991 and will supply stores in the Southwest Region and the new, planned California Region.

The third regular quarterly dividend in 1990 of 7 cents per common share was paid on Sept. 14, 1990.

Smith's is a leading regional supermarket chain operating 94 stores in seven intermountain and southwestern states. The majority of these stores are large combination food and drug centers.

EL SEGUNDO, CALIF. (OCT. 23) PR NEWSWIRE - Infonet, the leading international value-added network services company, announced today the formation of a separate corporation, called Infonet Portugal.

Headquartered in Lisbon, Infonet Portgual is jointly owned by Infonet, Conpanhia Portuguesa Radio Marconi (CPRM), Telefonos Lisboa e Oporto (TLP) and Time-Sharing S.A. CPRM and TLP are both telecommunication companies in Portugal. Time-Sharing S.A. is a Portuguese computer services firm.

"Infonet Portugal was established to better serve our rapidly growing customer base in Portugal," said Juan Cenzano, director of Infonet's Iberoamerica region.

"A number of Infonet's multinational clients in the United Kingdom, Germany, France, Spain and the U.S. have invested heavily in Portugal's booming commercial real estate market and created joint ventures with Portuguese firms " added Cenzano.

"These multinational firms now want to communicate with their Portuguese operations via Infonet's worldwide public data network and assure local support for their Infonet users in Portugal."

Infonet Portugal will actively market Infonet's global public data network and store and forward messaging services to businesses in Portgual. The Infonet network is accessible in more than 110 countries for worldwide data, store and forward, E-mail, fax and telex transmissions.

An interconnect is also being established between the Infonet network and Portugal's national Telepac public data network. Once this interconnect is

completed, Telepac subscribers will be able to gain direct local access to the Infonet network from Faro, Setubal, Lisbon, Porto, Coimbra and numerous other cities in Portugal.

Infonet Portugal's telecommunication experts will make the necessary arrangements for users in Portugal to access the Infonet network via Telepac.

Established in 1970, Infonet is the leading standards-based international value-added network services company. It provides and directly supports communication and computer services throughout the world. The company is jointly owned by MCI and 10 major telecommunication administrations in Europe and the Asia-Pacific.

SAN FRANCISCO (OCT. 23) PR NEWSWIRE - Transcisco Industries Inc., a San Francisco-based company (AMEX: TNIA, TNIB), announced today that its wholly owned subsidiary, Transcisco Trading Co., signed a sublicensing agreement in the U.S.S.R. along with its primary licensee, HAKA of Finland, for its proprietary Uni-Temp tankcar heating technology. This new agreement is a 12-year sublicensing agreement for over $48 million in revenue to HAKA and Transcisco Trading, and provides for a specified number of Uni-Temp heating plates to be furnished by the Western partners for the domestic U.S.S.R. market.

In addition, Transcisco Trading, along with HAKA of Finland, signed a letter of intent, or protocol, with the National Railways of Hungary (MAV). This protocol specifies that the parties will now begin negotiations to establish a tankcar leasing company in Hungary whereby HAKA, Transcisco and MAV are partners providing tankcar leasing services to petrochemical operators and enterprises in the nation. The format will be similar to what Transcisco has set up in the U.S.S.R. with their first joint venture, SOVFINAMTRANS, and what is now being negotiated in Poland for a similar venture. The signing of the protocol in Hungary, when negotiations are completed, would make it the third joint venture railcar leasing company in Eastern Europe. This is a continuation of Transcisco's strategy started several years ago.

Additional production of Uni-Temp plates for its Soviet joint venture begins soon, and prototype Uni-Temp equipped tankcars for the Polish joint venture are now being built. It is not contemplated that production units for either Poland or Hungary will begin until mid-1991. Over the last few months, the company signed leases in the Soviet Union for some 900-1,000 units, and that production begins shortly, continuing well into 1991.

Transcisco Industries operates railcar maintenance and retrofitting operations

through its Transcisco Rail Services division and through its wholly owned subsidiary, Transcisco Tours, operates a dinner train in San Antonio, Texas, and will commence operation of a luxury "cruise train" service to Lake Tahoe and Reno from the San Francisco Bay Area starting in late 1990. Transcisco owns 36 percent of PLM International, an AMEX-listed diversified equipment leasing company, and Transcisco owns 20 percent of SOVFINAMTRANS, a U.S.S.R. railcar leasing company that operates tank cars with Transcisco's Uni-Temp heating system. Transcisco expects to diversify its exposure, both in equipment-types and geography, to proprietary transportation equipment, parts, and operating businesses using its own unique technologies and its proven financing skills.

#90296p8139 10/23/1990 ~PR Newswire

TACOMA, WASH. (OCT. 23) PR NEWSWIRE - Weyerhaeuser Co. (NYSE: WY) today reported third-quarter earnings per common share of 42 cents, down from 78 cents per share in the comparable period of 1989.

Net income for the quarter was $90.6 million, down 46 percent, and sales totaled $2.3 billion, down 12 percent.

For the first nine months of 1990, earnings per share totaled $1.57, down 29 percent, net income $334.9 million, down 29 percent, and sales $6.9 billion, down 8 percent.

The year-ago quarter and nine months net earnings included a $10-million gain (5 cents per common share), representing the net of gains on asset and subsidiary stock sales and reserves established and costs associated with restructuring.

Chairman and Chief Executive Officer George H. Weyerhaeuser said the most significant declines in third-quarter year-to-year results were in businesses associated with new construction. Earnings of the company's building products operations were down 56 percent from the comparable quarter of 1989, and those of its construction subsidiaries, down 59 percent.

Overall pulp and paper sector earnings from operations were down 22 percent, with the variance concentrated in market pulp and containerboard packaging. Paper and newsprint results were up from the 1989 quarter.

The company's financial services subsidiaries all contributed to a $25 million earnings improvement over the 1989 quarter in that sector.

Mr. Weyerhaeuser said domestic log and timber prices have declined in response to the depressed domestic lumber market. He said there are no signs of

near-term improvement in domestic construction, but that, as Japan continues to work down excess inventories of lumber and logs, export markets for those products should improve.

Paper and paperboard product markets, he said, may be nearing the bottom of the cycle, with price increases appearing in some products, notably newsprint, linerboard and some paper grades.

SEATTLE (OCT. 23) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) announced today that it received U.S. patent 4,965,195 covering technologies for making genetically-engineered Interleukin-7 (IL-7) proteins, a family of growth factors pioneered by Immunex scientists.

IL-7 is a growth factor which stimulates the growth in bone marrow of immature B-cells and T-cells which regulate the immune system. Il-7 may also stimulate the production of platelets which help control blood clotting.

Immuex scientists Anthony Namen, Raymond Goodwin, Stephen Lupton and Diane Mochizuki are the inventors of the technologies described in the patent, which broadly covers recombinent DNA technologies for producing mammailian IL-1 proteins. In order to clone the IL-7 gene, Namen developed a method for growing pre-B-cells in cell culture systems which simulate the environment in bone marrow. This technique permitted the presence of IL-7 produced by recombinant DNA clones to be detected and the gene isolated.

The research leading to the Immunex discoveries was sponsored by Immunology Ventures, a joint venture between Immunex and Sterling Drug Inc. Sterling is conducting preclinical research on IL-7 and retains worldwide rights to manufacture and market the drug.

"The IL-7 patent represents an important achievement in the development of blood cell growth factors," said Steven Gillis, Ph.D., executive vice president of Immunex. "IL-7 may be the first factor involved in the early differentiation of B- and T-cells which control immune function. It may ultimately play an important role in the treatment of patients whose immune systems have been suppressed as a result of infection or by radiation or chemotherapy."

"This patent strengthens our expanding proprietary portfolio of cytokine and cytokine receptor products and demonstrates our leadership position in this field," said Scott Hallquist, Immunex vice president and general counsel.

Immunex is a leading biotechnology company focused on the research,

development, marketing and manufacture of immunological therapeutic products.

SAN DIEGO (OCT. 23) PR NEWSWIRE - BSD Bancorp (AMEX: BSD) today announced that it has initiated an internal reorganization through which Bank of La Costa will become a branch of The Bank of San Diego. The transaction is subject to appropriate regulatory approvals.

Bank of La Costa, with $26 million in assets at Sept. 30, 1990, became a wholly owned subsidiary of BSD Bancorp in 1989 when the holding company acquired the 47 percent of the shares not previously owned.

BSD Bancorp Chairman James S. Brown said the reorganization was being undertaken to better utilize the company's capital and human resources. "We look forward to continuing to serve the La Costa community with a full range of banking services," said Brown.

The Bank of San Diego, with $170 million in assets at Sept. 30, 1990, currently operates five branches in San Diego County, located at Balboa and Ruffin Road; Grossmont Center; downtown San Diego; Tenth and G Street; and Towne Centre. The bank also operates a loan production office in Orange County, Calif. The addition of a La Costa location will bring the total number of branches to six. The Bank of San Diego is the largest subsidiary of BSD Bancorp Inc., a publicly owned multi-bank holding company serving banking and trust markets in Southern California.

CONTACT: Vito J. Guarino, Jr., president and COO, 619-237-5365, or Marilyn Creson Jones, CFO, 619-237-5366, both of BSD Bancorp.

#90296p8142 10/23/1990 ~PR Newswire

HINGHAM, MA (OCT. 23) PR NEWSWIRE - The Software Developer's Company, Inc. (NASDAQ: SDEV) (Boston Stock Exchange: SDC) announced today the operating results for the second quarter ended Sept. 30, 1990.

THE SOFTWARE DEVELOPER'S COMPANY, INC.
Results of Operations
(Unaudited -- In thousands, except per share data)

Periods Ended	Three Months		Six Months	
Sept. 30	1990	1989	1990	1989

Net sales	$8,322	$4,523	$15,610	$8,121
Operating income	374	236	719	355
Net income	207	117	391	205
Net income per share	0.09	0.06	0.16	0.10
Common shares outstanding	2,413	2,059	2,401	2,079

According to President Bruce Lynch, "Revenues increased 84 percent over the comparable quarter last year, continuing a strong growth pattern. Income grew 77 percent, slightly below revenue growth due to the scheduled expansion of management and sales staff and planned expenditures for new products being launched by the Solution Systems division.

"The sales increase is a result of two principal factors," Lynch noted. "First, increased circulation of the Programmer's Shop Catalog to 500,000 has generated additional advertising revenue as well as increased software sales for the Programmer's Shop division. Second, sales at our Solution Systems division grew, reflecting the efforts of Dale Troppito, the recently hired general manager of the division and vice president of product development."

The company also announced the resignation of Melvin Seiler as vice president - sales. Said Lynch, "Since he joined us in March 1989, Mel had been working part-time to assist us in plotting strategy and building our sales organization. At the same time, he has been working for two other companies nearer his Wilton, Conn., home. As his assignment with us is now largely complete, Mel will be able to devote more of his energies to his other responsibilities. We are pleased he will continue to work with us on a consulting basis."

The Software Developer's Company, Inc. develops, publishes and distributes software development tools for the PC programming community through three divisions: Solution Systems, publisher of BRIEF and other development tools for PC programmers; the Programmer's Shop, a retail and wholesale mail-order distributor of more than 1,500 products for PC programmers, and SDC Communications, which publishes the Programmer's Shop Catalog and utilizes SDC's substantial mailing list of programming product buyers in other marketing endeavors.

#90296p8144 10/23/1990 ~PR Newswire

PITTSBURGH (OCT. 23) PR NEWSWIRE - II-VI Inc. (NASDAQ-NMS: IIVI) today reported results for the first fiscal quarter ended Sept. 30, 1990.

Net earnings for the period were $226,000 ($0.09 per share) on revenues of

$3,628,000. These results compare with net earnings of $311,000 ($0.12 per share) on revenues of $3,413,000 in the first fiscal quarter last year.

Results for the current period reflect higher shipments of infrared materials and laser optics. However, gross margins were lower primarily as a result of continued price competition. In addition, the company recorded higher corporate overhead expenses and decreased net interest income when compared with the first quarter of fiscal 1990. Internal research and development expenses increased significantly during the quarter reflecting less focus on Cadmium Teluride and greater emphasis on the Zinc Selenide/Zinc Sulfide areas. II-VI's Singapore manufacturing facility reported improved performance vs. the same period last year.

Bookings for the current period rose 5 percent to $4,104,000, the second highest level in II-VI's history. The company attributed the increased bookings level to greater orders from military and defense-related customers primarily as a result of the departure of a major competitor in the Zinc Selenide/Zinc Sulfide markets.

International bookings, however, decreased significantly reflecting a general slowdown in worldwide manufacturing of industrial carbon dioxide lasers.

In discussing the results of the quarter, Francis J. Kramer, president and chief operating officer, stated, "We are pleased with the increase in new order bookings. While it is too early to determine if this trend will continue throughout fiscal 1991, we are nonetheless encouraged by the growth in our military-related business, though somewhat disappointed in our international optics orders for the quarter." Kramer continued, "We remain enthusiastic about the long-term prospects for II-VI, although we continue to view the near-term with cautious optimism."

Headquartered in Saxonburg, Pa., II-VI Inc. designs, manufactures and markets optical and electro-optical components and materials for precision use in infrared devices. The company's products are used in high-power lasers for industiral processing, lasers for surgery and other medical applications and military sensing systems.

#90296p8145 10/23/1990 ~PR Newswire

LOWELL, MASS. (OCT. 23) PR NEWSWIRE - Wang Laboratories (AMEX: WAN) today reported a net profit of $2.6 million, or 2 cents per share, for the first quarter ending Sept. 30, 1990, compared to a net loss of $62.1 million, or 38 cents per share, for the first quarter of fiscal 1990. Revenues from continuing operations totalled $571.5 million for the first quarter, compared

with $604.8 million in the first quarter of fiscal 1990.

Richard W. Miller, chairman and chief executive officer, said, "Given an extremely difficult industry situation and an adverse economic environment, we are pleased with these results as further evidence that our turnaround programs are working. We continue to make important progress in improving the relationship between operating revenues and operating expenses."

Operating profit before any special charges or credits was $12.6 million versus a loss of $30.1 million in the same quarter last year and a loss of $5.6 million in the quarter ending June 30, 1990. Additionally, the company recorded a gain of $11.8 million reflecting the transfer of an interest in a non-strategic real estate subsidiary in Brussels, Belgium bringing total operating earnings from continuing operations to $24.4 million for the quarter. Interest and other expenses for the quarter were $13.6 million versus $19 million a year earlier, resulting in pre-tax earnings from continuing operations of $10.8 million for the first quarter of the 1990 fiscal year versus a loss of $62 million for the same quarter in 1989. "During the quarter", Miller said, "the company achieved another important milestone by totally eliminating debt to its bank group. This debt was $575 million in August, 1989 and it is zero today."

Miller said, "During the quarter, the company's revenue mix continued to show strength in larger systems, a trend that began in the last quarter of fiscal 1990. This richer mix of products sold demonstrates renewed customer confidence in both the company's financial health and in the products and services it offers.

"We compete in an industry that is changing rapidly as a result of global economic forces and new customer needs. The current weakening economic cycle is continuing to put severe pressure on all companies in the computer industry and will need to be watched carefully as we proceed through the year. Accordingly, Wang is building an organization that can adapt to these changes and that can remain competitive in any environment."

#90296p8146 10/23/1990 ~PR Newswire

FULLERTON, CALIF. (OCT. 23) PR NEWSWIRE - Wynn's International Inc. (NYSE: WN) reported today net income of $1,593,000 or $.42 per share in the 1990 third quarter compared to $1,221,000, or $.32 per share in the third quarter of 1989, a 31 percent increase. Pretax income from operations was $3,469,000 in the quarter ended Sept. 30, 1990, a 71 percent increase over $2,034,000 in the third quarter of 1989. Net income was negatively affected by an increase in the effective tax rate to 54 percent from 40 percent in the 1989 third

quarter.

Net sales for the quarter ended Sept. 30, 1990, were $71,651,000, compared to $72,780,000 in the third quarter of 1989, a decrease of 2 percent. The decline in revenues compared to the same quarter in 1989 was caused by significantly lower sales at the Wynn's Climate Systems automotive air conditioning subsidiary, which was partially offset by higher revenues at the other Wynn's operating subsidiaries.

Net income for the nine months ended Sept. 30, 1990, was $4,896,000 or $1.27 per share compared to $6,084,000 or $1.59 per share a year ago. As previously reported, the 1989 first quarter results included an aftertax gain of $1,375,000, or $.36 per share, from the sale of a joint venture interest.

Net sales for the first nine months of 1990 were $212,716,000 compared to $216,407,000, for the first nine months of 1989, a decrease of 2 percent.

Wynn's Climate Systems Inc. (WCS), which designs and manufactures automotive air conditioning systems for sale to original equipment manufacturers (OEM) and through the aftermarket, experienced a 26 percent drop in revenues during the third quarter of 1990 compared to the 1989 third quarter. This expected reduction was due principally to reduced OEM sales to Chrysler, Isuzu and independent Hyundai dealers and lower aftermarket sales. Sales to Mazda increased in the third quarter of 1990 compared to the same period in 1989. Although WCS incurred a small operating loss in the most recent quarter, results of operations improved significantly compared to the third quarter of 1989.

Wynn's-Precision Inc. (Precision), a key supplier of sealing products for automobiles and other equipment, recorded a 3 percent increase in operating profits in the third quarter compared to the third quarter of 1989 on a 12 percent increase in revenues. Domestic operations performed well despite the overall general slowdown and pricing pressures in the automotive industry.

Wynn Oil Company had another strong quarter, recording a 25 percent increase in sales and a 29 percent increase in operating profit compared to the same quarter in the prior year. Excluding the effect of exchange rate fluctuations growth in revenues and earnings were 16 percent and 17 percent, respectively. The 1990 figures include the results of the two recent small acquisitions in France. Foreign operations continue to generate strong earnings which is a principal reason for the increase in the company's effective tax rate.

Wynn's International Inc., founded in 1939, is a worldwide supplier of automotive air conditioners, O-ring, seals, molded rubber products, petrochemical specialties products and builders hardware. The company has 2,041 employees and is headquartered at 2600 E. Nutwood Ave., Fullerton, Calif., 92631. Telephone: 714-449-8900.

#90296p8147 10/23/1990 ~PR Newswire

SAN DIEGO (OCT. 23) PR NEWSWIRE - Mycogen Corp. (NASDAQ: MYCO) today reported third quarter revenues of $4,082,000 for the period ended Sept. 30, 1990 compared to $2,926,000 in the same period last year. Net loss was $140,000, or $.01 per share, compared to a net loss of $224,000, or $.03 per share, for the same period in 1989.

For the first nine months of 1990, revenues were $11,455,000, compared to $7,669,000 for the same nine months of the previous year. For the first nine months of 1990, net loss decreased to $606,000, or $.06 per share, compared to a net loss of $1,143,000, or $.16 per share, for the first nine months of calendar 1989.

"The third quarter results are in line with expectations and reflect the decision made last quarter to increase the level of commercial development activities," said Jerry Caulder, chairman of Mycogen. "We believe the increased product development efforts will provide the company effective and environmentally sound biopesticides for the 1990s and beyond."

Cash and marketable securities at the end of the third quarter totaled $69,473,000 or approximately $5.91 per share. "Our strong cash position provides the basis to carry out our business strategies," added Caulder.

Mycogen Corp. develops, manufactures and markets biopesticides as alternatives to chemical pesticides to control a variety of insects, weeds and other pests. Mycogen's biopesticide products are based on natural agents such as microorganisms and fatty acid compounds which are compatible with the environment. The company develops its products through the application of genetic engineering technology and innovative formulations.

#90296p8149 10/23/1990 ~PR Newswire

WHIPPANY, N.J. (OCT. 23) PR NEWSWIRE - Isomedix Inc. (NASDAQ: ISMX) today reported third quarter consolidated sales of $5,998,895, a gain of 15 percent over sales of $5,201,779 for the same period in 1989. Operating income increased 8 percent to $1,477,269 compared with $1,369,946 for the same period last year.

Consolidated net income in the third quarter increased 22 percent to

$1,037,768, compared with $848,884 earned a year ago. Based on 6,672,505 weighted average number of shares outstanding in the third quarter compared with 5,394,221 shares a year ago (a 24 percent increase), earnings per share were 16 cents for both periods.

Consolidated sales for the nine months ended Sept. 30, 1990, were $18,246,131, exceeding sales of $15,213,738 for the same period in 1989 by 20 percent. Operating income increased 15 percent to $4,687,232 compared with $4,063,391 for the same period last year.

Consolidated net income in the nine months ended Sept. 30, 1990, increased 27 percent to $3,153,091 compared with $2,482,568 earned a year ago. Based on 6,670,175 weighted average number of shares outstanding in the third quarter compared with 5,270,905 shares a year ago (a 27 percent increase), earnings per share were 47 cents for both periods.

"We are pleased with the results of this quarter. Isomedix continues to show sizeable gains even in a weak economy. Our ethylene oxide sterilization business is strong and Skyland Validation continues to show improvement after its restructuring" stated John Masefield, president and chief executive officer of Isomedix Inc.

The company operates a network of nine sterilization facilities in seven states and Canada. During 1989, the capability to sterilize medical devices with pure ethylene oxide was added at two of these nine facilities and both locations are now operational. Isomedix also provides validation services through its Skyland Scientific Services subsidiary located in Montana.

CAMBRIDGE, MA (OCT. 23) PR NEWSWIRE - Boston Technology (NASDAQ: BSTN) announced today that it has entered into an agreement with BellSouth (NYSE: BLS) for the use of Boston Technology's CO ACCESS voice processing systems. The company has already shipped several CO ACCESS systems to BellSouth. The systems are being used to provide Memorycall(R), BellSouth's telephone answering and voice messaging service.

"We have been working closely with BellSouth for many months to establish this relationship," said Greg C. Carr, president of Boston Technology. "We are dedicated to serving BellSouth as a customer."

Boston Technology develops, manufactures and markets enhanced applications platforms, primarily to Regional Bell Operating Companies, cellular providers,

and independent telephone companies.

#90296p8153 10/23/1990 ~PR Newswire

MINNEAPOLIS (OCT. 23) PR NEWSWIRE - Control Data (NYSE: CDA) today reported third quarter 1990 net earnings of $8.5 million, or $.20 per share, on revenues of $434.1 million. For the first nine months of 1990, the company reported net earnings of $26.5 million, or $.62 per share, on revenues of $1.26 billion.

In the third quarter of 1989, Control Data reported net earnings of $9.8 million, or $.23 per share, on revenues of $763.0 million. Results for that period included revenue and earnings from Imprimis, the disk drive subsidiary sold to Seagate Technology at the end of September 1989. Net earnings in the third quarter of 1989 also included a net pre-tax restructuring gain of $8.5 million.

In the third quarter, improved performances from several businesses helped the company achieve better operating results than in the previous quarter, setting aside the second quarter pre-tax gain of $4.3 million on the sale of Silicon Graphics stock. The Computer Products Group continued to exceed its earnings targets in the third quarter, despite the economic slowdown and its transition to new products.

"We are confident that Computer Products' strategy of continuing to enhance and support its proprietary offerings, while at the same time providing integrated solutions that help customers reduce product development cycles and manage information, has put it on the right track," said Perlman. "Government Systems also continued to meet its earnings and revenue goals. The business is well positioned in markets that are high priorities for the Department of Defense, and the sale of its ATARS contract in early October will enhance its performance in 1991.

The company's previously announced plan to discontinue the SAMI product tracking operation will improve the earnings capability of its Arbitron subsidiary. Arbitron also entered into an arrangement with Information Resources, Inc. (IRI) in which it has assigned SAMI's customer contracts to IRI, and over the next seven years, IRI will provide certain data services to Arbitron without charge. Collectively, these transactions resulted in no gain or loss for Control Data in the third quarter.

Control Data provides data solutions that integrate hardware, software and services to meet customers' complex information management, data collection, processing and communications needs. Its businesses include the Arbitron Company, Automated Wagering, Business Management Services, Computer Products,

Data Services, Empros Systems International, Government Systems and Microgrnosis.

#90296p8163 10/23/1990 ~PR Newswire

EAST RUTHERFORD, NJ (OCT. 23) PR NEWSWIRE - Cambrex Corporation (NASDAQ: CBAM), a manufacturer of specialty chemicals, today reported net income of $0.5 million for the third quarter ended Sept. 30, 1990, compared with $0.4 million reported in the third quarter of 1989.

Net revenues for the third quarter were $31.7 million, compared with $33.7 million reported in the third quarter of 1989.

On a per share basis (fully diluted) the company reported net income equal to 11 cents compared with 7 cents in the third quarter of 1989.

Revenue increases in Agricultural Chemical Intermediates and Health and Cosmetic Products categories did not offset declines in the other product groups. The principal revenue shortfall was in the company's coatings group and was attributable to revenues associated with the sale of the organic biocides business in the first quarter of 1990.

Operating profit in the third quarter of 1990 was $1.2 million, compared with the $1.1 million reported in the same quarter last year. Lower raw material costs more than offset decreased revenues, leading to higher operating profits.

For the nine months ended Sept. 30, net revenues were $103.1 million, compared with $99.4 million reported for the first nine months of 1989. Operating profit was $5.3 million compared with $7.5 million last year.

Net income for the nine month period was $4.0 million compared with $4.1 million for the month period of 1989. The 1990 period included a gain of $1.8 million, net of taxes, on the sale of the company's organic biocides business.

On a per share basis (fully diluted) net income equalled 82 cents compared to 73 cents in the 1989 nine month period. Per share data is based on an average of 5,126,900 shares outstanding in the first nine months of 1990 and 5,908,800 shares in the nine months of 1989. The shares outstanding declined principally because of the company's stock buyback program. Between mid-February and early April the company repurchased one million shares.

Cambrex Corporation manufactures a broad line of specialty chemicals, fine chemicals and commodity chemical intermediates. The chemical families of castor oil, pyridine, organometallics, succinic anhydrides, organobromines and ammonia reaction chemistry are used by the company to produce compounds for

its five product categories: Urethane Systems and Additives, Coatings, Health and Cosmetic Products, Agricultural Chemical Intermediates, and Specialty and Fine Chemicals.

#90296p8164 10/23/1990 ~PR Newswire

DENVER (OCT. 23) PR NEWSWIRE - TSL Inc. (NASDAQ: TSLI) today announced that it has signed an agreement to acquire Linetec Inc., a privately held distributor of safety products to various industries, utility companies and government agencies. The acquisition of Linetec will be made as a stock transaction as part of TSL's acquisition of Regent Enterprises Inc. (OTC: RGTE).

The Linetec acquisition agreement calls for the exchange of 600,000 shares of TSL common stock for 100 percent of Linetec. The 600,000 shares of TSL are included in the 49 percent of TSL common stock required for the acquisition of Regent Enterprises. The closing of the Linetec transaction will be simultaneous with the acquisition of Regent.

Linetec consists of two divisions: an industrial safety products division and a snack food manufacturing and distribution division. The industrial safety division operates with a customer base of 750 distributors located throughout the United States, Canada and Puerto Rico. Linetec is expected to have sales in excess of $2.5 million in 1990. Due to an aggressive expansion program in its industrial safety division, which will add 12 new products in 1991 and increased activity in its snack foods division, sales for 1991 are projected to be in excess of $5 million. Linetec is located in St. Charles, Ill. and occupies 22,000 square feet of office and warehouse space, employing 24 personnel.

Linetec's chief products are Doublesafe(TM) and Alertine(TM) underground marking tapes. These unique products are color-coded tapes containing a metallic foil that are placed 4 to 6 inches above underground utility lines (gas, electric, water, sewer, cable television and telephone) so that they can be easily detected by crews at construction sites. It is estimated that only 5 percent of all such lines are currently being marked prior to digging, and that damage done to undetected lines run into millions of dollars annually.

Linetec also markets non-detectable underground marking tapes which are placed above buried utility lines, acting as a "stop-sign" for digging, and a full line of barricade safety tapes to warn of dangers or hazards.

Linetec products currently under development include flagging tape for surveyors, marketing flags, plastic safety and snow fencing, woven tapes and barricades. It is anticipated that as these products are introduced into the

marketplace, the number of distributors carrying Linetec products will increase considerably.

Based in Denver, TSL formulates and markets antitampering packaging technologies, under the trade name Tamper Safe(TM), for the pharmaceutical, food, cosmetic, security and packaging industries.

SAN JOSE, CALIF. (OCT. 23) PR NEWSWIRE - Cadence Design Systems Inc. (NYSE: CDN), a worldwide leader in electronic design automation (EDA) software, today announced a divisional reorganization, forming an Integrated Circuit Solutions Division and merging its Advanced CAE (ACAE) Division with its Systems Division to form an expanded Systems Solutions Division. In addition, the company also announced several executive staff reassignments to give greater corporate wide focus to Cadence's two primary market thrusts.

Prabhakar Goel, 42, has been named president of the Systems Solutions Division which now incorporates the former ACAE Division, based in Lowell, Mass. and the former Systems Division, based in Santa Clara, Calif. Goel, formerly president of the ACAE Division and founder of predecessor company Gateway Design Automation Corp., has moved to the company's San Jose corporate headquarters where he will oversee his expanded responsibilities. All former ACAE Division functions remain at the Lowell facility, including product marketing and development of the company's Verilog- and VHDL-related families of logic simulation tools. Goel continues to report to Cadence President and Chief Executive Officer Joseph B. Costello.

Michael D. Lack, 39, formerly head of the Systems Division, has been named president of the company's newly-formed Integrated Circuit Solutions Division, a business unit focused on the integrated circuit design automation market. Lack is credited with overseeing Cadence's development and introduction of the Amadeus(TM) Systems Design Series product family, the EDA industry's first top-down design automation toolset for systems-level design. Lack continues to report to Costello.

Tony Zingale, 34, has been promoted to vice president of corporate marketing, a position in which he will form an expanded corporate marketing group that will oversee all corporatewide marketing functions, including framework technology marketing, corporate business development, market research and corporate communications. Zingale, formerly vice president of Systems Division marketing, reports to Costello who continues as acting executive vice president of corporate marketing.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence, with offices throughout the United States, Europe and Asia, is headquartered in San Jose, and is traded on the NYSE under the symbol CDN.

Amadeus is a trademark of Cadence Design Systems Inc.

TORRANCE, CA (OCT. 23) PR NEWSWIRE - International Technology Corp. (NYSE: ITX) (IT) announced today results for the second quarter ended Sept. 30, 1990. Revenues for the quarter rose 41 percent to $100.6 million, compared with revenues of $71.4 million for the same quarter of the prior year. Net income for the quarter was $4.3 million, or $.13 per share, compared with $3.3 million, or $.10 per share, for the same period last year, reflecting an increase in net income of 30 percent.

For the six-month period ended Sept. 30, 1990, revenues rose 37 percent to $190.1 million, compared with $139.2 million for the same period of the prior year. Net income for the six-month period was $8.2 million, or $.25 per share compared with $5.5 million, or $.17 per share, for the same period last year, reflecting an increase in net income of 50 percent.

"Second quarter results reflect the continued strong demand for the company's services as the company exceeded the $100 million quarterly revenue level for the first time," said Murray H. Hutchison, chairman and chief executive officer.

International Technology Corp., based in Torrance, is a leading environmental management company providing services to government and industry. The company's common stock is traded on the New York Stock Exchange under the symbol ITX.

SAN DIEGO (OCT. 23) PR NEWSWIRE - Wavetek Corp. (NASDAQ: WVTK) today announced that preliminary results of operations for the fourth quarter ended Sept. 29, 1990, were sales of $20,399,000, compared to $21,048,000 for the quarter a year ago. A net loss of $1,240,000 or 14 cents per share is anticipated, compared to net income of $209,000 or two cents per share for the fourth quarter last year.

Sales for the fiscal year ended Sept. 29, 1990, were $90,605,000, compared to $85,190,000 for last year. Net income of $1,064,000 or 12 cents per share is anticipated for the year, compared to net income of $895,000 or 10 cents per share a year ago.

Fred Sehnert, president and chief executive officer, said, "Overall business conditions continued to be difficult through the fourth quarter. As a result of the decrease in new orders during the second half, it was necessary for the company to adjust expense and production levels during the quarter. The financial effects of these actions are included in the anticipated results of operations."

Audited results of operations for fiscal 1990 will be announced in mid-November.

Wavetek Corp., headquartered in San Diego with facilities and offices in California, Florida, Indiana, New York, West Germany, Hong Kong and the United Kingdom, produces a broad line of electronic test and measurement equipment and related products.

#90296p8169 10/23/1990 ~PR Newswire

PASADENA, CALIF (OCT. 23) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) announced today the receipt of a multi- million-dollar contract from BP Oil Co. to provide engineering, design, and procurement services in support of BP Oil's program to upgrade its petroleum refineries throughout the United States.

The announcement was made by Noel G. Watson, Jacobs' president and chief operating officer, who said that Jacobs will furnish engineering services over the next five years on a variety of petroleum-processing projects. The announcement did not provide the specific dollar value of the contract.

The projects will involve new installations as well as the revamping and modernizations of existing processing units at selected BP Oil refineries. BP Oil initiated the projects in order to comply with new regulations for diesel products and to position itself to respond to changing market demands.

"We are proud to be associated with BP Oil and see this new contract as a way of solidifying our working relationship with this important international company," said Watson. Jacobs has provided refinery maintenance and construction services at several BP installations for many years.

"This series of projects for BP Oil further enhances Jacobs' position as a leader in the refinery engineering field," Watson added.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural, construction, construction management and maintenance, and operations services to government and industry worldwide.

#90296p8172 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - Forstmann & Company, Inc. has extended until 5 p.m., New York City time, on Wednesday, Oct. 24, 1990, the expiration date, withdrawal rights and proration period relating to its exchange offer for up to $60 million aggregate principal amount of the $100 million outstanding of its 14-3/4 percent Senior Subordinated Notes due April 15, 1999 for an equal

principal amount of its new Split Coupon (Accrued Interest) Senior Subordinated Notes due April 15, 1999.

Forstmann's lenders have informed the company that there would be no future extensions of the company's credit facility, which expired on Oct. 22, 1990, unless a satisfactory agreement on a restructuring of Forstmann is reached between the company, its bank lenders and the holders of the Senior Subordinated Notes. Forstmann is continuing its discussions with representatives of a committee consisting of the holders of a majority of the Senior Subordinated Notes and representatives of Citibank, N.A. and the company's other lenders with respect to possible alternatives and amendments to the exchange offer, including a restructuring of the company.

Among the proposals currently being considered by all parties is a restructuring of Forstmann which would include, among other things, (i) the payment of the $7.375 million of interest on the Senior Subordinated Notes due on Oct. 15, 1990 upon consummation of the restructuring in the form of $5 million in cash and $3 million aggregate principal amount of new Senior Subordinated Notes which would be redeemable not later than 91 days after expiration of the company's new or extended credit facility; (ii) reducing the interest rate on the 14-3/4 percent Senior Subordinated Notes for the period from Oct. 16, 1990 to Oct. 15, 1992 to 6 percent per annum; (iii) the issuance of new Senior Convertible Preferred Stock with a liquidation preference of $17.5 million to holders of the 14-3/4 percent Senior Subordinated Notes; (iv) the exchange of the company's Senior Exchangeable Adjustable Rate Preferred Stock for a new Junior Convertible Preferred Stock; (v) the conversion of the Junior Convertible Preferred Stock of FI Holdings, Inc. held by Odyssey Partners, L.P. into common stock; (vi) the merger of FI Holdings, Inc., the parent of the company, with and into the company; and (vii) the suspension of the management fee payable by the company to an affiliate of Odyssey Partners until Oct. 15, 1993. The new Senior Convertible Preferred Stock and the new Junior Convertible Preferred Stock would be convertible into an aggregate of 45 percent of the common stock of the company on a fully diluted basis, with the remainder being owned by Odyssey Partners and management of the company. In addition, in order to facilitate the restructuring, Odyssey would provide a $3.5 million stand-by letter of credit, with terms to be negotiated, in favor of Citibank and the other lenders guaranteeing a portion of the extended bank facility. The company expects that consummation of the restructuring would be conditioned upon, among other things, the consent of holders of at least 95 percent of the outstanding Senior Subordinated Notes.

As of Oct. 22, 1990, approximately $145,000 in outstanding principal amount of 14-3/4 percent Senior Subordinated Notes had been tendered for exchange and not withdrawn.

#90296p8173 10/23/1990 ~PR Newswire

CHICAGO (OCT. 23) PR NEWSWIRE - The Quaker Oats Co. (NYSE: OAT) today reported earnings per share from continuing operations of 42 cents for the first quarter of fiscal 1991 ended Sept. 30, 1990, compared to 49 cents a year ago. Consolidated sales of $1.33 billion are 9 percent ahead of last year's $1.21 billion. Consolidated operating income of $89.3 million was 12 percent below the prior year's $101.4 million. Net income per share including discontinued operations was 42 cents compared to 70 cents a year ago.

Operating income for U.S. and Canadian Grocery Products was $75.9 million, or 21 percent above last year. The operating income improvement was driven by significantly improved margins due to lower commodity costs, as well as higher volumes. Sales of $949 million were 5 percent above a year ago. Overall unit volume was 1 percent above last year as increases in Gatorade, ready-to-eat cereals, Aunt Jemima products, and snacks more than offset a significant decline in Pet Foods and, to a lesser extent, Food Service. Despite the volume declines in Pet Foods and Food Service, operating income for both businesses was up for the quarter. Advertising and merchandising expenditures were $36 million above last year, and also higher as a percentage of sales reflecting higher planned support of Gatorade and cereals.

International Grocery Products Operating income in International Grocery Products was $13.4 million, or 65 percent below last year's $38.6 million. The decline in operating income was primarily due to increased marketing expenditures for the introduction of Gatorade thirst quencher in Germany and France and significantly lower sales and operating income in Brazil. Sales of $378 million were 21 percent above a year ago, due in part to stronger European currencies in relation to the U.S. dollar. Also contributing to the sales increase in the quarter were strong volume performances for Gatorade in Italy, pet foods and Gatorade in Germany, pet foods in the United Kingdom, and chocolate sales in Mexico. Overall unit volume for International Grocery Products was up 2 percent for the quarter.

Net financing costs (interest expense and foreign exchange) are $2.8 million lower than last year. Foreign exchange losses of $2.5 million are $7.7 million less than last year due mainly to lower devaluation of the local currency in Brazil. Interest expense of $23 million is $4.9 million above last year due primarily to higher overall debt levels related to common share repurchases during fiscal 1990.

In April 1990, the company announced its intention to spin off Fisher-Price to the company's shareholders, by the first quarter of calendar 1991. The proposed spin-off is subject to board of directors approval of the final terms and conditions. Accordingly, Fisher-Price has been accounted for as a discontinued operation for all periods presented. During fiscal 1990, the company recorded provisions for anticipated transaction expenses relating to

the planned spin-off, as well as projected operating losses (including allocated interest expense) through the expected completion date of the spin-off.

The average number of shares outstanding in the quarter was 75.6 million compared to 78.2 million last year.

The Quaker Oats Co. is an international marketer of foods, beverages and pet food.

#90296p8175 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - Chubb Corporation (NYSE: CB) today announced that net income for the nine months ended Sept. 30, 1990, was $367.2 million or $4.26 per share compared with $313.7 million or $3.69 per share for the like period of 1989. These amounts include realized investment gains after taxes of $24.2 million or $.28 per share in 1990 and $21.1 million or $.24 per share in 1989. Net income also includes tax benefits of $8.1 million or $.09 per share in 1990 and $14.4 million or $.17 per share in 1989 relating to the "fresh start" adjustment as a result of the Tax Reform Act of 1986.

Net income for the third quarter of 1990 was $145.3 million or $1.69 per share compared with $101.7 million or $1.18 per share for the third quarter of 1989. Net income for the quarter includes realized investment gains after taxes of $15.8 million or $.18 per share in 1990 and $9.3 million or $.10 per share in 1989. These quarterly amounts also include "fresh start" tax benefits of $2.7 million or $.03 per share in 1990 and $4.8 million or $.06 per share in 1989. Per share amounts have been retroactively adjusted to reflect the two-for-one stock split effective May 7, 1990.

Property and casualty underwriting loss after taxes amounted to $6.3 million for the first nine months of 1990 compared with $14.3 million in 1989. These underwriting results include the "fresh start" tax benefits. Net premiums written were $2.2 billion, an increase of 5.8 percent compared with 1989. The combined loss and expense ratio, after dividends to policyholders, was 100.5 percent for the first nine months of 1990 compared with 100.9 percent for 1989. The third quarter combined loss and expense ratio, after dividends to policyholders, was 98.2 percent in 1990 compared with 103.2 percent in 1989. Catastrophe losses for the first nine months of 1990 amounted to $26.1 million or 1.3 percentage points of the combined loss and expense ratio compared with $58.0 million or 2.9 percentage points in 1989. Catastrophe losses in the third quarter amounted to only $8.3 million which represented 1.2 percentage points of the combined loss and expense ratio for the quarter compared with $42.0 million or 6.3 percentage points in 1989.

Investment income after taxes, exclusive of life and health insurance operations, was $290.2 million for the first nine months of 1990 compared with $251.6 million in 1989, an increase of 15.3 percent.

Life and health insurance operations resulted in income after taxes of $34.4 million for the first nine months of 1990 compared with $30.9 million in 1989.

Real estate operations contributed income after taxes of $32.3 million for the first nine months of 1990 compared with $33.2 million in 1989.

#90296p8176 10/23/1990 ~PR Newswire

WATERTOWN, MASS. (OCT. 23) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ: BEAM), manufacturer and marketer of excimer laser systems for medical applications, today announced record revenues and earnings for the third quarter of 1990. For the three months ending Sept. 30, 1990, revenues were $3,777,876, an increase of 313 percent over revenues of $915,021 for the same period in 1989. Net income for the quarter was $231,319 or 2 cents per share, as compared to a net loss of $862,190 or 10 cents per share, for the corresponding quarter in the prior year.

For the nine months ending Sept. 30, 1990, revenues totaled $7,845,335, a 187 percent increase over the $2,729,812 reported during the corresponding period last year. Net loss for the nine months ended Sept. 30, 1990 was $865,950 or 7 cents per share as compared with $1,580,600 or 20 cents per share for the comparable period last year.

Summit attributes the increase in revenue to the continued strong demand from ophthalmologists for the ExciMed(tm) UV200 excimer laser. The increase in expenses is primarily due to the addition of personnel necessary to meet product sales demand. Summit forecasts revenue of $10 million-$12 million for fiscal year 1990 (ending Dec. 31) compared to revenue of $5.16 million in fiscal year 1989.

The ExciMed UV200 ophthalmic excimer laser system will be exhibited at the upcoming American Academy of Ophthalmology Meeting (AAO) in Atlanta, Ga., Oct. 28 - Nov. 1, 1990. The largest of all ophthalmology congresses, the AAO draws over 12,000 ophthalmologists from around the world. Excimer laser treatment for common vision disorders such as near-sightedness will be discussed by physician investigators who will be presenting their clinical data. There are over 700 opthalmologists pre-registered for a Summit sponsored breakfast meeting on excimers Wednesday, Oct. 31.

Summit Technology, Inc. has established a leadership position in designing,

manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism, and superficial diseases of the cornea. Summit has received six Investigational Device Exemption approvals from the F.D.A. for clinical trials with its excimer laser systems. To date, the Summit Technology ExciMed UV200 excimer laser system has been used to treat approximately 900 patients in ophthalmology clinical trials at 20 domestic and 40 international sites.

PASADENA, CALIF. (OCT. 23) PR NEWSWIRE - Countrywide Mortgage Investments, Inc. (NYSE: CWM) today announced unaudited earnings of $2,385,000, or $.17 per share, based on 13,645,000 weighted average shares outstanding, for the third quarter ended Sept. 30, 1990.

In addition, the company's board of directors declared a cash dividend of $.17 per share for the quarter, payable Nov. 20, 1990 to shareholders of record on Nov. 2, 1990.

For the comparable year-ago quarter, net earnings were $1,908,000, or $.14 per share, based on 13,645,000 weighted average shares outstanding, and a cash dividend of $.14 per share was paid.

For the second quarter ended June 30, 1990, earnings were $2,263,000, or $.17 per share. A cash dividend of $.17 was paid for this quarter.

For the nine months ended Sept. 30, 1990, Countrywide Mortgage reported net earnings of $7,002,000, or $.51 per share, based on 13,645,000 weighted average shares outstanding. For the comparable period last year, net earnings were $6,469,000 or $.48 per share.

Countrywide Mortgage Investments, Inc., a real estate investment trust, invests in fixed- and adjustable-rate, single-family, first-lien residential mortgages, mortgage securities and other related investments. Countrywide Mortgage was sponsored by Countrywide Credit Industries, Inc. (NYSE: CCR), which, through its subsidiaries, Countrywide Asset Management and Countrywide Funding Corporation, provides management services and a source of mortgage investments.

ST. PETERSBURG, FL (OCT. 23) PR NEWSWIRE - Security Tag Systems, Inc. (NASDAQ: STAG), today reported continued sales growth for the second quarter and first half of fiscal year 1991 ended Sept. 30, with profits rising to $533,418 for the quarter, and $1,001,829 for the six-month period.

Carter W. Clarke Jr., president and chief executive officer of Security Tag Systems, stated, "Both sales and profits were significantly higher than last year. While the company did get an added boost in profits from the completion of the sale of its position in Securitag International, Ltd., it is encouraging to experience these continuing upward trends during this period of economic uncertainty. A contributing factor has been our Inktag(TM) sales, which continue to be strong. The company's market leadership with this product has greatly enhanced our stature within the retail industry.

"It still looks as if Security Tag Systems is going to have a banner year as far as revenues are concerned, and it appears that we will end the year with profits greater than those of last year."

Security Tag Systems, Inc., develops, manufactures and markets electronic detection systems for retail, business, industrial and military markets.

LAWRENCEVILLE, NJ (OCT. 23) PR NEWSWIRE - American Reliance Group Inc., a regional insurance holding company, began trading 2,549,420 common shares on the American Stock Exchange today under the ticker symbol ARI.

American Reliance Group previously traded in the NASDAQ National Market System under the symbol ARIG.

American Reliance Group, together with American Reliance Insurance Company, which owns 66 percent of the holding company, specializes in providing coverage for small and medium size businesses and for individuals in rural and suburban locations. These products include commercial multiple peril, farmowner, workers' compensation, automobile, fire and allied lines, inland marine, homeowner, tenant, condominium, and general and excess liability insurance.

American Reliance Group and American Reliance Insurance Company market insurance coverage through independent insurance agencies for customers in New Jersey, Florida, Pennsylvania, Delaware, Indiana, Maryland and Virginia.

American Reliance Group reported net income of $5,099,000 or $2.00 per share on revenues of $62,608,000 for the nine months ended Sept. 30, 1990, compared with net income of $4,581,000 or $1.80 per share on revenues of $52,536,000 for the comparable periods in 1989.

IRVINE, CALIF. (OCT. 23) PR NEWSWIRE - Gateway Communications Inc. (NASDAQ-NMS: GWAY) announced today the results of operations for the third

quarter ended Sept. 30, 1990. For the three months ended Sept. 30, 1990, the company reported a 10 percent increase in net income which amounted to $365,000 or $0.08 per share on total revenues of $7,019,000. In the comparable 1989 period, net income was $332,000, or $0.07 per share on total revenues of $6,904,000.

For the nine months ended Sept. 30, the company reported net income of $167,000, or $0.04 per share on total revenues of $18,653,000. Net income for the comparable period in 1989 was $756,000, or $0.17 per share on total revenues of $19,679,000.

David S. McMaster, president and chief executive officer of Gateway Communications announced that, "Third quarter 1990 revenues were the highest in the company's history.

"The nine month results for 1990 compared to 1989 were adversely affected by a net loss in the first quarter, largely affected by our decision to liquidate our Australian subsidiary, and lower revenues and net income in the second quarter," he said. "I am therefore extremely pleased with the third quarter results.

"We have experienced strong demand for the company's products worldwide as evidenced by this record quarter in sales," McMaster said. "In addition, we anticipate increasing our visibility in the USSR and East bloc countries as these emerging markets continue to open."

Formed in 1981, Gateway Communications Inc. is a major supplier of award-winning networking and communications products for the IBM PC market. Gateway products are sold in more than 70 countries worldwide. Corporate and international headquarters are located at 2941 Alton Ave., Irvine, CA 92714; telephone: 714-553-1555; fax: 714-553-1616.

#90296p8182 10/23/1990 ~PR Newswire

TROY, MI (OCT. 23) PR NEWSWIRE - VOPLEX Corporation (AMEX: VOT) today announced a third-quarter loss of $2,303,344 or $.86 per share on sales of $12,006,022 compared to a loss of $570,882 or $.21 per share on sales of $15,815,804 a year ago.

The 24-percent sales decline, in what is a traditionally soft quarter in the automotive industry, was cited as the major factor contributing to the loss. Even in this period of decline, the company is absorbing costs required to support new business being introduced next year. In addition, the company charged off expenses related to a joint venture investigation which was

terminated in September.

The current slowdown in the auto industry also affected the company's joint venture in Canada, increasing the losses by $307,000 from the same period in 1989.

Despite the reported results, the company continues to maintain a strong balance sheet and make improvements in its working capital.

The board of directors suspended payment of a regular quarterly dividend for an unspecified period of time in order to preserve cash for capital expenditures required to support its strategic plan to grow the business and to support new business that has been acquired.

VOPLEX is a Troy-based supplier to the automotive industry that designs, engineers and manufactures interior trim components, modules and systems for the automotive industry as well as supplying blow molded products to the packaging industry.

#90296p8185 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - RJR Nabisco Holdings Corp. today reported significantly higher third quarter 1990 results.

Business unit contribution (operating income before amortization of trademarks and goodwill) rose 42 percent from the third quarter last year, to $857 million from $604 million. Operating income was $706 million, or 56 percent

higher than operating income of $452 million a year ago. Consolidated net sales in the quarter were $3.53 billion, 18 percent higher than net sales of $3.00 billion last year.

The company reported free cash flow, excluding divestiture proceeds, of $886 million in the quarter.

A number of special items complicate third quarter comparisons: The company reduced domestic tobacco shipments last year to eliminate excess trade inventory; domestic tobacco marketing expenditures were significantly higher in 1990; and several food businesses were sold since the third quarter last year.

RJR Nabisco Chairman and Chief Executive Officer Louis V. Gerstner Jr. said the quarter's results reflected the company's continuing strong operating performance.

The company reported an 81 percent reduction in its third quarter net loss, to an $86 million net loss from a $447 million net loss a year ago. The third quarter 1990 net loss reflects charges of $507 million (pre-tax) for non-cash interest primarily related to RJR Nabisco's leveraged buy-out in 1989 as well as $303 million (pre-tax) of other non-cash charges, including amortization of intangibles and depreciation. The net loss also includes a $108 million extraordinary gain primarily from open market purchases of the exchange debentures of RJR Nabisco Holdings Group Inc., as part of a recapitalization program announced in July.

For the first nine months of 1990, business unit contribution of $2.50 billion was 37 percent higher than the $1.82 billion reported last year. Operating income was $2.04 billion, 46 percent higher than the $1.40 billion reported a year ago. Free cash flow, excluding divestiture proceeds, for the first nine months of 1990 was $2.08 billion. Consolidated net sales of $10.19 billion were 10 percent higher than $9.23 billion reported last year. The year-to-date net loss was reduced 59 percent to $416 million from a net loss of $1.01 billion for the first nine months of 1989.

#90296p8187 10/23/1990 ~PR Newswire

GRAND RAPIDS, MI (OCT. 23) PR NEWSWIRE - An increase in mobile home written premium and an increase in corporate net income results for the third quarter, were reported today by Foremost Corporation of America (NASDAQ: FCOA).

Third-quarter net income from FCOA's continuing operations was $.45 per share, up from the $.08 per share reported during the same quarter last year. The

net income, from continuing operations, for the first nine months of the year was $1.29 per share compared with $1.43 per share last year.

During the third quarter mobile home written premium, the major line of FCOA's insurance subsidiaries, increased 18 percent. This continues a strong trend established earlier in the year.

Severe storms, too small to be considered catastrophes, but serious enough to cause significant damage in much of the United States pushed up the combined loss and expense ratio. The ratio for the property casualty group, before catastrophe losses, was 98 percent compared with the 94.3 percent reported during the same quarter in 1989. Catastrophes in the third quarter added only 2.4 points to the combined ratio compared with 18.9 points added in 1989. For the nine months of 1990, the non-catastrophe combined loss and expense ratio was 96.0 percent compared to 94.2 percent in 1989.

In other lines: -- Written premium for recreational vehicle products is up 2 percent over last year's third quarter.

-- Automobile policies in force have declined significantly as part of a plan to lower our writings in this line.

-- After-tax investment income dropped 8 percent compared with last year's third quarter and 5 percent for the year. The drop is due to a smaller investment base.

-- Litigation involving insurance issued in 1985 by Foremost Guaranty Corporation, a subsidiary sold in 1988, was settled for approximately $2 million, after tax. The trial court ruling, in favor of Foremost, was recently overturned upon appeal.

Foremost Corporation of America and its subsidiaries primarily provide manufactured home and recreational vehicle insurance.

#90296p8188 10/23/1990 ~PR Newswire

LAKE SUCCESS, N.Y. (OCT. 23) PR NEWSWIRE - Tambrands Inc. (NYSE: TMB) reported today that net earnings in the third quarter and the first nine months of 1990 reached record highs.

Net earnings for the quarter ended Sept. 30, 1990 increased to $25,890,000 over third-quarter 1989 earnings of $16,567,000, which included a one-time charge of $5,026,000 ($0.22 per share).

Earnings per share increased to $1.22 in the third quarter of 1990, up from earnings per share of $0.74 in the same period of 1989. Net sales for the third quarter of 1990 were $152,119,000, compared to net sales of $153,214,000 in the third quarter of 1989.

Tambrands' Chairman, President and Chief Executive Officer, Martin F.C. Emmett said, "We are pleased to have achieved record earnings for the third quarter and the year to date. The success of our strategy of focusing on the Tampax tampon business should provide a sound basis for future growth as well."

Tambrands' record earnings in the third quarter resulted from strong performance in international operations, including improved shipments in Europe and favorable foreign exchange rates; and the positive effects of the restructuring program announced by Tambrands in December 1989, which included workforce reductions and the sale of businesses unrelated to the worldwide Tampax tampon franchise. Sales in the third quarter of 1990 were slightly lower than in the comparable period last year because of the divestitures of Tambrands' diagnostics and cosmetics businesses and the program to reduce promotional discounts in the United States and sell only to replenish consumption.

Earnings for the nine months ended Sept. 30, 1990 also set a company record for the period, again showing the positive results of Tambrands' restructuring program. Earnings increased to $79,727,000 from $60,751,000 for the

comparable period last year. Earnings per share increased to $3.72 from $2.72 for the first nine months of 1989. Net sales were $480,651,000 for the nine months ended Sept. 30, 1990, compared to $449,257,000 for the comparable period in 1989.

Earnings per share increased at a greater rate than net earnings in the third quarter and the first nine months of 1990 because there were fewer shares outstanding than in the comparable periods of 1989.

Tambrands is an international manufacturer and marketer of personal care products, including Tampax(R) tampons and Maxithins(R) sanitary pads.

NEW YORK (OCT. 23) PR NEWSWIRE - Culbro Corporation (NYSE: CUC) announced today that it planned to offer for sale the plastics injection molding business conducted by its subsidiary Moll Tool & Plastics Corp. (MTP). MTP has plants in Fort Smith, Ark., and La Vergne, Tenn., and a technology and sales center in Evansville, Ind. MTP manufactures components for major home appliances (principally refrigerators, air conditioning and heating units), housings for business machines and automotive parts. The unit, which is part of Culbro's Industrial Products Group, had sales of approximately $33,500,000 in 1989 which accounted for less than 4 percent of Culbro's consolidated sales.

Culbro selected Chemical Bank Investment Banking to conduct the sale. Inquiries should be made to Carroll Wetzel, Jr., managing director, Chemical Bank Investment Banking (212-310-7783).

Culbro Corporation is a diversified organization with interests in cigars, wholesale distribution of tobacco and sundry consumer products, industrial
